Excellent accommodation for first-class passengers.

For Freight or Passage apply to NORRIS and JOYNER, 60, Cornhill, E.C.

Steam via the Suez Canal.

TO PENANG, SINGAPORE, HONG KONG, and SHANGHAI, taking cargo for transhipment to Java, Japan, &c., at through rates at shippers' risk. Last shipping day 28th August. The favourite full-powered screw steamer CANTON, 100 A1, 1,215 tons register, 200 h.p. nominal; J. C. JAQUBS, Commander; South West India Docks. This magnificent steamer, built last year by Messrs. C. Mitchell and Co., Walker-on-Tyne, expressly for the China trade, has proved herself one of the fastest in the trade. Has splendid accommodation for first-class passengers.

For Freight or Passage apply to the owners, WATTS, MILBURN, and Co., 85, Gracechurch-street, E.C.; or to NORRIS and JOYNER, 60, Cornhill, E.C.

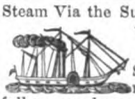
All packages must be marked distinctly with port of destination.

CASTLE LINE OF STEAM PACKETS for PENANG, SINGAPORE, HONG KONG, SHANGHAI, JAVA, and JAPAN.—The following high-classed and full-powered STEAMSHIPS will be despatched as under:—

Steamer.	Class.	Tons.	Dock.	Last shipping day.
Glengyle	100 A1	1,670	SWID	Aug. 30
Drummond Castle	100 A1	1,930	SWID	To follow
Glenlyon	100 A1	2,200	SWID	To follow

For Freight and Passage, apply to THOMAS SKINNER and Co., 5, East India-avenue, E.C.

Steam Via the Suez Canal. To sail on the 10th Sept.



FOR PENANG, SINGAPORE, HONG KONG, and SHANGHAI, taking goods at through rates for Java and Japan, the splendid full-powered screw steamer LORD OF THE ISLES, 100 A1, 1846 tons register, 240-horse power nominal, JAMES BLOW, Commander; South West India Docks. Has elegant accommodation for first-class passengers, including cabin fittings, bedding, and linen.

For Freight or Passage apply to SHAW, MAXTON, and Co., 2, Royal Exchange Buildings, London, E.C.

With quick despatch.

FOR HONG KONG, direct, the splendid clipper ship, NYASSA, A1 10 years. 800 tons register; W. S. GARRICK, Commander; East India Docks.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

STEAM to BANGKOK (Crossing the Bar.)

Via the Suez Canal, with all possible despatch, calling at Tanjong Pagar Wharf, Singapore, the new, powerful, first-class screw steamer KROMATAH, 805 tons, 150-horse power, nominal, W. B. HAFFENDEN, Commander; South West India Docks. Splendid accommodation for passengers.

For Freight, Passage, or further particulars apply to SMITH, SON, and COLE, 12 George-yard, Lombard-street, London, E.C.

THE MAILS, &c.

The P. and O. mail, with dates as above, was delivered, *via* Brindisi, this morning, its due date. The next inward (French) mail, with dates Yokohama July 17, Shanghai, July 21, Hong Kong July 27, Singapore Aug. 5, is due, *via* Marseilles, on Monday next, the 9th inst.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, four to five hours in transmission. Telegraphic communication between Shanghai and Nagasaki is interrupted.

List of Passengers.

PASSENGERS INWARD.

By this mail to Venice, per P. and O. steamer *Mooltan*, arrived Sept. 1.—To Venice and Brindisi: From Hong Kong: Mr. and Mrs. Sterry, Mr. Boniface. From Singapore: Mr. Giveri.

To Southampton, per P. and O. steamer *Ceylon*, expected to arrive Sept. 8.—From Shanghai: Mr. I. Roberts. From Singapore: Mrs. Weymouth and child, Mr. D. Deans.

To Gibraltar.—From Singapore: Don F. de la Coucha and three second class passengers.

By the Pacific mail steamer *Japan*, from Yokohama and Hong Kong, arrived at San Francisco Aug. 14.—For New York: F. G. Heron, Rupert Smith, William Lane, Capt. Percival, and J. M. Coulter. For Chicago: H. Muller and child, C. Gaerte and two children. For Philadelphia: Mrs. F. H. B. Jenkins. For Europe: De Bien Antonio, Vogel Marger, Jules Geetzal, Albert José Mury, daughter, two nephews, and servant, and J. Ross.

PASSENGERS OUTWARD.

Per French mail steamer *Le Sindh*, from Marseilles, Sept. 1 (booked from London).—To Yokohama: Mr. Peltzer. To Shanghai: Mr. Forrest, wife, family, and servant, Mr. and Mrs. Blair. To Hong Kong: Mr. and Mrs. Newton, Mr. Julian Pauncefote, Mr. B. Pauncefote. To Singapore: Miss Strickland Mr. Dreypus, Mr. Menzaleh. To Batavia: Mr. Laguir.

Per French mail steamer *Provence*, from Marseilles, Sept. 15 (booked from London).—To Hong Kong: Mr. Hams. To Shanghai: Mr. and Mrs. John Bradford. To Batavia: Mr. Arntrenius.

Per French mail steamer *Tigre*, from Marseilles, Sept. 29 (booked from London).—To Yokohama: Mr. Fraissinet. To Shanghai: Mr. and Mrs. J. Bradfield. To Singapore: Mr. and Mrs. Burn and one second-class passenger.

Per French mail steamer *Hoogly*, from Marseilles, Oct 13 (booked from London).—To Shanghai: Mr. and Mrs. Medhurst and child. To Galle: Mr. A. S. Daniell, Mr. S. W. Daniell.

Per P. and O. steamer *Hindostan*, from Southampton, Aug. 29.—To Yokohama: Mr. Klasen. To Shanghai: Mr. G. M. W. Playfair, Mr. W. Holland, Mr. M. F. A. Fraser. To Singapore: Mr. G. Magalkarn, Mr. Nai Bin Surrawongse. To Ceylon: Miss Lloyd.

Per P. and O. steamer *Mooltan*, from Brindisi, Sept. 9.—To Yokohama: Mr W. Gowland. To Hong Kong: Mr. E. H. Lovers, Mr. G. Harleman. To Galle Mr. G. R. and Mrs. Scott.

Per P. and O. steamer *Pekin*, from Southampton, Sept. 12.—To Yokohama: Mr. and Mrs. Cheesman. To Ceylon: Mr. W. Moss, Mr. McGregor, Mrs. Puckle and child.

Per P. and O. steamer *Candia*, from Brindisi, Sept. 23.—To Hong Kong: Mr. and Mrs. Hase. To Ceylon: Mr. D. Blyth.

Per P. and O. steamer from Suez, Sept. 27.—To Shanghai: Mr. F. E. Woodruffe.

Per P. and O. steamer *Massilia*, from Southampton, Sept. 26.—To Hong Kong: Mrs. Andrews. To Singapore: Rev. H. Francis.

Per P. and O. steamer *Malta*, from Brindisi, Oct. 7.—To Yokohama: Mr. Short.

Per P. and O. steamer from Southampton, Oct. 10.—To Hong Kong: Miss Simpson. To Singapore: Mrs. Trotter.

Per P. and O. steamer from Venice, Oct. 18.—To Penang: Mr., Mrs., and Miss Vermont.

Per P. and O. steamer from Brindisi, Oct. 21.—To Yokohama: Mrs. Marshall. To Hong Kong: Mr. C. A. Sinclair, Mr. M. Murray. To Singapore: Capt. and Mrs. Caldbeck.

Per P. and O. steamer from Southampton, Oct. 24.—To Hong Kong: Mr. H. H. Thornton, Mr. J. Alexander.

Per steamer *Patroclus* (Holt's Line), from Liverpool, Aug. 24.—For Singapore: Miss Deichmann and lady friend. For Hong Kong: Mr. T. W. Barrington. For Shanghai: Mr. Tramnack, Mr. Kofod and two children, Miss A. Lamont, and Mrs. Gordon, two children, and nurse.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present—P. and O.—mail brings advices to the 10th July, only three days later than those previously to hand. The Pacific mail steamer, with dates from this port to the 22nd July, arrived at San Francisco on the 14th ult., and the following items of news have been telegraphed to the New York press :—

The Mikado continues his visits to the several shrines at Kioto, his former residence, Osaka and Hiogo, and is now on his way to Nagasaki. His Majesty dresses in a foreign style, with an ample supply of gold braid, and has several attendants, who are similarly attired. The Mikado is accompanied on his trip by eight men of-war.

Much comment has been made on a letter from Korea which has been received by the Mikado. Korea spurns the Japanese demand for tribute, and offers to fight at any moment, and even threatens to attack Japan. The letter of the Mikado, on assuming power in Japan, to the Koreans, demanding tribute, was torn up and scattered with contempt. One of the Ambassadors of Japan was imprisoned and the other sent back to convey the threats of the Koreans and their contempt for the new rule.

Foreigners complain that had the Japanese been friendly disposed towards the United States they would have informed the Americans of the state of affairs in Korea, and thus have avoided a defeat of America's intentions there.

The fares on the railway to Yedo have been reduced, and the amount of travel has been increased largely.

A brisk demand for Tea has sprung up since the last mail, with advancing rates. The stock of Silk is increasing, and the quality is very good, at fully $30 per picul over last year's rates. The settlements have been 750 bales since the last mail.

CHINA.

—o—

SHANGHAI.

The present mail brings dates to the 14th July. The outward French mail of May 24th was received on the 8th, and the following P. and O. mail of May 31 on the 10th July; the last named mail was only forty-one days in transit from London, stated to be the shortest time on record. The *Courier* contains the following items of news:—

By the Pacific Mail steamer which left on the 12th July Sir Edmund Hornby and Lady Hornby started for Japan. It is said that they will take Kioto in their route. It is just possible the Exhibition may be closed ere they arrive there; but the city itself is the grandest exhibition. Besides, it may just happen that their visit may take place at the same time as the Mikado on his tour arrives at the Sacred City of his race and Empire. C. W. Goodwin, Esq., Assistant Judge of H.B.M. Supreme Court, and his family, have left for England per steamer *Ulysses*. In the course of one day this week three deaths have occurred through unwise exposure to the heat. The heat was so intense at the bottom of Old Dock that three of the Chinese mechanics at work on H.M.S. *Ringdove* became insensible. Removal to an airy spot and free drenching with cold water were effectual in reviving them.

We have already mentioned the undocking of the *Ulysses*, which vessel, it will be remembered, came in contact with some obstruction under water, which some supposed at the time must be the wreck of the *Rona*, or of some other vessel. As soon as she was docked it became evident that the damage was by no means confined to the rudder, and was of such a nature as could not be accounted for by contact with any floating object. The keel was found to be broken in six different places; the plates forward and amidships very much bilged and broken in several places; the whole presenting an appearance which made it almost certain that she had grazed some sunken rock, the rise and fall of the waves on which would account for the successive bumps the ship had suffered. A large portion of her upper quarter was also broken by the working of her jury-rudder. The work of repairing could not have been done more effectively in any part of Great Britain. The new rudder stands thirty-three feet high from socket to deck, and weighs more than four tons. The total weight of iron replaced during the entire repairs may be stated approximately at 27,000 lbs.

A serious stabbing case has occurred on board a Norwegian vessel. A man named William Taylor, a Norwegian, employed on the American ship *Wildwood*, was on board the *Gunyner*. Some dispute arose, and Taylor drew a knife, with which he menaced some of those near him. A man named Thorjoren Lorensen gave him a slight push, and a scuffle ensued, in which Taylor fell under the other man, and, it is alleged, while clasping him, stabbed him thrice in the back and once under the left arm, besides giving him a deep cut in the leg and marking his temples and knee. Lorensen was removed to hospital, and though his wounds are severe he is expected to recover. The case is under investigation.

A Chinkiang correspondent writes as follows:—Nothing special to note here, but the continued increase of trade and the prospect of still more, on account of the blundering policy of distinction enforced in the Transit Pass trade by the Taoutai of Kiukiang, which only adds to the import sent inland from this port. The transit question is at last settled for a time by the Taoutai's entirely yielding the point, by direction of the Viceroy at Nankin, and issuing outward passes as heretofore. The Taoutai tried to stop after he had commenced issuing the passes; but the refusal of the U.S Consul, Col. Flint, to even entertain the question, soon caused him to yield. Several missionaries leave for England,—Rev. Mr. Judd and wife, also Mr. Harvey.

The second concert of the Wind Instrument Society has taken place in the public garden. The attendance was even larger, and the music more effective than last time, being considerably assisted by some Italian bandsmen from the United States *Saco*. The Taoutai honoured the gathering by his presence, and expressed himself much pleased.

The steamship *Craigforth* has been two days at the "shears" at Old Dock, discharging five large Krupp guns, which, we understand, are to be sent on to Tientsin for the armament of some of the new forts on the river Peiho.

HONG KONG.

The dates extend to 20th July. The outward mail of 7th June (French) arrived on the 16th July:—

The *China Mail*, on the question of a Mint for China, says:—

The chief obstacles to the successful introduction of a silver coinage into general use in China are two-fold—the excessive cheapness of labour, and the small value placed on time. Now, if we reflect a moment upon the fact that every sovereign, shilling, or dollar is actually worth so many cents less than the value we agree to attach to it, it will be evident to the least reflective that we pay so much upon each coin for the convenience of having our bullion in a certain shape. This argument would be more obvious if the wealth of every well-to-do man at home consisted, like that of the Chinese of similar grade, chiefly of bullion, to convert which into coin required the payment—that is the loss—of so much on each coin. We believe that the intrinsic value of the Mexican by the standard of gold is 95 cents, although some dollars are worth only 91. To turn bullion into coin would therefore require an expenditure of five (5) cents on every dollar. The amount matters little; assume it to be two cents, and the argument is the same. Something has to be paid. Now, the average foreigner (to whom both time and labour are money) is content to pay this percentage—the more so as he does not see how he pays it—in order to avoid the expenditure of some five minutes' time, and a little muscular exertion, such as would be necessary every time he paid away a dollar if he had to chop it off a lump of silver. But the Chinaman is not willing to pay the five or more cents (say from 65 to 117 cash) in order to be saved the same time and labour. On the contrary, he could get a skilled artizan to work, not for five minutes, but for two whole hours for the five or more cents in question. He is not therefore disposed to pay that amount to be saved five minutes' trouble. Hence he prefers bullion to coin, unless he gets the latter as cheap as the former.

The *Gazette* contains the Report of the Superintendent of Fire Brigade for June, which seems satisfactory. We hope, however, that the energetic official in question will not rest until he has satisfactorily arranged a system of alarms, so as to indicate with tolerable precision the district and locality in which a fire breaks out. True, we have had no bad fires lately. But good as are our engines and brigades, we have some doubts whether, if a fire broke out in the upper part of Taipingshan, it would not make considerable headway before the former could be got into efficient position for pumping on it. In such an event a prompt notification of the place where the fire had broken out would very possibly save a large amount of property. The *Gazette* also notifies that Mr. James Whittall has been appointed a member of the Legislative Council, in place of the Hon. Mr. Keswick, resigned.

The following is the account, duly certified, of the average amount of Bank notes in circulation in Hong Kong during the month ending June, 1872:—

Banks.	Average Amount.	Specie in Reserve.
Oriental	$545,248	$250,000
Chartered Mercantile of India, London, and China	401,275	150,000
Chartered of India, Australia, and China	464,913	160,000
Hong Kong and Shanghai ...	1,131,805	500,000
Total	$2,543,241	$1,060,000

A vote of $770 for printing the library catalogues and binding the books still requiring it has been granted by the Legislative Council to the City-hall. The public will thus be able to ascertain the contents of this really valuable collection of books, which will then become of extensive use.

His Majesty the King of Cambodia made his official landing on the 15th. A guard of honour was formed at the Government wharf, and as his Majesty landed the band played, while a Royal salute was fired from the battery. The Hon. C. C. Smith was at the wharf to receive the King, who was conveyed in the Government reception chair to the Government House, accompanied by the Acting Colonial Secretary and several French officers. None of his Majesty's suite followed. His Majesty will visit Canton, Macao, Manila and Batavia before returning to his dominions. His Majesty has invested some $6,000 to $7,000 in jewellery, &c., at Messrs. G. Falconer and Co.'s establishment.

The King's appearance is neither prepossessing, nor the reverse. He wears, on ordinary occasions, no insignia in rank, and was in fact quite overlooked by those who boarded the *Bourayne* until pointed out to them. Slender, and of middle height, he looks much like a Malay, nor in his every-day dress does he appear in any way remarkable. His brothers are all dressed alike, and are much of the same stamp. As the tailor, to a great extent, makes the man, however, in other parts of the world than Europe, his Majesty and suite may seem to greater advantage when dressed in their robes of ceremony. The *Princess Charlotte* saluted the Cambojan flag shortly after the *Bourayne's* arrival.

The Spanish steamer *Rosita y Nini* (late *Veaus*), which sailed for Macao, has been laid on there to take coolies to Havana—some 800 it is said. If this be true it is to be hoped that the necessary alterations will be made as regards the ventilation of her lower deck, as should she leave Macao in the same condition as that in which she left Hong Kong the unfortunate cargo are likely to be decimated by suffocation.

HONG KONG, CANTON, AND MACAO STEAMBOAT COMPANY (LIMITED).

The ordinary half-yearly meeting of the shareholders in the above company was held at the General Agents' Office on 17th July. Present:—Viscount Do Cercal (in the chair), Messrs. Hitchcock, Dixwell, R. Deacon, Gillson, Sage, Sherwood, Head, Wicking, Dolan, Steel, Sands, Notley, Francis, Hunter, Dr. Dantra, Dr. Adams, Hon. J. Greig, and Messrs. Arnold and Da Costa.

The following report was taken as read:—

The Board of Directors take pleasure in submitting to you their report upon the affairs of the company for the half-year ending June 30, 1872.

Digitized by Google

The accounts presented herewith show that, after paying commissions, running expenses, salaries, premia of insurance, a heavy amount for repairs and all other outgoings to 30th June, and including $4,448.12 brought forward from the last statement, there remains a profit of $71,622.78. The directors recommend that this amount should be distributed as follows, viz.: to the repairs of the *Kin Shan* $15,000, to a dividend at the rate of 8 per cent. on the paid up capital, $48,000; and to their own remuneration $2,500; leaving $6,122 78 to be carried forward to a new account.

At the meeting the Chairman—Viscount do Cercal—stated that shareholders were fully aware of the object of the meeting, and they had doubtless all seen the accounts, &c. He would be glad to reply to any questions put. Mr. Francis asked why the Company had invested in a share in the Whampoa Dock Company's stock? The chairman replied that hitherto, though large contributors of business to the Dock Company, they had as yet received no bonus; and by purchasing a share in the company they, as shareholders, became entitled to a slice of the bonus to contributors. Mr. Francis next inquired whether any bonus had been received from the Insurance Companies? The chairman, in reply, stated that they had not thus far, but had been talking over it; and in consideration of the large bonus now given the directors had resolved to take action and obtain has much as possible in return for their business. The reports and accounts were then passed unanimously. Mr. Hitchcock next proposed that the action of the directors be confirmed in regard to the purchase of the Dock Company share, and that the directors be empowered to purchase one share in such limited companies as they thought advisable. Mr. Francis seconded this proposition, which was carried unanimously. In place of Mr. Hart, who has gone home. Mr. Thurburn was elected auditor; and Mr. Blakeman was re-elected to the same office. The proceedings were then closed with the usual vote of thanks.

During the period under review the repairs of the *Kiu Kiang* and *White Cloud* have been completed, and considerable improvements and repairs have been made upon the *Spec*, now called the *Fei Wan*, and the *Spark*. The gross earnings, excluding the Canton and Macao line, show an increase of $7,000 on the corresponding period of 1871. The Canton and Macao line shows a gross of $42,038.23 against $25,701.82 for the previous six months.

The new iron steamer is spoken of very favourably by parties who have seen her on the stocks, but owing to the great pressure upon all builders in Great Britain, it is feared that she will not be finished as soon as was originally hoped. The hull of the *Kin Shan* has now to be almost entirely rebuilt at a considerable expense: which however the directors think will be fully met by current earnings and the $15,000 from the past half year's now proposed to be set aside for that purpose.

Mr. R. Deacon retires from the direction, but offers himself for re-election. The accounts have been audited by Mr. J. Hart and Mr. J. Thurburn, whom the directors appointed in the absence of Mr. A. N. Blakeman. As Mr. Hart is going home, and will not be re-eligible, Mr. Blakeman and Mr. Thurburn offer themselves as auditors for the ensuing year.

(FROM A CORRESPONDENT.)

HONG KONG, July 20, 1872.

The most important event of the fortnight has been the arrival of the King of Cambodia, who appears to have been let out for a run by his French protectors (?) at Saigon. He came up a few days ago in the French corvette *Bouraye*, and has been hurrying ever since. There is evidently a charm in the word "king," even though his kingship be, as in this case, copper-coloured, squab, and ugly. The attendance at the public gardens and at Lady Kennedy's Tuesday afternoon receptions has vastly increased during the week, in consequence of his Majesty's presence. He is about to leave for Canton and Macao shortly, and it is hoped will have the courage to give Viscount San Jannario a bit of his mind about the Annamese kidnapping, which still flourishes under the protecting *Ægis* of the "most holy city." Of course it is all done by native junks, and the flag of Portugal is not ostensibly used to cover the rascals' proceedings. But the junks are outfitted at Macao and return thither with their ill-gotten cargoes. We don't hear much of it publicly now-a-days. The officials call it "free immigration," and it is very hard to prove piracy when the sufferers are unable to speak either Cantonese or English, or any other language save their own, and a whole city conspires to say "it's all right."

Locally we have not much other news. Mr. Whittall got the vacant seat in the Legislative Council. Mr. Whittall knows the work well, and has always been outspoken, so that on the whole people are satisfied. There is a little more legislation going on now than was the case in Sir Richard MacDonnell's time. Sir Arthur Kennedy does not appear to think that snubbing the independent members is a necessary part of his daily work, and there is much less grumbling going on in consequence. Sir Arthur, moreover, does his best to encourage the community generally to visit Government House, the gardens, &c., by constantly mixing with the colonists, and his amiable endeavours to promote a good understanding between all classes are well seconded by Lady and Miss Kennedy. At present they are great favourites, and their apparent desire to discourage *cliquism* is very popular.

You will see in this mail's papers an account of the unfortunate death of the Rev. Mr. McChesney, an American missionary, who was accidentally shot during a piratical attack by some river thieves upon a small town lying on the West River. The *China Mail*, which seems inclined to support the high handed policy, desires to make the provincial authorities responsible, basing its arguments on the known complicity of the Mandarins with the pirates who infest the coast. This idea does not, however, seem to meet with much favour outside, and the "accident" is already forgotten by all but the poor man's friends. A good deal of local interest has been excited by the *Benefactor* case, of which you will doubtless receive full reports. Four attempts have been made to fire the vessel, and the last time the incendiary was happily caught in the act—the ship's boy being the culprit. He has just been committed for trial, and it is expected that his evidence will implicate several others of the crew, who are now under arrest. Great satisfaction is felt that Captain Berry should have been relieved from any stigma, for, high as his character is, the mysterious way in which the rascals did their work left an unpleasant opening for suspicion.

I hear privately from the North that the Chinese are going to fight the Audience question to the last. The weather here is remarkably hot, with much rain, but healthy. Sickness, however, prevails extensively at Shanghai and Tientsing.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The latest date by this mail is 28th July. The outward mail of 28th June arrived on 27th July.

The *Straits Times* has the following items:—

We learn that the Hon. Colonel Phillips, R.A., commanding Her Majesty's troops in the Straits, will be leaving this for Hong Kong about the 11th August, under orders from England. The Straits is now subordinate militarily to the China command, and it is considered desirable by the home authorities that all senior officers should be at head-quarters. For this reason Colonel Phillips, who is senior artillery officer in the China command, proceeds to Hong Kong, where he will rank next to General Whitfield. Colonel Phillips, during his stay in the Straits, has made many friends and acquaintances, and has been very popular with all classes as a frank, genial, straightforward English gentleman, as well as a capable officer. He will carry with him to his new sphere of duty the best wishes of all. He will be succeeded as senior officer in Artillery here by Captain Nicholls from home, and Colonel Smith, of Her Majesty's 80th, will be the officer commanding the troops in the Straits.

It will be gratifying to our readers to know that the Rev. W. H. Gomes, who has lately arrived in Singapore to take charge of St. Andrew's Church Mission,—and who has for the last fifteen months been acting as Colonial Chaplain at Penang, during the absence on leave of the Rev. Julian Moreton, has received a very handsome testimonial from the community of Penang, as a mark of the appreciation in which his ministry was held during his fifteen months' residence, and as a token of the esteem in which he is held by the community generally. It must be doubtless very gratifying to the reverend gentleman to feel that while he has only performed his sacred duties—he has so satisfactorily executed them as to call forth this token of esteem and regard from his flock. The testimonial, we are informed, is in the form of a purse of about six hundred dollars

The police have lately directed their attention to the Wha Whay lotteries and gambling-houses with very good success. A case was tried last week, where five Chinese found gambling in a gambling-house were fined each fifty dollars, and Inspector Warne also last week executed a Wah Whay warrant, in New Bridge-road and Carpenter-street, securing the head lottery and arresting the man who declared the winning number, and also securing one or two of the branches, with the lottery tickets, money, &c. The case has been already twice before the magistrate, but is not yet decided.

A serious accident happened on board the British ship *Ocean Mail*, Captain Watson, yesterday forenoon. Mr. W. Hormann, one of the assistants to Messrs. Behn, Meyer and Co., to whom the ship is consigned, was on board of her, and some way lost his footing and fell down the hold, sustaining such severe injuries on the skull as to become insensible. The Hon. Dr. Little was in attendance shortly afterwards, and pronounced the brain to have been seriously affected. We learn that hopes are now entertained of his recovery, though this was for a time considered doubtful.

It would appear that H.E. the Governor is not going to Siam, as was recently stated. His Excellency, accompanied by H.H. the Maharajah of Johore, K.C.S.I., intends on Monday next to start in the *Pluto* to pay friendly visits to two or three of the Rajahs on the East Coast. H.M.S. *Zebra* will probably go with the *Pluto*. The Rajahs have been notified of the intended visit and its object, which is to cultivate good feeling and more intimate relations with a view to the increase of trade, and they have all expressed the pleasure the visit will give them.

We quite agree with our correspondent that the committee appointed by H.E. the Governor to inquire into the working of the Municipal Act could not have been worse chosen. The two

Digitized by Google

unofficial members of the committee have publicly committed themselves so positively to his Excellency's views that they cannot retract, and of the official members the only one who knows anything about the matter is the Colonial Secretary, who has also publicly committed himself to the Governor's side of the question. Here are three of the five members of the committee known to be hostile to the municipalities, and the result of their deliberations may easily be foretold. If his Excellency wishes to be credited with impartiality he should at once alter the composition of the committee; and if he cannot find unbiassed official members of the council to sit upon it, there is no reason why he should not do as he has done in the case of the Police Commission, and appoint three or four respectable and well-informed residents to sit together with those already chosen, so as to give both sides of the question a fair hearing. Unless he does this he cannot expect the decision of the committee to be accorded much weight.

Commercial Report.

(*For dates see first page.*)

IMPORTS.

SHANGHAI.—There had been a quiet steady business in the principal Grey Cotton fabrics, to the almost utter neglect, however, of Fancy Cottons, Woollens, and other textiles. Grey Shirtings, 7 lbs.: Good demand and reluctance of holders had established a slight rise, and about 50,000 pieces had changed hands at Tls. 1.70 to 1.72½ for common to good. Dewhurst's Eagles in very limited demand at Tls. 1.92 to 1.94; 9¾ lbs. to 10 lbs. slightly weaker. White Shirtings lower and medium entirely neglected, and only one sale of fine at Tls. 2.70. T-Cloths, 6 lbs., 14 by 15 to 15 by 15 reeds much wanted at Tls. 1.21 to 1.23½ for Dewhurst's T.; 7 lbs., same chop and quality, realised Tls. 1.41 to 1.42. Small lots of 6 lb. Mexicans placed at Tls. 1.40 to 1.45; sales of 7 lb. Mexicans irregular; Tls. 1.51 for Stewart's "Lion and Flag," Tls. 1.56 for Mendel's "Horse and Jockey," and Tls. 1.60 for Collie's "Chop Dollar;" 8 lb., Tls. 1.73 to 1.80; XX (best make), Tls. 2.23. Drills: Moderate business in Dutch at Tls. 2.90; the value of English ranged between Tls. 3.05 and 3.15. Jeans and Sheetings: English, Tls. 2.20 to 2.22. Fancy Cottons: Small business; the characteristic of the market is a desire to sell rather than to buy. Woollens had received little or no attention, and this was ascribed to the flooding of the Yangtsze. Metals.—Lead: Quiet, but holders firm. Nailrod Iron: Transactions limited to 2,000 bundles inferior at Tls. 3; market firm. Coals: Few transactions and liberal supplies; Cardiffs sold from ship at Tls. 8.65.

FOOCHOW.—Sales had been:—T-Cloths, 7 lbs., 900 pieces at $2.05 to 2.12½ per piece; Grey Shirtings, 7 lbs., 500 pieces at $2.46; Lead, 7,725 pigs at $7 to 7.55 per picul.

HONG KONG.—With the exception of Yarns, which had been in very good request, only a small business had been done in imports generally. The desire of importers to realise led to the dealers withdrawing from the market in the hope of lower prices. Cotton Yarn: 16/24s: Large business had been done, but market quiet at the close; 28/32s eagerly asked for at a rise; 38/42s taken to a small extent at last mail's rates. Grey Shirtings: 7 lbs. difficult to move; 8.4 lbs. quite neglected; 9 lbs. to 10 lbs. firm at last mail's quotations. White Shirtings: 54/60 reeds 5c. lower, and even at this reduction could not be quitted; 64/72 reeds quiet at former rates; finest qualities declining; White Irishes out of favour. T-Cloths, 6 lbs. common exceedingly dull; 7 lbs. common continued in an unsatisfactory position; 6 lb. Mexicans changed hands at $1.82½ for Dewhursts MT; 7 lb. Mexicans, inferior found a few buyers at last quotations, but fine chop tended downwards; 8 lb. Mexicans could not be sold even at a reduction. Grey Drills, English 14 lbs. to 15 lbs. relapsed into a quiet state, at a decline of about 2½c.; American not in stock; Dutch difficult to move; Jeans 5c. lower, owing to fair arrivals; Sheetings can be sold to a small extent. Fancy Goods and Woollens and Worsteds little doing. Metals: Nail Rod Iron firmer, but not over $3.80 per picul could be obtained for good assortment; Bar has improved 15c. per picul; Quicksilver showed a rise of $10 per picul owing to telegraphic advices of a considerable rise in England; Lead had relapsed into a quiet state, and quotations were nominal.

MANILA.—The demand for Plain Staples was dull and rates were weak; Coloured Goods, on the other hand, were in good enquiry at improvig rates.

SINGAPORE.—Messrs. Boustead and Co.'s Circular says:—The arrivals with general cargoes during the fortnight are the Buena Ventura, steamer, and Deucalion, steamer, from Liverpool, and the Trafalgar, steamer, from London. Grey Shirtings: Demand for 8¼ lbs. fallen off, and only a moderate business done at $2.57½ to 2.60; closing quotations 2½c. lower; 7 lbs., inquiry limited; 6 lbs. dull and lower. 45-inch 8 lbs. scarce and wanted at $2.60; 9 lbs. in better inquiry and steadier. 32-inch Grey T-Cloths in poor demand and easier; 7 lbs. dull at $1.87½ to 1.90; 6 lbs. steady at $1.67½ to 1.70; light weights in less inquiry. Camlets in small inquiry and firm. Scarlet Long Ells quieter, and few inquiries made. Spanish Stripes saleable at 85c. Brocade Lustres dull of sale. Assorted Lastings in less inquiry. 40s Grey Yarn in some request at $137 to 137.50, but demand fallen off; 30s scarce and in some demand at $117; 18-24s, only few inquiries at $110 to $112.50. T. R. Yarn, best quality in good request. Green asked for and sales to a fair extent effected. Iron: Govan flat bar in moderate request at $3.90 to 4; common not inquired for; Nailrods, 100 tons sold at $4; Hoop wanted at $4¼ to 5; Swedish flat bar quiet, last sale at $4; a sale of Belgian flat bar reported at $3.60. Lead: Moderate inquiry for L B at $6.05 to 6.07½; sheet dull.

EXPORTS.

TEA.

YOKOHAMA.—Considerable activity had prevailed, and prices had ruled about $2 per picul above previous rates; but at the advance buyers seemed less disposed to purchase, while with a moderate stock —4,300 piculs—teamen were enabled to maintain their asking figures. The Polly Lewis was loading for New York, and the Clara Bell and Charley for San Francisco.

HANKOW.—Scarcity of supplies during the early part of the fortnight led to a steady demand for all Teas then arriving, at Tls. 13¼ to 18¼ per picul for Shungtams and common Oonams, and Tls. 20 to 23 per picul for other classes. Second crops (Yang-low-toongs) commenced to arrive in bulk on the 25th July, and sold readily at Tls. 21.2.5 to 22.6.0 per picul; settlements had since been made up to Tls. 23.7.5 per picul. Sun-Yangs: Only a few were to hand, and sales of these ranged from Tls. 24.2.5 to 26 7.5. Nipcarses, Tls. 20 to 22.5 per picul. Chong-sou-kais: Arrivals to date consisted of two or three well-known chops, which had commanded Tls. 24.2.5 to 26 per picul. In Oonam district Tea business had been done from Tls. 19.5 to 21.5 per picul. The quality of the second crop, with exception of Chong-sou-kais, and a few special chops, was not up to the standard of last season. The prices paid were as follows:—Oonfas and Oonams, good common to fair, Tls. 19.2.5 to 22.6; common, Tls. 17.5 to 18.2.5; Shun-tams, Tls. 13.5 to 14. Oopacks, fair to medium, Tls. 22.5 to 26; common to fair, Tls. 20 to 22.

KIUKIANG.—Supplies from the country had been moderate, and had gone forward to Shanghai. Second crop Congous had come to hand, and a few settlements had been made, but the quality proved inferior to last year, while prices were higher. Total arrivals, 116,963 chests; stock nil.

SHANGHAI.—*Black*: Owing in a measure to the paucity of stocks, caused primarily by the large and hurried purchases of second crop Tea at Hankow, and the exceedingly large export figures from all China (amounting to no less than fifty millions of pounds to the 30th June) coupled with the somewhat undesirable character of the majority of parcels on offer, the amount of business transacted since the departure of the last mail had not been large; but with increased supplies from the river ports further business on a more extended scale was looked for. The second crop Teas were considered of average quality but inferior to this yield last year. Prices showed an advance on last season's rates of probably Tls. 4 to 5 per picul. An indisposition on the part of many buyers to operate had been shown, pending the realisation in London of the early shipments. Settlements for the fortnight, 20,500 chests; Re-shipment on owners' account, 5,600 chests; Stock, 52 chops, or 16,700 chests. Quotations (duty paid, exchange at 6s. 2¼d., freight at £3 10s.):—Hohow, 1s. 1⅞d. to 1s. 4½d.; Shuntaam, 1s. 1d.; Oonam and Oanfa, 1s. 3½d. to 1s. 9½d., Ningchow, 1s. 5½d. to 1s. 9½d.; Oopack, 1s. 3d. to 1s. 8d. *Green*: Less activity had prevailed during the interval, but there had been no change in values. The market for country Teas was opened on the 9th July, by the settlement of a chop of Fychow at Tls. 40¼, (without first Hyson), and a chop of Taiping kind at Tls. 43½ per picul, being very full prices, and considerably above last year's rates for same grades. A few more parcels from the same districts had since arrived, but no further transactions had been reported. These chops were of good cup quality for their class, but were rather deficient in make and appearance, especially the Fychows, and seemed as if they were unduly hurried forward. Teenkais were daily expected, and the Moyunes were looked for three weeks from date. The prices paid had been about as follows:—For Pingsuey, Tls. 41 to 66; Local packed, Tls. 38 to 45; Fychow, Tls. 40¼; Taiping kind, Tls. 43¼.

FOOCHOW.—The Congou market had been rather inactive, business having been checked by the Teamen demanding too much for the second crop Teas, which, they stated, had cost high prices up country, and as the receipts of late had been moderate Teamen had thereby been encouraged to hold. The second crop Congous were, on the whole, inferior in quality to last season's, for although a few chops were attractive on account of their pungency and point, the bulk of the Teas was more or less wanting in decided character. Souchongs had met with a moderate inquiry at former prices. About 8,400 half-chests Oolong had been settled during the interval, the most of which were intended for the American market, and many were specially purchased to go by the steamer Sarpedon, bound to New York via Suez Canal. These quotations were for leaf with not over 15 per cent of dust, for the purchasers had the option of either sifting the Teas to within this percentage of dust or of reducing the price. The former course had been adopted by some. In Scented Teas a good business had been transacted at unchanged prices. Settlements had been:—Congou, 28,296 chests at from Tls. 7.55 to 8.8 o.b. for dust and siftings; Tls. 11.3 to 13.8 o.b. for broken leaf; Tls. 15.8 to 18.3 o.b. for ordinary to good common; Tls. 19.8 to 24.8 o.b. for flavoury to medium; Tls. 25.8 to 36.8 o.b. for good medium to finest. Souchong, 5,981 chests at Tls. 16·8 to 22.8 o.b. for low common to common to Tls. 28.8 o.b. for medium; Tls. 29.8 to 38.8 o.b. for good medium to finest; Tls. 42.8 o.b. for choice and Tls. 46.8 to 57.8 o.b. for fancy lots in boxes. Oolong, 8,406 half-chests at Tls. 24.3 to 26.8 o.b. for common to fair cargo; Tls. 29.3 to 30.8 o.b. for good cargo; Tls. 37.8 to 42.8 o.b. for a few small lots of fine. Scented Tea, 19,695 boxes at Tls. 23.8 to 27.8 o.b. for common to medium to Tls. 37.8 o.b. for good medium to fine. Flowery Pekoe, 1,287 chests at Tls. 32.8 to 59.8 o.b.

AMOY.—Settlements made had established no change in price, but natives evinced more anxiety to sell; the quality of the crop continued satisfactory, and it was stated to be a full one. About 1,200 half chests Congous had been settled at an average of $22 per picul for superior grades, the quality being certainly over an average.

CANTON.—Large settlements had transpired during the past fortnight at a decline of Tl. 1 to 2 on rates previously ruling, in consequence of the eagerness of native holders to realise. Canton District Congous had not been dealt in. Scented Teas: Orange Pekoes had

Digitized by Google

been freely taken at a decline of Tl. 1 for new make sorts and the lower grades of long leaf, but for the medium to good medium of this description, full rates still ruled. Scented Capers, good common to fair had commanded some attention, and in all classes below finest, a reduction of Tl. 1 to 1½ per picul was quoted. Canton Greens: Gunpowders of fair to medium quality were obtainable at Tl. 1 to 2 per picul below last mail's quotations, whilst in the finest kinds there was no change. Settlements from July 3 to 17:—Canton District Congous, none; Scented Orange Pekoe, 12,000 boxes at Tls. 15 to 30; Scented Capers, 24,000 boxes at Tls. 16 to 25; Canton Greens: Gunpowder, 4,500 boxes at Tls. 18 to 30; Imperial, 800 boxes at Tls. 19 to 22; Young Hyson, 600 boxes at Tls. 18 to 20. Stocks estimated at 2,000 boxes Canton District Congous, 10,000 boxes Scented Orange Pekoe, 20,000 boxes Scented Caper, 10,000 boxes Gunpowder, 1,500 boxes Imperial, and 2,000 boxes Young Hyson.

SILK.

SHANGHAI.—Up to the departure of the French mail on 7th July, a large business was done at former quotations; since then, the market had been quieter, and though the business doing was still large, the increasing stock had induced lower rates. In best standard chops of Tsatlees nothing had been done, and quotations were therefore unaltered. In medium chops and market Silks a fall of Tls. 10 to 15 had taken place. "Blue Elephants" had been settled at Tls. 530. Best Kahing Taysaams had nearly maintained their former value; medium and lower sorts had declined Tls. 10 to 15. In Hainins and Chin-Cum Taysaams nothing had been done; for the latter extreme prices were asked for the few on offer. Settlements for the fortnight, Chinas, 4,500 bales. Total settlements since 1st June, 17,500 bales, against to same date 1871, 16,000 bales; 1870, 14,000 bales. Comparative unsold stock on this market on the 13th July, 1872, 8,000 bales; 1871, 5,500 bales; 1870, 5,000 bales.

CANTON.—The market was somewhat easier, but no decided change in prices could be quoted. The quality of the third crop was well spoken of, but the yield was expected to be far short of the second; about 70 per cent. of the second crop was yellow, while about 80 per cent. of the third would be white. Attention had been chiefly directed to Nos. 1 and 2 Tsaltee, although proportionably dear, as these qualities were much cleaner than the medium and lower classes. The stock was estimated at—70 bales Loongkongs, 250 bales Tsatlee reels, 70 bales Kowkongs, 100 bales Cumchucks, Lacklows, &c., and 300 bales of inferior descriptions.

ARRIVALS NOT IN THE TABLES.—Aug. 30, at Liverpool, from Rangoon, Slieve Bloom; 27, at Bremerhaven, from Bassein, Antonietta Accame; 31, off the Lizard, from Ilo Ilo, Eastern Star; 28, at Bremerhaven, from Rangoon, Arracan; Sept. 1, at Queenstown, from Rangoon, Genitore R.; at New York, from Colombo, Isurium.

DEPARTURES.—From Nieuwe Diep, for Batavia, Conrad (str.); from Newcastle, for Sourabaya, Anna and Sophia; Aug. 30, from Liverpool for Colombo, &c. (via S.C.), Statesman (str.); 29, from Ayr, for Singapore, &c., Attalo (str.); from Sunderland, for Galle, Oleander; for Shanghai, Kirkland; 4, from Rio Janeiro, for Singapore, A. H. Wille; 15, from Falmouth (after repairing), for Singapore, Saltee (str.); 30, from London, for Penang, Alvington; for Yokohama, Coulnakyle; 31, for Colombo, Scawfell; 30, from Cardiff, for Singapore, Melissa.

MISCELLANEOUS.—The Bessie H. (barq.), from Cardiff, to Ceylon, which put into Bahia, July 13, with master mutinous, sailed for her destination Aug. 3rd; the former master and several of the crew were sent home by the Olga (str.). Advices received from Bahia, dated Aug. 9th, state that a bottle was picked up in the bay on the 7th, containing a paper on which the following was written in English and German:—No. 391, German brig, Hermann Friederich, from Hamburg to Shanghai, 1872, in lat. 17. 24 S., and long. 34, 42 W. The finder is requested to send this paper with information of latitude and longtitude of the place where found, also date and year, to the Deutshe Seewarte, in Hamburg. F. Niejahr.

CASUALTY.—The Lothair, Peacock, from Foochow, put into Yokohama, August 20, dismasted.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BARTON—On the 10th July, on board the *Waterwitch*, at Shanghai, Mrs. Z. Barton, of a daughter.

BRETT—On the 6th July, at Hankow, the wife of A. L. Brett, Imperial Chinese Customs Service, of a son.

COULTER—On the 9th July, at Shanghai, the wife of Mr. A. Coulter, of a daughter.

DAVIDSON—On the 30th Aug., at 42, Portsdown-road, W., the wife of Wm. Marshall Davidson, Esq., of a daughter.

FINCH—On the 9th July, the wife of Capt. Finch, of a daughter.

GWYTHER—On the 30th Aug., at Meadowcroft, Lower Sydenham, the wife of J. Howard Gwyther, Esq., of a son.

JACKSON—On the 7th July, at Yokohama, the wife of Thomas Jackson, of the Hong Kong and Shanghai Bank, of a daughter.

KATZ—On the 15th July, at Singapore, the wife of Mr. A. Katz, of a daughter.

MCCHESNEY—On the 12th July, at Canton, the widow of the late Rev. W. E McChesney, of a son, two days after the death of his father.

PEACOCK—On board the ship *Lothair*, in Hong Kong harbour, the wife of Capt. E. Peacock, of a son.

REID—On the 8th July, at Shanghai, Mrs. Reid, of a daughter.

MARRIAGES.

BRENT—DITCHBURN.—On the 29th Aug., at All Saints, Poplar, by the Rev. T. W. Nowell, Arthur Brent, of Yokohama, Japan, second son of Henry Brent, Esq., of Lee, Kent, and of the Bank of England, to Charlotte Louisa, eldest daughter of the late T. I. Ditchburn, Esq., of Blackwall.

RYAN—BRUYLANT.—On the 15th July, at Malacca, at the Roman Catholic Church of St. Francis Xavier, by the Rev. C. Mazery, vicar, Mr. Charles Edward Ryan, chief engineer of the steamer *Telegraph*, to Primrose, eldest daughter of Mrs R. Bruylant, of Penang.

DEATHS.

ARTHUR—On the 8th July, at the Diocesan Home and Orphanage, Hong Kong William Vaughan Arthur, aged three months, son of Mr. Wm B. Arthur.

DE CUNHA—On the 21st July, John De Cunha, assistant interpreter, Penang division of the Supreme Court, aged 42 years.

HAWES—On the — July, at Chefoo, the wife of Capt. Hawes, of S.S.N.S. *Shantung*.

HOWARD—On the 3rd July, at sea, near Hong Kong, Walter John, aged 16, third son of A. G. Howard, of 21, Denbigh-place, Pimlico.

JARRETT—On the 12th July, at the Shanghai General Hospital, Mr. Henry Jarrett.

KNIGHT—On the 7th July, at Chefoo, Mr. Henry Knight, of Shanghai, aged 33 years.

MCCHESNEY—On the 15th July, at Canton, the infant son of Mrs. McChesney.

TOBIN—On the 2nd July, at Malacca, Mary, the beloved wife of Colour-Sergeant Edmond Tobin, H.M.'s 80th Regiment, aged 26 years.

WEST—On the 10th July, at Hongkew, Mary Clementina, infant daughter of Capt. W. A. West, aged 9 months.

We understand that shareholders and others interested in the Hong Kong Insurance Office have deemed it desirable to protect the interests of their constituents, by reinsuring their risks, in consequence of the failure of the London agents, Messrs. Gledstanes and Co.

The amount of bullion by the P. and O. Company's steamer *Hindostan*, which left Southampton on the 29th ult., was, in gold—to Galle, £1,950; in silver—to Penang, £1,512; to Singapore, £8,537; to Hong Kong, £10,750; to Shanghai, £6,080; total, in gold, £1,950; in silver, £26,879.

WE learn from the *Athenæum* that a curious literary piracy has been perpetrated at Canton. A Chinese publisher in that city has lately issued a duodecimo edition of the four Chinese classics known as the "Four Books," accompanied by the text of Dr. Legge's well-known translation, together with his prolegomena, from which, however, all depreciating remarks on Confucius or Confucianism have been carefully expurgated. The stated object of the publication is to aid Chinamen in the study of English.

THE O'CALLAGHAN LIBEL CASE.

In a recent issue we gave a brief report of an action for libel brought by the Rev. Robert O'Callaghan, formerly of Hong Kong, against Mr. John C. Hall, claiming damages of £6,000. We subjoin a more detailed report of the trial.

The hearing occupied five days. Mr. Robinson and Mr. Jordan appeared for the plaintiff; Serjeant Armstrong, Messrs. Beytagh, M'Dermott, and Monahan, for the defendant. Mr. Robinion, Q.C., who opened the case for the plaintiff, said that his client was a clergyman of the Established Church, who had formerly lived in Galway. He was in Hong Kong in 1869, and wished to be appointed on the committee of an institution for female education. The bishop of the diocese of Hong Kong, Dr. Alford wished to know what character plaintiff bore, and wrote to defendant, who resided in the parish where plaintiff had been curate. The defendant replied:—

"Letterfrack, County Galway,
"29th November, 1869.

"MY DEAR DR. ALFORD,—Berta writes to say you wish to get the character of a certain individual; what I tell you is not mere idle rumour or gossip, but real truth; and I speak of what came under my own personal observation. He was a ruthless liar for his own advantage, or for the sake of revenge on anyone he wished to injure. I never saw him drink, but he could take as much liquor as would ruin most other men. He ill-treated his wife shamefully, and he had not the self control to prevent him abusing her before others. His last notorious act was to seduce his own servant, and to send her to a neighbour as a servant with a recommendation from himself. When his neighbour found what was wrong he went to him to know how matters stood. He, of course, denied all knowledge of the girl's state, and brazened it out by sending the girl to England in charge of his own children to school. The man's own wife first of all turned the girl out of the house, because she was in the family way by her master. I think this will be sufficient for you to have nothing to do with him. —Yours sincereiy, "J. C. HALL."

That was the libel complained of, and counsel promised to show that it was false, scandalous, malignant, and that it had prevented his client being appointed to a chaplaincy of £800 a-year at Hong Kong, which he would otherwise have got. Evidence was then gone into.

Serjeant Armstrong stated the case for the defendant. He said that plaintiff had had a school at Ashleinh, and while there had behaved in the most improper manner, drinking hard, driving girls about, and behaving in the most rollicking way. He had long been separated from his wife. He had pretended at Hong Kong he was unmarried. Counsel then called evidence for the defence. Miss Baxter was examined. Her evidence was immaterial. Canon Beach, examined by Mr. Monahan, deposed he now held the position of senior chaplain of the forces in Dublin; he was colonial chaplain for nearly three years at Hong Kong; he arrived there in 1867; Bishop Alford was there at that time; he was the Bishop of Victoria, and that gave jurisdiction over Hong Kong; the bishop appointed him his domestic chaplain; he remembered Mr. O'Callaghan going to Hong Kong about twelve months after himself; that was about December, 1868; he had heard of the orphanage originated there by Miss Baxter; the orphanage was broken up after her death; this school was for the instruction of girls; not all Asiatics, they were of mixed blood; on an average about twenty attended it; the question did arise with regard to Mr. O'Callaghan's connection with the school; he (Mr. Beach) received a communication from the bishop about Mr. O'Callaghan; he stated the contents of that letter to Mr. Gray, that was the letter of the 3rd December; Mr. Gray was Archdeacon and the Bishop's Commissary; and by his direction the letter was communicated to Mr. O'Callaghan. (Archdeacon's letter to Canon Beach on the subject produced.) What did he say? He said I call on God to witness there is not a particle of truth in the whole matter. Did you make any reference to his turning out to be a married man? I did; I said "Mr. O'Callaghan, I think it is hardly fair that you should pass as an unmarried man in Hong Kong. Mr. Monahan: When you spoke about its being unfair that he should pass as an unmarried man what did he say?—"Well," he said, "My wife is dead;" then pausing for a moment, he added, "dead to me." When you heard "dead" for the first time before the pause did you intimate any surprise?—I doubt if there was time enough. When he said, "dead to him," did you make any observation?—I said, "Very well, Mr. O'Callaghan; she is not dead yet, nor will you be able to get married;" I further said that rumour had associated his name with Miss W———, but I added that I did not know that there was anything in it; he then said, "Oh! there is nothing in that quarter, Mr. Beach, as Miss W———'s sister-in-law knows all about my affairs." What did he say about speaking to young ladies again?—I cannot say that he sad anything about that. Was any suggestion made by him to you, that you should not disclose?—Yes; I said, as a brother clergyman, I was sorry to see him part with his wife. He said that it all arose from incompatibility of temper. I said that was not a serious thing—that it was no business of mine, but that I hoped they would come together again. He then said, "It is a painful thing to me, Mr. Beach; I would rather not have the subject talked about."

Mr. Monahan: Now, Canon Beach, did he not mention, in proof of his innocence as regards the libel, that the girl who was accused was still in charge of his sister's children, and could you suppose it would be so, and she guilty of such a charge?—I believe so. When did you leave that colony?—I left on the 15th July, 1870.

The Rev. Mr. Tucker examined by Mr. M'Dermott: I believe you are a chaplain? Yes. I believe you were chaplain to the navy? I was accountable for recommendations to the navy; I occupied that position in the year '68; I was chaplain to the British Hospital in that year; that was the year the Rev. Mr. O'Callaghan presented himself to me; I have a letter from him since 1870; I thought him an unmarried man; he told me he had children, and my impression was that he was a widower. Had you any conversation with Mr. O'Callaghan since you came to Galway? Yes, a few words passed between us. Had it any reference to his wife? He expressed regret, as far as I can

Digitized by Google

remember, that I should have been ignorant of his separation from his wife, and that he had not communicated to me the separation. Did he apologise to you about it? I would rather say he expressed his regret.

John C. Hall, the defendant, was examined by Serjeant Armstrong. I knew Dr. Alford before he was appointed a bishop; I know the Hon. David Plunket; I made the acquaintance of the plaintiff very shortly after his arrival; before I wrote the letter complained of I received a letter from Bishop Alford; the subject of the Bishop's letter to me was to inquire into the plaintiff's character; the letter of Miss Bertha Baxter was to the same effect; the plaintiff had been at our house upon invitation, and I had met him at Mr. Plunket's often, and also at other places before I wrote this letter; I had heard him say that a bottle of whisky was nothing to him, and that it was out of the power of whisky to make him drunk; I never saw him drunk, but I saw him once when he looked as if he had been drinking—as if he had been imbibing a good deal the night before; his language showed me he was not sober. The witness then described the language the plaintiff used, but it is not fit for publication. I have seen him with his wife; his manner was unkind and snubbing towards her, as if he thought she did not know how to behave herself at table; I heard him in his own house say to her, "Get out of that, and mind your own business"; I was well aware that Miss Harriett Baxter had the institution in Hong Kong; on one occasion, when I met the plaintiff at the Hon. Mr. Plunket's, we were in the garden, and the plaintiff mentioned he had got a fall from his horse the previous evening returning from Westport; when Mr. Plunket said, "I suppose you were blind drunk," the only reply the plaintiff made was "well, well!" I remember when Tynan was discharged from Mr. Plunket's employment; he was succeeded as manager for Mr. Plunket by the plaintiff; the plaintiff told Mr. Plunket that Tynan used to fish with one boat and keep the produce for himself; I am one of the board of Conservators, and Tynan was and still is our inspector and clerk; the plaintiff said to me, "Now that I have hunted Tynan out of Mr. Plunket's employment I'll hunt him out of Leenane, as I won't have him sitting there watching me"; the plaintiff's seduction of the girl Mary Walsh was notorious in the county long before I wrote this letter; from all I had heard and known of the plaintiff I verily believed when I wrote this letter that he was an improper person to have charge of the education of young girls or any young people, and I had no malicious or improper motive whatever.

Cross-examined by Mr. Robinson: The plaintiff talked of the Royal Family as State puppets, and said he did not care that (snapping his fingers) for them; I did not think Mr. Plunket was joking when he said, after the plaintiff told him he had got a fall from his horse, "You must have been drunk."

Dr. Tyner was then called, but requested to be excused from giving evidence in this case, and thereby divulging private conversations which took place in the house of his best friend, now no more. He said he was medical superintendent of a lunatic asylum, and his nervous system was so excited by the thoughts of this trial that he was more fit to be an inmate than the medical officer of the asylum. —Baron Fitzgerald told him he had no privilege, and must give evidence.—The witness persisting, he was removed in custody the sheriff.

Bridget Nee, examined by Mr. Monahan: I was a pupil at the Ashleigh School when the Rev. Mr. and Mrs. O'Callaghan were there; I have heard him call Mrs. O'Callaghan an "old hag," and a "dirty devil;" they did not sleep in the same bedroom or occupy the same sitting-room; on another occasion I heard Mrs. O'Callaghan screeching as if she was being beaten; at the time when Mary Walsh was living with the plaintiff, Mrs. O'Callaghan went out to walk with the children, and she left me some work to do; I went out into the garden to sow, and when I had done I returned by the scullery door; it was locked; I then went to the window of the servant's room and looked in, and I saw Mr. O'Callaghan and Mary Walsh; he was standing within a couple of yards of her; I then ran away and returned to the garden; in a quarter of an hour I saw him coming out of the hall door; Mary Walsh left in a couple of months after.

Bridget Gibbons, a girl who had been a servant in the laundry at Mr. Plunket's, stated that she had frequently seen the plaintiff and Miss Nolan walking together. The reason witness heard for Miss Nolan's leaving was, that she was going to get married, and that she was spoken of for being great with Mr. O'Callaghan; she had also seen Mr. O'Callaghan in Miss Bennett's room, and on one occasion she peeped in through the keyhole, and saw Mr. O'Callaghan and her sitting on the same chair, his arm on her shoulder, and she saw him kiss her. On another occasion she saw Mr. O'Callaghan coming out of Miss Bennett's room about three o'clock in the morning; this was the morning Miss Bennett was going away, and Mrs. Joyce helped to bring down her things; she also stated that she saw Mary Walsh walking about the roads with Mr. O'Callaghan; the report in the country why Miss Bennett left was because Mr. O'Callaghan and she were as great as man and wife; she stated also that one evening she saw Mr. O'Callaghan beating Mrs. O'Callaghan in his own parlour.

Walter Henry, a sub-constable in the Royal Irish Constabulary, stated that he had formerly been a pupil in the Ashleigh School. He stated he had heard rumours of an undue intimacy between Mr. O'Callaghan and Mary Walsh.

Dr. George Tyner, who had declined to give evidence when first called upon, was now examined: I am a physician to the Doun Lunatic Asylum; I was dispensary doctor at Letterfrack; I knew the late Hon. David Plunket, and frequently went to see him at his house at Ashleigh; I knew the plaintiff, and have seen him in company with his wife both at Mr. Plunket's and his own house; I remember being present at a rather loose conversation which took place at Mr. Plunket's, and I heard the words used by him which have already been mentioned; I never saw him drunk.

James Tynan examined by Serjeant Armstrong: I was formerly steward and manager of the fisheries of the late Hon. David Plunket; I knew the plaintiff at Ashleigh; I was dismissed in 1863 and he was appointed; the first thing he asked me about was to account for herrings killed in 1861, and I explained the matter to him; on my oath I never kept for myself the produce of any boats belonging to Mr. Plunket; in 1864 I first noticed signs of drink on the plaintiff; the plaintiff made a charge against me to the Board of Conservators of charging posting fees without paying a license.

The plaintiff then went into a rebutting case, and the Rev. John Cather, Rector of Westport, was examined, and stated he had known the plaintiff for some years, and examined him prior to his ordination; the plaintiff after his ordination was sent to a curacy in Achill, and was subsequently appointed to Ashleigh, which is in his parish; so far as his knowledge of Mr. O'Callaghan went, he would not say that he was in the habit of indulging in intoxicating drink, or anything approaching, nor did witness ever hear of such, nor that he was guilty of incontinence with his servants, or cruel to his wife; he had seen Mrs. O'Callaghan in his, witness's, house with the plaintiff. He proved the granting to the plaintiff of the *bene decessit* (produced).

James Leslie was examined by Mr. Jordan, and stated that he was a schoolmaster at Ashleigh during the time Miss Bennett was there. The witness stated he never saw any undue intimacy between her and the plaintiff, nor ever heard anyone speak of such, and he knew Miss Bennett well. He described the room occupied by Miss Bennett, and stated from the way the door opened no one could see the bed without going into the middle of the room. He said he was never aware, and he did not believe the plaintiff used to go into Miss Bennett's bedroom and stay there for two hours; he never heard any report that the plaintiff had any improper intimacy with Miss Bennett; the plaintiff was not addicted to drink, nor did he ever hear him say anything unbecoming a clergyman.—Cross-examined by Mr. Beytagh: I am now a mis-lonary agent stationed at Portarlington. He described the position of the bed in Miss Bennett's bedroom.

The Rev. Richard Goodison, Incumbent of Kilcommin, was examined and said: I have known the plaintiff since 1861; he officiated for me during my absence while I was at Ashleigh; I have heard him preach; I recommended him as my successor: from my own knowledge and experience of the plaintiff, I think him and believe him to be a most temperate man, and I never knew him to tell lies. Cross-examined: I never heard of these rumours while I was in the country; I subsequently heard that the Admiralty had sent down to make inquiry about some servant girl; the plaintiff was always polite and civil to my wife in my presence.

The Hon. Mrs. Plunket, examined by Mr. Robinson: I am the widow of the late Hon. David Plunket; I knew Mr. O'Callaghan while he was at Ashleigh; he often dined at our house; I never saw Mr. O'Callaghan in the least under the influence of drink, nor did I ever see him act in any way unbecoming a clergyman; the immediate cause of Tynan's dismissal was showing great want of feeling on the death by drowning of a young man in our service, but there were many other reasons for dismissing him which Mr. Plunket had besides this; Mr. O'Callaghan knew nothing of his dismissal till I told him of it, and I requested him to communicate the fact to Tynan; Mr. O'Callaghan, after Tynan's dismissal, acted as my husband's friend, and he never got one penny remuneration. The Hon. Mrs. Plunket was next examined by Serjeant Armstrong: Seven o'clock was our tea hour; there was always whisky in the house: she had the plaintiff taught to sing in connection with the services of the church; had heard him sing some of the negro melodies.

Henrietta Hillery examined: She was Miss Bennett; was schoolmistress at Ashleigh in 1866; plaintiff was then a clergyman there; there was no intimacy between her and the plaintiff; no, never; he never took any liberties with her; never put her hands on his whiskers; never put her arm on his shoulder; he never took any liberties with her in her room; had a boarder, Caroline Porter; slept in the next room to witness; he came into her room occasionally when he came about the school and gave religious lectures; never remained any time in her room unless on duty; her boarder was in the room; never saw him under the influence of drink; the day she left she was up early, and the plaintiff came to call her; had to go by a rough road a great many people came with her to plaintiff's house; the Rev. Mr. Mollan was at the car on the road, and he and his son travelled on the car; plaintiff's wife was at the car and bid her good-bye; changed carriages at Athlone for Ballinasloeet; her present husband; Kane M'Donogh, a schoolmaster at Ashleigh; he had been rude to her; he wrote offering to marry her; saw him in Galway yesterday, and he said in presence of her husband that he admitted in the presence of the Almighty that he had nothing to say against her, either by him or anyone in the place. Cross-examined: Plaintiff never remained an hour in her room in the evening; she is now a teacher at Aughrim; knew Ellen Joyce in the school; never shook hands with plaintiff but three times; she was two days ill, and plaintiff came to visit her; never told the servant not to let the children into her room; attended plaintiff's children three evenings in the week; plaintiff never saw her home; never found her in her room.

Mary Walsh examined: Was servant to the plaintiff at Ashleigh for eleven months; the plaintiff never kissed her, nor ever made any freedom of that nature; never was pregnant. Honor M'Nab and Mrs. O'Callaghan were examined and gave evidence strongly in favour of the plaintiff. The Rev. Mr. O'Callaghan was examined, and totally denied all the allegations put forward against him. Ellen Joyce was then examined, to contradict Mary Walsh's statement, and said that she was sleeping one night with her (Mary Walsh), when she told her that one evening, Mrs. O'Callaghan and children having gone to Ballinakill, the plaintiff came into her bedroom, got into her bed, and remained there until the morning, and that he then gave her three drops out of a bottle.

Counsel having spoken to evidence, and the Judge having charged, the jury found for the plaintiff, £25 damages, and costs.

ELOQUENCE IN THE "STRAITS."

WE have a serious complaint to prefer against our worthy contemporary, the *Straits Times*. We all know the salubrity of the climate of Singapore, but our contemporary need not have tried to convince us further of its beneficial influence on the lungs of his townsmen at the expense of our eyesight. To be plain, he really should not—he should not indeed—terrify us with verbatim reports of the speeches of the members of the local Legislative Council. Fancy nine columns of debate among ten gentlemen—to say nothing of a little paragraph slipped in like a sandwich—to say that "a long discussion took place on clause 1 of section 41!" We can readily believe it; long discussions are the order of the day in the Straits, and we can only suppose that the reporter was so thoroughly exhausted with his labours, that he was compelled to retire to obtain some refreshment—otherwise we should have had a verbatim report of that part of the debate too. Would that he had been content to rest on his stenographic laurels, and had not returned to Council that day! For what does the reader imagine all the remainder of the debate was about? The difficulty of going to sleep in the midst of the Chinese music, for which special licenses have to be obtained from the police on "high days and holidays!" On this "emusing subjeck"—as THACKERAY says—nearly all the honourable members expatiated with what Mr. GREENSHIELDS called "great freshness of feeling"—which we suppose is pidgin English for being insufferably tedious. So did Mr. SIDGREAVES, who proved to demonstration that, though Justice is blind, Chief Justices are a long way from being dumb. It would really seem as if all the ten members felt the disturbance of their natural rest at home so painfully that they determined to talk one another to sleep in Council. Mr. SIDGREAVES so particularly distinguished himself in this way that we cannot wonder that there is great difficulty in getting gentlemen to act as jurors if that is how he "sums up." Perhaps the *Straits Times* may reply to this remonstrance of ours that he only publishes these verbatim reports as a cruel kindness, in the hope that honourable members will recoil from the perusal of the platitudes they have uttered. But must not his subscribers recoil too? Surely one martyr in such a cause would be sufficient, and the public might be let off with a "summary."

The oddest part of this wire-drawn debate was its termination. After hearing everything that could be said, and a vast deal that need not have been said, on the subject—for this "Council of Ten" seem to enjoy their oratory as ardently as the youthful members of a debating club—and after it had been ascertained by a division that the rhetorical gladiators had not succeeded in bringing a single member of the opposition to their own opinion—both sides being equal in numbers—the Governor, Sir HARRY ORD, gravely stated his intention to give his casting vote *against his conviction, in order to allow of the re-opening of the question!* Why this should be we are at a loss to guess, for surely the laws of the Singaporeans are not as immutable as those of the Medes and Persians; and, if the proposed ordinance should be found not to work well, it could be repealed. But be this as it may, it is beyond a joke to contemplate a question that has not only been exhausted, but exhausted its readers into the bargain, being *re-opened*.

The main question of the debate was whether the Chinese should be employed in a greater degree than at present in the police force; and the argument in favour of so doing was compressed by Mr. GREENSHIELDS in a very few lines when he pointed out that "every bank, every mercantile "establishment, takes its employés from among the natives. "In every employment," he proceeds, "the Chinese swarm: "European enterprise would have done little here, except "for the aid of Chinese energy." Why, then, should the administration of the law, the detection of crime, not be entrusted to those who are best acquainted with the forms of crime, the motives which tempt to it, and the means of detecting it—among their countrymen? The Greek philosopher, when he was asked what was the best code of law, answered:—"That which is best suited to the country; "that which would be a good law in Athens might be a bad "law in Lacedœmon." Dr. LITTLE, who supported the movement, pointed out the notorious inefficiency of the present police, which he attributes to their being strangers in this land of Chinese, and not knowing their language or habits. We agree with him, and with the arguments in favour of a better kind of Chinese being attracted into the force by a higher rate of pay. We are convinced from experience that the Chinese are the most plastic and manageable of Eastern peoples—but they must be well paid. If they are not at least fairly remunerated they consider themselves almost excused for extracting "black mail" from either the criminal or the general classes of society—a system which our readers are well aware is continually being brought to light even here in London. As for that part of the Act which proposes to do away with "music" at night, we offer no decided opinion—though we should give a casting vote in favour of allowing the Chinese as much honest recreation as we can, on the principle that a man is seldom engaged in doing anything very wrong when he makes a noise about it. But for the extended employment of Chinese as policemen we are decided advocates, and we hope Sir HARRY ORD will reconsider his proposal to "re-open the question"—take the debate under notice "as read," at the next meeting of Council—and give his casting vote on the side which in his judgment is the right one.

PROGRESS IN CEYLON.

WE have sincere pleasure in congratulating our friends in Ceylon on the continued prosperity and prospective development of their beautiful island, as indicated in the letter from a correspondent which we published in the last number of the *London and China Telegraph*. On the appointment of Mr. GREGORY to the Governorship of Ceylon we expressed our opinion that, though it would be no light task to tread worthily in the steps of Sir HERCULES ROBINSON, Mr. GREGORY was just the man to enter upon it *con amore*, and to whom it might be confided without fear or jealousy. The result thus far has justified our expectations. The new Governor has not contented himself with accepting anything upon hearsay; resolved to judge for himself, he has been travelling from point to point where improvement is most demanded; he has supplemented the information officially furnished to him by his own observation; and mindful of OVID'S apothegm—

"Fertilior seges est alienis semper in agris."

he has taken care to guard against the suspicion that any one portion of the island shall receive undue preference over another. This is the right way to make the island contented as well as prosperous; and we cannot but recognise the foresight of Sir HERCULES ROBINSON in making an alteration in the currency almost the last act of his rule. The retiring Governor perceived that, under the beneficial influence of the improvements he had initiated, and with the energy of his successor applied to their completion, the good people of Ceylon would be "making money" so fast that, if only to save time in counting their gains, it was desirable to coin rupees instead of shillings for their accommodation. As a natural consequence of the progressive improvement in the value of land in other parts of the island than those which our correspondent quaintly—but very truly—describes as the

Digitized by Google

"stereotyped" coffee districts, we are not surprised to learn that capital and enterprise, driven to seek

"Fresh woods and pastures new,"

has advanced the price of land, though 7,000 feet above the level of the sea, to £2 and £3 per acre. We have little hesitation in predicting that, if the present course of development be pursued, it will soon double that.

But, while regarding with justifiable satisfaction their own assured agricultural prosperity, we hope that neither Mr. GREGORY nor the public of Ceylon will overlook their responsibility for the necessity of making the island more safe and accessible both to Europe and the Far East. Among the most pressing of the legacies which Sir HERCULES ROBINSON left to his successor are the improvements of the harbour of Galle and the formation of the Paumben Passage. We have so often pointed out the impolicy of transferring the mail port from Galle, and the imperative necessity for widening the Paumben Channel, that we need now do no more than urge the claim of both these enterprises to precedence over any other improvements that may be in contemplation. It is not only an absolute injustice to the rest of the commercial world to neglect to provide a secure harbour and a short cut, but every day that these works are delayed is so much money out of the pockets of those whose prosperity as planters has raised the value of land remote from their estates to the comparatively high rates we have quoted in a surprisingly short space of time. To bring these new blocks under cultivation, and thus multiply the production of the island, without providing a safe harbour and a near road for shippers trading between East and West, would be niggardly and shortsighted policy.

THE JAPANESE EMBASSY.

THE Japanese Ambassadors paid a visit on Tuesday last to the Royal Arsenal at Woolwich, where they were escorted over the several portions of that establishment by the heads of the departments, and appeared to take great interest in everything that was to be seen. From Woolwich the Ambassadors proceeded to Portsmouth, and while *en route* had an opportunity of inspecting the Northern Division of the Army which is to take part in the Autumn Manœuvres while on the march to the scene of operations. The troops, both Cavalry and Infantry, were marched past the carriages containing the members of the Embassy. The Ambassadors reached Portsmouth on Wednesday, where they paid a visit to the naval Commander-in-Chief, and inspected the dockyard and the ironclads in the harbour, and yesterday, accompanied by Sir HARRY PARKES, Major-General ALEXANDER, and Mr. ASTON, they embarked for Spithead, on a visit to the ships of the Channel Squadron now lying there. The first visit was paid to the flagship of the Admiral Commanding-in-Chief, the *Minotaur*, where they were received on the quarter deck by Rear-Admiral HORNBY and his officers. After having inspected the flagship the Ambassadors were conducted through the fleet and boarded each of the vessels in succession.

The following letter has been addressed to the American Secretary of State, in acknowledgment of the courteous reception accorded to the Ambassadors during their stay in the United States:—

Sir,—We cannot leave the shores of your most hospitable country without again returning you our sincere thanks and hearty acknowledgments for the great kindness shown us both in your private and official relations with this Embassy while in Washington. Since our departure we have received the generous hospitality of the City of Philadelphia and kind attentions in New York. The city authorities of Boston have been untiring in their great bounties to us, which have been bestowed with unbounded enthusiasm and apparent sincerity. We have also to acknowledge polite attentions from the towns and cities of Lowell, Lawrence, Providence, and others.

These generous expressions of kindly feelings have indeed moved our hearts. We especially thank you for your happy choice in appointing so genial and pleasant a gentleman as General Myers in charge of our receptions. His kindness and attentions have been unremitting, and we cannot too strongly express our entire appreciation of his constant courtesies, so delicately bestowed. We sail for England by the steamship *Olympus*, and avail ourselves of this our last opportunity, on the eve of our departure, to express to you our sincere thanks for your nation's hospitality and renewed assurances of our most distinguished consideration.

T. KIDO, N. YAMAGUTCHI.
T. OKUBO,

COMMERCIAL PROGRESS IN SINGAPORE.

WE had lately occasion to speak rather plainly to the community of Singapore on the error they seemed in danger of falling into of allowing Government assistance to take the place of private enterprise, but a statement we have recently seen convinces us that public spirit and energy is still alive in the colony, and already reaping the reward which when well directed it cannot fail to do. It is not many years since the great natural advantages of the new harbour of Singapore were availed of only by the mail and opium steamers and vessels discharging coals at the private wharves, but, during the month of June to July last, the report shows that there lay alongside the wharves at Tanjong Pagar no less than thirty-six steamers and nine sailing vessels, giving an aggregate tonnage of 45,000 register. About 30,000 tons of general cargo and coal passed over the wharves. The Company which affords these facilities to the Eastern trade has, we are glad to see, surmounted the difficulties with which it had to contend, and the opposition it naturally experienced from "vested interests." At the last half-yearly meeting, held on 20th ult., a dividend was declared at the rate of 12 per cent. per annum, and the shareholders will now be recompensed for their confidence in the undertaking and for their "hope deferred." We have been struck with the returns in the report, because during the month June to July last the resources of the wharves were strained to their very utmost, consequent on the illness of the manager and a strike among the coolies. Notwithstanding this there was no long detention of any steamer, and the work went on with less interruption than was the case the other day in one of our own railways, under similar circumstances. Results like these re-establish our faith in the commercial vigour of the colony.

WE learn that the Dutch Government have granted the application made to them for a subsidy to assist in the establishment of a line of steamers between Java and Australia.

MR. FERGUSON, who was lately apppointed Dutch Ambassador to China, has left the Hague to assume the duties of his post.

MR. ROBERT R. PURVIS has been appointed to the post of British Vice-Consul in Sumatra, and will reside at Padang.

MR. O. JOHNSON, Mr. G. L. B. ALLEN, and Mr. R. W. HURST have been appointed student interpreters for China.

Monetary and Commercial.

With regard to the suspension of Messrs. Gledstanes and Co., it is stated that a large number of the bills upon the firm has already been taken up by the holders, and that arrangements are in progress whereby a further considerable amount of the liabilities, as represented by acceptances, will be provided for. An application has been made to the Court of Bankruptcy for the appointment of a receiver and manager of the estate, and the debtors have filed their petition for liquidation. Mr. Harding, of the firm of Harding, Whinney, and Gibbons, accountants, has been appointed receiver. Now that the firm has been placed under the protection of bankruptcy there will be no ordinary meeting of creditors. The suspension of Messrs. Shand, Fairlie, and Co., the correspondents of the firm in Calcutta, is announced.

At the meeting of the Universal Fire Insurance Company, the report for the year ending July last stated that policies had been issued representing premiums to the extent of £4,575, while the losses were £533. A dividend was declared at the rate of 10 per cent. per annum.

Messrs. Mactaggart, Tidman and Co. have received a telegram from Singapore announcing a most successful half-yearly meeting of the Tanjong Pagar Dock Company, and the declaration of a dividend at the rate of 12 per cent. per annum.

The directors of the India-Rubber, Gutta-Percha, and Telegraph Works Company (Limited) have announced an ad-interim dividend at the rate of 5 per cent.

The time for receiving proposals at the United States Post-office Department at Washington, for the additional monthly mail service on the route between San Francisco, Japan and China, authorised by the Act of June 1st, 1872, expired on the 12th ult. The only bid received was from the Pacific Mail Steamship Com-

Digitized by Google

pany, for the sum of $500,000, the full amount authorised by Congress.

Owing to a revival of the Continental demand, Bar Silver has been rather more in request during the last few days; the present price is 60½d. per oz. standard. There is but little to report in regard to Mexican Dollars, of which the supply is limited; prices remain as last quoted, viz., 60d. per oz. for the new coinage, and 62½d. per oz. for the old.

Foreign Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Aug. 28.

At last I have a good piece of news. According to the *Nieuwe Rotterdamsche Courant*, and this paper may be regarded as well informed, the Government has granted a subsidy for a steamship line between Java and Australia, and a credit for this purpose will be asked for by the Minister of the Colonial Department during the forthcoming session. This is certainly a good beginning of Mr. Fransen van de Putte, and will give much satisfaction both here and in the East.

I regret to say that the strike in our cotton district has become more serious. Thousands of weavers decline to work without an increase of wages, which the employers refuse to grant. Some disturbances have taken place, which were, however, by a prompt intervention of the military force, soon suppressed. A number of the workmen have left for Ochtrup, in Prussia, where it is said they can find plenty of work at higher wages than they have obtained here. This has induced many of the Dutch manufacturers to raise their terms, and, this being done, we may flatter ourselves that the affair is at an end. In Amsterdam last Sunday there was a "demonstration" by about six hundred workmen, members of the International League, who went in procession, amidst thousands of curious people, to the house of the Burgomaster to express their wish that he would establish a lower scale of house-rent for the workmen than now obtains, and further intervene that he would induce the Government to prohibit the export of all food supplies. It is a terrible wrong, they urged, that our cattle, our potatoes, our fruits, our vegetables should be exported to England, and that they should in consequence be obliged to do without these things, because prices had increased enormously. Of course the Burgomaster could not promise to comply with these requests, and he merely urged the men to return in peace to their respective homes. This advice was adopted, so that public order was not disturbed. The authorities have, however, taken the necessary measures to prevent a repetition of such a manifestation, which may be regarded as preliminary to the pending assemblage of the Internationale at the Hague.

In the early days of September the Dutch-Flemish Literary Congress will meet at Middleburg. Care has been taken to make known the fact that this Congress has nothing at all to do with politics, in order to prevent any Flemish demonstration. It thus creates much astonishment and regret that the Antwerp "water-beggars"—as the Dutch patriots are called—have made use of this occasion for a political manifestation. Our Antwerp friends intend to erect a monument at Souburg in remembrance of Marnix van St. Aldegonde, one of the leading "beggars," who in 1572 captured by surprise the town of Brielle.

A meeting of shareholders of the Company *Nederland* was held yesterday at Amsterdam, with the object of appointing three managers. After a somewhat animated discussion the following gentlemen were nominated:—Messrs. J. Boissevain (200 votes), M. L. J. van Asperen (257 votes), C. W. J. Ramann (142 votes). The last-named will continue at the same time in his office as manager of the Royal Steam Shipping Company, which is certainly somewhat singular. The few votes by which he was elected proves that the members were for a good part of opinion that one person, however eminent he may be, should not manage two companies at the same time. A commission has been appointed by the managers to investigate the "screw question," in order to throw some light upon the somewhat mysterious manner in which the steamers of this company have lost so many screws. This commission is an amalgamation of scientific men, and their report will, without doubt, be of much interest scientifically, but the public—as is proved by correspondence published in the newspapers—would prefer that the company should first take care to provide the steamers with better fittings, which would not so easily be lost, and afterwards if they please institute any technical investigations they may consider necessary. It is advertised that the steamer *Prins van Oranje* will sail at the end of next month or in the beginning of October. The *Conrad* has just left Nieuwe Diep, and amongst her passengers is Mr. Ferguson, our new Ambassador to China.

The official paper, the *Staatscourant*, has published satisfactory news about the military expedition to Deli, which was announced in a somewhat misty way by the Batavia papers. In fact the Colonial newspaper reports—especially those of the *Java Bode*—were so greatly exaggerated that everyone was convinced that military operations on a grand scale were on the *tapis* in Sumatra, and Mr. Kolff hastened to publish a map of the expected scene of operations.

The Bourse still remains very dull, but prices are generally well supported. The chief operators are still enjoying their holidays, but the weather having become, within the last few days, very cold and damp, it is thought that they will soon return, and that there will be a revival of business.

Mr. Bredius, who was lately attacked by severe illness, is now better, he expects to be able to return from Carlsbad to attend the sittings of the Second Chamber, when they are opened, on the 16th September.

The general-major of the East India Army, Mr. D. L. de Brabant, has been pensioned.

PRODUCE MARKETS.

The Trading Company's Coffee sale, which took place here last week, has fully borne out by its result the favourable opinion which has prevailed of late for this article, and which continues to be firmly maintained since the sale. The quantity realised has been wholly secured for consumptive wants, and several descriptions continue to be inquired after at the auction prices. With regard to other leading articles but little change of note has occurred in the position of our market, but the turn has been for the better, and amongst other articles Tin has assumed a firmer appearance.

COFFEE.—The Netherlands Trading Company resumed their monthly public sales by offering about 83,600 bags Java, Menado, and Padang, which found buyers at further advanced rates as follows, viz.:—

		Valuations. cts.	cts.		Prices paid. cts.	cts.
1,988	B. Java, Preanger brown to yellow ...	55	to 59	...	55¾	to 58½
7,305	„ Do. „ pale	48½	to 49½	...	48½	to 51
4,609	„ Menado	53½	to 57	...	56¾	to 59
6,168	„ Padang	47½	to 49	...	47½	to 48½
12,512	„ Java, yellow to pale	47½	to 49½	...	47¾	to 48¾
7,462	„ Do. pale greenish	47	to —	...	47½	to 47¾
6,204	„ Do. green	46½	to —	...	46¾	to 47
13,088	„ Do. Tagal	46½	to 47	...	46¾	to 47
17,218	„ Do. Malang, Bangil, and Tenger ...	44	to 47	...	45½	to 47
7,049	„ Do. thoroughly damaged	—	to —	...	—	to —

It will be seen that the prices paid range mostly ¼c. to 1c. above the valuations, and for the Menado from 1½c. to 4c. above, whilst on the other hand the Padang sold ¼c. to 1c. below. Good ordinary pale greenish Java realised 47¼c. to 47½c. Solo and Malang 46¾c. to 47c. Since the public sale a firm tone has continued to prevail in the market, and several numbers are still sought after, especially the pale kinds, which have sold comparatively cheap. Sales have been closed by private contract of two small shipments.

COTTON has exhibited more firmness, a fair demand having continued to prevail for export. Prices are well supported. American low ordinary 54¼c. to 55c., middling 55c. to 55½c.

SUGAR remains very dull, and there are no sales to report.

TEA.—The business doing continues to be confined to small lots from second hands.

TOBACCO.—About 8,000 bales of several marks Java have changed hands. The very high prices ruling serve to check transactions.

SPICES.—The business done has embraced 27 packages Nutmegs and 43 packages Mace, ex Conrad and Noach I., on secret terms, whilst sales have been closed on secret terms at Amsterdam of 53 cases Nutmegs, ex H.W.M.

RATTANS.—Prices keep firm, but no sales are to be mentioned. Ordinary descriptions are less inquired after.

TIN.—Although prices have stiffened a little transactions have been upon a limited scale. Banca has sold for usual prompt at f.94, and for delivery, ex the coming autumn sale, at f.91, f.91¼, f.91.

HIDES.—Some small parcels, together about 1,000 ps., ex several vessels, have found buyers, at prices which of course are kept secret.

INDIGO.—There is no change to report in the market. The scanty stock on hand of fine soft sorts, which are almost exclusively in request, does not admit of any transactions of note being concluded.

RICE remains very quiet, and there are no sales worth notice to report.

SHIPPING.

ARRIVALS.—Aug. 20, at Flushing, from Akyab, J. H. Stetson; 25, at Brouwershaven, from Batavia, Henderika; from Akyab, Ruby; from Rangoon, Anna, Leonilda Simosi; 26, at Texel, from Probolingo, California; from Calcutta, Algonquin; at Flushing, from Akyab, Tanore; 24, at Zierikzee, from Banjoewangie, Haamstede; from Rangoon, Catarina Petra; 27, at Brouwershaven, from Rangoon, India; at Flushing, from Akyab, R. C. Rickmers.

DEPARTURES.—Aug. 21, from Texel, for Macassar, Helena and Henriette; 24, from Texel, for Batavia, Conrad (str.).

PASSENGERS OUTWARD.—For Java, per Steamer Conrad, Messrs. H. J. van der Plas, J. H. Ferguson and family, F. Cameron, J. Coupérus, J. J. Borst, R. van Stigt, J. J. C. van den Abeelen, A. J. Ovink, C. Ten Brink, J. A. van den Biggelaar, J. A. Schonewald, A. S. J. van Kesteren and family; W. J. M. Georges, C. M. Haccow, J. B. Paling, H. C. Verbraak, W. Littel, H. L. Welther and family, V. A. E. Vuroschki, J. C. van Beusekom, D. T. M. Price, G. H. Prikken, H. Tjaskes, A. Herman and family, W. J. van Dorp and family, K. F. Glaser, H. J. de Nys, Mrs. Bool and family, Messrs. E. Retemeyer, Mr. M. F. van Schaick.

PASSENGERS INWARD.—From Java, per Haamstede, Messrs. Tieleman and family, Spanjaard, Nuizink and family, Veenema and family, per Henderika, Mr. W. Fuyk.

ARTICLES OF IMPORT.

TEA.

Messrs. Capel and Co.'s Circular says:—

We have still to report a quiet tone in the market, the amount of business being only limited, but prices generally have been fairly maintained. The demand has chiefly been for good medium and fine to finest black-leaf kinds. The quantity of Foochow Teas on offer has been in excess of the want of buyers, and the sales made have been at rather irregular prices, but showing some slight decline on last week's rates, notwithstanding the firmness of holders. The deliveries for the week amount to 3,634,360 lbs., against 3,041,080 lbs. last year.

Black: Red leaf kinds: Siftings have sold, at public sale, from 3½d. to 3¾d. per lb., being again rather lower. Broken leaf kinds remain as before. Fair to good common has been in request at fully previous prices. Fair to good Kaisow and Saryune kinds have sold rather lower. In fine to finest business has been small, but previous prices have been maintained. In Pak Lin kinds the few sales made show no alteration. Black leaf kinds: Low qualities remain as before; some sales, of old import, have been made at 1s. 2d. to 1s. 3d. for fair to good medium kinds. In new, fair has been sold at 1s. 1½d. to 1s. 2d.,

Digitized by Google

fair to good medium from 1s. 3d. to 1s. 8d., fine from 1s. 9d. to 2s., and finest from 2s. 1d. to 2s. 5d., being fully former prices. New-make kinds: Some low have been sold, at public sale, from 7½d. to 9d. per lb. Fair to good show no change. Oolongs: Fair to good have been difficult of sale, fine to finest have been wanted for export. Souchongs: Some sales of fine to finest have been made from 1s. 10d. to 2s. 6d. per lb. Scented Teas—Canton Capers: A few sales have been made at former prices. Foochow kinds have also been taken at former rates. Canton Orange Pekoes show no change. Foochow kinds have sold rather more readily, from 1s. 7d. to 1s. 11d. for good to fine quality. Uncoloured Japans: The better qualities have been fairly saleable; common kinds neglected. *Green*: There has been but little alteration during the week; a small invoice of about 500 packages was sold by public auction on the 26th inst., at previous prices. Privately, the demand is limited at the high prices current. Canton kinds have sold at public sale from 1s. 2½d. to 1s. 5½d. per lb., being former prices.

On the 26th ult. 850 packages new season's, per Enterprise, from Shanghai, comprising 360 chests new season's Congou, 318 half-chests Gunpowder, 56 do. Imperial, and 116 do. Young Hyson, were sold by auction, the whole being without reserve. There was a fair attendance, but the Green met a poor competition, and prices ruled rather under those for similar kinds on the 19th inst. The Congous brought the valuation. On the 27th a total of 8,212 packages China was offered, the whole without reserve, and 7,900 packages found buyers. The new season's Congous met a better demand and brought firmer prices; but old season's, of which the bulk consisted, went off slowly at former rates. 506 half-chests new season's Moning Congou, per Drummond Castle, sold at 1s. 6½d. to 1s. 7½d., 772 boxes do. do. at 1s. 9d., and 250 boxes, per Menelaus, at 1s. 3¾d. to 1s. 4d., also 420 boxes Ningchow, per do. at 1s. 8½d. to 1s. 9¾d.; 910 boxes new district Congou sold at 8¾d. to 9d.; 762 chests and half-chests old Kaisow siftings import 1869, brought 3d. to 4d., 336 chests common to medium do. 9½d. to 1s. 0¾d., 394 Oonfa at 1s. 2½d. to 1s. 2¾d., 672 boxes Shantam at 7½d. to 8d.; 451 chests Moning Congou, per Avona, sold at 1s. 2d. to 1s. 2½d., 500 boxes at 1s. 3¾d., and 400 half-chests Ning Chow at 1s. 2d. to 1s. 2½d.; 354 boxes new season's Moyune Gunpowder, per Diomed, brought 1s. 2½d. to 1s. 5½d. per lb.

SILK.

There is very little business to report in Silk this week; the general trade still holds back, and as importers are everywhere firm, sales are made with great difficulty. Quotations of China Silk are unchanged. In Cantons there is nothing doing beyond a few sales of Loong Kongs at 19s. to 21s. Tsatlee reel is still quoted at 19s. for market quality, but without business doing. For Japans there has been rather more inquiry within the last few days, but with hardly any corresponding increase of business.

COFFEE.

The market has become decidedly dull, and the public sales have gone off with less demand than for some time past, and prices show a slight decline. The bulk has consisted of Plantation Wynaad, which sold 6d. to 1s. per cwt. lower, Ceylon also selling rather below last week's prices. The latest prices paid for Plantation Ceylon have been triage, 70s. to 76s.; small, 76s. 6d. to 80s.; fine fine ordinary, 78s. 6d. to 79s.; low middling, 79s. 6d. to 81s.; middling, 81s. 6d. to 83s. 6d.; bold, 84s. 6d. to 85s. 6d.; peaberry, 96s. to 99s. There has been no movement in Native Ceylon or other East India.

The landings last week consisted chiefly of Ceylon and Costa Rica, and exceeded those of the previous year by 320 tons; the deliveries showed a falling off, and were 650 tons less than in 1871, the deficiency in the stock being slightly reduced. The quantity of Ceylon Coffee afloat for Great Britain is estimated as follows:—Plantation, 70,897 cwt., against 124,534 cwt. at the corresponding date of 1871; Native, 16,336 cwt., against 19,247 cwt. The quantity of Coffee landed in the thirty-four weeks ended Aug. 24, 1872, was, of Ceylon, 23,207 tons, against 30,002 tons during the corresponding period of 1871; of all descriptions, 43,555 tons, against 54,240 tons. The quantity entered for home consumption was, of Ceylon, 7,116 tons, against 7,805 tons; of all descriptions, 12,402 tons, against 13,758 tons. The quantity exported was, of Ceylon, 16,032 tons, against 22,732 tons; of all descriptions, 30,878 tons, against 41,598 tons. The stock on Aug. 24 was, of Ceylon, 21,746 tons, against 13,070 tons; of all descriptions, 19,979 tons, against 23,693 tons.

CINNAMON.

Messrs. Carrick, Hill and Co. report:—The quarterly sales took place on the 26th ult., and comprised 1,759 bales Ceylon Cinnamon and 1,747 bags Cinnamon Chips. The finest marks were sparingly represented, while medium marks of a more recent date exceeded in quantity and quality the last four sales. Two well-known marks showed a decided falling-off in thinness of quills, which may be accounted for as two months previous to the peeling time heavy rain fell, and perfectly inundated these special plantations. Concerning Chips we observe that the unfair practice of mixing them with plain trunk shavings is still continued. Shippers, however, will soon discover their error, as they did two years ago, in mixing good quills with bastards. Finest, fine, and good quills sold at last sale's prices; medium and ordinary 1d. to 2d. cheaper, compared with last quarterly sale prices of the 27th May; broken 2d. to 3d. cheaper.

Of the quantity offered 1,877 bales were sold at the following prices, and 382 bales were withdrawn.

GARDEN CINNAMON.

First Sort,	really superior picked quill	3s. 7d. to 3s. 9d.
	fine pale quill...	3s. 5d. to 3s. 6d.
	middling to good	3s. 1d. to 3s. 4d.
	ordinary and sea damaged	3s. 3d. to 3s. 4d.
Second Sort,	fine bright quill	3s. 3d. to 3s. 4d.
	middling to good ditto	3s. 1d. to 3s. 2d.
	ordinary to middling ditto...	2s. 10d to 3s. 0d.
	Sea damaged	2s. 5d. to 2s. 9d.
Third Sort,	fine	2s. 8d. to 2s. 11d.
	good middling to good	2s. 6d. to 2s. 7d.
	ordinary and sea damaged...	2s. 4d. to 2s. 6d.
Fourth Sort,	sound	2s. 1d. to 2s. 4d.
	sea damaged	1s. 8d. to 2s. 0d.
Broken,	sound	2s. 0d. to 2s. 3d.
	sea damaged	1s. 8d. to 1s. 11d.
Chips, 1,747 pkgs. (outside Bark), mostly medium quality, partly mixed with white tasteless wood shavings, only partly sold		0s. 2½d. to 1s. 8d.

Stocks: 6,003 bales, of which 3,896 bales are old and of former sales, and 2,107 bales of recent importation, and mostly passed this day in sale. The 6,003 bales consist of 2,462 bales real Plantation, and 3,541 bales Bastard Cinnamon. Stock of Chips, 15,825 bags. The next quarterly public sales will take place on Nov. 25, and will consist of about 1,400 bales.

SUGAR.

The market has shown extreme depression during the week; at the public sales few offers have been made and only a small portion sold on reduced terms, and by private contract a further decline has also been accepted; in public sale 852 bags washed clayed Manila have been sold at 25s.; privately 7,000 bags date Penang have been sold at 22s., being cheaper; and business has been done in Java to the extent of about 700 tons fine strong quality (duties 5s. 3d. and 5s. 8d.) at 33s.

The comparative deficiency in the stock has been further reduced, and is now little more than 14,000 tons. The landings last week were 550 tons less than last year, but the deliveries were 1,700 tons less. Stock, Aug. 17, 56,182 tons, against 73,484 tons; Aug. 24, 58,670 tons, against 72,812 tons. The quantity of Sugar landed in the thirty-four weeks ended August 24, 1872, was, of Penang, 2,873 tons, against 974 tons in the corresponding period of 1871; of Manila, Java, and China, 16,435 tons, against 16,399 tons; the quantity entered for home consumption was, of Penang, 1,625 tons, against 2,922 tons; of Manila, Java, and China, 18,623 tons, against 22,501 tons. The quantity exported was, of Penang, 71 tons, against 184 tons; of Manila, Java, and China, 991 tons, against 1,054 tons. The stock on August 24 was, of Penang, 1,613 tons, against 844 tons; of Manila, Java, and China, 9,746 tons, against 20,638 tons.

COCOA-NUT OIL.—The market is steady at £35 10s. to £36 for Ceylon, and £38 to £38 10s. for Cochin.

COIR GOODS.—At the public sales the supply of Yarn was small and the whole found buyers at previous rates; 452 bales Cochin sold, low coarse at £24 5s. to £24 15s., low middling to middling at £29 5s. to £33 5s., good middling to good well-made yarn at £34 to £38 10s., 44 tons do. sold, coarse roping at £20 to £22 5s., low to common £25 5s. to £27 15s., good common £28 15s.; 41 tons Ceylon sold, coarse roping at £21 5s. to £22 10s., common to middling £27 10s. to £31; 104 bales from Liverpool at £22 to £23 15s., ordinary £18 5s., also 100 bales Cochin Fibre sold at £14 10s. to £16 5s., and 5 tons Ceylon at £16 10s. to £16 15s., ordinary £12, bristle at £38 per ton.

CUTCH continues very dull; at auction 500 boxes Pegu were bought in at 24s. 6d. per cwt.

CHINA PRESERVES.—An offer of 30 cases Ginger was quitted at 8½d. to 8¼d. per lb.

GAMBIER.—There have been no transactions since our last report.

GALLS.—China have slightly advanced, a sale having been effected of 100 cases at £2 16s. 9d. per cwt.

GUM BENJAMIN.—Of 181 cases Sumatra offered in public sale 20 cases greyish seconds sold at £7 12s. 6d., and 53 cases brown almondy thirds at 70s. to 80s., 1 lot 82s. 6d. per cwt.

HEMP.—Manila continues quiet, and only 176 bales have been quitted during the week, good fair roping realising £48, and white Quilot £55 5s. per ton.

INDIA-RUBBER.—At auction 83 packages Borneo have been sold at 1s. 6d. to 1s. 10d. per lb.

OILS.—Privately 15 cases Anniseed are reported to have been sold on the spot at 12s. 6d. and 5 cases at 13s. cash.

MUSK.—In public sale 35 caddies Tonquin sold, fair to good shaped pods 37s. 6d. to 39s., rough and bally mixed with some flat 22s. to 24s. 6d., wet pickings 23s. 6d. to 25s., trimmings 10d. to 1s. Of 10 tins Grain offered 5 tins sold, dark and damp to good at 44s. to 55s.

PEPPER.—*Black*: A good supply brought to auction has met a moderate demand, and steady rates have been obtained. Penang has sold at 6¾d., Singapore sea-damaged at 6¾d. for first class. *White*: In auction fresh Singapore has sold rather dearer, viz., at 1s. 1½d. to 1s. 1¾d. Large contracts are reported for forward delivery, Oct.-Nov.-Dec. at 1s. 1¼d., and last four months also at 1s. 0¼d.

RICE.—Although there is a good demand for all kinds of cleaned at full rates, scarcely any enquiry exists for the rough article, and no sales on the spot. Afloat two cargoes have been sold, viz., the Amaranth, 1,175 tons Rangoon, arrived off coast, at 9s. 10½d. ex ship for London; and the Secunda (str.), 850 tons Necrausie, July sailing, at 9s. continental terms.

SPICES.—*Cinnamon*: See report of quarterly sales above. Privately since the sales 30 bales Ceylon have been sold, second sort at 2s. 10d., low and ordinary second and third at 1s. 5d. to 2s.; also 138 bags Chips at 4d. to 4½d. *Cassia Lignea*: 20 cases sold at 92s. to 93s. *Nutmegs*: Of 21 cases Penang offered 16 cases sold, average 67 nuts to the lb. at 3s. 9d., 107's to 103's at 3s. *Mace*: 1 case fine bold pale Penang sold at 4s. 9d.; of 13 cases Singapore offered 3 cases low dark and broken sold at 3s. 4d.

SAGO.—At public sale 736 bags small pearl were offered and sold at previous rates—good to fine bright at 16s. 6d. to 17s. per cwt.

STAR ANNISEEDS.—Privately 25 cases have been sold at £5 15s. per cwt.

TAPIOCA.—In public sale 1,441 bags Singapore were offered, and nearly all sold at firmer rates—fine white 2¼d. to 2¾d., good 2¼d. to 2½d., Malacca 2½d. *Pearl*: 175 bags medium Singapore sold rather dearer at 26s. 6d. *Flour*: 20 bags sold at 1¾d.

TIN.—There is a steady demand, and Straits in small quantities can be obtained at £147, but the greater part of the stock is held for higher prices. Straits to arrive is quoted £146 to 148; Banca £158; Billiton £150 per ton; Banca showing no change, but Billiton being £2 lower compared with last mails quotations.

ARTICLES OF EXPORT.

—o—

METALS.

IRON.—Welsh: Rails, £11 10s. to £12 10s. Bars, £13 to £13 5s Staffordshire Best: Bars, £16 to £16 10s.; Nail Rods, £15 10s. to £16 10s.; Hoops, £17 to £17 10s.; Sheets, £20 to £24; Scotch Pig, No. 1, £6 10s. to £7 5s.; Swedes, Bars, Hammered, £16 10s.; Swedes, Steel in kegs, ½ and ⅝ in., £18.

YELLOW METAL.—Sheets, 4 by 4 ft., 9d. to 9½d.; Sheathing and Rods, 9d. to 9½d. per lb.

TIN.—English Refined, £153. Tin Plates: Charcoal I C, per box, 45s. to 48s.; Coke, 42s. to 45s.

LEAD.—W.B., nominal; do., other brands. £20 to £20 5s.; Spanish, soft, ex ship, £19 15s.; Sheet, £21 5s. to £21 10s.; Shot (kegs extra), £23 5s.; White, do., £27 10s.; Red do., £23 5s.

SPELTER.—Silesian, £22 10s. to £23; English, smelted from ores £23 10s.

QUICKSILVER.—In bottles of 75 lbs. each, £12 5s. to £12 10s.

Messrs. French and Sm th's Circular says:—Business continues dull. Iron: No change. Copper: On the 27th inst. the smelters reduced quotations, making tough £103, best selected £105, manufactured £110. The foreign market has had a downward tendency, good ordinary Chili bars being worth £90 per ton, and Wallaroo £98 to £99. Lead is firm at quotations.

MANCHESTER GOODS.

Since the 23rd inst. there has been no increase in demand, either for Yarns or Goods, and the business transacted has been so limited that prices have barely been tested. At the close the Market presents the same tame appearance, and although the tendency is slightly in favour of buyers, producers have on the whole adhered steadily to their quotations, which their previous engagements have enabled them to do.

WOOLLEN AND WORSTED GOODS.

The current quotations in the Leeds market for Woollens and Worsteds rule as follows:—

Spanish Stripes, 62 in., 19 yards, Elephant Chop, 3s. 6½d. per yard for scarlet; Long Ells, 30/31 in., 24 yards, Lion Chop, 34s. 6d. per piece for scarlet; Camlets, best SS, 30/31 in., 58 yards, Elephant Chop, 80s. per piece for scarlet; Lastings, 31 in., 30/31 yards, Lion Chop, 72s. per piece for gentian; Brocades, 31 in., 29 yards, Half Moon Chop, 25s. 6d. per piece for scarlet.

NEW YORK MARKET REPORT.

—o—

TEA.

The market is very dull, and though we do not alter quotations they are weak and in buyers' favour. Holders for the most part decline making concessions to any extent, and business in invoices is very quiet. There has been a fair line trade, the sales being 1,350 half-chests Oolong, 300 do. Souchong, 1,200 do. Green, and 4,938 do. Japan. By auction 200 half-chests Oolong sold at 34½c. to 37c. cash. The current quotations rule as follows:—Hyson: common to fair, 45c. to 52c.; superior to fine, 55c. to 68c.; extra fine to finest, 70c. to 95c. Young Hyson: Canton-made, nominal; common to fair, 38c. to 45c.; superior to fine, 52c. to 75c.; extra fine to finest, 80c. to $1.15. Gunpowder and Imperial: Canton-made, nominal; common to fair, 55c. to 65c.; superior to fine, 75c. to 92c.; extra fine to finest, 95c. to $1.40. Hyson Skin and Twankay: Canton-made, nominal; common to fair, 28c. to 31c.; superior to fine, 33c. to 35c.; extra fine to finest, 36c. to 40c. Uncoloured Japan: common to fair, 40c. to 46c.; superior to fine, 50c. to 65c.; extra fine to finest, 70c. to $1.05. Oolong: common to fair, 35c. to 40c.; superior to fine, 45c. to 62c.; extra fine to finest, 68c. to $1.05. Souchong and Congou: common to fair, 25c. to 35c.; superior to fine, 40c. to 57c.; extra fine to finest, 60c. to $1.05.

The total receipts of Tea from China and Japan at the port of New York from Jan. 1 to July 1, 1872, were as follows:—Greens, 16,275,432 lbs.; Japans, 8,252,649 lbs.; Souchongs, 2,657,814 lbs.; Oolongs, 10,972,749 lbs.; other sorts, 83,397 lbs.; total, 38,242,047 lbs. The stock on Jan. 1 was 19,708,564 lbs.; which, added to the above total, gives a result of 57,950,611 lbs. as the total supply. Subtracting from this total the exports from Jan. 1 to July 1, 3,183,072 lbs., and the withdrawals for home consumption during that period, 15,501,319 lbs., there remains a total of 39,266,220 lbs., representing the stock on the last-named date.

COFFEE.—There is a very quiet but firm market for Brazil. The demand at the moment is moderate, and chiefly confined to the good and better grades, which continue scarce, and held for the most part above the views of buyers. The lower grades are more accessible, but the whole market may be written firm at previous valuations. For other descriptions the market is fairly active at steady rates. The only sale of East India has been 2,250 bags Government Java at 18¾c. gold.

CORDAGE.—Manila has declined half a cent, and Sisal Rope 1c. per lb., New Zealand being without change. The revised figures are: Manila Cordage, sizes above 12-thread, 19c.; 6-thread and 9-thread (¼ inch and 5-16 inch. diam.), 20c.; 12-thread (⅜ inch. diam.), 19½c.; Manila Hay Rope, 19½c.; do. Cordage, Bolt Rope Yarns, 21c.; do. 6-thread and 9-thread, 22c.; Tarred Manila, 18½c.; fine Tarred Manila Lath Yarn, 20c.; Sisal Rope, sizes above 12-thread, 16c.; 6-thread and 9-thread, 17c.; 12-thread and Hay Rope, 16½c.

CAMPHOR.—China is quoted 18c. to 19c. gold in bond.

CHINA PRESERVED GINGER rules at $8.50 currency, duty (35 per cent. *ad val.*) paid.

ESSENTIAL OILS.—Aniseed is quoted $2 gold, and Cassia $1.45 gold, duty (on Aniseed 50c., on Cassia 100c. per lb.) paid.

GAMBIER is quoted at 4½c. to 4⅝c. gold; market dull.

GUNNY BAGS.—We note sales of 50 bales Borneo at 15½c. currency.

HEMP.—There is but little doing at the moment in Manila, owing to the expectation of the arrival of a considerable supply of that description, in view of which buyers are holding back. The sales of the week have been 100 bales at 10⅞c. thirty days, and 1,800 bales at 11c. sixty days, and 1,247 bales at 11⅛c. sixty days, all gold.

INDIGO.—The market is without alteration.

RICE.—Rangoon continues without change, being fairly active at last quoted rates, viz., $7 to 7.37½ currency duty paid, and $3.12½ to 3.35 gold in bond. About 4,500 bags have been sold during the week.

SUGAR.—The business since our last has been to only a very moderate extent, refiners confining their purchases to their immediate wants, which, during the "heated term," have been reduced to minimum proportions. There is, however, no lack of firmness on the part of holders; indeed, with favourable accounts from Cuba, &c., they have somewhat enhanced their pretensions, and the market is strong at previous quotations. There has been no business in East India descriptions.

SPICES.—The market for all kinds continues in a strong, healthy condition, with a pretty large aggregate jobbing trade, but no movement in invoices. We note free sales in lots of pepper at 17c. for Sumatra and 17¾c. for Singapore; Cassia, 28c.; Penang Nutmegs, 95c.; Cloves, 20c. to 21c.; Mace, $1.15 to 1.20, all gold.

TIN continues quiet; we quote Straits nominal at 35c., and Banca 15c. gold.

Insurances.

By steamers via S.C., or sailing vessels, f.p.a.:—To Yokohama, steamer 35s., ship 40s.; to Shanghai, steamer 30s., ship 40s.; to Hong Kong, steamer 25s., ship 35s.; to Singapore, steamer 20s., ship 25s. to 27s. 6d.

CASUALTIES.

Advices received from Aden, dated 13th Aug., say:—The damaged cargo recommended to be sold ex Tweed (str.), from Canton (as reported by telegraph from Aden on the 15th Aug.), consists of 278 quarter-chests of tea.

The master of the Tweed reports the Parnassus (str.), from Hankow to London, ashore at Guardafui, as standing firm, with the sea breaking clean over her.

The Maria Adolfina, Bakker, from Batavia, put into St. Helena, 15th July, with a leak forward, and with loss of cutwater and head rails; she was surveyed twice, and on the cargo being shifted aft, the leak was raised sufficiently to be stopped, and the vessel proceeded for Falmouth on the 23rd.

The Falcon, Sharman, from Sourabaya, put into St. Helena, 16th July, leaky, but proceeded, 19th, for Amsterdam.

The Callisto, from Colombo, to London, put into St. Helena, 16th July, with loss of sails, &c.; she, however, proceeded, 18th, for her destination.

The Bestevaer, from Batavia, to Amsterdam, passed St. Helena, 16th July, with loss of foretopmast.

The Prince Alfred (barque), Pfeiffer, from Hiogo, to New York, which put into St. Helena, 13th July, making water, &c., was surveyed on the 18th; the surveyors considered the leak as of no importance, but recommended that the foremast head should be strengthened and the vessel proceed. Another survey held on the Prince Alfred, on the 27th July, recommended that she should be listed and caulked, and where the copper was off, the same to be replaced.

MISCELLANEOUS.

Advices received from Suez, dated 15th Aug., state that three sales had taken place, two on the 22nd and one on the 23rd, of goods which had been thrown overboard by the Excelsior (str.), from London to Colombo, &c. (via S.C.), when aground in the Red Sea; the total amount realised was £945, the number of articles sold, 3,953, consisting of shawls, muslins, umbrellas, &c., all much damaged by sea water. Since the sale of the above goods several vessel have arrived, bringing about 9,500 pieces stuffs, 60 barrels of beer, 2 packages wire rope, some sewing machines, &c.; these goods have been warehoused, until instructions arrive for their sale. The sewing machines were, with one exception, incomplete. A large quantity of stuffs are still expected. A telegram received from Port Said, dated Aug. 26th, announces that the goods ex Excelsior (str.), from London to Colombo, &c. (via S.C.), which were landed at Suez, would be sold there on the 27th.

Off Ascension, July 23, Cœur de Lion: 25, from Colombo, to London, Pauline (Dutch); from Batavia, for Falmouth, Lady Palmerston; from Colombo, for Llanelly (?).

At St. Helena, July 15, Gravenage, Alberts, from Batavia, and sailed 16th, for Rotterdam; 17, Auriga, Alderton, from Sarawak, and sailed 18th, for London; Mina v. Bruggers, from Batavia, and sailed 18th, for Rotterdam; 18, Tony, Petersen, from Manila, and sailed 20th, for Falmouth; 19, Coleroon, Montgomery, from Penang, and sailed 20th, for London; 21, Nederland v. Ingen, from Batavia, and sailed 22, for Amsterdam; 27, Andriana Petronella de Bruck, from Batavia; 28, Kennemerland de Jong, from Batavia,

NOTICE TO MARINERS.

China.—Reported Danger off Breaker Point.—Information has been received that the Ocean Steamship Company's vessel Ulysses, on her passage from Hong Kong to Shanghai, struck on a wreck, or rock, off Breaker Point, carrying away her rudder. From a position near, in 13½ fathoms water, the following bearings were taken:—White Rock, W.N.W.; Flat Rock, N. by W. ½ W.; Dome Hill, North. These bearings place the danger in lat. 22 deg. 52 min. 20 sec. N., long. 116 deg. 27 min. 50 sec. E.—Hydrographic Office, Admiralty, August, 1872.

GLYCERINE
DE
TOILETTE.

HEALTH.) **NEW PERFUMERY.** (BEAUTY.)

INVENTED BY

EUG. DEVERS, QUIMICO.

PATENTED S.G.D.G.

PREPARATIONS for the Toilet, and particularly Soaps; Powders, &c. for the Teeth; Toilet Washes, and Vinegars, have of late assumed an importance in proportion to the demand for them. Foremost amongst these is GLYCERINE, a remarkable unctuous substance, which softens the skin without greasing it; its valuable qualities were quickly recognised by the most eminent physicians. Experimented on by MM. Dumarquay and Sutom (See "Reports and Memoirs of the Biological Society, 1836," &c.).

GLYCERINE CREAM for the skin.
GLYCERINE TOILET WATER for baths and ablutions.
GLYCERINE ELIXIR for the mouth.
GLYCERINE POMADE against scurf.
GLYCERINE SOAP for chaps and chilblains.
GLYCERINE ANTIPELLICULAIRE to prevent the hair falling off.
DULCIFIED GLYCERINE CREAM SOAP for the beard.
PATE DENTIFRICE à la GLYCERINE for the teeth.

HOLLOWAY'S OINTMENT

AND PILLS.—EVERY DAY WANT—Skin diseases, blotches, and unseemly eruptions, which prevail frequently and annoy much, can be removed with facility by this cleansing and cooling Ointment, the salutary properties of which over all cutaneous affections have been long and indubitably established. Moderate doses of Holloway's Pills should be taken while the outward ailment is being treated with this Ointment. They will depurate the blood, and free it from every taint that may induce a relapse, deteriorate the general health, or otherwise act injuriously. By promoting digestion, and by purifying the circulation, Holloway's Pills ever help to eradicate the many rashes and spots, always mortifying evidences of infirm stomachs, and frequently the heralds of serious illnesses and mortal maladies.

ESTABLISHED 1807.

SUCCESS IN INDIA,

AND HOW TO ATTAIN IT.

EFFINGHAM WILSON, Royal Exchange.

The writer is evidently well acquainted with the East, and the information afforded by him is both useful and interesting.—*Daily News.*

The honest yet hopeful way in which practical information is communicated in these pages concerning actual life in India will awaken the dormant enterprise of young men of education and ability, whose prospects may be somewhat indifferent at home.—*Globe.*

A valuable little pamphlet.—*Morning Post.*

The author of this very sensible work appears quite at home in his subject.—*Financier.*

We leave the little book with much the same impression as would be derived from the conversation of an intelligent and observant man of the world.—*Bulliomis.*

A real and practical knowledge has been brought to bear upon the subject.—*Money Market Review.*

The author of the above-named pamphlet formerly editor of the *Indian Examiner*, and since on the staff of daily and weekly journals in London, seeks a re-engagement as editor in China, Japan, or Ceylon. The advertiser has a thorough knowledge of the practical working of a newspaper, and could undertake the business department also.

Address, J. D. B., care of the Editor of the *London and China Telegraph*, 2, Cowper's-court, Cornhill, to whom references are kindly permitted.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.

Messrs. MACTAGGART, TIDMAN, and CO., 34, Great St. Helens.

E. M. SMITH, Manager.

JAPAN AND CHINA.
Great Mail Route via New York and San Francisco.

THE MAILS, &c.

The advices by the Pacific mail steamer *Japan*, bringing the above dates from Japan, reached us on the 6th inst., *via* San Francisco and New York. From China and the Straits we have no later advices, the Messageries Maritimes steamer *Tigre*, ringing the French mail from Shanghai July 21, Hong Kong July 27, Singapore Aug. 5, which was due this day, having been disabled by the breaking of her screw during her passage through the Suez Canal. The mails have been transferred to another of the company's steamers, the *Said*, and may be expected on the 11th or 12th inst. The following inward (P. and O.) mail, with dates Yokohama July 24, Shanghai, July 28, Hong Kong Aug. 3, Singapore Aug. 11, is due, *via* Brindisi, on Monday next, the 16th inst.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, four to five hours in transmission. Telegraphic communication between Shanghai and Nagasaki is still interrupted.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer *Hindostan*, from Southampton, Aug. 29.—To Yokohama: Mr. Klasen. To Shanghai: Mr. G. M. W. Playfair, Mr. W. Holland, Mr. M. F. A. Fraser, and three second-class passengers. To Batavia: Mr. S. Welch, Mr. Jarman, and two second-class passengers. To Singapore: Mr. G. Magalkarn, Mr. Nai Bin Surrawongse. To Ceylon: Miss Lloyd, and two second-class passengers.

Per P. and O. steamer *Moolian*, from Brindisi, Sept. 9.—To Yokohama: Mr W. Gowland. To Hong Kong: Mr. E. H. Lovers, Mr. G. Harleman. To Galle Mr. G. R. and Mrs. Scott.

Per P. and O. steamer *Pekin*, from Southampton, Sept. 12.—To Yokohama: Mr. and Mrs. Cheesman. To Ceylon: Mr. W. Moss, Mr. McGregor, Mrs. Puckle and child.

Per P. and O. steamer *Pera*, from Southampton, Sept. 19.—To Hong Kong: Mr. C. F. Sangster.

Per P. and O. steamer *Candia*, from Brindisi, Sept. 23.—To Hong Kong: Mr. and Mrs. Hase. To Ceylon: Mr. D. Blyth.

Per P. and O. steamer from Suez, Sept. 27.—To Shanghai: Mr. F. E. Woodruffe.

Per P. and O. steamer *Massilia*, from Southampton, Sept. 26.—To Hong Kong: Mrs. Andrews. To Singapore: Rev. H. Francis.

Per P. and O. steamer *Moolian*, from Brindisi, Sept. 30.—To Ceylon: Mr. Duncan.

Per P. and O. steamer *Malta*, from Brindisi, Oct. 7.—To Yokohama: Mr. Short. To Shanghai: Mr. Fauvit.

Per P. and O. steamer from Southampton, Oct. 10.—To Hong Kong: Miss Simpson, Mr. F. B. Hooper. To Singapore: Mrs. Trotter, Mrs. Dunlop and child.

Per P. and O. steamer from Venice, Oct. 18.—To Penang: Mr., Mrs., and Miss Vermont.

Per P. and O. steamer from Brindisi, Oct. 21.—To Yokohama: Mrs. Marshall. To Hong Kong: Mr. C. A. Sinclair, Mr. M. Murray. To Singapore: Capt. and Mrs. Caldbeck.

Per P. and O. steamer from Southampton, Oct. 24.—To Hong Kong: Mr. H. H. Thornton, Mr. J. Alexander.

Per Messageries Maritimes steamer *Menzaleh*, from London, Sept. 5.—To Yokohama: Mr. J. Keda, Mr. Langfang. To Shanghai: Rev. J. Cromby, Mrs. Cromby and child, Miss Potter, Miss Wilson. To Singapore: Miss Strickland.

Per French mail steamer *Provence*, from Marseilles, Sept. 15 (booked from London).—To Yokohama: Mr. Peltzer. To Hong Kong: Mr. Hams. To Shanghai: Mr. and Mrs. Hisbrunner, Mr. and Mrs. John Bradford. To Batavia: Mr. Arntrenius, Mr. C. P. Winckel, Mr. de Haart.

Per French mail steamer *Tigre*, from Marseilles, Sept. 29 (booked from London).—To Yokohama: Mr. Fraissinet. To Shanghai: Mr. and Mrs. J. Bradfield. To Singapore: Mr. and Mrs. Burn and one second-class passenger.

Per French mail steamer *Hoogly*, from Marseilles, Oct. 13 (booked from London).—To Shanghai: Mr. and Mrs. Medhurst and child. To Galle: Mr. A. S. Daniell, Mr. W. Daniell.

Per steamer *Canton*, from London, Sept. 4.—For Singapore: Mr. and Mrs. Hewick. For Hong Kong: Mr. and Mrs. Willes.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The present (Pacific) mail brings advices from this port to July 22; the French mail, with dates from London to May 24, arrived out on the 11th; and the following P. and O. mail, of May 31, on July 13. The following items of news are from the *Japan Herald*:—

Nearly three years ago the Japanese Government sent to the Koreans to demand payment of arrears of tribute; the Koreans refused compliance, and sent a most insulting reply back. Until lately the Korean despatch (by no means a "happy despatch" for the Japanese) has been kept from publication, but a copy has by some means been obtained, and published, much to the chagrin of the Government, who do not at all relish that the world at large should know that the Koreans have been enabled to insult them with impunity. The following is a copy of the document:—

We have received your letter, and have given it very deep consideration, comparing your despatch with other despatches. It is a long time since there has been any intercourse between the two countries. Your despatch demands payment of tribute. We will show how this affair stands. Taico Sama, without provocation or cause of any kind, invaded Korea, and made Korea sign a document agreeing to pay tribute. In those days Korea was unprepared for war, and had not even been informed of the intention of Japan. But it is very different now. The invasion by Taico was a crime committed against Korea by Japan, which is not yet punished. Your demand is so unreasonable that instead of Korea paying you a tribute, it is for you to return the money paid by Korea. In your despatch you have made many insinuations of your having adopted foreign customs; we can assure you that Japan is Japan, Korea is Korea—but Korea has its own customs. Some years back we had a difference with a country called France, which is, among barbarians, considered to be very powerful and very large, while Korea is very small; but we defeated that great country. We assembled all our warriors, every one of whom was ready to die. According to our old treaty of friendship, whenever either is attacked by barbarians the other is to help. To show our honesty, when the barbarians went to your country we immediately wrote to you that we had made every preparation to help you. During the French attack on Korea we day and night expected that you would come with your forces to our aid; but, not having received your assistance, we wrote and informed you of our distress, informing you of our position, and asking for immediate help. You have neither sent aid or any answer to our despatch. From that day our treaty of friendship was at an end. We no longer consider each other friends, but enemies. The tone of your despatch is so friendly that we look upon it as treachery; and after having been so friendly with Japan and being repaid by treachery, we never can be friendly again. Not only have you broken the treaty as we have

Digitized by Google

above described, but you have also broken another very chief point of treaty in adopting the manners and customs of the Western barbarians. Our information is that you have adopted French drill; and whenever you want money you go to England: and if you wish to tax your own people or impose duties you take advice from Americans. But you have never consulted us, as agreed in our old treaty. You think the Western barbarians are great people. We, Koreans, are a very small country, but yet we have the courage to put in writing to you that Western barbarians are beasts. The above we intend as a direct insult to you and your allies—the barbarians. We desire that you should join them and bring your great ships and your army here. Fusankai is the nearest part of Korea to Japan. To make your attack as inexpensive as possible to you and your friends, we will send and clear Fusankai for a battle field and will appoint the battle. It is useless to go into any correspondence, because the wrong you have done to us is so great that your apologies will not avail. The only alternative is a bloody war—a war that will cost Japan all its warriors; and then we will bring you to terms.

This is our intention. You must not attempt to write us again; and the above is a notice to you to make all preparation, for either Japan must invade Korea or Korea will invade Japan. KAKURIN.

The internal organisation of the Imperial household appears to be regulated by a thoughtful economy. The Sovereign is away, and his spouse will speedily follow him; consequently the establishment is reduced by the dismissal of thirty-six female attendants, who issued forth in a body, last week, from the *O Te go Mon*, carrying with them good wishes and a moderate gratuity.

A notification has been received by the various Consuls from the Lord Chamberlain's office to the effect that the Empress Dowager intends visiting the hot springs at Myonoshta, and requesting them to notify their countrymen to that effect, and to desire them to abstain from visiting that place during the stay of the Imperial party.

During the Mikado's absence the new American horses which he recently purchased will probably be put in training. Up to this time they have only served as expensive ornaments. Although there is nothing really dangerous about them, they have hitherto shown too much of the spirit of the steeds of Indra, the Vedic hero, to be trusted with a monarch who is rapidly sinking his divinity, and can only control his coursers by ordinary mortal means. In due time, let us hope, they will be tamed down to a sense of their responsibility, for they are really beautiful animals, and ought not to waste their prowess in a stable.

Katsu Awa has been appointed Controller of the Admiralty (*Kaigun no Taiyo*). This appointment has given much satisfaction to the Tokugawa party, to which he belonged.

The manufacturing departments under or belonging to the Kobusho (Public Works Department) are seven in number. The first and most important of these is the arsenal at Yokoska, ship docks at Nagasaki, iron foundry at Hiogo, iron foundry and machine shop at Yokohama, lighthouse and buoy establishment at Benten, Yokohama, and a type foundry and a cotton mill at Yedo.

A meeting of the subscribers to Christ Church was held on the 11th July, for the purpose of discussing the desirability of the erection of a schoolhouse on the church compound. The meeting was very thinly attended, and, after a short discussion, authority was given for the building of the projected room.

A number of schools are being built in Yedo and elsewhere by purely private enterprise. The Japanese and foreign languages will be taught.

The purchasers of silkworms' eggs who annually arrive here from Italy and France will find a new feature connected with that business this year. Commissioners have been appointed by the Japanese Government to examine all the silkworms' eggs brought in to be sold to foreigners. The Government claims that it is done solely in the interests of foreigners, as the Japanese have been in the habit of selling inferior eggs for the best, thus "bringing discredit on the country." But as most of the buyers are experienced men, and easily distinguish good eggs from bad ones, it appears to me that this solicitude is rather superfluous. How will the Commissioners be paid? By a tax on the eggs? I should not be surprised if this interference resulted in enhanced prices and a considerable amount of swindling.

A telegram was received from Osaka stating that the American Consul at Kobe, Mr. Turner, had broken his leg in Kioto, and required medical aid immediately in Osaka, having been brought there after the accident. The steam launch was soon ready, and Dr. C. J. S. Wells was soon in her and on the way to Osaka to aid the wounded Consul. Various were the surmises as to the cause of the accident. Finally all agreed in the supposition that he must have fallen from his horse in an excursion to Lake Biwa. It was not till Dr. Wells returned next day that the facts were ascertained. It seems that a party, consisting of Colonel Shepherd, Consul-General at Yokohama and *Charge d'Affaires* during Mr. De Long's absence, Mr. Turner and Mr. Senter, agent of the Pacific Mail Company, had gone to Lake Biwa, and soon after their arrival Messrs. Senter and Turner had gone out for a walk, leaving Colonel Shepherd in the tea house at which they had stopped. Becoming fatigued, they stopped at another tea house, and were quietly taking a cup of the gentle stimulant that cheers but not inebriates, when suddenly a crowd of drunken Japs broke into the room where they were sitting, and commenced an attack on them with clubs and sticks. Being unarmed and unattended by a guard they retreated in haste; but as they ran one of the pursuers thrust his stick between Mr. Turner's legs and tripped him, so that he fell and broke the bone of his thigh. Mr. Senter being a man of great muscular strength immediately picked up his fallen friend and bore him off safely from his enemies. The Japs still pursuing, the Americans took refuge in another tea-house. The pursuers, probably blinded by the saki they had been drinking so profusely, did not see this dodge, and they remained there safe till a messenger could be despatched to Colonel Shepherd for assistance. Mr. Turner was then conveyed on a stretcher, borne on the shoulders of Japanese, to Osaka, and the despatch sent thence for medical aid as above stated.

The next day Mr. Turner was brought down to Kobe in a Japanese boat towed by the Colorado's steam launch, and conveyed to his room in the Hiogo Hotel, where he is now attended by Dr. Harrison, who came out in the Stonewall, and Dr. Wells, of the Colorado. His thigh not having been set soon after it was broken they have not been able to do so since.

A disgraceful scandal has taken place amongst a few of the lower orders of German Jews. Two of their number went to the synagogue to pray for a dying relation. On their arrival there they found the building stripped of all its furniture by one J. L. Liebermann, to whom they went, and asked him to give up the scrolls of the law. This he refused to do. Bad language on both sides followed, and the affair culminated by the parties appearing in the Consular Courts to answer summonses for assault.

In H.B.M.'s Supreme Court, Mr. F. V. Dickins on behalf of the defendants in the recent action, Findlay, Richardson, and Co. *v.* Pitman and Co., brought a motion for leave to appeal questions in that suit to the jurisdiction of the Supreme Court of Shanghai. Mr. Davidson, for Messrs. Findlay, Richardson, and Co., in arguing against the motion, said that it was not in the power of his lordship to grant the appeal, on the grounds that the Orders in Council provided that from a Supreme Court no appeal could lie, and the present one having full jurisdiction, except in one or two matters, it could certainly not be called a Provincial Court. Mr. Dickins replied, and his lordship said he saw no section in the Orders in Council under which he could grant the appeal. The proper course as it appeared to him for the defendants to pursue was for them to apply for an order to remove the case for the consideration of the Privy Council or take it to Shanghai for a rehearing. His lordship, therefore, dismissed the motion. The arguments adduced by the learned counsel for both sides were purely of a technical character, and occupied some little time.

H.M.S. *Iron Duke* is to leave shortly after the arrival of the mail of July 31st, and the *Salamis* will follow her with a fortnight's later mails. Mr. Watson will take this opportunity of visiting the northern ports of Hakodadi and Niigata. Mr. Lowder proceeds as British Consul to the latter port by the same opportunity.

THE "ZADKIA" CASE.

The trial has been concluded of the action "Siber and Brenwald *versus* the captain and owners of the steamer *Zadkia*" for damages alleged to have been suffered by reason of delay in the delivery of the merchandise carried. The actual time of the delay alleged, four months, was not denied in the answer; but several causes were pleaded which, it is averred, excused the delay for a portion of that period; the defendants admitting a delay for which the ship is liable of only fourteen days. The evidence submitted in the case consisted of certain papers purporting to be copies of letters and telegraphic despatches bearing on the detention of the ship at Alexandria, a certain bottomry bond shown by defendants' counsel, in which is recited the cause of the delay in the river Clyde, and the verbal testimony of the present master and engineer of the ship. These alleged copies of despatches and letters, however, threw no light on the exact nature of the proceedings against the ship which caused the delay at Alexandria. Seven days at Point de Galle, and twenty at Singapore, were consumed in effecting repairs required by the engine and boilers, which had suffered injury from causes quite beyond control. As to the delay of ten days in the Clyde, the master stated his belief that no blame can attach to any person for the grounding of the ship which there occurred, but he admits that with a lightening of the ship to the extent of 100 tons of her burden, her draft would have been less by eight inches, and that this would have changed the conditions materially. A survey of the ship was had, and by an entry in the log book it appears that the survey report pronounced the ship to be "overloaded," and that in consequence upwards of 100 tons of cargo were discharged, and not again re-laden on board. The plaintiffs presented a schedule of losses, making up an aggregate of $3,200 per month.

The Court adjudged and decreed that the plaintiffs recover from the ship, her master and owners, the sum of $7,000, with interest thereon from the 19th day of May, 1872, the day of the ship's arrival in the port of Yokohama, at the rate of one per cent. per month. Costs to follow judgment.

Judgment has also been delivered in another action against the vessel, in which Messrs. Hudson and Malcolm were the plaintiffs, and which was brought to enforce payment of several bottomry bonds executed at Galle, Aden, and Singapore, in favour of the plaintiffs.

The Court decreed that the plaintiffs have and recover from the ship, her master and owners, the sum of £6,155 19s. 10d., and the further sum of $8,888.44, with interest on said sums, from

Digitized by Google

and after May 28, 1872, at the rate of 1 per cent. per month. Costs to follow judgment.

HIOGO—OSAKA.

Our advices extend to July 18; the Pacific mail from New York, June 6, and the French mail from London, May 24, arrived out on July 12.

The Mikado, on his southward visit, has reached Osaka, arriving there five hours after the appointed time. With the exception of a general holiday that was observed at the Custom-house and other Government offices, ordinary traffic went on as usual, and no one could have imagined that an event fraught with so much importance as a visit of the Emperor to the second largest city in Japan was about taking place.

As soon as his Majesty was on shore no time was lost in greeting or presentations, but he was immediately assisted to mount the handsome Japanese horse which had been kept ready saddled for his arrival. The horse was led by some attendants, and preceded by an officer on foot, bearing a small crimson flag having a white chrysanthemum crest in its centre, the Imperial party entered the neighbouring Foreign-office or Custom-house. Here the Mikado remained till about a quarter to nine o'clock, taking some refreshment, and receiving the various local officials who were presented to him. On leaving the Foreign-office the Emperor, attended by the Governor and Vice-Governor on horseback, rode slowly between two files of foot soldiers through the concession to the city. At the foot of the Foreigners-bridge a large bonfire had been lit by a neighbouring resident, the light from which enabled the small group of foreigners which had assembled there to get a good view of his Majesty.

His Majesty paid a visit to the Mint, and expressed himself extremely gratified with all he saw there. He took up his quarters at the Reception House belonging to the establishment, which he ordered to be styled from that day "Seupukau." His Majesty devoted a long morning to the details of the works, and subsequently gave Major Kinder an audience, at which he graciously expressed his approval of all he had seen—an approval earned by the cordial and intelligent co-operation of the native and foreign officials who administer the affairs of the establishment.

NAGASAKI.

(FROM OUR OWN CORRESPONDENT.)

NAGASAKI, JULY 15 (VIA SAN FRANCISCO).

The mails from London of the 17th, 24th, and 31st May arrived here at seven P.M. on the 13th inst., but were not delivered by the British postal authorities until the next morning (Sunday). It is a wonder we got them then, as we could not obtain the letters three mails ago, when the *Salamis* came in in broad daylight, owing to the day being Sunday, which, however, did not prevent the private friends of Mr. Quin from getting theirs, although the public could get none. This system is one which brings into contempt a service which can be used for private purposes, and calls for strict instructions to give all applied for, or give none at all. It is not the first instance where we have had reason for complaining, and we suppose the present functionary, who shortly leaves for Yokohama, is serving us out before he goes. I hope his successor, Mr. Longford, will be more obliging.

The principal topics of the fortnight have been the land renters' meeting, at which there was a scene or two between the Consul for the United States of America and the residents, and the other is the approaching visit of the Mikado, who is expected to arrive at Nagasaki this day week in the ironclad corvette *Iho Sho Maru*. The *Nagasaki Express* gave an account of the meeting last week, and at the same time administered a lecture to the Consular body, whose implied if not openly-avowed intention is to endeavour to keep the community in the same position as a lot of schoolboys would be in the presence of their master. Of course this sort of thing can never be successfully carried out, and hence the undignified conduct of the chairman in retaining his seat when he could do nothing with the meeting. Had a leader appeared to move a resolution "That the chair be vacated," it would have been carried without a single opponent. However much I might write upon this subject it would be the old thing over again, but I cannot help expressing an opinion that a different system should be adopted, and that Her Majesty's representative here should have votes more in proportion to the number of land renters' interests he is charged with, and not be placed upon an equality with the representative of Italy, who represents no one but the country. The same arguments apply to the Belgian Consul, who has one person to care for, and he pays no taxes.

Reforms in the constitution of the Municipal Council, as at present administered, are greatly needed, and, above all things, the member representing the largest number of land renters should have the greatest power, and not be overruled by those who ought to have none. Collective wisdom may be useful at times, but we are made painfully aware of the dangerous facilities afforded to obstructive persons who have hobbies to ride, or those persons who consider themselves so much above the merchants—a foible which, I am sorry to say, is a great failing with the present American Consul at this port.

The visit of the Mikado will have a most beneficial effect upon the minds of the natives, who are looking forward to the event with great interest. So far as foreigners are concerned they are benefited by it, owing to the improvements which are now being made in the town of Nagasaki. These are of a permanent character, and although not extensive engineering works, they are what would not have been done for the next dozen years had not the ruler of the country paid us a visit.

The foreign residents intend illuminating during the visit, at which the Government officers have expressed themselves pleased with the mark of respect intended to be shown to their Sovereign. Everyone has his leisure moments occupied by the coming feast of lanterns, and no endeavours will be spared to bring the event to a successful termination, if the weather will only clear up before the day arrives. At present we are in the wet season, and everything is unpleasantly damp and the weather hot. The visit will be of three days' duration, and while it lasts we may anticipate a total cessation of business; but this I think foreigners are quite prepared for, and will make a virtue of a necessity and do the same as Japan does. I have dwelt at some length upon the subject, but it is a prevalent failing just now at this place.

At present only two men-of-war are in port:—the Russian corvette *Vitias* and the United States steamer *Monocacy*. The surveying vessel *Sylvia* is expected shortly.

Business in new tea has not yet commenced in any large quantity, but arrivals have come forward much about the same as previous years from the country. Tobacco for export to England has been settled somewhat extensively. The rate for draft on England keeps nominally high, and is quoted at about 4s. 10d. No vessels are loading for London. Nebukin are 396 per $100. You will have seen by the *Nagasaki Express* the *Oregonian* case and the subsequent salvage dispute. The case is to be tried here shortly before Sir Edmund Hornby, who comes over expressly for it, so that the expenses are likely to be somewhat heavy to one side or the other. I cannot give you particulars, as the current rumours are conflicting in the extreme and require some professional legal expert to sift them, as the side in the right varies according to who gives you particulars. The case will be the P.M.S.S. Company *v.* Henry Gribble and Co. and others, to recover the property saved by them.

Commercial Report.

(*For dates see first page.*)

IMPORTS.

YOKOHAMA.—The position of the market remained much the same as last reported, the demand being principally directed to Grey Shirtings and Yarns. There had been several arrivals from Home side, viz.: the Leander, Albuera and White Adder from London, the Eastern Chief from Glasgow, the Oceana from Liverpool, with general cargoes, and the Ivanhoe from Cardiff with coals. A large business had been done in Yarns, but Nos. 16 to 24 had declined considerably, and closed weak; Nos. 28 to 32 were in fair demand, Nos. 38 to 42 were neglected. In the early part of the fortnight Grey Shirtings were in very good demand, and large sales were effected at a little above quotations, latterly however there had been less inquiry, and prices had become lower. T-Cloths and Drills were dull; Mousselines were rather weaker, in other Woollens few transactions were reported. Metals were quiet; Quotations ruled as follows:—GE Grey Shirtings, 7 lbs., 38½ yards, 39 inch, $2.40 to 2.45 per piece; 8 lbs., 4 to 8 lbs., 6 ditto, $2.60 to 2.65; 9 lbs., ditto, 44 inch, $2.95 to 3. GE White Shirtings, 56 to 60 reed, 40 yards, 35 inch, $2.40 to 2.55; 64 to 72 ditto, $2.70 to 2.85; T-Cloths, 6 to 7 lbs., $1.70 to 2.10. Drills, English, 15 lbs., $3.85 to 3.95. Handkerchiefs, Assorted, $0.55 to 1 per dozen. Brocades and Spots, White, $2.90 per piece. Chintz, Assorted, 24 yards, 30 inch, $1.25 to 2.75. Turkey Reds, 24 yards, 30 inch, $0.85 to 0.97½ per lb. Velvets, Black, 35 yards, 22 inch, $11.50 to 13.50 per piece. Victoria Lawns, 12 yards, 42 inch, $1 to 1.10. Taffachelass, double weft, 12 yards, 43 inch, $2.60 to 2.95; single weft, $2.40 to 2.70. Cotton Yarn: Nos. 16 to 24, $45 to 45.50 per picul; 28 to 32, $49.50 to 50.50; 38 to 42, $49 to 50. Woollens and Woollen Mixtures:—Camlets, 8S, Black, $11.50 per piece; Scarlet, $19.50 to 20. Union Camlets, $6 to 7. Lastings, 30 yards, 31 inch, $13 to 13.50. Crape Lastings, ditto, $4.50 to 8.

HIOGO-OSAKA.—The import market had been quiet during the month. Cotton Yarns had advanced in value, but in the absence of any stock transactions have been limited. Prices of Grey Shirtings had also improved, but deliveries had been on a smaller scale. There was nothing of interest regarding other Cotton manufactures. Woollens: Mousselines de Laine were in better demand at slightly improved rates. Other goods were not much inquired for. Quotations ruled as follows:—Cotton Yarn: Nos. 16 to 24, $142.00 to 143.00 per bale; 28 to 32, $148.00 to 150.00 do.; 38 to 42, $240.00 to 142.00. Cotton Piece Goods: G.E. Grey Shirting, 7 lbs., 38 yards 39 inches, $2.42½ to 2.45; 8½ to 8¾ lbs., $2.63 to 2.65; 9 lbs., 44 inches, $2.85; Camlets, S.S. Scarlet, $20.50 to 21.00; Black, $13.50 to 14.00; Assorted, $13.00 to 16.20; Mousselines de Laine, 30 to 31 inches, Plain, $0.20 to 0.24; per yard; 44 to 45 inches, $0.29 to 0.35; 30 to 31 inches, Figured, $0.28 to 0.45; Long Ells, Assorted, 12 lbs., $5.75 to 6.00 per piece; Blankets, $0.50 to 0.52 per lb. Iron: Nail Rod, $3.50 to 4.50 per picul; Lead, $5.50 to 5.75.

NAGASAKI.—In imports generally there had been little improvement in prices. Large sales of 8¼ lbs. Grey Shirtings and Fancy

Digitized by Google

Chintz had taken place, at quotations, in order to take advantage of high rates of Exchange, but for other descriptions of goods the inquiry had been very small, and stocks were difficult to move, except at low rates. Quotations: Grey Shirtings, 7 lbs. $3.14; ditto, 8¼ lbs., $2.52. Fancy Chints, $2.33.

EXPORTS.

TEA.

YOKOHAMA.—The demand lately reported had continued, and settlements to the extent of about 7,500 piculs had been made, total settlements for the month being about 15,500 piculs; these had been chiefly of the good medium and fine grades at prices ruling much the same as last quoted, but the market closed with an upward tendency. The quality continued fair and showed more care in the preparation compared with previous crops; supplies had been about on a par with settlements, leaving the stock without change. The last P. M. S. S. Company's steamer took 310,498 lbs. for New York, 154,921 lbs. for San Francisco, 53,490 lbs. for Boston, 26,946 lbs. for Chicago, and 3,304 lbs. for Philadelphia; the Charley took only 5,170 lbs. for San Francisco. The Clara Bell sailed on the 19th July, with about 120,000 lbs. for San Francisco. The Polly Lewis, Leander, 883 tons, and Eastern Chief, 401 tons, were loading for New York, and the Oceana, 499 tons, had been offered for the same port. Quotations:—Common and good common, nominal; medium, $34 to 37 per picul; good medium, $38 to 41; fine, $42 to 45; finest, $46 to 50; choice, $52 and upwards. Export from June 1 to date:—To New York, 692,869 lbs.; to San Francisco, 255,985 lbs.; to England, nil; total, 948,854 lbs.

HIOGO.-OSAKA.—Since the departure of the last American mail there had been a steady business doing, and settlements amounted for the month to about 8,500 piculs. Quotations were rather easier for medium to fine grades. Stocks, 3,000 piculs. The present mail steamer took about 300 tons. Quotations, common, nominal; good common, $23 to 25 per picul; medium, $26 to 31; good medium, $32 to 37; fine $38 to 43; finest, $44 to 48; choice, $49 to 52; choicest, $53 to 63.

NAGASAKI.—The only transactions of importance that had taken place during the month had been in Teas from the Ooreshino districts, which being very suitable for making up into Green Teas, had been bought up at high rates for export to China, for mixing with the new leaf there. There had been no settlements of uncoloured Teas, as the native merchants were asking from $5 to 6 per picul, more than operators were prepared to offer. Stocks were very small, but as the weather had become more settled, heavy arrivals were expected to come forward.

EXPORT OF TEA AND SILK, SEASON 1872-73.

TO GREAT BRITAIN.

LATEST TELEGRAMS.

—o—

BURNING OF THE PACIFIC MAIL STEAMER "AMERICA."

HONG KONG, SEPT. 3.—The Pacific Mail Company's steamer *America* has been destroyed by fire while *en route* from Yokohama to Hong Kong. After leaving Yokohama the cargo on deck took fire, and immediately afterwards the whole vessel became enveloped in flames. All efforts to extinguish the fire were unavailing, and the ship burned all night, the Hong Kong mails, the cargo, and the passengers' and officers' luggage being destroyed. So rapid was the progress of the fire that all hands on board jumped into the water, as there was no time to lower and get into the boats. Six Chinese lost their lives, and ten Chinese engineers, the storekeeper, the steerage watchman, and the cook are missing. The specie on board can be recovered.

LAUNCH.—On the 5th inst., Messrs. John Elder and Co. launched from their shipbuilding yard at Fairfield, Govan, an iron screw steam-ship, of 3,055 tons gross register, and 400 horse-power nominal, and of the following dimensions:—Length between perpendiculars, 350 feet; breadth moulded, 39 feet; depth 31 feet 6 inches. As the steamer left the ways she was gracefully named the "Koning der Nederlanden," by Miss Johnson of London, assisted by Miss Walker of Glasgow, who cut away the dogshores. The Koning der Nederlanden has been designed and constructed for the Stoomvaart Nederland Company's service between Amsterdam and Java*via* the Suez Canal. In her construction and equipment she has been fitted with all the latest improvements. Her saloon is elegant and commodious; her state-rooms are capacious, light, and well-aired, and they are furnished in a style of great elegance and beauty, while the comfort of the passengers has been most sedulously cared for. She has ample accommodation for 100 first, 50 second, and a number of third-class passengers. The engines, which are being supplied by the firm, are upon their compound principle. This is the fifth vessel the firm have launched during the last eighteen months for the Stoomvaart Nederland Company.

ORGAN FOR THE TOWN HALL OF BOMBAY.—Sir Albert Sassoon, Kt., K.C.S.I., a member of the well-known firm of Sassoon and Co., has presented to the town of Bombay a magnificent organ, costing about £2,000, in honour of the Duke of Edinburgh's visit to that city. It has been built by Messrs. Bishop and Starr, of Marylebone-road, and is to be erected in the Town Hall of Bombay. The "great organ" and "solo great organ" have each a compass from CC to A, fifty-eight notes, and are on the same manual, but the solo organ is on a higher pressure of wind. The "swell organ" and "choir organ" have also a compass from CC to A, fifty-eight notes, and the "pedal organ" a compass from CCC to F, thirty notes. The interior metal pipes are of spotted metal, and the exterior are of zinc, as zinc will better sustain the shaking it will receive during its long voyage. The wood pipes are all of mahogany, and the rest of the wood work is of mahogany, oak, and cedar, and is varnished throughout to protect it from the effects of changes of climate. The rollers are of tubular iron, the squares of gilded brass, and the wirework of a metal made expressly for this organ, instead of the usual tinned iron wire, which speedily rusts in India. All the leather work is poisoned, to protect it from the ravages of white ants.

MR. POPE HENNESSEY.—It is stated that the career of Mr. Pope Hennessey, the late Governor of Labuan, is still onwards. He will ere long pass from the administration of the British settlements on the West Coast of Africa to the Governorship of Trinidad, which is likely to become vacant by the promotion of the present Governor to the Proconsulship of Demerara. Those who remember the eulogistic way in which Mr. Knatchbull-Hugessen—of course delivering the opinion of the Colonial-office—spoke in the House of Commons of the ability and tact with which Mr. Pope Hennessey discharged the delicate duties imposed on him when the Dutch possessions on the West Coast were transferred to England, will perhaps not be surprised that this gentleman should have been marked out for promotion by the department.

THE deaths are recorded of two naval officers who have served on the China station, Lieut. Arundell and Navigating Lieutenant Tizard. Lieutenant Henry Alphonsus Arundell, who died while in command of the Bittern at sea, on the 19th July, served as acting sub-lieutenant in the Scout, 21, on the East India and China station, from March 14, 1861, until August 7 following, when he became acting lieutenant in command of the Leven gun vessel, on the China station, and in 1862 he was confirmed to the rank of lieutenant. Navigating Lieutenant Thomas H. Tizard was appointed to the Rifleman, 5, screw vessel, fitting at Deptford, for China, November 14, 1861; and was employed as second master and master on surveying service in the China seas until July 2, 1867.

THE BURMESE EMBASSY.—The Burmese Embassy arrived at Sheffield yesterday morning from Bradford. An address from the Mayor and Corporation was presented to them at the Midland Railway Station. They visited the celebrated cutlery establishment of Messrs. Joseph Rodgers and Son, and lunched with the Cutlers' Company, at the Cutlers' Hall, where an address from the Chamber of Commerce was presented. This day they will visit the principal works in the town.

THE executors of the late Mr. William Tarrant, of Shanghai, Mr. W. Mundy and Miss Jane Tarrant, give notice that all claims against the deceased are to be sent in before the 1st Jan. next.

Foreign Intelligence.

—o—

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, SEPT. 3.

With the return of the Court to Berlin, the presence of the three Emperors and many of the ruling potentates of Germany, with their numerous suites, and the influx of visitors from all sides, anxious to see the Sovereigns, or attracted by the wish to become spectators of the military manœuvres and parades, illuminations, and other festivities, the capital has again assumed its usual appearance of light-hearted gaiety, to the great gratification of the shopkeepers and hotels, which latter are now overflowing with guests. From far and near excursion trains arrive from all the principal towns, starting from every point of the compass and converging on Berlin, so that the railways come in for their full share of the increased traffic. Three long trains were launched from this city yesterday and to-day, carrying off more than two thousand of these sight-seers, from which it may be inferred that their pockets are well lined with the *nervus rerum*. I will not here attempt to speculate on the political subjects that will, of course, be discussed by the Sovereigns and their Ministers, as the result will soon leak out and be duly transmitted to the daily press.

But now "look on this picture and on this." Whilst in the "metropolis of modern intelligence," as the people of Berlin are fond of calling their city, everything appears going on in the most satisfactory condition; small capitalists are becoming millionaires, the funds are rapidly rising, and there is a plethora of money which cannot find investment. Under this brilliant but delusive surface there is more distress and misery to be found than ever existed among the poorer classes, arising from the enormous increase in the price of provisions, the frequent strikes, disease and sickness, and, above all, the absolute and utter insufficiency of dwellings for the poor. The extent of this latter exceeds all belief; for though the municipal authorities have been spending money very freely in doing what they could for their relief in the way of fitting up empty buildings, warehouses, and barracks for their temporary accommodation, it is far from coming up to the requirements of the case, and it is painful to read of the extraordinary shifts to which the poor people are put only to find a shelter for the night. Unused and empty railway carriages are in great request for this purpose, and directors and inspectors shut their eyes to these irregularities from feelings of sympathy and compassion. It was only last week that a turn-table at one of the terminal stations at Berlin being out of order, instructions for its repair were issued; on taking off the top the cavity beneath was found to be swarming with a colony of juvenile Troglodytes, no less than thirty-seven half-naked children being unearthed and brought to light.

Our Burgerschaft, which has been in recess for nearly two months, is convened for the despatch of business, and the first sitting will be held to-morrow. There is no lack of subjects for their consideration, no less than fourteen being placed on the order of the day, to say nothing of a considerable number standing over from the last session and waiting to be disposed of. They are mostly of local importance, having no interest abroad, except, perhaps, a message from the Senate asking the Burgerschaft for their concurrence to make an exception to the law restricting medical men, lawyers, and other officials in the service of the State, from undertaking private practice. The exception asked for is to allow Herr Dalmann, the Government Engineer and head of the Hydrotechnical Department, to undertake the execution of the works about to be commenced for the new docks and warehouses on the opposite island of Steinwerder. The reasons assigned in the Senatorial message are plausible enough—1. The Company have asked for his services; 2, which he is willing to give, subject to the consent of the Legislative bodies being obtained; 3, as the land required for the works has been given by the State without compensation, and reverts to it under certain circumstances; being moreover for the use of the public, the improvement and enlargment of the harbour and the facilitation of our annually expanding trade and navigation, it may in some sense be considered as a public work not even requiring the concurrence sought for; and 4, it is highly desirable to entrust the execution of the works to an engineer of undoubted capacity, of which he has afforded sufficient practical proof in the way he has executed the new docks and other hydrotechnical works recently opened in the upper part of the harbour, and known as the Kaiser's Quay, rather than to call in a stranger unacquainted not only with the locality, but with the wants and requirements of the merchants and shipowners of this city.

And this reminds me of a cognate subject, which is, that the works for the great docks at Cuxhaven have been commenced, and the excavations are being carried on with spirit by more than 500 navvies and labourers. There was no public demonstration, though a considerable number of the inhabitants had turned out to see the first sod cut and wheeled away by Mrs. Giles, the wife of the engineer-in-chief, after which the latter made a speech to the assemblage, forcibly dwelling on the importance of the work commenced that day for the future interests not only of Cuxhaven, but of all Germany.

The thirteenth annual congress of the German political economists was held this year at Danzig, and was opened on the 26th ult. The most important subject for discussion—the vital question of the necessity of a reform in the Custom-house tariff of the Zollverein—was placed at the head of the list on the order of the day for the first sitting. A great many members insisted on the urgency of the reform that must be made in support of the principles of free trade, which alone would satisfy the nation; and as there was no opposition offered the following motion was put and carried unanimously:—"Resolved, that the present state of our national economics requires the immediate revival and uninterrupted continuation of the agitation for a radical reform of the existing tariff of import and export duties by the Parliament of the German Empire. This object can only be gained by the consistent and uncompromising abolition of the protective system; secondly, by the simpli-

Digitized by Google

fication of the tariff, retaining only a few financial duties; and thirdly, the immediate and total repeal of the import duty on raw iron and chemicals, and of the export duty on rags."

The "German Steam Navigation Company of Hamburg" advertise that their arrangements are now perfected for a regular monthly communication with the Far East, and that one of their steamers will for the future be despatched every month "at greatly reduced freights," *via* Suez Canal, to Penang, Singapore, Hong Kong, and Shanghai; and also taking cargo at through rates to Batavia, Sourabaya, Samarang, Padang, Macassar, Manila, Saigon, Nagasaki, and Yokohama. The *Enterprise* is to leave this port on the 10th inst.

According to the accounts received here from Nijni Novgorod, the great annual fair had opened under unfavourable auspices, caused by the great losses suffered from the recent fire, which are said to amount to two million rubles. However, it appears that an improvement has taken place since, especially in iron, teas, and manufactured articles. On the other hand, hides and skins continued in a depressed state, and leather was 10 per cent. lower than in May. Of the 120,000 calf skins brought to the fair scarcely any had been disposed of. Of cow-hair 15,000 poods had been sold for shipment to England. There was but a small assortment of wool, but Donskoi sorts were in fair demand, both for Germany and England. Horse-hair was at first dull, but latterly a better feeling prevailed. Camel's-hair was abundant, but almost unsaleable unless at a great sacrifice. Bochara Silk moves off slowly at 250 roubles. Large quantities of Persian and Bochara cotton are on show, but there are no buyers. Furs are in great request and very dear, especially Squirrels; Merluschkins too high for the export trade. Ermine alone is neglected, the high rates demanded precluding business to any large extent. Greyhareskins sell readily at 36 copeks each, and white ditto at 14 to 16 copeks. Foxes skins are in demand.

Yesterday, being the anniversary of the great and decisive battle of Sedan and the capture of Napoleon III., was kept here as a general holiday, all the shops being closed, and most of the houses decorated with flags, as were also the vessels in the harbour. In the evening there was an illumination, but only partial, as the only official recognition of the great event was that all the public schools were closed, and both masters and pupils made holiday, by order of the Senate.

The cattle disease has broken out very suddenly in our immediate neighbourhood; last week eighteen cows died in one field in the outlying rural suburb of Eppendorf, communication with which is now cut off by a military cordon furnished by a battalion of the 76th regiment.

COMMERCIAL.

Teas are quiet, but the 851/4, 156/8, and 525/16 chests of Congou, and 199/16 ditto of Souchong sold by importers realised full quotations. The recent large arrivals of Rice have lowered the prices, but given an impetus to the market, and considerable purchases have been made, including 9,800 bags Rangoon, per John Bertram, for delivery on arrival. Cassia Lignea continues in demand at previous rates; and Flores sells easily at 14½ sch. bco. Pepper: Firm, and moves off freely at 7½ for Singapore, and 6½ for Penang No transactions in Spelter; nominal price 15⅛ marks banco.

SHIPPING.

ARRIVAL.—Cesar Godeffroy, from South Sea Islands.

SAILED.—J. H. Jesson, to Yokohama; Ocean, to Shanghai; Fyen, to Hong Kong; Christine Aquaroni, to Rangoon.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Sept. 4.

Since last Monday about 100 Internationalists have arrived in the Hague, and up to this moment the town is not burned down, to the great disappointment, it seems, of the leading Opposition paper. Affairs are as quiet and orderly as we could wish—it is even dull. I need not say that the people generally have no sympathy for these men, who wear as a mark of distinction a blue ribbon, and some of them the traditional red neckcloth. No open meeting has been held as yet, and reporters are not admitted to the secret assemblages, so that we know nothing about the proceedings except that much discord prevails amongst these "gentlemen of the pavement," with heads *a la* Greeley, about questions which must be decided before the congress can be opened. A great number of newspaper correspondents who have come from abroad are of course much annoyed because they cannot find out anything about the proceedings of these, whom I may call the sweepings of society. The French Government has sent some commissaries of the police to watch over suspected persons of that nationality. As far as I can obtain information, but four members of the ex-Commune have arrived in the Hague, viz., Deruere, Ranvier, Serailler and Leo Frankel. But several of the deputies withhold their true names, because they are criminals who, if known, would be forthwith turned out of Holland. Perhaps something interesting may happen to-day, but till now this Congress has deeply disappointed all the seekers after sensational news, who had dreamt in anticipation of petroleuses, murder on a large scale, and a complete and general social revolution. It was even said by the Conservative Press that the strike of the weavers in our cotton districts was the commencement of the revolutionary movement. This of course was nothing but imagination. The disorder in Almelo and other towns in that district lasted but a few days' and all is now calm, as before. The masters have granted higher wages, and the people are content. But nevertheless I should not be surprised to find much exaggeration in the letters which are forwarded by the special correspondents. It is very strange, but nevertheless it is true, that foreigners cannot write about Holland without making the most curious blunders about our people and our social institutions. If you could afford the space I should be able to give you the most extraordinary illustrations of this fact, drawn from the articles which were published some days ago by the *Holnische Zeitung*, and which were written by Karl Gutzkow, the famous German novelist. I can recommend them much to those of your readers who like amusing nonsense. In this connection I may refer to the leading article of *The Times*, stating that the Italian Government proposes to establish a criminal settlement on the island of Borneo. *The Times*, which, it seems, is not aware that two-thirds of this island is under Dutch sovereignty, assures us that the Sultan of the island has granted permission to the Italian Government, and this permission has been approved of by the English Cabinet. The rights of the Dutch are completely overlooked, and, as I have said, *The Times* is probably unaware of their existence.

The majority of our literary men, with their "Flemish brethren," are now assembled in Middelburg, to attend the Literary Congress which is to be held in this beautiful town. The day before yesterday the Antwerp "beggars" arrived there to inaugurate the monument which is erected at Souburg, in commemoration of Marnix van St. Aldegonde. An enormous number of "Liberals" were present at this political ceremony.

In our politics dullness still prevails, and will continue until the session of the Second Chamber is opened. It is said that his Majesty will soon return from his trip to Switzerland, and that our Queen will again visit your beautiful watering-place, Torquay. The Ministers are still busy with their budgets.

A quiet tone has prevailed in our Produce Market for most of the leading articles, and no change of note has occurred in prices.

SHIPPING.

ARRIVALS.—Sept. 2, at Brouwershaven, from Batavia, Lichtstraal, 's Gravenhage.

DEPARTURES.—Sept. 2, from Brouwershaven, for Batavia, Maria Elisabeth; from Hellevoet, for Batavia, Susanna Johanna; Sept. 3, from Brouwershaven, for Batavia, Jason; for Sourabaya, Anna Lucretia.

THE INDIAN REVENUE AND CHINESE OPIUM.

The following letter on this subject appeared in the *Times* of Friday last:—

Sir,—On various occasions *The Times* has, in leading articles on Indian affairs, referred to the importance of the opium trade with China as affecting the Indian revenue; in fact, it is generally admitted that the great receipts from opium form the pivot of our Indian revenue system, and that it would be most difficult to find substitutes if those receipts materially diminished. You have done me the honour at different times to insert letters of mine referring to the same matter—letters written both from India and latterly in this country, but not until now bearing my own name. Having been a witness before the Committee of the House of Commons for Indian affairs, I was asked, among other things, if my experience of the trade while a merchant in India led me to think that the Indian revenue had been, or was now, in danger from competition, and I replied that I had not hitherto entertained any fear, but that now I thought the competition from opium grown in China itself did appear to be getting dangerous, as the information we possessed (however imperfect it was) pointed to an increased quantity of home-grown opium, and, what was even more important, to a great improvement in the quality. I referred the Committee to the information given in the "Opium Blue-book," lately published in Calcutta, and especially to the Report of the Government examiner of Opium on samples of China grown opium lately brought from China by Mr. Nasserwamjee, a highly respectable Parsee merchant, and sent by him to the Revenue Board. The opium examiner compared them with other samples received some years before, and reported a great improvement in quality and approximation to the character of Indian opium. I was then asked by the Committee what appeared to me the best thing to be done to ascertain if the danger was real or imaginary, and I replied that I thought the Government of India ought to do at once what the Board of Revenue had recommended to the Lieutenant-Governor of Bengal (Sir W. Grey, now at home), and which he had recommended to the Supreme Government, to send their own Commissioner or Commissioners to China, to reside for some time at the principal place of production and manufacture, and get all the information they could. Long ago I had the same idea, and had urged it as much as I could in conversation with Government officials and brother merchants, and in letters in your paper and elsewhere, and when I saw the quarter in which it was now supported I had confidently hoped that it would be done, and done at once. The Supreme Government, however, negatived the proposal, preferring, as they said, to get information through Her Majesty's Consuls at the treaty ports in China—gentlemen who have already plenty to attend to in their own departments, and can only pick up at second hand information which ought to be secured on the spot if this can be done.

If it cannot be done there is an end to the matter, but I have never heard of or read of any anticipated difficulty, and I would now ask your attention, and, through you, that of all interested in Indian affairs, to the report of Mr. Consul Caine to the Supreme Government of India, a copy of which I now enclose. It is taken from the *Calcutta Englishman* paper of the 30th of July. You will see that the Consul at the very port in China which is nearest to the place of growth speaks of "largely increased production," and of "the lasting improvement in the quality," but begins his report by saying that "full and accurate information, which is so emphatically necessary on a subject of such vast importance, can only be procured by personal observation on the spot,"—in short, he recommended just the same thing as has already been urged on, and been negatived by, the Government.

Surely it seems a business-like and common sense course that has been suggested? The Consul's letter speaks of a French gentleman who has been travelling through Yunnan, and reports the cultivation as proceeding there also. Mr. Cooper travelled through and resided in the interior of China for some time, and French Roman Catholic missionaries have long done the same. Why cannot the Commissioners of the Indian Government do so also?—Your obedient servant,

WILLIAM MAITLAND.

The London & China Telegraph.

LONDON: MONDAY, SEPT. 9, 1872.

THE SHANGHAI MUNICIPALITY.

FOR some time passed we have contented ourselves by summarising the proceedings of the Shanghai Municipal Council; of course, at best, its periodical minutes can but be a progress report of the projects sanctioned by the rate-payers. The late Council's annual report, and the rate-payers' debate on it, as well as the Budget for the current year, go far to mark what may be aptly termed the *internal progress* of Shanghai. The first thing that must strike any person conversant with the working of Municipal Institutions is the public spirit of the gentlemen who accept the office of Councillors. They give much valuable time and attention, and undertake grave responsibilities gratuituously, and they are ably aided by their permanent staff. Perhaps few municipalities possess employés who are so devoted to their duties as those of the Shanghai Council. This unity of action between the Council and its staff has tended much to earning for Shanghai the fairly appropriate title of the Model Settlement.

The police force continues a credit to the place, the nature of crime is only that which must necessarily take place in any town wherever there is a mixed population. The improvements continue in a steady manner. Roads and drainage go on yearly, the landing accommodation has been increased; these are the principal current works advancing steadily. The progress of Shanghai is best evidenced by the growing needs of its community; a call is now made for more street room in its main thoroughfare, the Bund is to be extended, the carriage traffic has to be controlled under stringent regulations so as to insure safety to the public. The extension of the Bund is a desirable undertaking, if for no other than sanitary reasons. The filling up of the foreshore removes any apprehensions that may exist as to danger to health by such a large surface of ground over which the tide flows being exposed to the action for hours of a scorching sun. That the extension of the shore line will in any way benefit the course of the river Hwangpoo we have our doubts at present, but time will solve this question.

A tramway scheme is on foot, which, if successful, as we have every reason to believe it will be, will bring about the settlement of the now important question to the community of efficiently bridging the Soochow Creek. The matter of water works has engrossed the attention of the Council; it has advanced some suggestions in the late annual report which have found such favour with the ratepayers that the subject is to be discussed at a special meeting. That the end in view will be best attained by being undertaken by the public, or by private enterprise, is one worthy of serious consideration. That difficulty will ever exist as to the position of a permanent pumping station on shore, caused by the *silting* up, or cutting away of the river bank, there can be no doubt, and this evil we apprehend can best be overcome by having the pumping machinery afloat, so that it can be moved at any time. The system of water supply in Geneva may, we think, be copied in Shanghai with advantage in this respect. The new Council has energetically entered on its labours, and the community has again to congratulate itself upon having the administration of its municipal affairs presided over by Mr. JOHN DENT.

THE AUDIENCE QUESTION.

IT is not unnatural that our friends in China should be watching with intense interest the development of a series of events which, for good or evil, are likely to materially affect foreign intercourse with that country. These events—comprising the marriage of the youthful EMPEROR, the revision of the German and other Treaties, the gradual increase of warlike resources in the shape of ships, arms, and foreign drilled troops, with other matters familiar to readers of our paper—are at this moment viewed from only one standpoint—their effect upon the much-debated and much-vexed "Audience Question." Rightly or wrongly our China contemporaries seem agreed to regard this as a test of China's future intentions; nor are we prepared to say that they are altogether wrong. There can be no doubt that an importance attaches to matters of form and ceremony amongst Oriental nations which Europeans find it hard to recognise. Especially is this the case in China, where the "divinity that doth hedge a king" is, from the autocratic nature of the sovereign power, an essential safeguard, not merely to the power, but even to the personal safety of the "Son of Heaven." For ages past, since an antiquity beside which our own history is one of yesterday, has the occupant of the dragon throne been regarded as at once the one supreme temporal ruler and the high priest of the unknown, yet one GOD. The "Son of Heaven" is no fanciful title bestowed upon the Chinese EMPEROR by foreigners, but is the veritable translation of a phrase commonly used to designate his MAJESTY.

It is therefore easy to understand how any acts on the part of foreigners which imply equality with a Sovereign whose very glance is deemed "sacred," seem to the natives almost sacrilegious. Did this sacred character pertain to the EMPEROR as Sovereign Pontiff only, we might humour a belief which, however absurd, is held by nearly a third of the human race. But, unfortunately, the high priest is King also, and the laughable pretensions of the one become the source of grave difficulties with the other. Those best qualified to judge upon the spot—even men who subject themselves to the charge of ultra fanaticism in favour of all that is Chinese—are agreed in one point, that this personal isolation on the part of the EMPEROR must be broken down. His pretensions would matter little did they not involve a daily interference, partly theoretical but partly real, in the affairs of State. It is this autocratic element in the Government which alone makes the Audience Question of any importance in China, and we can fully comprehend the anxiety felt by the Chinese to retain, and by the foreign residents to do away with, pretensions which once upset can never be successfully revived. There is another point of view in connection with the Audience Question which must not be lost sight of. As we have implied, Chinese and foreigners alike will view the reception by the EMPEROR of ambassadors on equal terms as a humiliation on his part, in so far as it publicly proclaims that he has abandoned his pretensions as the vice-regent of Heaven. But more than that, it will impose upon every provincial official, from Tsung tuh to the Yamen runner, the necessity of treating those foreigners with whom he comes in contact as equals by courtesy. So long as the EMPEROR refuses to even see an "outer barbarian," so long may his subordinates plead Imperial example for arrogance and impertinence to Europeans. We can, therefore, easily understand with what dislike they view the approaching possibility of an event which, once consummated, will for ever destroy a precedent so agreeable to their feelings.

MESSRS. GELLATLY, HANKEY, SEWELL, and Co. have issued a circular to British shipowners on behalf of the Messageries Maritimes Company, calling for their co-operation in the action which the directors have brought, to test the validity of the increased rates imposed by the Suez Canal Company. Some two months since we gave the text of the memorial, or case, drawn up by the directors of the Messageries, and we trust that shipowners in this country will see the wisdom of strengthening their hands as much as possible. The trial is expected to commence in Paris this day.

TELEGRAMS were received on the 4th inst., announcing the destruction by fire of the Pacific Mail Company's steamer *America*, while on a voyage from Yokohama to Hong Kong. The accounts differ somewhat in their recital of the details

Digitized by Google

of the catastrophe, but unite in stating that the cargo and the Hong Kong mails are destroyed, but that the passengers and crew have escaped, with the exception of about twenty Chinese stokers.

THE current number of *Blackwood's Magazine* contains an article upon Japan, which is of a similar character to those on the same subject which have appeared recently in other periodicals. It summarises the history of the country from its earliest period, and details the striking changes which have taken place in the policy of the Government in adopting European laws and customs.

IT will be seen by our Hamburg Correspondent's letter, that the Steamship Company, organised a few months since, are now ready to despatch a steamer once a month to the Far East. The *Enterprise*, which has been purchased for the line, will be despatched on the 10th inst.

THE appointments are gazetted of Mr. ROBERT LITTLE, M.D., and Mr. THOMAS SHELFORD, as members of the Legislative Council of the Straits Settlements, and of Mr. WILLIAM HASTINGS ALEXANDER as a member of the Legislative Council of Hong Kong.

THE last of the four steamers contracted for by Mons. LARRIEU, through Messrs. MATHESON and Co., for the navigation of the inland rivers of Saigon, will be despatched this week, and is named the *Vaico*.

A DAY IN A JAPANESE THEATRE.

The *Cornhill Magazine* for this month presents its readers with a graphic description of the drama in Japan, by Mr. E. H. House. To read this amusing review is almost to persuade oneself that Mr. Boucicault must have studied in the Japanese school of histrionic art when he was concocting *Babil and Bijou*, the splendid spectacle with which he is cramming Covent Garden nightly. It is curious to notice how things theatrical revolve in a cycle, and repeat themselves, like more important affairs. One of Mr. Boucicault's greatest successes, the *Colleen Bawn*, is, for example, and making allowance for local colouring, a mere reproduction of a Hindoo play, acted 2,000 years ago, and translated by Professor Wilson, under the title of *The Golden Cart*. The imitation is, no doubt, unconscious, but the resemblance is amazing. Our business, however, on the present occasion is with the Japanese drama, which appears to be conducted alternately in dialogue and most expressive pantomime.

The theatre to which Mr. House conducts us is in Yedo, and he premises that it is necessary for the thorough perception of the merits and bearings of the Japanese drama that one whole day should be devoted to it. There are three theatres in Yedo, and it appears that the "abominable custom of taking money at the doors" does not prevail there. On the contrary, the audience is regaled with tea on assuming their seats, at about eight o'clock in the morning. The theatre itself is described as resembling our Adelphi in area, but falling short of it in height, and capable of containing two thousand persons.

The "programmes" would appear to be very extraordinary documents, for Mr. House tells us that for amplitude of description and copiousness of illustration the new worlds of Europe and America know nothing to compare with them. They are not slips or sheets of paper, but little books neatly bound, and worth preserving. They present a list of the day's proposed entertainments, with names of the actors and portraits of some of the most distinguished among them, followed by very full analyses of the various plots, with coloured illustrations of the principal scenes. These amusing little volumes are sold for a halfpenny. The time when these programmes are handed round is the happy moment when the visitor is informed of the price of his admission. This varies according to the hour when the visitor arrives, but the maximum is about half a Mexican dollar.

The scenic appointments are good; but the situation of their musicians is less satisfactory. Two galleries are platforms, about five feet above the stage, which accommodate orchestra and chorus. There are generally three "samisen," or guitar players, and three singers on each side; and their position is accounted for by their utility in explaining the progress of the drama. Other twelve musicians are placed below with flutes, "kotos," or Æolian harps, and drums, some broad and shallow-like tambourines, and some shaped like hour-glasses. After the overture the performance commences, the favourite actors receiving an enthusiastic "reception" from their friends. The female characters are performed by men, who are admirably made up for their parts. Their dresses are very splendid, costly in material, and well contrasted in colour, and they perform a dance by way of *lever de rideau*.

The play which followed on the occasion of Mr. House's visit was called *Bumbuku Chagama; or the Bubbling Tea-pot*, and was founded on the legend of an enchanted tea-pot, which had the extraordinary property of turning itself into a badger, and then (through events in which we need not follow the writer) into a beautiful woman. In the last scene, the badger, harassed and worn out, seeks refuge once more in the tea-pot, which is broken to pieces by a priest armed with a fragment of tombstone. Then ensues a "transformation scene," not dissimilar to our own. A churchyard is changed into a smiling garden, and in the midst, lovely woman, released from her enchantment, stands ready to reward her adorer.

This is a fair description of the average drama. But lively comedies and plays of the class which we call "domestic" are almost as much favoured as the fairy tales. One of the most popular of the latter, it may be mentioned, is merely a local rendering of the legend of *The Fair One with the Golden Locks*, so well known to us through the charming writings of the Countess D'Anois and Mr. Planché. The acting is described as being exceedingly expressive and good. One of the performers to whom Mr. House was introduced was painted from top to toe, having to personate a "beto," or groom,—one of a class which is distinguished all over Japan by profuse and elaborate tatooting; and a singular "umbrella dance," full of ingenious developments and strange surprises—almost resembling a brilliant pyrotechnic display, is described in such terms of praise as will probably induce some of our metropolitan managers to imitate it at Christmas.

After several of these parts of a very long programme, as twilight approaches, candles are lighted, and what the French call a Solennité commences. Just before the termination of the ballet, a device well known in our theatres is practised. An actor, dressed simply as a citizen, rises from amongst the audience, and, attracting attention by his cries and eccentric gestures, makes his way to the stage, having reached which he changes his tone, and announces that his purpose was only to gain the public ear and give information of the novelty in store, which is not set down in the bills. Everybody had risen to depart, but now everybody sits down again, and immediately afterwards an immense number of persons pour in from the street, filling every corner of the house. It appears that, on the occasion of a first performance, which always takes place at the close of a day, the theatre is thrown open, and any person may enter gratuitously. If the new piece is well received, the favourable report of 1,000 auditors is a good advertisement; but, as has been remarked in other communities, these free comers are the most exigent of the spectators.

We have now extracted all that we think the bulk of our readers will require us to reproduce from Mr. House's very entertaining paper; but we cannot close without commending these Japanese plays to the attention of our friends of *The Phœnix*. A translation of some of the dramas which Mr. House saw would, we are sure, interest many general readers, while it would enrich the pages of that most valuable of Oriental miscellanies.

Monetary and Commercial.

With reference to the failure of Messrs. Gledstanes and Co.'s report has appeared in several of the daily newspapers that the unsecured creditors will obtain only a trifling dividend—probably not more than 1s. to 1s. 6d. in the pound. This statement is wholly without foundation. The books and accounts of the firm were placed immediately after the suspension in the hands of Messrs. Harding and Co., the accountants, and until their statement of the position of affairs is issued nothing can be known of the probable results of the liquidation. The private deposits in the firm, which will inflict the most serious consequences, we understand, amount to about £170,000. The Court of Bankruptcy have extended the protection order granted to the debtors last week, *sine die*. In consequence of the stoppage of Messrs. Gledstanes and Co., the firm of Leggatt and Co., of London and Bombay, has been compelled to suspend payment, and in order to protect the rights of all creditors, have presented a petition for liquidation of their estate. The liabilities are estimated at about £150,000, and statements are made that they will be paid in full.

A meeting has been held of holders of bills drawn by Messrs. Chapman, King, and Co., of Shanghai, on Gledstanes and Co., with a view to an agreement as to the course to be adopted. We understand that the representations made by Messrs. Chapman and King were considered very satisfactory, and that a formal suspension will be avoided.

Messrs. M'Arthur, M'Lean, and Co., ship owners and sugar brokers, Greenock, have suspended payment, with liabilities, it is stated, of about £100,000. Their suspension is attributed to speculation in raw sugar.

The traffic returns on the European lines of the Great Northern Telegraph Company for the month of August amounted to f.131,606, against f.106,612 for the corresponding period of 1871. In consequence of the interruptions on the Siberian land lines, the traffic returns of the China and Japan section for the month of August have not yet arrived.

Tenders for £650,000 in bills on India were received on the 4th inst. at the Bank of England. The amounts allotted were:—To Calcutta, £416,800; Bombay, £220,000; and Madras, £13,200. The minimum was fixed, as before, at 1s. 10¼d. Tenders on Calcutta and Madras at 1s. 10⅛d. will receive about 12 per cent.; and on Bombay at that price 86 per cent.; above in full. A somewhat increased demand is apparent, compared with the last occasion.

Bar Silver has again slightly improved in price, and may now be quoted as 60 5-16d. to 60⅜d. per oz. standard. Mexican dollars remain as last quoted, viz., 60d. and 62¼d. per oz. for new and old coinages respectively.

ARTICLES OF IMPORT.

TEA.

Messrs. Shepard, Harrison, and Co.'s Circular says:—

A steady tone has ruled in the market, and a fair quantity of Tea has been sold, preference being given to black-leaf Congou from 1s. 7d. to 2s. per lb.; red-leaf continues out of favour. Advices report the Lahloo, which sailed June 29, from Shanghai, ashore near Batavia. The export trade to all quarters has been on a small scale. Deliveries show a wonderful expansion, being for the month alone 15,250,000 lbs., making,

	1872.	1871.
Home consumption for London from Jan. 1 to Aug. 31	... 62,126,500 lbs.	59,109,000 lbs.
Export do. do.	... 27,000,000 ,,	24,637,000 ,,
Sent coastwise do.	... 24,200,000 ,,	22,800,000 ,,
Total delivered ...	113,326,500 lbs.	106,546,000 lbs.

Black: Red-leaf, old season's, of the grades below common, rule at low rates; a few new Siftings have come forward, and sold at 7d. to 8d. per lb.; good flavory to Kaisow kinds sell at 1s. 1d. to 1s. 4d.; medium Kaisow, at 1s. 5d. to 1s. 8d.; fine, 1s. 9d. to 2s. per lb. Pakling: Limited sales, at easier rates. Tayshan-leaf: Fair to medium quality has been in request, at 1s. to 1s. 3d. per lb., and is the turn dearer; other grades no change. Black-leaf: There is no new feature as regards common quality, but considerable sales have taken place, at 1s. 8d. to 1s. 10d. for fruity Pekoe-flavoured kinds, chiefly Ooanfa district. Souchong and Oolong show no alteration. Scented Tea: Canton kinds have been quiet; Caper, at 1s. 1d. to 1s. 3d., only asked for. Foochow Scented Orange Pekoe sells slowly at 1s. 8d. to 1s. 10d.; Caper, at 1s. 5d. to 1s. 8d. per lb. *Green*: Owing to unfavourable advices of the New York market it has been difficult the last few days to effect sales. The Stock is smaller than for many years past, but consumption in this country each season is decreasing, Indian leaf, change of taste, and irregular prices during the past few years all tending to this result. Canton kinds, no change. Uncoloured leaf: The stock is chiefly of common to fair quality, for which demand is limited. New Season's Ping Sueys, ex Menelaus and Enterprise, have met with ready sale at comparatively high prices, viz.:—No. 1 Gunpowders (boxes), 3s. 4d. to 3s. 8d.; No. 2, 2s. 10d. to 3s. 1d.; No. 3, 2s. 7d. to 2s. 10d.; No. 4, 2s. 3d. to 2s. 6d.; No. 5, 2s. 0d. to 2s. 2d.; No. 1, Young Hysons, 2s. 5d. to 2s. 8d.; No. 2, 2s. 2d. to 2s. 4d.; No. 3, 1s. 10d. to 2s. 0d.

SILK.

The Market has been quiet, but prices continue firm. In China Silk the demand has been chiefly for the better classes, for which very full prices have been paid; on the other hand, common and inferior descriptions, the stock of which is now large, have been comparatively neglected, and prices show a downward tendency. In Canton Silk transactions have been small, the high prices asked checking business. Japan Silk has been rather more in request, and prices are firmer. A few parcels of new Silk have arrived, some of which have changed hands at from 26s. 3d. to 28s. per lb., being 3s. to 4s. per lb. higher than the opening prices of last year. The new Silk is decidedly better than the first arrivals of last season. The deliveries—2,550 bales of China, 607 bales of Canton, 857 bales of Japan, and 391 bales of Bengal, although not so large as those of last month, are on a fair scale. The deliveries this month (1st to 4th inst. inclusive) have been:—China, 404 bales; Canton, 86 bales; Japan, 100 bales; total, 590 bales.

COFFEE.

Considerable supplies of Plantation Ceylon have again been placed upon the market, and have tended to increase the depression previously existing. Prices have further declined, and may be quoted 6d. to 1s. lower than those ruling at the date of our last report a week since, the latest rates paid being triage 69s. to 75s., ordinary 76s. to 77s., small 77s. 6d. to 78s. 6d., low middling 78s. 6d. to 80s. 6d., bold grayish 81s. to 81s. 6d., middling 80s. 6d. to 82s., bold 83s., pea-berry 98s. to 100s. The business done in Native Ceylon has been very limited; at auction 66 bags were sold at 72s., and privately a few hundred bags have been sold, good ordinary at 73s. 6d. per cwt.

SUGAR.

There is not the slightest improvement in the market, and a further concession in prices which has been made has not brought any increase of business. The sales of the week have been extremely small, and the only transaction in East India descriptions has consisted in the purchase of 360 baskets date Penang at 22s. per cwt.

CAMPHOR.—*China*: There is very little doing, holders being firm at £3 17s. 6d., at which figure there is but little disposition to do business. The sale is reported of 300 cases at £3 16s., re-weights. *Japan*: No business doing.

CARDAMOMS.—No transactions in Ceylon.

CHINA GRASS remains without the least inquiry, and quotations are quite nominal.

COCOA-NUT OIL.—There is only a moderate demand, but prices are steady. Ceylon ruling at £35 10s. to £35 15s. for fine quality, Cochin at £38 to £38 10s. for fine, £37 15s. for medium. Business afloat has been rather restricted, importers generally holding out for an advance, but lately 50 tons Ceylon, August or September sailing, have been sold at £36 5s. per ton.

COIR GOODS.—*Yarn*: Although the demand has shown no activity, yet the quantities brought to auction have been moderate, and prices exhibit no alteration. Quotations: Cochin, very fine to fine, £45 to £55; good, £35 to £40; low and common, £21 to £28. Ceylon, very fine and superior, £50 to £60; fine, £40 to £45; good, £33 to £36; low and common, £24 to £27. *Fibre*: Steady; Cochin, good to fine, £28 to £30 15s.; middling, £22 to £23. Ceylon, bristle, £32 to £38 per ton. *Rope*: Without alteration. Cochin, 2½ to 4 in., £28; Ceylon, 1½ to 1¾ in., £27; 2 in., £24 15s.; 3 to 3½ in., £20.

COPRA.—No demand, and all offers of Penang—about 1,100 bags—were retired.

CUBEBS.—Market very quiet, no business during the interval.

CUTCH.—The market continues very quiet, at 24s. 6d. to 25s. for Elephant mark Pegu.

DRAGON'S-BLOOD.—There is but little demand, and all offered have been bought in at £7 to £8 per cwt. for middling quality, no really good or fine genuine being on offer.

EBONY.—The long absence of supplies has caused manufacturers to be bare of stock, and a recent arrival of Ceylon per Middlesex, 74 logs (20 tons), sold at auction at the unusually high prices of £26 5s. to £30 per ton.

ESSENTIAL OILS.—*Aniseed* has been held very high, and sales are reported at 12s. to 13s. per lb., but for August delivery 11s., and for September delivery at 11s. 6d. (actual parcels) a considerable business has been done. *Cassia* is firmly held, and but little has been done at 6s. 3d. *Nutmeg* unchanged. *Cinnamon* wanted; very little fine here; 2 cases common sold at 4d. and 9d. per oz. *Citronelle* in steady request; of 60 cases at auction half sold—Winters' at 2⅜d. to 2½d.; Native at 2⅝d. *Lemon Grass* steady; 16 cases at auction retired.

GALANGAL ROOT.—In the absence of sales and arrivals there is nothing to report. Value about 15s. to 16s. per cwt.

GALLS.—*China* have slightly improved, the stock mostly being held by one house; 300 cases have been disposed of privately at 56s. 9d. per cwt., and at auction 211 cases offered were bought in at 57s. 6d. *Japan*: None here; inquired for.

GAMBIER.—Since our report of 2nd inst. the market has been steady especially on the spot and near at hand; for parcels ex ship in dock 24s. has been obtained. Afloat shipments for August-September are offering freely, but the market is not so strong in these positions, and early August shipment offers at 22s. 6d. per cwt., being 3d. easier, but without finding buyers. These lots will probably arrive after the close of the shipping season to the Continent, which is the reason of the easier market. Pressed Cubes are very firm, and a recently-arrived parcel, per Martha Augusta, has been sold at 26s. 9d. per cwt. for good. Cubes are scarce, and fine are quoted 28s. per cwt.

GUMS.—*Benjamin*: Siam firm for good kinds, but stock of common still large; Sumatra steady, and of 150 cases at auction half sold at £7 12s. 6d. for middling seconds, and 70s. to 82s. 6d. for good thirds. *Copal*: Very quiet; of 1,119 cases at public sale a very few only sold—hard good well-scraped, with a little dark, 34s. 6d. to 35s., being rather cheaper. *Damar* very dull, and 50 cases retired, but a few subsequently placed privately at 57s. per cwt. for fair Batavia. *Gamboge* steady; of 11 cases at sale 2 only sold at £15 2s. 6d. for fine bright pipe, part run.

GUTTA-PERCHA.—Market very dull, and no business doing.

HEMP.—Manila has continued depressed, and sales have been moderate and difficult to effect, even at a slight decline. The most recent quotations are—Quilot, good white, £55 5s.; good fair roping, £48; good, £48 10s. per ton. The sale is reported of about 5,000 bales on secret terms.

HIDES.—East India Hides continue to be freely offered to sale, and with a good demand both for Home consumption and Export a considerable business has been done. Good slaughtered selections have been comparatively scarce, and have realised somewhat improved prices. *Singapore and Penang Ox and Cow* sell more readily than of late, and full to slight advanced rates have been realised, viz., Light 8¾d. to 11d.; Heavy 6¼d. to 10d.; Thirds 5¾d. to 7d.; Fourths 3¼d. to 5¼d. per lb. *Singapore and Penang Buffalo* have maintained about previous prices, but were in somewhat limited demand at the last public sales. The

Digitized by Google

sales of the month comprise 7,710 Hides; Slaughtered, average 34½ lb., best 7½d.; fair to good average 25½ to 36 lb., best 5½d. to 6⅝d.; seconds, 5d.; average 7½ to 15½ lb. best 6½d. to 7d.; ordinary and inferior, average 30⅜ to 30¾ lb., best 5½d. to 5⅝d.; seconds 4¾d. to 4½d.; average 13⅛ lb., unassorted 6¼d. per lb. *Batavia Buffalo* of good quality find ready sale at full prices. The transactions of the month comprise 3,672 Hides; average 15½ to 23¾ lb., best 8½d. to 8½d.; seconds 5⅝d. to 6¼d.; average 9¼ to 12⅛ lb., best 9d.; ordinary Javas, average 20⅜ to 24¼ lb., 5d. to 5⅛d. per lb.

INDIA-RUBBER continues very dull; of 83 packages Singapore at auction, one-fourth sold at 1s. 6d. for whitish mixed foul. Borneo is quoted at 1s. 9d.

ISINGLASS.—There has been no change in the market since the periodical sales of the 13th ult.

JAPAN-WAX.—There is a small business doing at £4 7s. to £4 8s. per cwt. for good and fine qualities.

MUSK.—The market for fine pod is firm; 33 caddies Tonquin have been offered at auction, and sold; selected well-shaped pods 37s. 6d. to 39s.; rough and bally fair to very good 22s. to 24s. 6d.; wet pickings 23s. 6d. to 24s. 6d. per ounce.

PEPPER.—*Black* has been steady. About 1,000 bags Singapore and 5,000 bags Penang have changed hands privately, the former at 6⅝d. to 6¾d. per lb., and the latter at 6½d. to 6⅝d. Auctions have embraced—of Singapore 3,488 bags only a small proportion sold at 6⅜d., and Rhio at 6½d. (which figure, and a fraction less, has been accepted for several hundred bags privately). Of Penang 4,291 bags offered, and nearly half sold at 6⅝d. up to 6½d., and 1,437 bags Trang were half placed at 6½d. for good. *White* has been very firmly held, and a fair amount of trade done privately at 1s. 1⅜d. At auction half of 680 bags Singapore was sold; fair at 1s. 1½d. to 1s. 1⅝d., and good at 1s. 2d., closing very firm.

PLUMBAGO.—The market continues extremely firm, and fine lump is again dearer. Only moderate quantities have been brought to auction, and partly sold at 40s. per cwt., for very fine bright clean lump; dust, fine 14s., middling 10s. per cwt.

RATTANS.—Steady at last quoted rates.

RHUBARB.—China is steady, and the stock of new import is firmly held; of 107 cases at auction one-third sold, medium root, well trimmed good pinky fracture 2s. 6d. to 2s. 7d., dull pale grey rough 1s. 3d. to 1s. 4d. per lb.

RICE.—The market is steady, with an improved demand both on the spot and afloat, and an unusually large business has been done in floating cargoes of Burmah at rather higher rates. The following cargoes have been reported sold during the week:—A cargo of about 1,000 tons Rangoon distant shipment at 10s. open charter; two floating cargoes of Rangoon, together about 3,000 tons, distant shipment, at 10s., ex ship London, or 10s. 6d. Liverpool quay terms; the Genitori R., 1,030 tons Rangoon, April sailing at 10s. 6d., Liverpool quay terms; the Ontario, 1,271 tons Rangoon, May sailing, at 10s. 3d. Continent or ex ship, and 10s. 9d. landed or Liverpool terms; the Hercules, 1,869 tons Rangoon, May sailing, at 10s. 1½d. Continent or 10s., ex ship, 10s. 6d. landed, or 10s. 1¾d. Liverpool terms; the Topgallant, 1,750 tons Rangoon at 10s. 1¾d., ex ship, 10s. 7½d. landed, or 10s. 9d. Liverpool terms; the Albert Wilhelm, 960 tons Rangoon, April sailing, at 10s. 1¾d., ex ship, London; the Albion, 800 tons Necransie, May sailing, at 9s. 3d. open charter; the W. G. Russell, 1,735 tons tons Necransie, May sailing, at 9s. 6½d., ex quay, London; the P. C. Merriman, 1,232 tons ditto, April sailing, at 9s. 6d., open charter; the Hengist, 825 tons (one-half of cargo) Moulmein, June sailing, at 9s. 7½d., ex ship, London; the Nueva Ghilao, 880 tons Rangoon, June sailing, at 10s. 3d., open charter; the Manila, 650 tons Rangoon, August shipment, at 10s. 4½d., open charter; the Peleg, 1,125 tons Rangoon, arrived off coast, at 10s., ex ship, London; the Calcagui, 612 tons Necransie, late May sailing, at 9s. 7½d., ex ship, on Continent; and a cargo of 850 tons Necransie, August shipment, at 9s. 9d., open charter.

SAGO.—The market is steady, but quiet; in auction, of 1,072 bags offered, half sold; small middling to good, 16s. to 16s. 6d. per cwt., one lot 17s. *Flour* rather cheaper and quiet; none at auction.

SAPANWOOD.—Very dull, and quotations nominal.

STAR ANISEEDS.—The demand for China continues to increase, and about 40 cases have been sold during the interval; the price has advanced to £5 15s. for good quality.

SOY.—All demand has abated and sales privately have been made at 1s. 10d. per gallon, which price is no longer obtainable for any quantity.

STICKLAC.—An offer has been made of 946 cases, per Lord of the Isles, a portion of which were sold at £4 7s. 6d. per cwt. for good quality. The sale is also reported of 210 cases privately at £4 7s.

SPICES.—*Cinnamon*: Since the quarterly sales reported on in our last issue 25 bales low quality Ceylon, mark "B, Mahara Plantation," per Hilarion, have been quitted—firsts at 1s. 8d. per lb.; seconds at 1s. 4d., thirds at 9d. to 10d., fourths at 8d., and broken at 1s. 2d. *Chips* have improved; bright, rather barky, have sold at 5½d.; shavey and barkey at 4½d. to 4⅝d. per lb., very good thin bark with flavour at 4⅝d., and low coarse bark at 2⅝d. per lb. *Cassia Lignea* continues steady but quiet, with large stocks; further small sales of unworked at 90s.; 20 cases fair, second pile, sold at auction at 92s. to 93s. per cwt. *Buds* firm and in rather more demand. *Cloves*: Amboyna quiet: Penang steady, but little done. *Nutmegs* steady; of 70 cases brought to the hammer one-half found buyers—67's at 3s. 9d., 84's at 3s. 3d., 109's to 107's at 3s. *Mace* steady, but quiet; of 13 cases offered part sold at former value.

TAPIOCA.—Market rather quieter; of 4,420 bags Singapore offered at public sale about half sold at 2¼d. to 2⅜d. per lb. for fair to fine; 54 bags Penang sold at 2¼d. for good; and 210 bags Pearl chiefly sold at 2⅝s. 6d. for fair medium.

TIN.—The market is quiet, business being almost suspended in expectation of the announcement of the next Dutch sale. Straits is quoted £148 to £150, afloat £148; Banca, £158 to £159; Billiton, £149 to £150 per ton.

TURMERIC.—*China* scarce; 45 bags at auction held for high prices, and retired. *Java* unsaleable.

VERMILION.—Market quiet, with small business doing in China at 3s. 8d. per lb.

ARTICLES OF EXPORT.

—o—

MANCHESTER GOODS.

A slight improvement noticeable in this Market towards the close of last week was maintained up to the 3rd inst., when a weaker report of the Liverpool Cotton Market caused a relapse. A moderate business has been done in Yarns for Germany, and spinners are steady, but the demand for goods is very languid, more especially for Eastern markets, and at the close manufacturers show more disposition to meet buyers, without inducing much increase in business.

FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports are without quotable change since our last issue. Tonnage is somewhat scarce, and there is but little business doing. In coal freights chartering is considerably impeded, both at the northern outports and in Wales, owing to the turns for loading being now so long.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 90s. meast. To Hiogo: 90s. meast. To Nagasaki: 90s. meast. To Shanghai: 40s. meast. To Hong Kong: 40s. meast. To Manila: 80s. meast. To Singapore and Penang: 40s. meast. To Sourabaya and Samarang: 70s. meast. To Batavia: 65s. meast. To Padang: 80s. meast. To Saigon: 100s. meast. To Galle: 40s. meast.

Per SAILING VESSELS.—To Hiogo: 45s. weight, 45s. meast. To Yokohama: 35s. weight or meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 30s. meast. To Hong Kong: 35s. weight, 25s. meast. To Batavia and Sourabaya: 20s. weight or meast. To Samarang: 20s. weight or meast. To Singapore: 20s. weight, 25s. meast. To Penang: 35s. weight or meast. To Ceylon: 30s. weight, 25s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—To Yokohama or Nagasaki: £42 10s. To Shanghai: £45. To Hong Kong: £33. To Singapore: £25. To Penang: £25. To Galle: £21 to £22.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama or Nagasaki: 40s. to 42s. 6d. To Shanghai: 45s. To Hong Kong: 35s. To Manila: 27s. 6d. to 30s. To Singapore: 23s. 6d. to 25s. To Ceylon: 21s.

From Birkenhead, per ton.—To Shanghai: 35s. To Hong Kong: 27s. 6d. To Singapore, 21s. To Colombo: 15s. to 16s. To Galle: 17s.

Insurances.

By steamers via S.C., or sailing vessels, f.p.a.:—To Yokohama, steamer 35s., ship 40s.; to Shanghai, steamer 30s., ship 40s.; to Hong Kong, steamer 25s., ship 35s.; to Singapore, steamer 20s., ship 25s. to 27s. 6d.

CASUALTIES.

A telegram received from Batavia, dated Sept. 3, announces that the Lahloo, from China to London, had gone ashore off Sandalwood Island; the master and crew landed there, and boats were sent off to the vessel's assistance.

MISCELLANEOUS.

Advices received from Mauritius, by telegraph from Aden, dated Sept. 3, state that the Hollandstrouw, v. Stryen, from Batavia to Amsterdam, which put into Mauritius for repairs, had proceeded for her destination. The master had signed a bottomry bond for £5,000.

The Bessie H. (barq.), from Cardiff, to Ceylon, which put into Bahia, July 13, with master mutinous, sailed for her destination Aug. 3rd; the former master and several of the crew were sent home by the Olga (str.).

Advices received from Bahia, dated Aug. 9th, state that a bottle was picked up in the bay on the 7th, containing a paper on which the following was written in English and German:—No. 391, German brig, Hermann Friederich, from Hamburg to Shanghai, 1872, in lat. 17.24 S., and long. 34.42 W. The finder is requested to send this paper with information of latitude and longitude of the place where found, also date and year, to the Deutshe Seewarte, in Hamburg. F. Niejahr.

The master (Lefevre) of the C. J., from Bangkok to Marseilles, which vessel left Mauritius 3rd July, was landed at the latter port sick, and afterwards died.

At ST. HELENA.—Vice-Admiral May, from Java, and sailed, July 15, for Amsterdam.

Off ST. HELENA.—July 26, Marie Suzanne, from Saigon, for Falmouth.

At PORT SAID.—Gordon Castle (str.), from London, for Singapore, China, &c.

Considerable interest is attached to the passages of the Cutty Sark and Thermopytae, which left Shanghai, for London, on the 18th June. The Cutty Sark passed Anjer 17th July.

The Japanese barque Fu-Ju-Maru arrived at San Francisco on the 23rd ult. from Hong Kong, with a cargo of teas, furnishing the first instance of a vessel flying Japanese colours and manned by Japanese entering a foreign port.

SIEBE AND GORMAN,

ESTABLISHED 1820,

Submarine Engineers and Sole Contractors to the Royal Navy.

No. 5, DENMARK-STREET, SOHO, LONDON, W.C.

Messrs. S. and G. beg to call the attention of their patrons and public in general to their "Patent Diving Apparatus," by which two Divers can work simultaneously and at different depths, entirely independent of each other, and in the case of the one Diver being entangled in cordage of wreck, etc., another Diver can be sent down from the same pump to clear him. We are the only Patentees and Sole Makers of this Apparatus.

The above Apparatus has been entirely adopted in preference to all others by the Military School of Engineering (vide *Times*, May 20th, 1868); also by the principal Civil Engineers and Contractors; also at the recovery of treasure from the "Hamilla Mitchell," when the Diver worked four hours consecutively at a depth of 144 feet (vide *Times*, Sept st, and *Graphic*, Nov. 5th, 1870.)

A TRAINED STAFF OF DIVERS FOR HOME AND FOREIGN SERVICE.

Illustrated and Descriptive Catalogues to be had on Application.

ENGINEERS AND MACHINISTS, ICE MAKING MACHINERY, STEAM ENGINES, BOILERS, DIVING BELLS, PUMPS, &c.

THE

NAVAL AND MILITARY GAZETTE

East India and Colonial Chronicle.

A SATURDAY MORNING PAPER,

ESTABLISHED 1833,

Now under new Editorship, gives all the Naval and Military News of the Week, from both Home and Foreign Stations, interesting alike to those in the Services and to their Friends.

Price THREEPENCE.

166, FLEET-STREET, E.C.

SUCCESS IN INDIA,

AND HOW TO ATTAIN IT.

EFFINGHAM WILSON, Royal Exchange.

The writer is evidently well acquainted with the East, and the information afforded by him is both useful and interesting.—*Daily News.*

The honest yet hopeful way in which practical information is communicated in these pages concerning actual life in India will awaken the dormant enterprise of young men of education and ability, whose prospects may be somewhat indifferent at home.—*Globe.*

A valuable little pamphlet.—*Morning Post.*

The author of this very sensible work appears quite at home in his subject.—*Financier.*

We leave the little book with much the same impression as would be derived from the conversation of an intelligent and observant man of the world.—*Bullionist.*

A real and practical knowledge has been brought to bear upon the subject.—*Money Market Review.*

The author of the above-named pamphlet formerly editor of the *Indian Examiner*, and since on the staff of daily and weekly journals in London, seeks a re-engagement as editor in China, Japan, or Ceylon. The advertiser has a thorough knowledge of the practical working of a newspaper, and could undertake the business department also.

Address, J. D. B., care of the Editor of the *London and China Telegraph*, 2, Cowper's-court, Cornhill, to whom references are kindly permitted.

K. de PIOTROWSKI,

HOLLOWAY'S PILLS

AND OINTMENT.—From high temperatures many evils result more formidable than mere loss of apetite, apathy, and restlessness. By headache, giddiness, and parched skin, nature gives warning that a feverish attack has begun, which neglect will intensify if the sufferer fail to resort early to these cleansing and regulating Pills, or some such corrective medicine. Holloway's Pills meet all disarrangements of the circulation and nervous centres with efficiency and safety, and through these potent auxiliaries they are competent to check the advancing malady and to conquer the threatened peril. In disordered digestion, torpidity of the liver, alvine pains, irritable bowels, diarrhœa or dysenteric symptoms, Holloway's Ointment should be well rubbed twice a day upon the abdomen.

Per steamer *Canton*, from London, Sept. 4.—For Singapore: Mr. and Mrs. Hewick For Hong Koug: Mr. and Mrs. Willes.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

We have only two days later advices from this port, viz., to the 24th July. The following items of news are from the *Japan Mail* and *Japan Herald*:—

The Japanese Government has issued the following notification:—"In order to prevent misconceptions it is to be notified universally throughout each local government, to all, down to the lowest, that the sale of land in any part of Japan, even though it be private property, to a foreigner, and the pledging of land or title deeds in order to obtain money, are acts which are strictly forbidden.—Yokohama, 1st July, 1872." Upon this, H.M. Chargé d'Affaires remarks that he has acknowledged its receipt, but pointed out to the Japanese Government that it cannot be allowed in any way to prejudice any rights or privileges secured to Her Majesty's subjects under treaty engagements, and moreover that it cannot have a retrospective effect.

A notification has been published in the Japan *Nishin Shinjishi* which will, says the *Gazette*, be read by the Japanese priesthood with pleasure. It appears that princes have been in the habit of borrowing largely from the Church. For instance, Shiba, we are told, has lent upwards of 200,000 rios to some of the old nobility. On the Government taking over the liabilities of the Princes it was expected that these claims would have been paid in common with others—but hitherto the Government has ignored them. Now, however, a more hopeful state of things appears, and Daijokuan has announced the intention of the Government to do the correct thing.

The steamer *Coila* recently came to grief at Kobe in rather a novel way—running away with her engineers, who could not stop her, and bringing up on the beach. It was high water at the time, and it is supposed there will be some difficulty in getting her off, though it is not supposed her bottom is injured, as the sand is very soft.

Digitized by Google

A three days' holiday has been recently held in Yedo, to commemorate certain decisive engagements during the last civil war; On the first day horse racing appeared to be the chief amusement, and fireworks and conjuring took place on the second and third days.

The *Oregonian* salvage case is to be heard before Sir Edmund Hornby, K.C.B., whose arrival at Hiogo is looked for shortly in company with the barristers engaged upon the case.

NAGASAKI.

THE VISIT OF THE MIKADO.

The *Nagasaki Express* gives the following account of the arrival and reception of the Mikado, who reached the port some days before the date fixed for his visit :—

On the afternoon of the 19th July, the previously arranged signal—the firing of two guns—announced that the vessels forming the Imperial squadron were in sight from the look-out stations on the hills, and this brought most of the residents on the bund to witness his landing. In a few minutes afterwards the forerunner of the fleet, the gunboat *Teibo-kan*, was to be seen rounding Takaboco Point, a short distance in advance of the ironclad corvette *Rujo kan*, bearing his Majesty's flag, the latter being followed by the *Nissin-kan, Mosun-kan, Yuko-kan*, the two latter being nearly abreast of each other, and the *Teibo-kan, Unyo-kan* bringing up in the rear. The *Takuba-kan* and *Kasuga-kan*, which had arrived some two hours in advance of the squadron, took up the anchorage alongside the *Hosho-kan*, which had arrived the previous day. One of the two former vessels, the *Hosho-kan* and H.I.R.M. corvette *Vetiaz*, with yards manned, in conjunction with the Government battery, fired a Royal salute as the *Rujo-kan* steamed up the harbour to her anchorage. By this time several gigs, bearing the national ensign and containing the local officials, were being pulled towards the Imperial vessel, which was reached by them very shortly after she had anchored. With equal promptitude boats were also lowered by the several men-of-war just arrived, and no time was lost in getting those intended to form the landing procession into their assigned positions. It appeared to be the work of a few seconds only, and they were making towards the temporary landing-stage at Ohata, in the rear of Decima, which had been erected expressly for the occasion. As his Majesty embarked on board his barge, the whole of the Japanese vessels, the *Vetiaz* and *Monocacy*, paid honours in the customary manner by manning the yards, and as each vessel was passed the sailors sent forth cheers. On the last war vessel being left behind, the *Rujo-kan* commenced another Royal salute, the number of guns fired in the aggregate being 210, and finished about the time the landing-stage was reached. The appearance of the vessels, their saluting, and the landing arrangements, indicated that the officers and the crews of the vessels forming the fleet have attained considerable proficiency in their drill.

Nagasaki with its festal drapery and improvements in its streets presented quite a different appearance to Nagasaki in its everyday costume. The crowds of holiday seekers dressed in their bright colours, which lend an air of gaiety to such occasions, were considerably swollen by the arrival of thousands of persons from the rural districts, all anxious to catch a glimpse of their sovereign, have caused this place to be like a gigantic fair. On the signal being fired, considerable excitement prevailed in the native town, where the people were to be seen coming from all directions towards the thoroughfares through which the procession intended to pass. The hatoba and its vicinity were densely crowded with people, all anxious to get a view of what was going on. The day was a very warm one, but foreign spectators were numerous, although scattered about in various parts of the town. A very different scene took place to what usually occurs at places in Europe when visited by crowned heads. On such occasions a general outburst of popular feelings and other demonstrations are made, but none were made by the natives, who all squatted down on the ground as the guards formed and presented arms, as his Majesty passed them. The procession to the temporary residence admits of very little description, owing to the distance traversed being but short. This consisted chiefly of soldiers, whose uniforms are like the French, forming the guard of honour, marching on each side of the Mikado, who was dressed in a blue and gold uniform and rode upon a strong black pony, led by four grooms, and was both preceded and followed by the officers of his suite, also dressed in blue and gold uniforms.

A thunderstorm of about one hour's duration in the morning cleared the atmosphere and caused the wind to gradually die away during the afternoon. This was followed by an extremely calm evening, which materially assisted to render the display of illuminations a great success, and the foreign settlement, the native town, and suburbs were one blaze of lights. From Decima point to Sagaramatz but little darkness was observable, excepting one black spot at the former place, which indicated that some misunderstanding or oversight had occurred regarding it. To catalogue and give a description of the various devices and designs employed, or to record a list of the highly successful ones, would involve giving a very lengthy account indeed, and we must confine ourselves to stating that the crest of the Mikado was chosen in numerous instances. A display of fireworks was made from the *Ariel*, anchored close in shore off the bund, and the *Vetiaz* had her outline illuminated.

CHINA.

—o—

TIENTSIN.

(FROM A CORRESPONDENT.)

The Viceroy Li Hung Chang is busy erecting new forts between this and Taku, and extending to a considerable extent the original Taku forts. A fortnight ago a battery of six of Krupp's rifled steel guns arrived here to be mounted on the new forts, and a further instalment of these guns is shortly expected. At the Arsenal all are busy at work, and a considerable quantity of machinery has lately been received. The European staff consists of six Europeans. Li Hung Chang at present has 10,000 soldiers making a rough road from Taku to Tientsin, to render a speedy access to the forts by his soldiers. If the road was properly made it would make a splendid drive for the residents to and from Taku, but in wet weather it will simply be impassable, as it is made of mud, only it is raised some four feet from the old road. The traction engine and omnibus are expected here in a few days ; the trucks have been put up here by Mr. Wells, the Engineer for the North China Steam Carriage Company, and well finished they are. Mr. Henderson deserves every credit for this undertaking, which in my opinion will be the commencement of the introduction of railways into China. I think it most likely that the Chinese Government will purchase the entire train, as they have of late been making several inquiries regarding it, also the Russian agents here for conveying their teas through Mongolia. I will let you know more of this road railway.

The military escort for M. Geoffroy, the new French Minister to the Court of Peking, arrived here on the 30th June by the steamer from Shanghai, consisting of picked men and nine very fine Arab horses, landed in splendid condition here ; they will escort the Minister from this. He is daily expected, and comes with a full staff for the Legation, and I hear M. Geoffroy spoken of as a man equal to the delicate questions he has to settle with the Chinese Government. The Audience Question is the first, as he bears a letter from M. Thiers, to be delivered personally to the Emperor, and the general opinion is that such a privilege will be refused, and the Chinese themselves are anxiously waiting to see what the French will do in such a case. *On dit* that is the reason Li Hung Chang is busy erecting new forts and keeping a large army near at hand. However, *nous verrons*, Chung How is at Peking, and will introduce the Minister, whom he met in Paris and Versailles, to Prince Kung.

M Geoffroy is greatly admired by every one here for coming to the capital with a display requisite for a Minister armed with the powers he is, and it has already a good effect in the eyes of the Chinese. Mr. Wade, our Minister, has an escort of six men, who are never used, and it is said it will soon be broken up when the men's engagements expire, which is a great pity. Mr. Low, the American Minister, has no escort whatever, neither has the Russian or Prussian Ministers. We all know the display Li Hung Chang and Prince Kung make when visiting the legations, and all Ministers should be in a position to do the same, and had every Minister an escort of twelve picked soldiers, as M. Geoffroy has, it would have a good effect, and be productive indirectly of strengthening the hands of the Ministers.

The English Legation is shortly to undergo extensive alterations, much required, not only for the appearance of the Legation, but for the comfort of the Legation Staff. The English Government ought to supply a fine steam barge, drawing not more than three feet, for the use of our Minister travelling between this and Tungchow. He is now compelled to travel by the ordinary clumsy China boat, taking days to go from this to Tungchow. A steam barge could do it in forty-eight hours. His position at Peking ought to be kept up with greater dignity.

The beautiful new Roman Catholic church on the French Concession will be completed in September, and a handsome edifice it is, being the only fine building in the settlement of Tientsin. Adjoining it are the residences of the Fathers, orphanage for girls and boys, forming a complete and pretty range of buildings. The schools are well conducted, presided over by Pere Delemasure, a gentleman highly esteemed by the foreign community, as was his predecessor, Pere Xavier, who is now with the Bishop, Monseigneur de la Place, Peking. The interior of the church will not be completed till next year, so that the walls will be dry enough to be plastered. The church was designed by the Fathers, and built under their superintendence, and competent architects are high in their praise of the building in every point of view. I believe it is intended to rebuild the old Cathedral in the city destroyed during the Massacre on June 21st, 1870, and to erect monuments on the graves of the noble Sisters who were so barbarously murdered.

SHANGHAI.

We have advices from this port to the 28th July. The French mail, from London June 7, arrived out on the 21st, and the following P. and O. mail of June 14 on the 24th July, the last-

Digitized by Google

named being four days in advance of due date. The following summary of news is from the *Courier* :—

The Shanghai and Hongkew Tramways Company have issued a detailed programme of their scheme and an estimate of the expense, drawn up by Thomas W. Kingsmill, Esq., the engineer of the company. The company propose to lay a line, of a gauge of three feet six inches, from the extreme limit of the French Concession, adjoining the police-station outside the Little East Gate, to the extremity of the old Broadway. From the starting-point we have indicated the course of the line is along the centre of the Bund as far as Kinleeyuen. The Tien-how Creek will be crossed by an independent wooden bridge, alongside of the main French Bund at a distance of eleven feet from the kerb of the footpath by the river front. A bridge outside that now existing, and at the same level, will take it across the Yang-king-pang, and conduct it to the new Bund, where it will keep the inside of the road, its centre line being about eight feet from the railing of the new garden plots. The line skirts the outer side of the present Public Garden and crosses the Soochow Creek by a bridge built for itself, standing between the present iron bridge and the new one proposed as part of the Bund Scheme. Various connections with wharves and godowns are intended, and extensions are proposed along the Soochow Creek Bund to a point where a street to be called New Bund-street is likely to be formed, which will allow the tramway to bisect the Settlement; while both ends of the main line may be carried further. Until the new Bund line has been formed, the present Bund would be used, the line being afterwards moved. The distance first proposed is two and three-quarter miles, and the whole cost is estimated at Tls. 120,000.

A smart shock of earthquake has occurred at Chinkeang. A correspondent, writing on the 25th July, sends the following account :—"We had an earthquake here last night, which startled us somewhat. It took place, according to H.M.S. *Leven's* time, at ten minutes to eight P.M, and lasted, I should thing, fully five seconds. I was lying down at the time, and the first intimation I got of the shock was by my couch being raised as if by a big dog underneath endeavouring to crawl from below, which was followed by an undulatory motion, accompanied with a low rumbling noise and the shaking of everything in the room. If the noise is any indication of the earthquake's motion, I should judge it was travelling from north to south. There were two other slight shocks, hardly noticeable, however.

Mr. Robert Hart and his suite, including Mr. D. M. Henderson, C.E., arrived at Woosung in the Chinese gunboats *Fei-loong* and *Fei-foo*, on the 16th inst. It is naturally supposed that the Inspector-General and his Engineer in-Chief stopped there so as to make a thorough survey of the *Lismore* wreck, the Woosung Bar, the Junk Channel, and other points of the approaches from the Yangtse to Shanghai, with a view to the practical settlement of the questions regarding these which have been so long under discussion. They came on to Shanghai the same day, and Mr. Hart has since visited Hankow.

A mandarin of red-button rank, who lately arrived from Soochow on business connected with the land-tax, has been accidentally drowned while proceeding from the Shantung-road jetty to his boat in the Soochow Creek. When nearing his boat he rose to prepare for leaving the sampan, but doing so hastily, lost his balance and fell into the creek; a strong tide was running at the time, and he did not come to the surface again. The Chinese have been busy dragging the creek in search of the body, for the recovery of which a reward is offered.

A young man named Pigeon, belonging to H.M. gunboat *Leven*, rescued a Chinaman from drowning a few days since at Chinkeang. He jumped overboard in his clothes. Any one who knows the dangerous current at Chinkeang must be aware of the great risk Pigeon ran in saving the life of this coolie. Last week two Chinamen were drowned, whilst bathing, near the same spot.

A few days since about 130 Shanghai Volunteers, including a dozen Rangers and one gun from the Artillery, turned out to take part in a general parade. The corps was divided into attack and defence parties, which engaged in mimic warfare along the line of the defence ditch, between the bridge at the head of the Maloo and that leading to the Cemetery-road. There was an immense crowd of foreign and native spectators.

Two more foreigners have succumbed to the heat—one, a police-constable, named Smith, and the other, a Mr. John Douglas, of Hongkew—who, being suddenly taken ill, died two hours after he reached the hospital.

The new naval architect for the Kaou-chang-meaou Arsenal has arrived and entered on his duties.

Chefoo is at present honoured by the presence of a brilliant assemblage of diplomats. General Vlangaly, the Russian Minister, and Mr. Annecke, Charge d'Affaires for Imperial Germany, have arrived to brace and invigorate themselves for the coming struggle with the Tsung-li Yamen. M. Geoffroi, the new French Minister, who is also at Chefoo is suffering from dysentery; as soon as he recovers he will proceed northwards.

From Peking there is absolutely no news whatever. A Tientsin correspondent writes :—Weather rainy; and as the water of last autumn's floods had not subsided from the plains before the rain set in, it seems certain now to remain there for another winter, as the rivers are rising. Mr. Landstein, who arrived the other day from Pekin, was five days on the journey, and reports the road two feet under water for half the distance. The Municipal Council has not been in harmony with itself; and Mr. Beveridge, the representative of Messrs. Jardine, Matheson and Co., has retired from it, so that the Council now consists of Messrs. Meadows (U.S. Consul), Moore, Hannan, and Kierrulff. Should the waters on the plain rise there will probably be no races here this autumn. Mr. Ney Elias, of Shanghai, and M. de Rochechouart, the French Charge d'Affaires, are preparing to make a journey homewards through Mohamedan Tartary—a most interesting route.

HONG KONG.

Our advices by this mail extend to the 3rd August; the P. and O. mails of 14th and 28th June arrived out on the 20th July and the 2nd August respectively; the intermediate French mail of the 21st June was received by the P. and O. steamer which brought that of the 28th, having been detained by an accident to the engines of the Messageries Maritimes steamer *Donnai*. We are indebted to the *China Mail* for the following items of intelligence :—

Extreme inconvenience has been caused by a strike of the carrying coolies. It appears that certain thieves, after effecting a robbery, took refuge (or were believed to take refuge) in a coolie-house. In the course of the proceedings it was discovered by the Acting Registrar-General that the house was not, as directed by the Ordinance, licensed, and upon further inquiry, it came out that none of the keepers of these houses had licenses. A notice was thereupon sent to them directing them to take out licences, the fees being $5 per annum for every ten men boarded. The men refused to do this, and were accordingly summoned before the magistrate and committed to prison. Before their arrest, however, they informed their coolie-boarders that the Government had levied a poll tax of fifty cents on each coolie, which they (the masters) were to pay in the first instance, recouping themselves from the coolies' wages. They judiciously suppressed the fact that the license fee was never intended to touch the coolies at all, but was payable wholly and solely by the house masters out of the very good profits they make by their tenants. The arrest of the housekeepers, therefore, seemed to the coolies a matter in which their landlords played the part of victims owing to a proper desire to save the coolies' pockets, and they accordingly struck work. Explanations were, however, made, the results of which were that the strike ended on the 30th July, and the headmen were subsequently released without payment.

Amongst the minor excitements of the day a duel fought on the 29th July on Chinese territory, near Kowloong City, has taken a prominent place. The principals were Senor Checa, H.C.M. Consul in Hong Kong, and Senor Torre Bueno, ex-Peruvian Consul at Macao. The conditions, as we learn from a reliable source, were pistols at twenty-five paces, each party advancing to deliver his fire, as he chose. The ground was measured off, and Senor Bueno won the toss for the position at twenty-five paces. At the signal Senor Checa advanced towards his opponent, and when about sixteen paces off received Torre Bueno's fire. The bullet passed close to his head, almost grazing his nose, but fortunately went clear. Checa then exclaimed, "You see, gentlemen, that he intends to kill me! he is aiming at my head. I would gladly fire in the air, but I dare not, as he would shoot me like a dog. So I must stop his pistol practice for the future." Checa then advanced and aimed at his opponent's right arm, and the ball took effect just inside the joint, under the collar-bone, and Torre Bueno fell. The medical men present immediately went to the assistance of the wounded duellist. He was conveyed on board the Spanish man-of-war in harbour. The others returned to Hong Kong.

On the 24th July a fire occurred, resulting in the total destruction of the West Point Rice Mills, of which Mr. W. W. Battles is the proprietor. Smoke was first observed issuing from a window at the back of the first floor, close to the engine-room, and from this it may be concluded that the furnace flue by some means or other caught fire. Another theory, however, makes it out that the fire was an act of incendiarism, and one man was arrested on that charge. This theory, however, is not borne out by circumstances. When smoke was first seen the constable on the beat gave the alarm, and another constable ran to the residence of the Honourable C. May, Superintendent of the Fire Brigade, at Castle-road, to convey the information to him. Meanwhile all the fire stations that possessed a firebell spread the alarm, and several fire engines soon arrived on the spot. Before their arrival the conflagration advanced so far that to save the building was simply an impossibility. The only thing to be done now was to confine the fire to the building in which it originated, and in this the combined efforts of the engines did very good service. The loss was considerable, as with a few exceptions the whole of the machinery and the building itself were destroyed, besides a large quantity of rice stored therein; one Chinese firm alone having in store over 1,000 piculs. Luckily, the fire was confined to the rice mill, otherwise the loss of property would have been very much greater, as on the east there is the P. and O. Company's factory, and on the west there is the Tung Fook godown, having it in a very valuable cargo stored. There was little or no confusion, and looting was not heard of.

A missionary gentleman and lady on returning from evening service at Kuk fau (near Canton) were attacked near Shap-sam-hong by some Chinese, who waylaid them. The gentleman received a heavy blow in the face, and the lady was also struck. It is said that this brutal act was committed in revenge for some remonstrances against gambling on the part of the missionary; but we have since learnt that the person who committed the outrage was crazed.

Grave irregularities have been discovered in a subordinate department of the police. In the absence of more precise information we refrain from comment, but enough has transpired to show that the police authorities have acted justly in instituting searching investigation.

The distribution of prizes at St. Saviour's College took place on the 27th July, H.E. Sir A. Kennedy, Hon. Judge Ball, Hon. C. C. Smith, Major Lucas, Messrs. Overbeck, Lister, Coxon, Remedios, Francis, and many other gentlemen being present.

An advertisement invites the brokers to select a representative from each branch, who will be received on the 13th August, at the Attorney-General's office, for the purpose of giving evidence before the committee appointed to inquire into the Ordinance.

The King of Cambodia, after paying a visit to Canton and Macao, has returned to Hong Kong.

A debating society and Philharmonic society have been founded, and are well supported.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings dates to the 11th August; the French mail, with London dates 5th July, arrived out on the 3rd; and the P. and O. mail of 12th July on the 11th August. The following summary of news is from the *Straits Times*:—

There has been no meeting of the Legislative Council since the departure of last mail, the Governor having been absent on a visit to the native rulers of Tringanu, Calantan, and Pahang. His Excellency was accompanied by the Maharajah of Johore, and was received with every assurance of friendship. One object of the visit was to settle certain differences between the Maharajah of Johore and the Bandahara of Pahang, in accordance with the terms of a treaty made in 1868, it being said that the boundary line then decided upon had been infringed by the Bandahara's subjects. The result of the visit was, we are informed, entirely satisfactory.

In contrast with this excursion to the East Coast may be placed the policy of the Government towards Salangore and Klang, where a civil war is again raging, the contending parties being Rajah Mahdie and his adherents, who have, it is asserted, been procuring supplies and enlisting men in Singapore. Mahdie spent some time in Singapore, and then went to Jahore, but the Government did nothing except to treat with him, he meanwhile continuing through his agents to carry out his designs. The Chinese traders of Malacca have addressed a letter to the Chamber of Commerce here, pointing out that after the shelling of the Salangore forts the local Government had announced its intention of protecting Tunku dia Oodin in the control of those territories, in consequence of which the traders of Malacca have been induced to invest money in the mining and other products of Klang and Salangore, and that their interests were jeopardised and the trade paralysed by the renewal of the war, some of the works of their tin mines having already been destroyed. Further, they say that Mahdie might have been easily arrested at Siak, or Johore, or Singapore, but this had not been done, and his friends openly boasted that the British Government would do nothing against him, and that he was being assisted by the Maharajah of Johore. They urge upon the Government the necessity of its interference to put down Mahdie and his adherents, not only in good faith towards themselves, but to further the interests of the trade of the colony. This letter has been forwarded to Government by the Chamber of Commerce, and it is now under consideration by the authorities. Meanwhile, it is said that Mahdie has gone to Klang at the head of an armed force, so that the Government has let slip an excellent opportunity of crippling if not wholly ending this vexatious petty war.

The Commission to inquire into the desirability of employing Chinese in the police force, and also the Commission of members of Council to inquire into the working of the Municipalities are both sitting. It is somewhat singular that in Hong Kong the very same questions are agitating the public mind, and the Police Commission there has by a very slender majority recommended the employment of Chinese as constables, though three out of the seven members held a directly opposite view. With respect to the Municipal question, however, it is curious to observe that while our own Government and the unofficial members seem bent upon abolishing the Municipalities and placing the conservancy of the towns entirely under the Government control, the officials in Hong Kong complain of too much responsibility in having to look after such work, and the establishment of a Municipal Commission is suggested as a remedy for the defects of the present system.

The Agri-Horticultural Society's flower show was held on the 31st July at the Botanical Gardens, and though the floral display was not so attractive as it might have been, still the affair was very successful. Should the weather prove more favourable next time, we have no doubt the society will be able to induce a larger number of competitors to take part in the exhibition.

The prospectus has been issued of the Galena Mining Company (Limited), with a capital of $200,000, in 2,000 shares of $100, and the share list will be closed on the 14th Aug. All the shares in the company were, we hear, bespoken beforehand, but as this gave dissatisfaction to others, the list was thrown open to the public for a few days, after which the shares will be allotted.

Commercial Report.

—o—

(*For dates see first page.*)

IMPORTS.

HANKOW.—The business of the fortnight had been on a very small scale. The river had, however, fallen several inches, and it was expected when the Settlement and native city become free from water the dealers would show more disposition to buy.

SHANGHAI.—There had been no improvement in the price of Grey Shirtings; a fair general demand for both 7 and 8¼ lbs. goods had been met by holders. More inquiry for common makes of 6 and 7 lbs T-Cloths suitable for dyeing purposes had existed, while Mexican Cloths had been comparatively neglected. Drills were rather firmer, but Jeans and Sheetings were in full supply, and weak. For White Shirtings there had been little or no demand. Fancy Cottons: A fair business in Chintzes, Turkey Red Cambrics, Gentian Shirtings and Dyed Brocades, but without advance in price. Woollens: There had been more inquiry for Long Ells and Black Lastings, which were slightly higher. Spanish Stripes had attracted the attention of some speculators and good assortments of Figured Orleans had been sought after.

FOOCHOW.—Sales had been:—8¼ lbs. Grey Shirtings, 900 pieces, at $2.80 to 2.82½ per piece; 8 lbs. White Shirtings, 100 pieces, at $2.67½ 7 lbs.; T-Cloths, 2,450 pieces, at $2.12 to 2.35; Lead, at $6.75 per picul.

HONG KONG.—The Import Market during the past fortnight had been dull. The large purchases noticed in our last report had supplied the wants of the dealers generally, while business had been somewhat interfered with by the strike amongst the carrying coolies. This had terminated, and the dealers were enabled to ship off their purchases. Holders still appear desirous of reducing their stocks, owing to favourable reports regarding the Cotton crop of America.

MANILA.—The demand for Plain Staples had been languid, and values were practically lower, although nominally rates were but little altered. Coloured Goods were in no great demand, but some importers had raised their prices to rates which practically kept their goods off the market. There was not, however, much confidence in the stability of the advance held for at the moment, as dealers entirely refused to follow it, but a steady advance in values was expected to obtain towards the end of the year, when there would be a better demand. Sales of all classes of Piece Goods had been very small during the fortnight.

SINGAPORE.—Messrs. Boustead and Co. report as follows:—During the fortnight a moderate business only has been done in Piece Goods at the closing quotations given in our last report. The latest telegraphic news from Manchester is more in favour of holders. 39-inch Grey Shirtings 8¼ lbs. best makes, in demand at $2.57½, other qualities little wanted at $2.55; 7 lbs. quiet at $2.17½, and 6 lbs. dull at $1.92½ to 1.95; 45-inch, 9 lbs. in rather better request at $2.90 to 2.95; 8 lbs. scarce and wanted at $2.60; 32-inch T-Cloths, 6 lbs. in moderate supply and fair inquiry, at $1.67½ to 1.70; 7 lbs. dull at $1.85 to 1.87½; 5 lbs. in poor demand; but some inquiry for 4 to 4¼ lbs. at $1.07½ to 1.72½. Grey Yarn, 18/24's little wanted; 30's scarce and in some request at $117; 40's, moderate demand at $134 to 136, being a decline of $2 to to 3. Woollens: Camlets firm at previous quotations; no inquiry for Long Ells or Lastings; Scarlet Spanish Stripes in some demand at 85c. to 90c. Metals: Iron, stocks of all kinds moderate and holders firm; Govan flat bar, $3.90 to 4; Nailrods, to arrive, $3.90; Swedish flat bar, $4.05 to 4.10. Lead in limited demand, L. B. $6.02½ to 6.10.

EXPORTS.

—o—

TEA.

YOKOHAMA.—Buying had been steadily conducted at previous rates, though the receipts from the interior had been light and the stocks offered but limited range for selection. The vessels on the berth for New York were:—Polly Lewis, Eastern Chief, Oceana, and Leander. The Clara Bell was loading for San Francisco, and the Yedo and Audax offering for London.

HANKOW.—Messrs. Drysdale, Ringer, and Co.'s report says a fair business has been transacted here in second crop leaf during the past fortnight, at fully the high scale of prices established on the arrival of these Teas, settlements aggregating 14,418 chests, 16,541 half-chests, 2,458 boxes. As compared with the same time last year the quantity shipped and settled for the fortnight is less than then, but prices range considerably higher, on an average 2d. to 3d. per lb. more, laid down in London. In addition to this the class of Tea settled has been decidedly inferior. We can only account for this advance in price by the now almost certain deficit in the second crop yield. This is undoubtedly drawing to a close; stock here is small, and from all accounts there cannot be more than two million pounds still to come forward. We should, therefore, estimate the second crop at about thirteen million pounds as against seventeen last year. With regard to third crop leaf little reliable is yet known, except that extravagantly high rates are ruling in the Tea districts, while the quality of the Tea is unsatisfactory. Up to 470 cash per catty is being paid in some of the districts, or as high as was paid for first crop leaf, laying the Teas down at this port at about Tls. 22 per picul, or nearly 1s. 7d. per lb. in London. The above settlements have been made at the following

Digitized by Google

rates:—Cheong-sow-kye Teas, Tls. 21½ to 25½; Young-low-szes and Yung-low-toongs, Tls. 21½ to 23¾; Soong-yongs, Tls. 23½ to 26; Oonfars, Tls. 20½ to 21½; Lee-lings, Ping-kongs, and other low class kinds, Tls. 18 to 22; Shuntams, Tls. 13 to 14.20 per picul. We estimate total arrivals at 39,300,000 lbs, against last year 40,200,000 lbs. Customs export to 18th July is 41,200,704 lbs.' against 40,095,571 lbs. last year.

KIUKIANG.—One chop of Green Tea had come to hand, but arrivals in quantity were not expected for a week or ten days from date.

SHANGHAI.—*Black*—The business done had been small compared with corresponding period last year, being 15,418 chests and 18,400 half-chests, against 32,687 chests and 20,882 half-chests. During the early part of the fortnight under notice a few settlements were made daily at former quotations; buying was not, however, by any means active, and as the due date of advices by wire respecting the arrival of the first steamers from Hankow approached, holders found increasing difficulty in effecting sales, business becoming quite nominal in character. On the 18th July the first advices of the opening of the home market for new Teas were received reporting limited sales, finest Teas being the only sorts giving profits, and other kinds not saleable at cost. Subsequent telegrams had, if possible, been more disappointing, and although losses do not appear to be heavy, still the news was regarded as very unsatisfactory, and the opinion that too much anxiety had been shown to realise was generally expressed. After receipt of the foregoing information the market continued very quiet, sales being nominal till near the close, when a fair business was done at a decline of Tls. 2.0.0 per picul, the market closing with a downward tendency. The grades that had commanded most attention had been the best of the second crop from Cheong-sow-kye and Ningchows; they were freely taken early in the fortnight at Tls. 28 to 32, when they were nearly all cleared off. Teas from Soong-young and other true Oopack districts were not in such favour, and had not realised such a high range of price. The supply of fair to medium grades had been small, any chops of the class finding ready sale at Tls. 23 to 25. But few common Hohows and Shuntams had been shown, and as holders asked prices much above home quotations they were unable to sell them. Current rates were about three taels over last year's prices, and fully equal to the highest rates obtained at home for the same class of tea at any time last year. Stock, 37,000 chests, against 48,700 chests; and export, 34,100,927 lbs., against 34,275,835 lbs. *Green*: A considerable business done in both Pingsuey and Teas from the Fychow and Teenkai districts. A further acquaintance with latter had confirmed the opinion as to their quality and make; the Fychows equal to last year's, whilst the chops of Teenkai shown inferior in make and quality. Prices for Pingsuey ranged from Tls. 34 to 67 proportion, some fine lines bringing Tls 74. Fychows and Teenkais settbed at Tls. 33 to 50, some Shanghai packed of good quality and proportion realising Tls 40 to 45.

AMOY.—A steady business had been done in Ooloongs, settlements having amounted to upwards of 20,000 half-chests. Rates paid had been irregular and generally lower, but at the close a further reduction was not expected, as buyers were disposed to continue operations at current figures. Arrivals were 123,518 half-chests, settlements 110,891 half-chests. The barques Hylton Castle and Aurora Australis were loading for New York, and the steamer Cyphrenes was expected for the same destination. The Kin Lin would load for Boston. Quotations: Common to fair cargo, $21 to 25; good cargo, $27 to 28; superior, $32 to 35; fine to finest, $39 to 52; choice $56.

CANTON.—Transactions had been conducted upon a considerably reduced scale, and, with discouraging telegraphic advices from London, buyers were showing but little disposition to operate, and were offering low prices; teamen, however, were unwilling to accept any material reduction in values, and the market in consequence closed very quiet.

SILK.

YOKOHAMA.—The market had shown considerable activity, and an advance in value of about $30 per picul had been established. The settlements had reached a total of 758 bales.

CANTON.—The settlements for the fortnight had been about 1,200 bales, leaving a stock of 1,000 bales. Prices had ruled slightly easier, but no sensible decline had taken place.

SHANGHAI.—Messrs. Skegge and Co.'s Circular says:—Immediately after the departure of last English mail dealers began to show signs of anxiety to sell, buyers held off until the 16th inst., when some large purchases of chop Silks were made at a reduction of Tls. 10 to 15 per picul, business then became general at irregular prices, but without any perceptible drop on the grades below chops, and continued up to the close of the French mail, when settlements for that week reached about 3,000 bales; since then business has been quieter, but buyers anxious to obtain well known chops of the 3 and 4 Tsatlee quality have paid an advance of Tls, 2½ to 5 per picul. A fair business has been done for America, and extreme quotations have been maintained for all choice parcels of Rereels and best Kahings. Settlements for this week amount toabout 2,000 bales.

MORRIS—On the 7th Aug., at Singapore, Mr. William Morris, foreman of stores in the Control Department, aged 37 years.

SILVER—On the 11th Sept., at Norwood Lodge, Streatham-common, Ellen, the wife of S. W. Silver, of Cornhill, aged 51.

TOLFREY—On the 10th Sept., at Fulham, Mary A. Tolfrey, second surviving daughter of Major C. F. Tolfrey, H.E.I.C.S., and granddaughter of the late Samuel Tolfrey, President of the Supreme Court of Ceylon.

MISCELLANEOUS.

VISIT OF THE BURMESE AMBASSADORS TO HALIFAX.

The principal members of the Burmese Embassy have paid a visit to Halifax. There were present to meet the Embassy the Mayor, Mr. John Crossley, Alderman McCrea, the Town Clerk, and several members of the Town Council. On the arrival of the train their Excellencies were introduced to the Mayor and other gentlemen by Major McMahon, who, having resided in Burmah for many years, speaks the language. The principal Ambassador then took the Mayor's arm, his first attache that of Mr. John Crossley, and the secretary that of Alderman McCrea, and in this order they walked across the rails to the principal entrance of the station, accompanied by Mr. Jones, the Burmese Consul in London, and a young Burmese gentleman, who, having resided many years in this country, speaks fluent English. In front of the station were drawn up the carriages of the Mayor, Mrs. Joseph Crossley, Mr. McCrea, Mr. E. Crossley, and Mr. E. Akroyd, M.P. On the box of the Mayor's carriage was his worship's mace bearer, the chief magistrate wearing his chain of office. In this carriage the Ambassador and Major McMahon took their seats. In the second carriage were the first attache and Mr. Jones; and in the third, the secretary and the young Burmese gentleman. Their Excellencies were gorgeously attired, wearing robes of silk of various colours, over which were snowy white tunics. On their heads were coronets of feathers, above which the hair was plaited into a knot. The visit of the Embassy was to Mr. Jno. Crossley, but it was thought desirable that the Mayor, Town Clerk, &c., should meet them. They were driven up Horton-street, and along Union-street, Market-street, Northgate, and Cross-hills, to Dean-Clough works, through which they were conducted by Mr. John Crossley, Mr. E. Crossley, and Mr. Collier. After having inspected the various processes of the carpet manufactory, and having them explained, the illustrious visitors were next conveyed to the card-works of Messrs. Jno. Whiteley and Sons, Brunswick Mills, through which they were conducted, and had the various processes pointed out by Mr. N. Whiteley. From this establishment their Excellencies were conveyed to the Crossley Orphan Home, where they were much struck by the admirable arrangements of the institution. They visited the school-rooms and the dormitories, and afterwards saw the children assemble for dinner in the large dining-hall. Subsequently the party was photographed whilst standing on the terrace, the artist being Mr. E. Greaves of Hall-end. The manufactory of Messrs. John Holdsworth and Co., at Shaw Lodge, was next visited, and here their Excellencies were met by Mr. W. I. Holdsworth, and Mr. John Holdsworth, who conducted them through the rooms in which the combing, preparing, and spinning are conducted, and afterwards through the extensive weaving-shed. Subsequently the party drove to Manor Heath, where a number of gentlemen had been invited to meet them at luncheon. The only toast proposed was "The King of Burmah and the Embassy," to which the Ambassador replied in Burmese, which was afterwards interpreted into excellent English by the first attache.

At a meeting of the general purposes committee of the Halifax Chamber of Commerce, held at the offices of the secretary, it was resolved that the President present the following address to the Envoy of the King of Burmah:—

"To his Excellency Mengyee Maha Saythoo Kenwoon Mengyee, Envoy Extraordinary and Minister Plenipotentiary from his Majesty the King of Burmah.

"May it please your Excellency.—The Council of the Halifax Chamber of Commerce heard with extreme pleasure of the proposed visit to this country of the Embassy sent by his Majesty the King of Burmah, of which your Excellency is the chief, and beg to assure you that it is with feelings of the greatest satisfaction that they welcome your Excellency to this town and district. The Council beg to express a sincere hope and warm conviction that the visit of the Embassy will tend materially to increase the commercial relations between the kingdoms of Burmah and Great Britain, to their mutual advantage. This Council has no doubt that the many industries that your Excellency is visiting during your stay in this country will be observed, and that such observation will stimulate still further the commercial enterprise of your own people. The Council having always considered the rich products and the fertile lands of Burmah as affording great inducements to the spread of commerce and agriculture, have from time to time carefully considered the many projected trade routes through the possessions of his Maje-ty the King, to open up a commercial highway to the unlimited resources of Western China. This Council recognise with great pleasure the extremely liberal spirit in which his Majesty has hitherto signified his willingness to afford assistance in promoting such ends. That whilst the Council assures your Excellency that they would hail with satisfaction the success of any route through his Majesty's dominions, yet, from careful inquiry and long consideration of the subject, they would most respectfully ask his Majesty the King to graciously concur in, and assist in opening out on equitable terms to himself, the direct land route from Rangoon to the capital of his Shan State of Kiang-Hung, on the right bank of the Meikong or Upper Cambodia River, commonly known as Captain Sprye's route, and they would venture to express an opinion that its completion would add most materially to the welfare and prosperity of his Majesty's subjects. In conclusion, the Council would entreat your Excellency to convey to your Sovereign the King of Burmah the respectful congratulations of this manufacturing community, which now welcomes him in the person of your Excellency.—W. MORRIS, President. Halifax, Sept. 4, 1872."

THE "PETREL" FOR SINGAPORE.—A case of some importance under the Merchant Shipping Act, 1871, was heard on the 6th inst. before the magistrates at Poole. The steamer *Petrel* put into Poole on her way from London to Singapore, and on the 31st ult. seven of the crew, all being foreigners, shipped in London, left the vessel, alleging that she was unseaworthy. They were apprehended under a warrant, and brought before the magistrates on the 2nd inst, when the collector of Customs, to whom the men complained in the first instance, expressed his opinion that the steamer was unseaworthy, and was unfit to make a voyage to Singapore. The prisoners were liberated on their own recognisances, and the magistrates directed that the vessel should be inspected by the Board of Trade surveyor at Southampton. The men appeared to their recognisances on Saturday, and the Mayor read the surveyor's report, which was to the effect that the steamer was too deeply laden, that the deck should be protected by bulwarks instead of having only iron stanchions and bars, that the house on deck was too large and not sufficiently secure, and that the forecastle was much too small for the men required. Under these circumstances, the Mayor said it was impossible for the magistrates to say that the men's complaint was not a *bona fide* and proper one, and they could not convict them of desertion. The prisoners were accordingly discharged, and the master of the vessel was ordered to pay them the wages due, and to pay the costs of the inspection and the court expenses.

NOTICE is given that the distribution of the bounty awarded for services against pirates in the China Seas on the 21st and 22nd of October, 1863, by Her Majesty's gunboat Cockchafer, commenced on the 13th inst. The following are the shares due to an individual in the several classes:—Lieutenant-Commanding, £57 5s. 6d.; fourth class, £39; fifth class, £21 13s. 5d.; sixth class, £19 10s.; eighth class, £6 10s. 1d.; ninth class, £4 6s. 8d.; tenth class, £2 3s. 4d. For services against pirates on the 28th February, 1864, by Her Majesty's gunboat Cockchafer, will commence at the same time and place. The following are the shares to an individual in the several classes:—Lieutenant-Commanding, £11 5s. 1d.; fourth class, £6 17s. 1d.; fifth class, £3 16s. 3d.; sixth class, £3 8s. 7d.; eighth class, £1 2s. 10d.; ninth class, 15s. 2d.; tenth class, 7s. 7d. And for services against pirates between the 21st and 25th of March, 1865, by Her Majesty's gunboat Cockchafer, at the same time and place. The following are the shares due to an individual in the several classes:—Lieutenant-Commanding, £45 16s. 4d.; fourth class, £26 19s. 7d.; fifth class, £14 19s. 9d.; sixth class, £13 9s. 10d.; eighth class, £4 9s. 11d.; ninth class, £2 19s. 11d.

THE distribution of the bounty awarded for services against pirates on the 9th, 12th, and 24th of March, 1868, by Her Majesty's gunboat Algerine, will commence on the 17th inst. The following are the shares due to an individual in the several classes:—Lieutenant-Commanding, £36 12s. 6d.; fourth class, £18 17s. 9d.; fifth class, £11 6s. 8d.; sixth class, £9 8s. 10d.; seventh class, £6 12s. 2d.; eighth class, £3 15s. 7d.; ninth class, £1 17s. 9d.; tenth class, 18s. 10d.

BURNING OF THE PACIFIC MAIL STEAMER "AMERICA"—The following details of the destruction by fire of the Pacific Mail Steamship Company's steamer *America* have been received:—"The mail steamship *America*, of the Pacific Steamship Company's line, arrived in the harbour of Nagasaki on the 24th August. At eleven o'clock the same night the freight took fire, and the whole ship was soon involved in flames immediately afterwards. Prompt efforts were made to extinguish the conflagration, but they were unavailing. The fire burnt on during the entire night, and the steamer is totally destroyed. The Hong Kong mails, the freight, with the luggage of the passengers and of the officers of the ship, have been lost also. The sudden outburst of the fire and the rapidity of its progress subsequently force all hands to jump from the decks and sides into the water, with the hope of saving their lives. There was no time for manning the boats Six Chinese were killed during the confusion which prevailed. Ten Chinamen, the engineers of the *America*, the storekeeper, steerage watchman, and the cook of the steamer are missing. The treasure is recoverable. It amounts to $1,500,000 in specie, a portion of it being Japanese silver coin; $114,000 had been shipped for Hong Kong, the remaining $386,000 went down in the specie trunk with the vessel. The cause of the disaster was not, or is not yet, known."

LAUNCH FOR THE CHINA TRADE.—On the 7th there was launched from the shipbuilding yard of Messrs. C. Mitchell and Co., on Tyne, a very handsome iron screw steamer, named the Chin Kiang. She has been built for Messrs. Watts, Milburn, and Co., Newcastle, and is intended for the China coasting trade, and is in every respect a sister ship of the Yang-tsze. The Chin Kiang is 240 feet long, 31 feet beam, and 23 feet deep; has upper deck of teak and large deck houses for passengers and officers. The vessel will be fitted with a pair of compound surface condensing engines, manufactured by Messrs. T. Clark and Co., Elswick, Newcastle-on-Tyne.

MR. GEORGE PADDLE, for more than thirty years a resident in the colony of Mauritius, died on the 22nd July, from an attack of fever, after only twelve hours' illness. The *Mauritius Gazette* states that during the last twenty years he was manager of Deep River Estate. He was persevering, active, industrious, intelligent, unassuming, and, above all, of unswerving probity in all his transactions.

IT is announced that the Merchant Seamen's Chaplaincy at Hong Kong is vacant, and that the nomination is with Bishop Alford, of Bowden, Cheshire.

Mr. J. A. H. Taylor and Mr. J. Scott have been appointed Student Interpreters in China.

CHINESE ARMAMENTS.

FOR some years the foreign representatives at Peking and Yedo have, coupled with offers of advice and assistance, urged upon the rulers of China and Japan the importance of advancing in those paths of civilisation which add to the prosperity and enlightenment of nations. They have both taken that advice, but in widely different ways; they have both accepted the assistance, but to serve very different ends. Our commercial interests in both countries are so large that all that affects the political prospects of either must at all times be of interest to us, and at the present juncture a glance at the action of the two Governments will furnish us with an instructive lesson. We will take for granted, for we suppose no one will deny, that in undertaking the reforms recently effected in Japan the Government of that country has been actuated by a pure desire to place itself in closer and more friendly relations with the countries of Europe. An honest intention, coupled with a shrewd intelligence, has led it in the path best calculated to accomplish this object. Instead of throwing obstacles in the way of the intercourse of foreigners with the natives, it had done all in its power to encourage it, and instead of giving the European representatives cause of suspicion by an undue expenditure on the military defences of the country, it has shown in the most conclusive manner possible of how much greater importance it considers it to be to seek and cultivate the acts which lead to, and secure peace. Railways, telegraphs, public libraries, and international exhibitions are among the outward and visible signs of the wise and enlightened policy of which the Embassy now amongst us is the mouthpiece, and in these and a thousand other ways we have distinct pledges of the peaceful intentions of the MIKADO and his advisers. But if we turn to China we find the exact converse of this picture. Instead of constructing railways we observe the Government of that country eagerly engaged in building forts; and rifled guns and ammunition are the only products of European manufactories which find favour in the eyes of the mandarins.

From a correspondent at Tientsin, whose letter will be found in another column, we learn that strenuous efforts are being made to place the approaches to Peking in a perfect state of defence. The Taku Forts have been completely rebuilt, and foreign rifled guns now peer out from the embrasures where the old native smooth bores used to stand in the days of SANKOLINSIN. The road from the mouth of the river to Tientsin has been raised and made available for the rapid transport of troops and material, while about half way a fortified camp has been erected for the defence of which the Government has thought it worth its while to import from Europe a number of Krupp guns. We hear that six of these weapons were lately landed at Tientsin, and advices from Shanghai inform us that the steamship *Craigforth* had also landed at that port "five large Krupp guns," which "are to be sent on to Tientsin for the armament of some new forts on the river Peiho." At the various arsenals and dockyards the construction of ships of war and the manufacture of all kinds of war material are being vigorously pushed on. To these facts it is impossible to close our eyes, and we are tempted to ask for what purpose are all these warlike preparations being made? Is the internal condition of the country so prosperous, and are the wants of the people so well cared for that the Government may legitimately expend the large sums it is now disbursing, in rendering its dominions safer from the attacks of kingdoms envious of its prosperity? Far otherwise. Only the other day we heard of thousands of people being driven homeless and starving from their dwellings in the nighbourhood of Tientsin, and of the Government being quite unable either to supply their wants or to alleviate their distress, while at this moment we have amongst our foreign guests in this country the representative of a rebel chieftain, who, for the last sixteen years, has exercised supreme rule over the greater part of one of the richest provinces of the Empire.

Whither, then, does all this tend? Does it not point us back to that passage in TSENG KWO-FAN'S celebrated memorial in which he advised the temporary adoption of a conciliatory policy on the ground that at that moment China was weak; but, he added, the time may come when China will have the upper hand? We are fain to believe that this is the true interpretation of the abnormal activity now visible in the dockyards and arsenals of the Empire. And if this be so a heavy responsibility rests on those foreign employés of the Government who by advice and assistance are furthering its hostile schemes. The direction in which things are drifting must be apparent to all on the spot, and to none more so than Mr. HART, who as a well-wisher to China cannot but deplore the course taken by the Government. We cannot believe that he approves of the expenditure of such vast sums on armaments while the gigantic engineering works which have hemmed in the water-ways of the Empire for so many centuries are everywhere giving way for sheer neglect, causing desolation and famine by their overthrow. If, contrary to his advice, the Government still persists in its mad career, the only course left to him is to come out from amongst such a people, and he would best consult his own good name were he to follow the course which his interests and honour alike point out.

THE KOREAN LETTER.

THE Korean difficulty has entered on a new phase, and a most interesting one. The despatch from the Korean to the Japanese Government—which has lain unsuspected by the Westerns for nearly three years, and which has now oozed out to the chagrin of at least one of the parties—is a most suggestive document. From whichever side we regard it, it bristles with information, and hints as to the right way for us to set about utilising it. It shows what an egregiously wrong course was steered by those Foreign Powers who thought to open the Korea by force—a blunder for which we cannot quite excuse our friends the Japanese, who, if they had not been held back by false pride, could at once have set the Americans right—given them "the straight tip"—by informing them of the character of the nation against which they sent out their expedition. We always protested against that ill-conducted and boastful affair, but we did not know how strong our case was until now. At the very time when the Japanese stood by, and saw the Americans making that fatal mistake, the despatch which has just come to light had been lying unanswered in their Foreign-office for two years. Lesson the first—that is the way in which the Japanese treat their friends. They stand by with closed lips, and see their allies run their heads against a wall; and we hope the good folks who have been lauding them with such gushing fervour in the United States will not forget it. Their policy seems to be silence and "non-intervention" with a vengeance. They do not answer the appeal of their old ally when he is attacked by their new one; and they afterwards let the new one attack the old one without a word of warning. It is by traits like these that we discover the true nature of nations as well as individuals.

The Korean despatch, considered by itself, has two sides—a romantic and a practical one. Bitter as is its tone towards the close, it seems to have been written "more in sorrow than in anger." The stern simplicity with which it recites the history of their long connection with their neighbours—the almost pathetic way in which it refers to the injuries which the Japanese have inflicted on them, and the help which they have withheld from them in the hour of need—the natural horror with which the Koreans recoil

Digitized by Google

from the faithless friends whom they suppose to have been corrupted by "keeping bad company" with barbarians—the haughty and resolved defiance *á l'outrance*—above all, the chivalrous proposal to clear a battle ground for them to meet in, if their antagonists will "name time and place"—all combine to show that the days

When, wild in woods, the *noble* savage ran,

are not yet bygone. Never in our own duelling days—when gentlemen were requested to "consider themselves horse-whipped," and when the choice of the *venue* was the right of the challenged party—was intentional insult inflicted, or "satisfaction" offered with more etiquette. The covert sneer, in allusion to their former despatches not having been answered, "*We* are not afraid to put in writing, &c."—is inimitable. Benighted, bigoted, and cruel, as the Koreans unquestionably are, a people that can write and act as they have done must have something noble at its core—and we must try to get at it. It is clear that the way through Japan is closed. France and America have excited not only hatred but triumph by their ill-judged and easily repulsed expeditions, and thus done irreparable injury to the character of the Western races. But the road through China is not yet blocked up, and skilful diplomacy in the approaching revision of our treaties there may do much to open up pacific relations with this singular people. Force is out of the question; anything like menace would only intensify the prejudice against foreigners generally. But reason, and a just appeal to the feelings, may, we think, go far to make it a point of honour with them to assist any of our vessels that may be wrecked, and to protect any of our countrymen who may be cast on their shores. And that is all we want—at least for the present.

THE Great Northern Telegraph Company's steamer *H. C. Orsted* has arrived in the Thames from Copenhagen, and will shortly proceed to take on board the cable, intended to be despatched to China, for the repair of the Company's cables as may be required from time to time. The *Orsted* will remain on the station as the repairing ship.

THE Halifax Chamber of Commerce has presented an address to the Envoy of the King of BURMAH, in which they most earnestly impress the great importance of an overland route from Rangoon to Kiang-Hung, on the river Meikong. We trust that the King of BURMAH will see his interest in promoting this enterprise.

ANOTHER steamer for the Japanese Government, the *Capron*, was launched at New York on the 28th of August, being the second built there for the navy of Japan.

THE JAPANESE EMBASSY.

On the 6th inst. the Japanese Ambassadors and suite paid their second visit to the International Exhibition, and were conducted through the chief galleries by Her Majesty's Commissioners. They inspected the printing of *The Times* and the *Echo*, the several processes of envelope manufacture, by Messrs. Dickenson and Co. the copper-plate printing, cotton machinery, cotton plant, &c., They showed great interest in the machinery for paper manufacture and printing, and noticed with evident satisfaction the valuable collection of Japanese papers which is shown in the department devoted to stationery. The next day, Saturday, the Ambassadors paid a visit to Windsor Castle. On their arrival from London at the Windsor Railway Station one of Her Majesty's carriages was placed at their disposal, in which they drove to the Castle, where they were shown the private and State apartments and the other principal objects of interest about the palace. Afterwards they were driven to the Royal Dairy, the Aviary, Frogmore, and then through the Great Park to Virginia Water.

On Tuesday, the 10th inst., the members of the Embassy repeated their visit made on the 27th ult. to the Royal Arsenal at Woolwich, where they arrived by steamer from London, and were received by Capt. Gordon, C.B., Controller, Royal Arsenal. They first proceeded to the Royal Carriage Department, being escorted through the labyrinth of workshops by Col. G. T. Field, R.A., the Superintendent. In this department, in which a larger number of trades is carried on than in any other department in the Royal Arsenal, the principal novelties and improvements which have lately been introduced were closely examined and criticised, the wheel factory receiving particular attention. The party proceeded then to the Select Committee Office, which had been improvised as a mess-room, where luncheon had been prepared. Sir David Wood, K.C.B., commandant, who was attended by his staff, including Capt. G. Best, R.A., A.D.C., Capt. W. J. Hall, R.A., Deputy Assistant-Quartermaster-General, and Capt. A. T. Pearse, Brigade-Major, joined the Ambassadors at luncheon, together with a number of other officers connected with the different departments in the Arsenal, and the Royal Artillery bugle band was in attendance. On resuming their tour of inspection the party proceeded to the Royal Laboratory Department, where Col. T. W. Milward, C.B., the Superintendent, explained the diversified nature of the work performed, and also the variety and importance of the modern inventions which have been successfully brought into use in the service. After passing through the main factory and the shell foundry, they left for the Royal Gun Factories, in which department Capt. E. Maitland, R.A., Assistant-Superintendent, and Mr. R. S. Fraser, the inventor of the "Woolwich" gun, took charge of the visitors, and conducted them through the new forge room, and subsequently through the pattern-room and the numerous other shops in this department, some of which contain the finest machinery in the Arsenal, invented expressly for the manufacture of the new gun. The shops also contain numberless coiling and wielding machines, and enormous furnaces, necessary for the immense heat which has to be manipulated. At the conclusion of their visit the visitors re-embarked, and returned to town by steamer.

On Wednesday the Ambassadors, with all the principal members of their suite, paid a visit to the City. They went first of all to the Mansion-house, where they were received by the Lord Mayor, and thence escorted by him to Christ's Hospital. This time of the year is not well suited for seeing the great school in full working order, but still there was in residence a fair complement of boys in their quaint costume to afford the distinguished visitors a notion of the establishment and its uses. And the Lord Mayor, through Sir Harry Parkes, explained to them the foundation of the school by Edward VI. and its general economy, with which they seemed much interested, asking questions in elucidation of doubts whenever they happened to be at a loss. From Christ's Hospital they accompanied the Lord Mayor in his private state carriage to St. Paul's Cathedral, where they spent a considerable time; thence to the Bank of England, where the general arrangements of the establishment were fully explained to them; and afterwards to Guildhall, returning to the Mansion house, where they were entertained at luncheon by the Lord Mayor and the Lady Mayoress, the Governor of the Bank and Alderman Sir Robert Carden being also of the party. On Friday several members of the Embassy dined with the Master, Wardens, and Court of Assistants of the Corporation of Mercers in their hall. The Lord Mayor has invited the Ambassadors to a banquet at the Mansion House on the 24th inst., and the Fishmongers' Company on a subsequent day. On all their visits the Ambassadors have been accompanied by Sir Harry Parkes and by General Alexander, the latter of whom it will be remembered was selected by the Government to attend the Embassy during its stay in this country.

THE EXPORT OF CLOTH TO JAPAN.

The *Pall Mall Gazette* has the following amusing but not very correct account:—It appears from the reports forwarded from Yokohama to the Foreign-office and Ministry of Commerce at Berlin that the importation of cloth into Japan has increased to an enormous extent within the last few years. This was at first chiefly owing to the taste of certain of the Japanese princes for clothing their troops in the European fashion, and afterwards to the revolution, which placed all the troops in the country under the Mikado, and rendered it necessary to clothe the whole army after the same pattern. Large quantities of cloth were then imported into the country, but many of the importers suffered considerable loss, owing to the sudden liking of the Japanese for grey colours, they having discovered that the Prussian troops wear grey trousers. The Government at Berlin, in publishing these reports, advises German manufacturers and importers to send cloth to Japan of the same quality and at the same prices as that furnished from England and France. The best time for sales, it adds, is the winter season (from September to February); in the summer light clothing only is purchased. The articles might be sent by steamer, and it is observed on this point that, in view of the increasing trade between Germany and Japan, it would be highly desirable to establish a line of packet ships between the two countries.

Monetary and Commercial.

At the meeting of the National Bank of India, on the 10th inst., Mr. R. O. Campbell in the chair, the directors' report, recommending a dividend for the half-year at the rate of 3 per cent. per annum, was unanimously agreed to. The report states that "the net profit realised during the half-year reached the sum of £42,011, which amounted to 18 per cent. per annum on the paid up capital of the bank, and sufficed only to wipe out the balance of £33,406 exhibited on Dec. 30 last at debit of profit and loss account, but to warrant the directors in declaring an *ad interim* dividend at the rate of 3 per cent. per annum, which will absorb £6,969, leaving a balance of £1,635 to be carried forward to the next account."

The chief manager, Mr. Sawers, having read the report, the chairman proceeded, in the first instance, to notice with extreme regret

Digitized by Google

the retirement of Mr. Fitzwilliam from the chair, owing to indisposition, but he was happy to say he would retain his seat on the Board. The report in the hands of the shareholders would no doubt be considered very satisfactory, and he believed that the next half-year's operations would show even greater success. They had fairly earned a dividend, and the directors thought that although it was small it was better to divide it at once. The Bank now stood in a first-rate position, both in the East and in the discount market at home. The directors were glad that they had not closed the Hong Kong branch, which had been well worked by Mr. Campbell with good results. The branches at Bombay and Calcutta had also been satisfactory. No questions being asked by the meeting the report was put and carried, and the proceedings ended with a vote of thanks to the chairman.

The directors of the Chartered Mercantile Bank of India, London, and China have declared a dividend for the half-year ended 30th June last at the rate of 8 per cent. per annum, free of Income Tax, payable on the 28th inst., and have carried forward a surplus of £88,149 18s. 7d. to credit of the current half-year's account. The meeting of the shareholders will be held on the 15th prox. The directors' report says:—

It will thus be seen that the result of the past half-year's operations has been highly satisfactory. Unfortunately, since the accounts were closed the failure of a firm of high standing, with which the Bank has had large transactions for many years past, has taken place. This will involve the Bank in a loss, the extent of which, depending on the realisation of the assets of various firms connected with them, cannot yet be correctly estimated; but at the worst it will leave a large balance available to supplement the profits of the current half-year, and apart from this the business of the Bank at all points continues satisfactory.

It is understood that the dividend to be announced by the Oriental Bank Corporation for the half-year ended June 30 last, will be at the rate of 12 per cent. per annum. The meeting will be held on the 17th prox.

The uneasy feeling established at Manchester on the failure of Messrs. Gledstanes and Co. has not yet subsided, and wild rumours in regard to certain firms are going the rounds. The addition in the Bank of England returns "other securities" instigated rumours as to firms of first class standing having been accommodated. A meeting of the bill holders and others on the estate of Messrs. Gledstanes and Co. was held on the 11th, but separated without any definite result.

In consequence of the loss of the *Lahloo*, following on that of the *Parnassus*, there is a disposition amongst underwriters to increase the rates of premium on China voyages. The *Lahloo* had on board, from Nagasaki, brass guns, wax, and sundries, and 936,100 lbs. tea from Shanghai, the value of which may be computed at £80,000. The *Lahloo* was composite built, and one of the finest of the China clippers. There is much regret at her loss, as the number of these vessels is now fast diminishing, the *Ariel*, which we noticed lately as overdue, being now finally given up. Such vessels cannot be built under £30 per ton, and owners are of course not disposed to give such prices. The value of sailing vessels has much advanced, owing to the high price of coals, and consequent increased cost of working steamers.

The Eastern Telegraph Company has published a list of "latest dates" of messages received during the last month from India China, &c., by the direct submarine lines, *via* Falmouth, which shows that the average time occupied by messages from Calcutta is three hours and eighteen minutes, and from Bombay two hours and one minute.

The Manchester market is extremely dull. The lull in business seems to be complete, and in order to make sales lower prices must be taken. The accounts from the East are such as so preclude all buying for the China market especially, and the little business that has been done has been chiefly for Germanyr.

Notice is given of the admission of Mr. William Shepard Wetmore and Mr. John Lindsley as partners in the firm of Frazar and Co., of Shanghai.

Bar Silver remains firm, and the price for a time slightly improved to 60½d. per oz standard, but it may now be quoted as 60⅜d. Mexican Dollars remain firm at last week's quotations.

The amount of bullion by the P. and O. Company's steamer *Peking*, which left Southampton on Thursday, was in gold—to Alexandria, £38,000; to Galle, £5,500; to Bombay, £7,000; to Madras, £1,136; in silver—to Singapore, £52,200; to Hong Kong, £50,250; to Shanghai, £11,277; to Gibraltar, £5,000; total, in gold, £51,636; in silver, £118,727.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of August show a further important expansion in the declared value of our exports, which amounted to £24,557,502, against £22,221,245 in August 1871, being an increase of £2,336,257. Of this £1,674,081 occurred under the heads of the principal exports, but chiefly Iron and Steel and Woollen and Worsted goods, and £662,176 under those of the more miscellaneous articles, more particularly Coal, owing chiefly to its augmented costliness, the same remark being even more applicable to the excess shown by Iron. The chief exports in August were:—

	1872.	1871.
Cotton Goods	£5,899,153 ...	£5,676,259
,, Yarn	1,325,050 ...	1,300,898
Linen Goods	637,270 ...	776,511
,, Yarn	165,975 ...	179,204
Silk Goods	226,580 ...	243,612
Woollen and Worsted Goods	3,817,666 ...	3,153,234
Ditto Yarn	541,758 ...	686,384
Iron and Steel	3,634,739 ...	2,558,008
Total	£16,248,191 ...	£14,574,110
Other Articles	8,309,311 ...	7,647,135
Grand Total	£24,557,502 ...	£22,221,135

During the eight months this year there was an increase in the value of the exports of £23 489.430 and of £35,523,268 over the corresponding periods respectively of 1871 and 1870, as shown by the following figures:—1872, £167,166,636; 1871, £143,677,206; 1870, £131,643,368.

The entries of Tea for home use in the month were about one million and a quarter lbs. heavier than in 1871, making a total excess of 3,343,300 lbs.; exports continued to fall off, and were nearly one million and a half less than last year. The imports, although very large, viz., fully 18,000,000 lbs., were 2,000,000 lbs. less then 1871, and the stock at the end of the month exhibited a reduced surplus of 10,000,000 lbs. Import for the eight months:—

1872.	1871.	Difference.
Lbs.	Lbs.	Lbs.
China, 110,790,425 ...	99,979,999	Increase, 10,810,426
Indian, 9,937,414 ...	9,028,389	Ditto, 909,025
Total, 120,727,839	109,008,388	Increase, 11,719,451

Home Consumption.	Exportation.
1872, 85,658,203 lbs.	26,909,850 lbs.
1871, 82,314,894	25,490,997
Increase, 3,343,309	Decrease, 1,418,853

The stock in bond on the 31st of August was 90,554,575 lbs., against 80,641,244 lbs. in 1871, and 75,728,705 in 1870.

The following is an extract from these returns of the figures which refer to our Export trade with China and the Far East:—

COTTON YARN.

To		For the Month ended 31st Aug. 1870.	1871.	1872.
China and Hong Kong	lbs.	994,660 ...	629,470 ...	602,800
Japan	,,	890,840 ...	306,800 ...	1,650,900

ARTICLES OF IMPORT.

—o—

TEA.

Messrs. Capel and Co.'s Circular says :—

The market has been very quiet during the week; there have been no fresh arrivals of Tea to stimulate business, but the trade have bought sparingly from the old stocks on offer at about previous rates. There has been only a limited inquiry for export. The public sales have comprised 1,376 packages new season's Green Teas, offered without reserve on the 9th instant; and a series, consisting of 8,146 packages, on the 10th instant, of which 6,618 packages have been sold without reserve, without material change in prices. The deliveries for the week amount to 3,375,000 lbs., against 3,517,500 lbs. last year.

Black.—Red-leaf kinds: Old season's siftings show no change New have been sold from 6d. to 8d. per lb. for good water Teas. Broken-leaf kinds, from 8d. to 10d. per lb., show no alteration. Fair to good common are scarce, especially in chests, and must be quoted at 1s. 1d. to 1s. 1½d. per lb.—buyers. Fair to good Kaisows have not been readily saleable, but prices remain much as before. In fine to finest a few sales have been made of small parcels at former prices. Pak Lin kinds have been rather more inquired for from 1s. 7d. to 1s. 8d. per lb. for good quality. Black-leaf kinds: Low to common kinds have been sold from 7d. to 9d. per lb. Good common remains steady at previous rates. Fair to good medium show no change, the quantity on offer being moderate. Fine kinds have not been so much dealt in, but prices are firmly maintained. In finest the few transactions have been at fully former prices. New-make kinds: There has been a moderate inquiry for common to fair kinds, but few of new season's are offering; for old season's buyers will not pay the same prices for equal quality. Oolongs: common to good kinds have been dull of sale at former prices; fine have been in fair request. Souchongs show no material alteration. Flowery Pekoes have been quiet. Scented Teas: Canton Capers have met with a moderate demand at previous prices. Foo Chow kinds have been steady. Canton Orange Pekoes have been rather more saleable. Foo Chow kinds, from 1s. 7d. to 1s. 9d., have also been taken rather more freely. Uncoloured Japans: the finer kinds have been fairly maintained, but common to fair neglected. *Green*: Further arrivals have come to hand, and been offered for sale; they still show a want of make and bad colour, and are consequently less saleable than they otherwise would have been. For the finer lines prices have been well maintained, but the common to medium sorts have been sold at a reduction of 1d. to 2d. per lb. In Canton kinds there has been nothing of interest to report.

SILK.

There is no improvement in business, a little more general demand, but no real inquiry. Prices continue very firm, importers holding for full quotations in nearly every instance; some very common Tsatlees have been sold at 22s. 6d., but there are no sellers at the moment at this price for even the lowest quality. In Cantons, new Loong Kongs are selling at good prices, but in Tsatlee reels there is still nothing doing, market sorts being held for 18s. 6d. to 19s. Japans and Bengals are both quiet, and quotations unchanged. The deliveries have slightly improved this month, being from 1st to 11th inst., China, 1,119; Canton, 221; Japan, 225; Bengal, 165; total 1,730 bales.

COFFEE.

There has been a slight improvement in the market for Plantation Ceylon, a considerable supply of which has been brought to auction during the past few days, and has been taken off at a slight advance for coloury, and at steady rates for other kinds, the latest prices paid having been—Triage and ordinary, 66s. 6d. to 74s.; small grey to coloury, 75s. to 78s.; fine fine ordinary grey, 76s. to 76s. 6d.; low middling, 77s. to 79s.; middling, 79s. to 81s. 6d.; good middling to fine bold coloury, 82s. to 87s.; pea berry, 97s. to 101s. per cwt. There has been no movement in Native Ceylon or other East India, all offers having been bought in.

The Dutch Trading Company announce 81,500 bags Java, &c., for their next public sale, to be held on the 16th inst.

SUGAR.

There is little or no change to report in the position of the market, but more steadiness is observable, and the downward tendency seems to have been arrested. At public sale of 2,188 bags Penang offered, about 800 bags sold, washed white (duty 5s. 8d.) at 34s. to 34s. 6d., fine bright yellow (duty 5s. 3d.) at 32s. to 32s. 6d., middling to good do. (duty 4s. 9d.) at 29s. 6d. to 31s., brown (duty 4s.) at 26s. 6d. to 27s., the remainder good to fine white (duty 5s. 8d.) bought in at 35s. 6d. to 36s.; 1,000 baskets 5,498 bags Native sort were all bought in, low to dry 21s. 6d. to 23s. Since the sale 170 bags good white have been sold at 35s. In auction 125 bales Siam concrete were bought in at 22s., but have since been sold at 21s. 6d. There has been no other movement in East India.

China Preserves.—An offer of 300 cases Ginger was quitted at 7d. per lb.

Cutch.—Moderate sales of Pegue have taken place, fine Elephant in boxes at 25s., old import at 24s. per cwt.

Galls.—A parcel of 210 cases China offered at auction last week and bought in, has been sold privately at £2 17s. per cwt.

Gambier.—Privately small sales have been made on the spot at 24s. 6d. per cwt.

Hemp.—There is a steady business doing at last. Quotations—Quilot, good white, £55 5s.; good fair roping, £48; good, £48 10s. per ton.

Pepper.—*Black:* The auctions have gone off slowly, and Penang, of which the greater part has consisted, has sold at a slight reduction, viz., 6¼d. to 6⅜d.; good West Coast, 6⅜d.; Singapore has been bought in at 7d. *White* is active and advancing, Singapore having been sold at 1s. 2⅛d. to 1s. 2½d., short prompt and for delivery in the last three months at 1s. 2d.

Rice.—The market continues firm, and is active, especially as regards business in floating cargoes; the recent advance in prices is maintained. On the spot 2,500 bags Ballam have been sold at 9s. 3d.; 100 tons Askoolie, at 10s. 3d., ex quay; 1,700 bags Askoolie, at 10s. 4½d.; 5,000 bags new Rangoon, at 10s. 1½d., ex ship; and 50 tons low white Bengal, at 10s. 1½d. For arrival 100 tons Dacca, August shipment, have been sold at 10s. 6d., ex quay; and the following floating cargoes have been sold, viz.:—The Delaide, 1,000 tons Rangoon, June sailing, at 10s. 6d., open charter; the Emanuel, 970 tons Necransie, April sailing, at 9s. 7½d., open charter; the Yorkshire (steamer), 1,800 tons Rangoon, arrived in dock, at 10s., ex ship; a cargo of about 350 tons broken Necransie July-August shipment, at 8s. 4½d. ex ship on Continent; the Myo 800 tons Rangoon, July sailing, at 10s. 6d. open charter; the Quatro 1,420 tons Rangoon, arrived off coast, at 10s. 7½d. Liverpool quay terms; a cargo of 385 tons Rangoon, arrived off coast at 10s. 1½d. ex ship or Continent; one of 860 tons Rangoon also arrived off coast at 10s. 1½d. ex ship or Continent; one of 1,205 tons Rangoon, July sailing, at 10s. 6½d. open charter, and one of 1,000 tons Necransie, July sailing, at 9s. 9d. open charter.

Sticklac.—Considerable sales have been made during the past few days of good quality Siam, at £4 7s. 6d. per cwt.

Shells.—The periodical sales were held on the 10th inst., with the following results:—*Mother-o'-Pearl* met an active competition for all descriptions, and a general advance in value was secured. 6 cases Manila sold at £9 12s. 6d. *Tortoise*: A brisk demand prevailed, and nearly the whole of the quantity offered (nearly 5,950 lbs.) found buyers at an advance; 6 cases (1,247 lbs.) Singapore were bought in at 24s. to 26s. per lb. *Ear Shells*: Of 235 bales, 198 cases, and 12 tons Japan offered, 235 bales sold at 10s. 6d. to 12s., the remainder being bought in at 15s. per cwt.

Tobacco.—In public sale yesterday 17 bales Manila were sold at 9d. to 9½d., 2s at 1s. 8d to 2s. 1d., 149 ditto Java a few lots only sold at 5d., 3 ditto ditto repacked damaged 2½d. to 4d., 24 ditto Japan part at 7¾d., 1 bale ditto repacked damaged 3d., 50 bales China withdrawn, 5 ditto ditto repacked damaged sold at 2½d. Of Cigars 2 cases Manila sold at 8s.

Tin.—On the 6th inst. the Dutch Trading Company announced their autumn sale to take place on the 2nd October next, and to consist of 46,500 slabs Banca, and 2,800 slabs Billiton. This being a much smaller quantity than was anticipated, the market became excited, and the price in Holland rose to 97 guilders for Banca, and here, to £158 for Straits. It is now quieter, and a parcel of 10 tons Straits has been pressed for sale and quitted for £150 cash.

MALACCA, London to Shanghai, July 17, in Gaspar Straits.

FREIGHTS AND CHARTERS.

There is a scarcity of suitable tonnage on the berth for Eastern ports, and rates consequently rule firm, at the undermentioned quotations. Coal freights from the outports are quiet, and the delay and difficulty in loading noted in our last issue still exists. Homeward a good amount of business is doing.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 90s. meast. To Hiogo: 90s. meast. To Nagasaki: 90s. meast. To Shanghai: 40s. meast. To Hong Kong: 40s. meast. To Manila: 80s. meast. To Singapore and Penang: 40s. meast. To Sourabaya and Samarang: 70s. meast. To Batavia: 65s. meast. To Padang: 80s. meast. To Saigon: 100s. meast. To Galle: 40s. meast.

Per SAILING VESSELS.—To Hiogo: 45s. weight, 45s. meast. To Yokohama: 35s. weight or meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 80s. meast. To Hong Kong: 35s. weight, 25s. meast. To Batavia and Sourabaya: 20s. weight or meast. To Samarang: 20s. weight or meast. To Singapore: 20s. weight, 25s. meast. To Penang: 35s. weight or meast. To Ceylon: 30s. weight, 25s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—To Yokohama or Nagasaki: £42 10s. To Shanghai: £45. To Hong Kong: £33. To Singapore: £25. To Penang: £25. To Galle: £21 to £22.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama or Nagasaki: 40s. to 42s. 6d. To Shanghai: 45s. To Hong Kong: 35s. To Manila: 27s. 6d. to 30s. To Singapore: 23s. 6d. to 25s. To Ceylon: 21s.

From Birkenhead, per ton.—To Shanghai: 35s. To Hong Kong: 27s. 6d. To Singapore, 21s. To Colombo: 15s. to 16s. To Galle: 17s.

Insurances.

By steamers via S.C., or sailing vessels, f.p.a.:—To Yokohama, steamer 35s., ship 40s.; to Shanghai, steamer 30s., ship 40s.; to Hong Kong, steamer 25s., ship 35s.; to Singapore, steamer 20s., ship 25s. to 27s. 6d.

The Admiralty have invited tenders for the conveyance of 109 tons of stores to Hong Kong.

CASUALTIES.

A telegram received from Batavia, dated Sept. 6, states that the master and crew of the Lahloo, who have arrived at Sourabaya, report the vessel a wreck, and the bulk of the cargo damaged.

A telegram from Hong Kong, dated Sept. 6, announces that the Maria (Bremen barque), Walter, from Canton to the Channel, with a general cargo, had struck on a rock west of Linting, was making water, and would probably be a total loss; a tug had gone off to her assistance; the cargo would probably be saved.

The Canaan, Manson, from Ilo Ilo, in entering Queenstown harbour Sept. 8, grounded on the Euurland (?) bank, but got off without apparent damage.

Advices received from Rotterdam, dated Sept. 10, state that the Bestevaer, Rosier, which arrived at Texel 8th, from Batavia, reports having encountered a heavy gale from W.S.W., July 24, when off the Cape of Good Hope, during which she sustained damage to rigging.

The Isa (str.), of West Hartlepool (off. No. 65,510), Gardin, which left Galle, June 2, with rice, for Falmouth, has been posted at Lloyd's as a missing vessel.

MISCELLANEOUS.

Off ST. HELENA.—July 28, Maxima, Stephen, from Ceylon, for London.

At ALGOA BAY.—Alliance (Norw.), and sailed, Aug. 1, for Galle.

The Petrel (str.), of Leith, which left London, Aug. 26, for Singapore, put into Poole, 31, on account of seven of her crew having refused to proceed in the vessel, on the plea of her being unseaworthy; they were taken before a magistrate, and a survey was ordered to be held on the vessel, and the surveyor having declared her to be too deeply laden and otherwise unfit for the voyage, the men were discharged.

GLYCERINE
DE
TOILETTE.

HEALTH.) **NEW PERFUMERY.** (BEAUTY.)

INVENTED BY

EUG. DEVERS, QUIMICO.

PATENTED S.G.D.G.

PREPARATIONS for the Toilet, and particularly Soaps; Powders, &c. for the Teeth; Toilet Washes, and Vinegars, have of late assumed an importance in proportion to the demand for them. Foremost amongst these is GLYCERINE, a remarkable unctuous substance, which softens the skin without greasing it; its valuable qualities were quickly recognised by the most eminent physicians. Experimented on by MM. Dumarquay and Sutom (See "Reports and Memoirs of the Biological Society, 1836," &c.).

GLYCERINE CREAM for the skin.
GLYCERINE TOILET WATER for baths and ablutions.
GLYCERINE ELIXIR for the mouth.
GLYCERINE POMADE against scurf.
GLYCERINE SOAP for chaps and chilblains.
GLYCERINE ANTIPELLICULAIRE to prevent the hair falling off.
DULCIFIED GLYCERINE CREAM SOAP for the beard.
PATE DENTIFRICE à la GLYCERINE for the teeth.

HOLLOWAY'S OINTMENT

AND PILLS.—EVERY DAY WANT.—Skin diseases, blotches, and unseemly eruptions, which prevail frequently and annoy much, can be removed with facility by this cleansing and cooling Ointment, the salutary properties of which over all cutaneous affections have been long and indubitably established. Moderate doses of Holloway's Pills should be taken while the outward ailment is being treated with this Ointment. They will deprave the blood, and free it from every taint that may induce a relapse, deteriorate the general health, or otherwise act injuriously. By promoting digestion, and by purifying the circulation, Holloway's Pills ever help to eradicate the many rashes and spots, always mortifying evidences of infirm stomachs, and frequently the heralds of serious illnesses and mortal maladies.

THE MAILS, &c.

The French mail bringing advices as above was delivered, *via* Marseilles, on the 18th inst., five days in advance of due date. The next inward (P. and O.) mail, with dates Yokohama 7th, Shanghai 11th, Hong Kong 17th, Singapore 25th Aug., is due, *via* Brindisi, on Monday next, the 30th inst.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, four to five hours in transmission. Telegraphic communication between Shanghai and Nagasaki has been restored.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Hoogly*, arrived Sept. 16.—From Yokohama: Mr. J. W. Coles. From Shanghai: Mrs. Weston. From Hong Kong: Messrs. Petersen, Bowden, Ford, Newling, De Leon. From Batavia: Messrs. Leuwen, Busch, Hilbers, Mr. and Mrs. Hermann. From Saigon: M. Geraud, Mdme. Gadras. From Singapore: Messrs. Hebrard, Higuerlo, Millan y Aguilo, Gutterier, Valcarciel, Harans, Lotano, De Caceres, Raigada, Giminez, De Mier. From Galle: Mr. Nagel.

By last mail to Southampton, per P. and O. steamer *Mirzapore*, arrived Sept. 14.—From Hong Kong: Mr. A. McDuff. From Singapore: Mrs. Weymouth and child, Mr. D. Deans. From Galle: Mr. Dauglish.

To Southampton, per P. and O. steamer *Khedive*, expected to arrive Sept. 29.—From Yokohama: Mr. A. F. Gain. From Hong Hong: Commander Wilson, R.N., Mr. W. Butchers, Mr. R. Bell. From Shanghai: Mr. W. McDonald. From Galle: Mr. and Mrs. Bury, two children, and servant, Dr. Guy. From Singapore: Sub-Lieut. Maden, R.N., Mr. O. Gillies. To Suez, from Singapore: Mr. and Mrs. Lesseler, four children, and servant.

To San Francisco, by Pacific mail steamer *Alaska*, arrived Aug. 27.—From Hong Kong and Yokohama.—For New York: H. W. Dreckman, S. Yauraguchi, Dr. R. Gebser, Capt. D. Partridge, and six Japanese. For Boston: Capt. W. P. Simes, Everet Frazer, wife and child. For Omaha: C. J. Roberts. For Europe: F. Hashemato, Capt. Geo. Robinson, R.N., Mr. Little, and Mr. Helms.

PASSENGERS OUTWARD.

Per P. and O. steamer *Pekin*, from Southampton, Sept. 12.—To Yokohama: Mr. and Mrs. Cheesman, and four second-class passengers. To Shanghai: Mr. R. W. Hurst, Mr. O. Johnson, Mr. J. A. H. Taylor, Mr. J. Scott, and two second-class passengers. To Hong Kong: Mr. E. F. A. Sangster and one second-class passenger. To Ceylon: Mr. W. A. Moss, Mr. McGregor, Mrs. Puckle and child, and two second class passengers.

Per P. and O. steamer *Candia*, from Venice, Sept. 20.—To Shanghai: Mr. E. L. B. Allen.

Per P. and O. steamer *Candia*, from Brindisi, Sept. 23.—To Yokohama: Mr. Beats and one second-class passenger. To Shanghai: Mr. J. McBean. To Hong Kong: Mr. and Mrs. A. Hasse, Mr. M. Murray. To Ceylon: Mr. D. Blyth, Mr. Joon Hacht.

Per P. and O. steamer *Pera*, from Southampton, Sept. 19.—To Hong Kong: Mr. C. F. Sangster.

Per P. and O. steamer *Mooltan*, from Brindisi, Sept. 30.—To Ceylon: Mr. Duncan.

Per P. and O. steamer from Suez, Sept. 27.—To Shanghai: Mr. F. E. Woodruffe.

Per P. and O. steamer *Massilia*, from Southampton, Sept. 26.—To Yokohama: Mr. Short. To Shanghai: Mr. A. B. Steel. To Hong Kong: Mrs. Andrews. To Singapore: Rev. H. Francis.

Per P. and O. steamer *Malta*, from Brindisi, Oct. 7.—To Yokohama: Mr. Short. To Shanghai: Mr. Fauvit.

Per P. and O. steamer from Southampton, Oct. 3.—To Ceylon: Mr. W. Owen.

Per P. and O. steamer from Southampton, Oct. 10.—To Hong Kong: Miss Simpson, Mr. F. B. Hooper. To Singapore: Mrs. Trotter, Mrs. Dunlop and child.

Per P. and O. steamer from Venice, Oct. 18.—To Penang: Mr. Speedy, Mr., Mrs., and Miss Vermont. To Singapore: Mr. J. R. McArthur.

Per P. and O. steamer from Brindisi, Oct. 21.—To Yokohama: Mrs. Marshall To Hong Kong: Mrs. C. A. Sinclair. To Singapore: Capt. and Mrs. Caldbeck.

Per P. and O. steamer from Southampton, Oct. 24.—To Hong Kong: Mr. H. H. Thornton, Mr. J. Alexander. To Singapore: Miss Rickards.

Per P. and O. steamer *Peking*, from Southampton, Nov. 7.—To Ceylon: Mrs. Bayley and child. To Hong Kong (*via* Bombay): Mr. W. H. Fittock.

Per French mail steamer *Hoogly*, from Marseilles, Sept. 29 (booked from London).—To Yokohama: Mr. Fraissinet. To Batavia: Mr. and Mrs. Hooykaas and family, Mr. C Bellart, Mr. Van der Louteuvante. To Hong Kong: Mr. and Mrs. Bertrand, Mr. Rogerson, Mr. J. H. Cox. To Singapore: Mr. and Mrs. Burn.

Per French mail steamer *Tigre*, from Marseilles, Oct. 13 (booked from London).—To Shanghai: Mr. W. F. Loy, Mr. R. E. Rennie, Mr. H. Broughman Miller, Mr. and Mrs. Medhurst and child. To Hong Kong: Mr. F. Bowden, Mr. and Mrs. Heard, Mr. J. Heard. To Batavia: Mr. and Mrs. Engelbronner and family. To Galle: Mr. A. S. Daniell, Mr. W. Daniell.

Per French mail steamer *Donnai*, from Marseilles, Oct. 27 (booked from London).—To Singapore: Mr. and Mrs. Labhart Lutz.

Per French mail steamer *Ara*, from Marseilles, Nov. 16 (booked from London).—To Singapore: Mr. and Mrs. W. Ullemeister. To Batavia: Mr. and Mrs. Nogel, Miss Klins.

Per French mail steamer *Cambodge*, from Marseilles, Nov. 29 (booked from London).—To Batavia: Mr. and Mrs. Hora Siccoina.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Telegrams from San Francisco report the arrival of the Pacific mail steamer *Alaska*, with advices from Yokohama to the 7th August. The following is the summary of news as telegraphed to the New York press :—

The Japanese trouble with Korea is rapidly becoming critical, and China has declared that in the event of a war she will side with Korea. The Japanese Government is without a policy, but with energy and a liberal credit abroad, she could cause Korea to regret her insulting letter to the Mikado. Foreigners are eager to aid Japan, and upon the return of the Mikado with his fleet of eight vessels from the tour of inspection of the Southern provinces some definite action will be taken relative to the dispute. The Prince of Tosa, of the League of Chosiu, Satumsa and Tosa, who broke down the Tycoonate, has died, leaving Satumsa the only survivor of the triumvirate.

The Kioto Exhibition will reopen on New-Year's-day. The passport system will be adopted, with a security of $300 that no foreigner will carry on any business whatsoever while there, peddling especially, which is most objectionable, until Japan agrees by treaty to open up the country. This rule will be strictly adhered to, and visitors will be treated and considered accordingly, and no impediment will be made to their expenditure of money.

The Governor of Yokohama has notified all landowners that they are not allowed to rent or sell any land to Japanese, nor lease any building without the permission of the Japanese Government.

The line of telegraph between Nagasaki and Yokohama, some 600 miles, has been completed, and when the new instruments are received, communication with San Francisco will be opened.

The policemen who murdered the eleven persons at Yedo have been captured and executed.

Digitized by Google

A meeting has been held to found a branch of the Royal Asiatic Society in Yokohama.

Of the new teas, 9,000 piculs have arrived, and have been settled, but the quality is inferior to the former receipts, being mixed with the second crop. Prices are firm.

A large business has been done in silk, the settlements being 2,100 bales, against 1,300 bales for the same period last year, at prices $30 lower.

CHINA.

—o—

SHANGHAI.

We have advices from this port to the 4th August; there had been no mail arrival since that of 14th June. The following summary of news is from the *North China Herald* and *Shanghai Courier*:—

A memorial of Li Hung Chang, which appears in the *Gazette* of July 5th, has an interest altogether apart from the immediate subject of which it treats. It gives us some important details of the Mahometan struggle in Ili, of the Kuldsha, and of the subsequent occupations by the Russians. The southern portion of the vast district comprehended under the name Ili has long since been independent of Chinese rule, and in 1864 the northern portion, or the northern district of the Tienshan, revolted, and it appears that, after two years' fighting, the Mahometans were triumphant. They took Kuldsha, the capital of the district, on the 27th March, 1865, and held it until they were driven out by the Russians in June, 1871. What the Russians had to do in Ili is not clear; probably they thought it a good opportunity for getting possession of the country without coming to an open rupture with China. But, be this as it may, it is evident, from the story of Chen Ching-fan, that Kuldsha is entirely under the control of the Russians at present. Yet it does not appear that China has relinquished her rights, for we find in the *Gazette* of Dec. 9th, 1871, an Imperial edict granting an amnesty to the soldiers and people of Ili who had submitted to the rebels while the latter were masters of the country. The same edict called on those thus pardoned to show their gratitude by becoming good and loyal subjects for the future. How the matter will be settled between Russia and China it is, of course, impossible for us to say.

Some glimpses of the devastation caused by the rebels still to be met with in the province of Anwhui, and other interesting matters, are given in the *Gazette* of 11th July. The Literary Chancellor of the province reports that though the literary examinations just concluded were satisfactory, the military examinations do not deserve much praise, as in the drill, in the use of weapons of war, in the art of horsemanship, in all that relates to the order, formation, disposition and discipline of troops and general tactics, he saw little worthy of commendation. Yet in excuse for this mediocre state of things, he says, it may be remembered that these cities and the surrounding country were overrun by the rebel armies, who pillaged and burned the houses, a large part of the inhabitants were murdered or died in battle, the country is still impoverished, and the population sparse; that he has travelled a whole day without meeting a single person, the houses are deserted, falling to the ground, and the roads overgrown with thousands of brushwood. Rich and learned men are no longer even heard of in these districts; the people are rude and simple, and in style and manner bear no comparison to the inhabitants of the land in former days. They seem mostly occupied in solving the problem as how to continue their own existence and that of their families, giving little or no thought to the acquirement of literary, civil or military honours.

A curious case has been tried before the Mixed Court, two men being charged with attempting to exact money from houses of ill-fame in the Settlements, on false pretences. It seems to be the practice for agents of the yamen runners to call at these places and demand sums of money, under the threat that accusations will be laid against the proprietors before the city authorities, and a warrant obtained for their apprehension, resulting in their being taken into the city while the case is heard, and a large amount of squeezing before they get out again. The accuser generally sends in a petition setting forth that, as he walked along, casting his eyes up, he saw at the window of the house a female whom he recognised as his long-lost daughter or sister; that he applied to have her restored to him, but that the people of the house claimed her as their property. This will be backed up by any amount of testimony necessary, and the proprietors of these places find it best to pay a moderate squeeze to be left in peace. A short time since $20 each were collected from about fifty houses in this way, and within six weeks the screw was applied again. This was a little too much, however, for the patience of the sufferers, and they applied to the foreign police for assistance in resisting the exaction. The result was that two men were arrested on the charge, and, fifty or sixty witnesses appearing against them, were convicted and sentenced—one to forty blows of the heavy bamboo and a month's cangue, and the other to forty blows on the hand and the same term of cangue. The yamen runners from the city were present in great force, and were, we hope, edified and warned by the proceedings.

The district Magistrate (Chehsien) of Shanghai has resigned, and a man named Yeh, at present in charge of the Opium tax office, is to be appointed in his place. Yeh is a son of Chy-loong, the great Canton ginger preserver, and had charge of the first native police force established at this port, as head of the Police Commission appointed by the Taoutai, in the troublous times of 1863. He has also acted as magistrate in various places. Chen, the magistrate of the Mixed Court, is entitled to the post, however, and so far as foreigners are concerned would probably prove a more friendly and complaisant official.

A case has been tried before a Joint Court composed of E. Morel, Esq., Consul for the Belgians, and F. B. Forbes, Esq., Consul for Sweden and Norway, with Assessors. The prisoners, a Belgian and a Swedish subject, recently partners in the "Scandinavian Hotel," on the French Concession, were charged with stealing a chest of opium from the British barque *Annie Muriel*. Both prisoners having been found guilty, they are to be detained in custody, in Shanghai, during the reference of the case to their respective Governments at home; that being the only course which the peculiarities of Swedish and Belgian law leave open to the Consul.

Some time ago we drew attention to the disgracefnl condition into which the Cemetery of the soldiers who defended us in 1861-62 has been allowed to fall. We are happy to say that only $60 to $70 now remains to be added to the amount already collected to enable the committee to proceed with their most commendable operations. We feel sure that so small a sum will be speedily forthcoming.

The screw steamer *Fairy*, advertised by Messrs. Tilby and Co. as for sale by auction, was bought in, the reserve, from small attendance at sale, not having been reached. We understand that the steam tug *Rocket* has been sold for Tls. 21,000 to a well-known resident.

The earthquake felt at Chinkiang was also observed at Shanghai on the same night and at the same time. The motion was slow and steady, without any accompanying sound, and apparently passed from north to south. Windows and furniture vibrated for about ten seconds.

The death is recorded of Frère Fournier, attached to the *Procure des Lazaristes*. The deceased had lived in China twenty-two years, and was known and esteemed by all old Shanghai residents. He had not been away from the place since 1857.

One of the back lots of the settlement at Hankow has been sold for *one tael*. The ground-rent is twelve taels, and the Municipal taxes six taels.

NINGPO.

(FROM A CORRESPONDENT.)

NINGPO, JULY 31, 1872.

A tragical event has taken place in this neighbourhood since I last wrote to you; and from the comparative rareness of such crimes, and the general lack of newspapers in China, I thought it worth while to record what had otherwise be better forgotten as speedily as possible. A boy eleven years of age has been brutally murdered by his step-mother. This woman's husband is employed in one of the Shanghai Foreign Hongs; and the wife being of more than doubtful character is supposed to have committed the murder so as to remove the only witness (as she fancied) to her evil-doings. The poor lad had a terrible presentiment of his doom. He related to his schoolmaster dreams which he had dreamt, describing with minute detail the manner of his coming death. On the day of the murder the lad begged to be allowed not to return home, as he felt certain that death was near. His master cheered him, and rallied him on his groundless fears. Next day he did not appear; and after two more days' absence the school-master became anxious. He went to ask for his pupil, and was told by the mother that he had gone to Ningpo. The words and manner of the woman roused his worst fears, and acting on the dreams of the poor boy he hastily tore up the flooring and found the corpse cut to pieces in a large jar. The school-master, who showed great courage—for had he been mistaken the false charge would have almost cost him his life—laid information before the Ningpo magistrates. The woman was arrested, carried in a chair all round the city to each of the six gates for the people to see and execrate, and will be executed as soon as the Che hien, who is slightly "under the weather," can attend to the trial.

The people speak of this as a crime of the deepest dye, and of very rare occurrence. "Nothing of the kind ever happens in your honourable country, of course," exclaimed my informant. Alas! we too have our Central Criminal Court, with its blood-stained list of crimes.

FOOCHOW.

On the 3rd August the community of Foochow was thrown into some excitement by the threatened attack of a party of some three hundred or more Chinamen on the American Consulate. From the facts which have been ascertained, it appears that Mr. Delano, the U.S. Consul, bought a small piece of ground from two Chinese as an addition to his garden, and commenced to build a wall thereon. This appears to have excited the ire of some adjacent villagers, who claimed ownership of the appropriated eighteen feet or thereabouts, and marched off to demand its restitution. On the appearance of Mr. Delano he was greeted with showers of stones and mud, and other Europeans coming to his assistance were served in a like manner. Several were hit, but none injured. Although there were firearms amongst the Europeans, they were unused. Mr. Delano, it appears, has built his

Digitized by Google

wall a little in the rear of its intended position, and this, added to the appearance of some celestial troops upon the scene, appears to have quieted the villagers. A superstitious belief in the Feng-shui, it is said, had more to do with the agitation than anything else. One of the principal ringleaders was secured, and handed over to the authorities, and he proved to be a coolie in the employ of a European house here.

HONG KONG.

Our advices by this mail extend to Aug. 10; there had been no arrivals of homeward mails during the interval. The following items are from the *China Mail* and *Daily Press*:—

The French corvette *Bourayne* left the harbour on Aug. 5, for Manila, with H.M. the King of Cambodia and suite on board. The Garrison Battery and H.M.S. *Princess Charlotte* fired salutes as she steamed out of the harbour. The late acting bandmaster, Sergeant A. P. Crawley, has received a splendid silver cup inlaid with gold from his Majesty, as a mark of his appreciation of the manner in which the band was conducted during his stay in Hong Kong. It bears the following inscription:—"Presented by his Majesty the King of Cambodia to the Acting Bandmaster, Sergeant A. P. Crawley, on the occasion of his visit to Hong Kong, July, 1872."

The following is the fourteenth report of the court of directors of the Hong Kong and Shanghai Banking Corporation, to be presented to the ordinary half-yearly general meeting of shareholders to be held on the 14th August.

The directors have now to submit to you a general statement of the affairs of the Corporation and balance-sheet for the half-year ending 29th June last. The net profits for that period, including $18,340.18 brought forward from last account, after paying all charges and deducting interest paid and due, and making full provision for all bad and doubtful debts, amount to $415,814.29, of which, after taking out rebate on bills not yet due, and remuneration to directors, there remains for appropriation $392,826.21. From this sum the directors recommend the distribution of a dividend of $7.50 per share on the paid-up shares, and of $6 per share on the new shares, being equivalent to six per cent. for the half-year, which will absorb $270,000.00. The balance, $122,826.21, they propose to carry forward to the credit of new account, deferring any appropriation of it until the result of the whole year's working becomes known. The directors consider that the result of the past half-year is very satisfactory, and they congratulate the proprietors on the continued prosperity of the Corporation.

The fifth and last call of $24 per share on the new shares, due on the 1st July, has been promptly met on 19,855 shares out of 20,000; the balance outstanding will doubtless shortly be paid.

His Excellency the Governor having assented to the application of the directors for power to issue One Dollar Notes in Hong Kong; arrangements have been made to introduce these notes to the public without delay.

Messrs. R. Rowett, J. Menke, and William Lemann resigned their seats at the Board on leaving the colony, and Messrs. William H. Forbes and H. B. Lemann have been elected to fill two of the vacancies.

The principals and seconds in the duel which was fought between Senor Checa and Senor Bueno have been summoned to answer a charge of conspiring to take life. It seems that an agreement was drawn up in Hong Kong on the subject before the duel took place, and this document by some means has found its way into the Attorney-General's hands. In the meantime the Governor refuses to acknowledge Senor Checa as Consul for Spain or M. de la Forrest (one of the seconds) as Consul for France. Messrs. Le Forrest, Checa and Dubost have been arrested on a Government warrant, but were released on bail—Mr. Le Forrest $2,000, Senor Checa $3,000 and Mr. Dubost $1,000. A warrant has also been issued for the arrest of Mr. Torre-Bueno, but he is yet too ill to be removed.

An inquest has been held on the body of H. N. Middleton, who died of a self-administered dose of opium. The deceased had been unfortunate in not finding a situation, and, being in debt, was uneasy about it. On the 5th August the deceased asked a Chinese servant to buy a half dollar's worth of prepared opium, as he wished to send it to a friend at home as a curiosity. He then returned to his lodgings, where he took the opium, and was found in an unconscious state. The police were communicated with, and the deceased was conveyed to Hospital, where he died in spite of the efforts made to save him. The jury returned a verdict that "the deceased died of an over-dose of opium taken by him while labouring under temporary insanity."

We regret to record the death of Mr. Maximilian Fischer, of Macao, who was long known in China as agent for the P. and O Company, and has for the last four years been living in retirement at Macao, preferring to settle down there for his remaining years than to return home. He had attained the advanced age of seventy years.

The invitation of the Amateur Philharmonic Society seems to have been fairly responded to, and over twenty instrumentalists are now interested in the movement. The want is in reed-instrument players, such as clarionet, oboe, &c. We wish the project every success, and trust that local talent will even be able to furnish the missing "reeds."

The 8th August being the anniversary of the birth of the Empress of Russia, the Russian man-of-war *Abreck* dressed ship after their Church service. H.M. ships *Princess Charlotte, Ringdove,* and *Opossum* hoisted the Russian ensign at the main, and the English ensign at other mast-heads.

In the removal of the *debris* at the ruins of the rice mills at West Point, to get at the rice on the quay side buildings, the heated materials burst into flames again, and sent forth volumes of smoke, which had to be speedily checked to prevent a further conflagration.

The Provincial Judge of Canton having been promoted to the Treasurership at Chihli, the Viceroy has appointed the Salt Commissioner to be the *locum tenens* until the arrival of the successor.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings dates to the 19th August; since the arrival of the P. and O. mail of 12th July, on the 11th August, no homeward mail had been received. The following summary of news is from the *Singapore Daily Times*:—

The Legislative Council held a meeting on the 15th August, when two important official papers were laid before the members. The first is a minute by the Attorney-General as to the relative duties and responsibilities of the police and the Municipal Commissioners in regard to the sanitation and conservancy of the towns. Our readers will remember some rather sharp correspondence which was recently published, addressed by the Municipal Commissioners and the Inspector-General of Police to the Government, mutually accusing each other of neglect of duties and other shortcomings omissive and commissive, and this minute is the result. According to the minute, the police can remove obstructions of their own motion under the Police Act, but as regards sanitary matters, which are dealt with by the Conservancy Act, all the police can do is to report breaches of the law to the Municipal Commissioners, who alone can put the law in force, and whose duty therefore it is to do so. The minute appears to be altogether exculpatory of the police from the charges made by the Commissioners. The second batch of papers consists of somewhat lengthy correspondence between the Home Colonial-office and the local government regarding the very difficult question of how to deal properly with the sick and leprous poor in the three settlements. The correspondence is covered by a minute of the Governor's, giving the Council a brief *résumé* of the present state of affairs to help them to decide upon what further measures should be taken to settle satisfactorily a matter of very great importance to the health and self-respect of the community. We feel sure we are giving expression to the general feeling of the public when we say that the prosperous condition of the revenue will fully warrant the Council in not stinting their vote for providing accommodation for these unfortunates, and alleviating their condition as far as human means can do so. The sources from which the revenue is derived and the nationality of the majority of our sick and leprous poor alike claim and warrant the utmost liberality on the part of our legislators.

A circular has been sent round asking the opinions of our bankers and merchants regarding a proposal made by Mr. Trotter, the Postmaster-General, for attaining the very desirable object of a quicker delivery of letters by the P. and O. mail steamers Mr. Trotter's plan is to appoint sorters to travel on board these steamers between Penang and this, who could take charge of the Singapore mails at Penang and occupy themselves during the voyage to this port in sorting into separate little bags the letters of all the firms in Singapore who hold what are called window tickets. By these means these firms would get possession of their letters five minutes after their receipt in the Post-office. Ther can be no doubt that this is a step in the right direction, and in accordance with the progressive spirit of this age of telegraphs and nothing seems easier than to have it carried out. Th only question is where are the dollars to come from? On this point there seems to exist a difference of opinion. The total expense per annum, not including travelling expenses, would be $1,944. Mr. Trotter proposes to meet this expense by getting the ticket holders, who number seventy-five, to pay $3 per mon in addition to the present fee they pay for their tickets. But the majority of the ticket holders would appear not to approve of this mode of raising money, and to be of opinion that the Post Office revenue, which is flourishing, should be charged with the expense. They allege that the charge for postages here is a very heavy tax already on business, and that there is no reason why the Post Office should seek to increase its annual handsome profit.

At last the much-needed waterworks have been sanctioned by the Secretary of State. The news, we are informed, came in the despatches received by last mail. The plans for the scheme will be sent out by next mail. The existing conduit is to be utilised as much as possible, and with this view it is intended to form a reservoir somewhere opposite the hospital, from which the water is to be pumped up on Prinsep's-hill, where another reservoir will be formed, from which iron pipes will be laid to the town. Such is, we believe, a general idea of the scheme which has been devised by the united wit of Mr. Rawlinson and Major MacNair to overcome the engineering difficulties which have hitherto baffled all our local talent. The public will not be particular how the thing is done, provided it be done, and that quickly.

Her Majesty's ship *Nassau*, Captain Chinmo, from Labuan *via* Macassar, has arrived here. While she was surveying in the Sulu Sea, a boat's crew, with Lieut. Gray and Mr. White, when taking bearings on the N.E. end of the Sulu Island, were attacked by forty or fifty natives. They fought their way through them to the boat, and during the fight Lieut. Gray and one of the crew were wounded; some of the natives were killed and others wounded. Captain Chinmo, believing his crew had been mistaken for Spaniards, communicated with the people, telling them that the *Nassau* was an English vessel, and had nothing to do with the Spaniards, and asked for an explanation of their conduct, which they declined to give, and expressed their readiness to fight. Several days were spent in vain endeavour to come to an understanding, after which the *Nassau* was put into position and shelled the villages, which were totally destroyed. It turned out that the people were Balignini pirates.

We are informed that the Straits are to be honoured shortly by visits from several scions of Royalty. The Grand Duke Alexis of Russia will be here towards the end of the present month, and Prince Philip and Prince Augustus of Saxe-Coburg Gotha, cousins of Her Majesty the Queen, are also expected very soon. Prince Augustus is son-in-law of the Emperor of Brazil.

Among the passengers who have arrived here by the *Ajax* is Mr. C. B. Waller, Superintendent of Police at Singapore, who will relieve Mr. R. W. Maxwell, now acting in that capacity. We hear that Inspector Richardson, of the Malacca police, has been dismissed from the force owing to certain charges brought against him by a Chinese dealer, in connection with prosecutions instituted by that officer, and that he will be replaced by Inspector Barnum from Singapore.

Small-pox is very prevalent here just now, though there are but few cases in the hospital. A gong has been beaten through the streets by the police, and an order of the Inspector General of police has been published directing that every case should be reported to him without delay. The natives, however, are averse to sending their children to the hospital, owing to the inconvenience of its location, the difficulty of procuring and cooking food, and want of accommodation for themselves generally, as they will not leave the nursing of their children and relatives to the hospital attendants.

It is reported that Tunkoo dia Oodin is likely to receive substantial aid against Rajah Mahdie and his followers—not only from Pahang, whence it is said he has been reinforced by a large body of men, but that the Chinese miners, some 70,000 strong, threaten to take up arms to exterminate Mahdie and all his followers.

CEYLON.

(FROM A CORRESPONDENT.)

COLOMBO, AUG. 21, 1872.

Our exports of Coffee for the season, which will close with September, are up to date (21st August) 696,950 cwt. As there are now only forty days to run till the export season closes it can hardly be expected that the total of both native and plantation will exceed 750,000 cwt. This will be a sad falling off from the previous two years—and from the round million which we were so long of attaining as an average. The coming crop looks better; but with it many will be disappointed, for it does not promise to equal by a long chalk early expectations. From our neighbours on the Continent of India, too, we hear that crops this year are to be very short, so that altogether the prospects for Indian Coffee ought to be good; yet somehow prices keep low, or rather, lower than circumstances would seem to warrant. However, time will doubtless set that right as yet. It is not fully believed in London that our crop of last year is to be so lamentably short, and that of this year considerably under estimate. But the unbelievers will not now have long to wait for a full assurance of the stern reality.

Commercial Report.

(*For dates see first page.*)

IMPORTS.

SHANGHAI.—Manufactured Cotton Goods: A steady business had continued in 7 and 8.4 lb. Grey Shirtings at Tls. 1.7.0 to 1.7.3 per piece for the former, and Tls. 1.8.6 to 1.9.4 for the latter. For White Shirtings the market had remained quiet, and prices were unchanged. In T-Cloths transactions had taken place on a fair scale at about previous rates, and 7 lb. Mexican qualities were quoted at Tls. 1.5.0 to 1.6.0 per piece. The demand for English and Dutch Drills for the Hankow market had remained active, and the additional purchases had been rather extensive; prices for the former kind were somewhat firmer, whilst the latter were about 3 candareens dearer. American Sheetings were entirely neglected, and were quoted nominally at Tls. 3.8.5 to 3.9.5. In the market for Woollens a further improvement was perceptible; Camlets and Long Ells had advanced in value 3 and 2 mace per piece respectively, and Spanish stripes were also saleable at somewhat higher rates.

FOOCHOW.—Sales had been 500 pieces 8¼ lbs. Grey Shirtings at 2.82½ per piece, and 300 pieces 8 lbs. T-Cloth at $2.70 per piece; Lead was quoted at $7 per picul to teamen.

HONG KONG.—Values of raw Cotton had gone no lower, but the enquiry was light, and only small business was doing. Nos. 16-24 Yarns were quoted at a decline of 50c. to $1 per bale, but the higher counts were firmly held for former figures. Transactions in manufactured Cotton Goods had been small; Grey Shirtings were but little wanted, and 8.4 lbs. goods were 2c. per piece lower; Drills had been somewhat asked for at previous currencies; T-Cloths had been comparatively neglected. In Metals all descriptions of Iron were dearer; Lead was not wanted; Quicksilver and Tin were steady. In Woollens Long Ells were weaker; Camlets were firmly held; Blankets scarce and wanted; Crape Lastings dearer.

SAIGON.—The market was rather dull for Piece Goods, and sales were difficult at former rates. Quotations:—Grey Shirtings, 8¼ lbs., $2.67 per piece; 7 lbs., $2.25; T-Cloth, 5 lbs., $1.42; 4½ lbs., $1.27; 4 lbs., $1.14; White Irishes, $1.78.

SINGAPORE.—The market had been without alteration during the week. Quotations: 40s. Mule twist, $135; 8¼ lbs. Shirtings, $2.55 to 5.57½; 7 do., $2.17½; 5 lbs. T-Cloths, $1.35; 6 do., $1.70; 7 do., $1.90; Cambrics 15 and 16s., $32½.

EXPORTS.

TEA.

SHANGHAI.—Black: The market during the week had been fairly active; buying had become somewhat more general, and any further material decline in price had thus been arrested. The better grades showed no quotable change in values, but the more common descriptions had been obtainable at a reduction in some cases amounting to one tael per picul. The settlements had been 17,860 chests, reshipments 597 chests, and the stock was estimated at 33,452 chests. Hankow advices to July 30 reported a quiet market, in consequence of unsatisfactory advices from London. The week's settlements had amounted to 6,600 chests. Green: A steady business had been transacted in Teenkai descriptions, mainly by a few buyers, at values varying little from those last advised, and in other kinds moderate transactions had taken place. Settlements reported during the week 14,477 half-chests Teenkai, at Tls. 43 to 50½; 3,146 half-chests Fychow, at Tls. 39 to 44½; 1,006 half-chests Taiping, at Tls. 40½ to 41½; 4,821 half-chests Pingsuey, at Tls. 34½ to 60, and 1,652 half-chests local packed, at Tls. 40 to 41—in all 25,182 half-chests. The stock was estimated at 53,675 half-chests, of which about 38,000 half-chests were country Teas. One or two small parcels of Moyune had been placed upon the market. For New York the Chinaman sailed on the 30th July, leaving the clippers Cashmere, Kaisow, Duke of Athol, and s.s. Cyphrenes on the berth, the Cashmere and Kaisow loading at £3 10s. per ton of 40 cubic feet; the rate per Duke of Athol not fixed; the Cyphrenes had completed her Shanghai engagements at £4 15s. per 40 feet, and was circulated to sail on the 11th Aug. For London the clippers Leicester, Northampton, and Weymouth were engaging slowly at £3 per ton of 50 cubic feet, and the steamers Macgregor and Deucalion were advertised to sail on the 6th and 10th Aug. respectively, the rates being £3 10s. per ton of 40 cubic feet.

FOOCHOW.—The business of the week had been limited in extent. *Congou*: Settlements had been 9,250 chests at Tls. 5⅛ to 24¼; arrivals, 20,810 chests; the stock amounted to 86,328 chests; the following were the current quotations, to which Tls. 2.1 must be added for duty; the cost at which Teas lay down in London calculated at an Exchange of 4s. 6d., and freight £3 per ton of 50 cubic feet; dust and siftings, 6⅛d. to 8d.; broken leaf to ordinary, 8¾d. to 11¾d.; fair to good common, 1s. 0½d. to 1s. 2¼d.; flavoury to medium, 1s. 2½d. to 1s. 6d.; good medium to fine, 1s. 6¾d. to 1s. 10½d. *Souchongs*: Settlements 433 chests at Tls. 18½ to 30; arrivals, 800 chests. *Oolongs*: No transactions; arrivals, 17,550 half-chests. *Scented Teas*: 6,059 boxes settled at Tls. 21 to 30; arrivals, 5,000 boxes. *Flowery Pekoes*: Settled 198 chests at Tls. 20 to 46; arrivals nil.

AMOY.—Oolongs had been in fair request and steady purchases had been made at somewhat irregular but lower prices. Supplies had not come in so freely, and as the stock was only 8,000 half-chests, any immediate decline was not looked for; it was hoped, however, that lower values would rule when the autumn (3rd crop) Teas come in about a month from date. Teamen were asserting that the supply for this season would be no greater than that of last, but the impression among buyers was that there would be an increase, though the future range of prices would doubtless considerably influence the receipts. The Hylton Castle sailed on the 4th Aug., with 538,690 lbs. of Oolong, leaving the Aurora Australis and the Tamerlane loading for New York, and the Kin Lin for Boston—all at £3 10s. per ton of 40 feet. Quotations:—Oolong, common cargo, $21 per picul; fair, $23 to 24; good, $26 to 28; superior, $31 to 34; fine, $38 to 44; finest, $45 to 50; choice and chaicest, $60 to 65; Congou, common and good, $19 to 20; superior, $22 to 23.

SILK.

SHANGHAI.—A considerable business had been transacted during the week. The settlements had amounted to about 2,500 bales, and the prices paid had shown no material change as compared with those ruling previously; Blue Elephants had been taken at Tls. 530 to 532½, and Red Peacocks at Tls. 515 to 517½, which figures may be considered about one shilling per pound above the quotations in London according to the latest telegrams, the quality of the Silk offering being moreover of a very unsatisfactory character. Total settlements to date were estimated at 24,000 bales, and the unsold stock was about 8,000 bales.

CANTON.—A good demand for Tsatlee Reels, for shipment to Europe, had existed, and settlements of upwards of 1,000 bales were reported. Moderate purchase of Rereels had been made for America, as prices had ruled rather easier, and about 400 boxes were to come forward by the outward U.S. mail.

The next French mail steamer, the *Hoogly*, leaving Marseilles on the 29th inst., will take 150 tons of material to be employed in the construction of the new jetty which is to be built at Saigon.

HILL—On the 17th Sept., at 2, Portswood-park, Southampton, Mr. Thomas James Hill, purser in the P. and O. Co.'s Service, aged 36.
PERCEBOIS—On the 31st July, at Shanghai, Mademoiselle Marie Eugenie Percebois, aged nineteen years.
WESTON—On the 29th Aug., on board the Messageries Maritimes steamer *Hooghly*, Joseph Greenwood Weston, of Shanghai, eldest son of Lambert Weston, of Dover, aged 33 years
WOODWARD—On the 3rd Aug., at Shanghai, the infant son of R. H. S. Woodward.

THE BURMESE EMBASSY.

The Burmese Ambassadors arrived at Glasgow on Monday last, and were entertained at luncheon by the Provost and magistrates of the city. In returning thanks for the toast of the health of the King of Burmah, proposed by the Lord Provost, the Envoy Extraordinary said he felt highly gratified at the kindly greetings with which they had been received in Glasgow, and he should not fail to communicate the fact to his Royal master. He had heard a great deal about the City of Glasgow in his own country—its wonderful manufactories, its harbour and shipping, and its gigantic commercial transactions. He trusted that their present visit to England would lead to bringing the nations, both politically and commercially, into closer contact, and that its result might be for the welfare of both countries and mankind in general. In the course of the day the Ambassadors visited various places of interest in and about the city.

On Tuesday the Chamber of Commerce presented an address to the chief Ambassador. The address stated that the Chamber was glad the King of Burmah had sent an Embassy to Great Britain to improve the political and commercial relations of the two countries, and that it was hoped the visit might be mutually beneficial. The chairman trusted a route would be opened up through Burmah to Western China. Were this done the benefits would be incalculable. His Excellency said he was much gratified by the address, and was sure that his august master would regard it as another proof of the friendly disposition of Great Britain. The prompt and cordial recognition of the Embassy by Her Majesty had been learned with extreme satisfaction by his Sovereign. The difficulties of access through Burmah to Western China were not caused by the King's Government, and his Majesty would do all he could to promote a communication.

MR. W. H. FITTOCK, Her Majesty's Consul at Ningpo, will leave England in November next, and proceed to his post by way of Bombay and Calcutta.

THE *San Francisco Bulletin* has an article on "Chinese Medicines," which says:—"The ingredients of a witch's cauldron as described by the poet could not have been more repulsively disgusting than are the articles and compounds shipped to the Chinese physicians of this city from their native country and used as medicines here. There seems to be just at the present time an extra demand for a venomous serpent closely resembling the rattlesnake, of which hundreds are received constantly. A Custom-house official brought a a specimen of these cheerful-looking creatures to this office yesterday,—a coiled snake of about four feet long, fanged, and with hideous head-scales like a crest. How these animals are taken by patients of Chinese doctors is not known. One would be a fair dose if disguised in a coating of sugar. They may be taken in sections three times a day, as they are desiccated, or they may be boiled down or pulverised, and taken in powders or rolled into pills. Lizards are in nearly as great demand as the snakes. These also are dried and sent over in packages, together with hundreds of other loathsome things, all of which are consigned to the Chinese physicians and used by them in their practice.

A MISSIONARY MEETING was held in the Free Church, Lethendy, on the 8th inst., in connection with the departure of the Rev. Robert Gordon as a missionary for China. The Rev. A. Gordon, minister of the congregation, presided. An address was delivered by the newly-ordained missionary on the past history and present state and prospects of mission work in China. The Rev. Dr. Macdonald, of North Leith; the Revs. Messrs. M'Crie and Russell, of Gowrie; Low, of Clunie; Shaw, of Laggan, and Hay, of Lethendy, also took part in the proceedings. At the close of the meeting a collection was made in behalf of the China mission.

AN error occurred in our last issue in the paragraph which stated that the Great Northern Telegraph Company's steamer *H.C. Orsted* would take out cable for repairing purposes. It should have been said that the vessel was shipping the cable required for making the telegraphic connection with the port of Amoy.

Foreign Intelligence.

—o—

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, SEPT. 17.

During the last week our money market has been in a state of the greatest excitement and alarm, and I may add that we have had an almost miraculous escape from a financial crisis of the worst character, and the break up of our ancient Bank of Hamburg and its antiquated banco valuta, which is now shown to be not equal to the requirements of the present period and the vast financial transactions that take place almost every day. The danger was only averted by the energy and *savoir faire* of private bankers, as the State was entirely incapable of interfering. A large part of the latest instalment of the War Indemnity paid by France to Germany consisted of bills of Exchange, and of these were drafts on Hamburg to the tune of forty-eight million marks banco. Such a thing had never occurred before, but the bills were duly accepted, and, being at a short date, had to be provided for by the acceptors (Messrs. L. Behrens and Sons) without loss of time by some unusual operation, as all the money in the bank was inadequate for the purpose. This sum, as is well known, varies from week to week, according to the quantity of bullion in the cellars of the bank, anyone being at liberty to deposit there his bars of silver, for which his account is credited in marks banco at the certain fixed rate of 59½ marks banco per metrical lb. of fine silver. In ordinary times this balance of the bank was generally from six to ten millions of marks banco, which sufficed for the common run of the daily payments, as the money could pass through several accounts on one and the same day. Within the last few years, however—ever since the trade of this city has made such rapid advances—a larger stock of money has become indispensable, and the quantity fluctuated between sixteen and twenty millions. To facilitate financial operations the concession was made to the Bank to create banco money, no longer exclusively by silver bars, but also by *Belehnungen*, or the deposit of gold in bars as well as silver and gold coin. In this manner the stock of the Bank had on Aug. 29 risen to 32,161,526 marks banco, of which 5,286;343 marks banco were *Belehnungen*, and by the official returns of the following week (Sept. 5) it rose to 38,411,771 marks banco. This was, it must be observed, before anything was known of the financial intentions and combinations of the French Government, and it will therefore be readily understood that all this money fell far short of the sums to be paid to redeem the acceptances; for the bills were drawn and made payable, not in silver thalers, but in marks banco.

On the 12th inst. the first bill for about twenty-five millions m.b. became due, and could not have been paid but for the extraordinary measures taken by the acceptors to create banco money. As I was passing the Bank on the day before bags of dollars were being unloaded from waggons and carried into the Bank; and I was credibly informed there were 7,000 such bags, each containing 1,000 thalers in silver coin. This would make seven million thalers, or about fourteen million marks banco. And the hebdomedal statement of the Bank gave the following official returns of the money represented:—Silver bars, 39,250,410 marks banco; *Belehnungen* on silver coin, 11,837,482 marks banco; do. on gold in bars and coins, 5,318,351 marks banco; total, 56,406,243 marks banco, or sufficient for the extraordinary drain on its resources.

A great sensation was created on the Exchange a few days ago by one of the above-mentioned bills being exhibited as an unparalleled curiosity by the Provincial Discount Company, to whom it had been sent to get it accepted. It was drawn on Messrs. L. Behrens and Sons, and in one sum, for 24,650,000 marks banco, the bill stamps amounting to more than 6,000 thalers for the benefit of the Imperial Treasury, "and which," said the Hamburg correspondent, "luckily has to be paid by France." As the largest bill stamps are only for ten thalers each, more than 600 were required, and as of course there was no room for so many adhesive stamps, the bill was pasted into a book—in the way that passports used to be made up for tourists, with blank leaves for the *visa* of the different authorities—and the stamps placed on the blank leaves of the book. I need hardly add that the bill was duly accepted, and paid at maturity in the usual manner by a simple cheque on the Bank to transfer the amount to the credit of the holder.

The events of the past week tend to show in the most conclusive manner that our separatistic and exclusive monetary system can no longer be tolerated, but must be abandoned and made to merge into the general system of the Empire. It is true that this has been decreed by the German Parliament last Session, and it is only a question of time when the alteration shall become obligatory; and this will probably be settled next spring, when Parliament again meets. But in the meantime, as the law is permissive, any State is at liberty to anticipate the obligation, as Bremen has already done with the most successful results. Shortly before the adjournment of our Burgerschaft for their summer recess, a motion was made be the President of the Chamber of Commerce to send a message to the Senate requesting their concurrence to the immediate abolition of the Banco Valuta and its transformation into the new German currency at the fixed rate, 450 new marks for 300 marks banco, and to allow the circulation of thalers at the rate of three new German marks for a thaler. The motion was carried by an overwhelming majority, as mentioned in my letter of the 16th of July. Nothing was done by the Senate during the recess of the Burgerschaft; but now that they have again met, the former cannot well postpone much longer vouchsafing a reply. It is generally believed here that the reason for the delay is that the Senators cannot agree among themselves on the subject, and this I have grounds for believing to be the case. But it is to be hoped they will not stand out any longer against the wishes most unequivocally expressed by the Burgerschaft, the Chamber of Commerce, and the practical merchants of the Exchange, who are all most eager to avert the possibility of such a dangerous crisis ever recurring again.

The great recommendation in favour of the Bank valuta when it was first created, a couple of centuries ago, was its absolute security; but no one appears to notice that this barrier was broken down when the system of *Belehnungen* was introduced. This amount was originally fixed at seven million marks banco, because at that time the sum represented by silver bars had never been below that figure. But as soon as the door was once opened the amount increased rapidly with the requirements of trade, and it was raised at first to fifteen millions, and subsequently to twenty millions, which sum was very nearly absorbed during the late crisis.

But there is still another episode to be mentioned in connection with this subject. The acceptors, who had lent out various large sums of money for short periods, were obliged by their own necessities to call them all in, which caused of course great inconvenience to all parties concerned, and a rise of two per cent. in the rate of discount owing to the temporary scarcity of money.

With all the combined efforts of the eight German mints the coining of the new gold currency goes on but slowly. According to the latest returns published the total amount that had been coined down to the end of August was 272,959,130 Imperial marks, of which 247,158,980 marks were in pieces of twenty-marks, and 25,800,150 marks in ten-mark coins.

Further accounts from Nijni Novgorod confirm the previously-given particulars of the dulness that prevails at the fair, and give a sad description of the want of order and regularity. A merchant from Irkutzk, who had purchased goods for 100,000 roubles, pawned them to one of the local banks for 60,000 roubles, and then suddenly disappeared. A number of rowdies, who always congregate in vast numbers to the fair, successfully effected a great *coup-de-main* one evening at the theatre, by the discharge of a pistol and giving a false alarm of fire. In the confusion that ensued there was a wholesale rifling of pockets, to prevent which the police were powerless.

The Emperor of Germany has granted authority to Dr. Focke, the Acting Consul at Hiogo and Osaka, to perform the ceremony of civil marriages between Germans residing within that Consular District, as well as to give legal certificates of baptism, marriages, and deaths, according to the provisions contained in Paragraph I. of the Law of 4th May, 1870.

The first Swedish steamer that has passed through the Suez Canal is the *August Leffler*, Captain Byork, with a cargo of Swedish produce, from Gothenborg to Singapore.

P.S. Since writing the foregoing I see by a letter from Berlin in the *Boersen-Halle* that a missive has been sent from the office of the Prince-Chancellor to the Senate of Hamburg, urging them to accelerate their deliberations with regard to the Bank-valutae, as in all probability the Bill for the introduction of the new currency will be laid before Parliament at the beginning of the approaching session, and that after it has been passed it follows, as a matter of course, that no single State can be permitted to have its own separate monetary system.

The *Enterprise* steamer, hence to Singapore and China, *via* Suez Canal, started last week on the day appointed. She takes out a number of cabin passengers and a full cargo.

COMMERCIAL.

There is no alteration to notice in the values of Tea; the sales have been to a fair extent, including the following by importers:—700/4, 159/8, and 600/16 chests of Congou; 433/8 chests Kaisow-Congou; 593/8 chests Moning Congou; 186/4 chests Souchong Congou; and 580/8 and 212/16 chests of Souchong. Also several considerable transactions in Congou, Souchong, Pekoe, and Haysan by the dealers. A better feeling prevails for Pepper—especially for Penang, which is higher—and the rise is expected to become general, as the season for the greatest consumption is approaching. There have been some fresh arrivals of Cassia Lignea, notwithstanding which the market is lively, 8,000 chests having changed hands at 9¾d., which is a trifle lower; but since then prices have recovered, and none to be had under 10 to 10¼ sch. bco. Flores is firmer, and sells at 14¼ in small lots. Rice is quiet; the sales of cleaned have not been extensive, and in rough no transactions are reported. No change in quotations. No business done in Spelter.

SHIPPING.

ARRIVALS.—Zorida and Concordia, from Rangoon; Hong Kong, from Hong Kong and Macao.

SAILED.—Enterprise (str.), to Singapore and China.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Sept. 18.

The Parliamentary Session of 1871-72 was closed last Saturday by the Minister of the Home Department in the usual manner. His speech was merely a *resume* of what had been done, and as this was only very little, he had but a few words to say; *Le Roi est mort; vive le Roi!* Two days after this ceremony the new session was opened by the King, who has returned from his trip abroad in excellent health. The Speech from the Throne was very, very meagre. In the first place it is stated that we live in friendship with all the foreign Powers—an assertion which contradicts the rumours set in circulation by the Conservative press, that some foreign Governments were anything but content that we had permitted the Internationalists to hold their meeting in the Hague. Then some clauses follow about the abundant crops, the good condition of our cattle, the improvement of our deep-sea fisheries, and the development of our trade and industry. The financial condition of the State is said to be favourable, and the army and navy are in a satisfactory state of discipline. Then the promises follow: a reorganisation of our military system is announced, but nothing is said about the *Schuttery*. Bills will be laid before the members to alter our Penal Code; likewise a Bill to extend the franchise in those communities where the right of voting is too limited. A new Bill bearing upon University Education is being prepared. The general condition of our East Indian Colonies is said to be satisfactory, notwithstanding the earthquakes and inundations which have occurred. The results of the agricultural and industrial pursuits were, in more than one respect, favourable in their

Digitized by Google

results, both to the native and the European population, and further development of those sources of welfare is most urgent. Proposals will be made to subsidise undertakings to improve the means of communication in Java by the State. More assistance will be given to our West India possessions. These are the outlines of the Royal Speech, which calls for but little comment. In the first place, it is strange that the Minister of the Department of Justice does not promise a more radical revision of our Penal Code, which dates from the days of Napoleon I.; that not one word is said about the new Java tariff of customs, that no financial reforms are announced. The proposed extension of the franchise seems to be very much like "a leap in the dark." The best promise given is the one which signifies that more help will be given to the West India colonies. This is indeed urgent. The last mail brought us reports of the discussions which were held in the colonial States, and which give us ample warning. Members openly declare that these colonies ought to be liberated from the Dutch protectorate, and advocate that England should take the place of Holland, the Dutch Government being indemnified by Great Britain as it was paid for the transfer of the Dutch settlements on the West Coast of Africa. Although some protests were raised against this course being advocated, it is, nevertheless, a fact that the proposed change of rulers found many defenders among the members of the Parliamentary Assembly. The questions now remain whether, if it is the real intention of our Government to give these unhappy colonies the assistance which is asked for, and, if so, whether the Second Chamber will agree to any proposal which will involve a larger expenditure than now obtains. Many of the members leave out of sight the fact that we cannot do better, if we wish to profit by our colonies, than to make them productive, even should the outlay be considerable, and our East Indian colonies have experienced that our legislators are anything but liberal in granting money in their behalf, even though they contribute millions and millions every year to our treasury.

We are, however, improving in this respect, as is shown by the East India budget for 1873, which was laid yesterday before the members of the Second Chamber. The revenue for the year is estimated at f.115,291,985, and the expenditure at f.104,967,210, leaving a favourable balance of f.10,324,775. The expenses of the Government and High Colleges are calculated to reach f.3,832,569, those of the Financial Department f.4,872,594, the Home Government f.39,216,731 (and under this head appears the amount of f.435,552, the subsidy for a steam packet service between Java and Australia), the Department of Education and Public Worship f.7,538,239 (out of which sum f.468,482 is to be expended on the promotion of the education of the natives), the Department of Public Works f.8,316,812, the Department of War f.17.364,747, the Naval Department f.87.857.561. This Budget does not make provision for the survey of proposed railway lines on Java, but only in Sumatra. The Bill of last session for the construction of railways in Netherlands India is repealed, as the Government desire that this should be left entirely to private industry, which will be encouraged by the means referred to in my last letter. If concessions are asked for in Java the Government already knows which districts are most in want of railway communication, and it will of course be to the interest of those who ask for concessions to take the very best *trace's*, which can be fixed by the Java Government. But the state of things in Sumatra is quite different. It is generally acknowledged, the Minister says, that Sumatra is much in need of railways. Nothing hinders so much the development of that rich island than the faulty means of communication. By direction of the Government a report has been made by the mining engineer, Mr. de Greve, but it is of a preliminary character only, because the necessary examination of the proposed districts is not yet completed. The principal line will be that which will bring the east and west coasts of the island in communication with each other, and that which crosses the rich Padang grounds. The question if it is possible to construct these lines—the Ombilion mines produce plenty of the best coals—will now be investigated in all its details, and the Minister will begin by asking for the necessary funds to send a corps of engineers to Sumatra. I think there is no fear of Parliament refusing the sums, which are relatively very trifling. A postscript which is added to the Budget says that the Budget for the War Department is but very little altered when compared with that of former years. The most important works for which credits are asked are those for the defence of Batavia and Samarang, and for the coast battery at Tjilatjap. The naval department requires a good deal of money more than last year, owing to the fact that the coast lights must be improved and augmented.

Yesterday the First and Second Chambers held a very short sitting. The newly elected members, Messrs. Blusse and Van Rees, were admitted, and the list of candidates was fixed. Mr. Dullert was at once elected first candidate by 42 of the 71 votes; this fact seems to prove that more homogeneity prevails amongst the members of the Liberal party.

A meeting of creditors of the Oost Indische Maatschappy van Lyfrenten has taken place at Amsterdam. Mr. den Tex proposed a liquidation, which was agreed to, and accordingly six commissaries will be appointed, with Messrs. van Berenstein and J. Seelig as liquidators. A dividend of forty per cent. will be divided amongst the creditors, and any further assets which may be realised will be disposed of as follows: —one-fourth to the shareholders, and three-fourths to the creditors. Ample communications were made about the actual condition of the company, and a report will be published. Mr. van Hemert, ex-director in Java, has offered to subscribe an amount of f.250,000 on behalf of the creditors, if the proposal of liquidation should be approved of. On the 20th January a decision will be taken whether this sum will be accepted.

To-day was established here, under the auspices of the Rotterdam Bank and other bankers of this place, Amsterdam, Brussels, Frankfort-on-the-Maine, besides a number of capitalists, the Rotterdam Trading Company, with a capital of fifteen millions of guilders, which is wholly subscribed. Mr. L. Pincoffs is appointed president-manager, and Mr. Then Bergh, manager. As commissaries were elected Messrs. F. A. Muller, M. Mees, E. Rensberg, D. van Weel, N. S. Raphael, from Amsterdam, J. Errera Oppenheim, from Brussels, R. Sulzbach, and J. May, from Frankfort-on-the-Maine, and G. Muller, from Berlin. The object of this company is to promote the trade, shipping and industry of the Netherlands in general and of Rotterdam in particular. I also hear that the large mercantile firm of Messrs. G. and H. Salomonson at Nyverdal has been converted into a company under the auspices of several bankers and capitalists. The business will now be continued on a very large scale.

I sincerely regret that Mr. Ortmann, about whom I wrote in my last letter, has been found guilty. He has been condemned to six months imprisonment.

The Royal decree respecting the premiums paid for the import of free labourers into Surinam from countries eastward of the Cape of Good Hope has again been altered, the premiums being augmented. For a man of the age between sixteen and forty years, imported from China, will be paid f.250; for a wife, f.200; for a married couple, f.500; for a child from eight to fifteen years, f.110; for a child from five to eight years, f.70; when they are imported from British India the premium is decreased by f.20 to f.100, and this is also the case when Chinese labourers are imported from the Netherland Indies.

The gentlemen who at the last meeting of shareholders of the Steam Shipping Company *Nederland* were elected managers have accepted the office.

PRODUCE MARKETS.

There is hardly any alteration to report in the leading articles of produce, transactions having been upon the whole devoid of animation, and prices are barely supported. Cotton has again declined, and prices of Tin have also ruled in favour of buyers.

COFFEE is quiet in the face of the Trading Company's public sale, in anticipation of which buyers keep aloof from the market, and no transactions worth notice have taken place here. Good ordinary Company's Java on warrant is offered in vain at 1c. below the currency of the late public sale. At Amsterdam 1,854 bags Java, ex Aria and Betsy, have been sold. The 81,482 bags Java, Padang and Macassar, to be put up at public auction to-morrow, for account of the Trading Company, are valued on a basis of 45c. for good ordinary Java, which is about 1¼c. to 2c. below the prices of the August sale.

TEA exhibits a healthy appearance, but the business doing is unimportant.

SUGAR.—A firm tone prevails, but the market is very dull, and I have only to report the sale of 1,401 baskets Passaroean ex Constance, stored, averaging No. 13¾ good, and very good quality, many moist at f.35½. The assortment of the 26,600 baskets Java, to be put up for sale by public auction here, on the 24th inst., on account of the Netherlands Trading Company, is as follows, to which I add the valuations of the Dutch standard, issued on the occasion by the brokers.

TOBACCO (JAVA).—Several parcels of sundry marks sold at prices that did not transpire.

SPICES.—The demand remains upon the whole inactive, but prices are well supported. Sales have been closed by secret tender of 42 casks Nutmegs ex Prins van Oranje, 8 casks Mace ex Maria Anna Catharina Elizabeth, besides 10 chests Nutmegs and 7 casks Mace ex Noach I. The following are the particulars of public sales for account of the Netherlands Trading Company, and on private account, to be held here on the 1st proximo:—1,050 casks Nutmegs, Banda No. 1, 212c.; No. 2, 202c.; No. 3, f.1.80; No. 4, 120c.; Macassar, No. 1, 212c.; No. 1, (average first) 210c.; No. 2, 202c.; No. 3, 170c.; No. 4, 165c.; 130 casks Mace, Banda D, 285c.; E, 280c.; Macassar D, 283c.; E, 275c.; for private account, 669 packages Java, Cinnamon, 90 to 220c.

RICE offers no change to report. 895 bags Java, ex Noach I., were disposed of at Amsterdam at a price not named, besides 666 bags do., ex Aria and Betsy, by public auction at f.8¼ to f.8⅜ for sound quality, and f.5¾ to f.8¼ for damaged.

ARRACK.—12 casks Batavia, ex Solo, and 50 casks do., ex Cornelis Gips, were sold at secret prices.

JAVA INDIGO.—No transactions have taken place in this article, but the late arrivals from Java, which now comprise about 650 chests, will be placed on the market, after having been examined by the brokers, which will then, no doubt, lead to business.

TIN.—The late advance could not be maintained, and to meet buyers lower prices have had to be accepted. Banca sold for usual prompt at f.96½ to f.95, and for delivery ex the coming autumn sale at f.96½ to f.93, whilst Billiton changed hands on the spot at f.92 to f.92¼.

SHIPPING.

ARRIVALS.—Sept. 10, at Texel, from Rangoon, Prins Oscar Frederick; 11, at Texel, from Batavia, Nederland; from Akyab, Gallino e Bonsignore; 12, at Brouwershaven, from Rangoon, Elizabeth Dawson; at Texel, from Batavia, Jan Pieterszoon Koen; 13, at Brouwershaven, from Banjoewangie, Zuid Holland; 15, at Zieriksee, from Batavia, Maria Diederika.

DEPARTURES.—Sept. 16, from Texel for Batavia, Ferdinand and Louis.

PASSENGERS OUTWARD.—For Java, per Ferdinand and Louis, Messrs. P. du Peyrou van Brengel, E. T. A. Keintz, P. Swildens and family.

PASSENGERS INWARD.—From Java, per Nederland, Messrs. J. A. Häfeli and family, J. van Weeren and family, Mr. A. de Bruin and family, A. Brunting and family, M. H. Bommezyn, Mrs. C. Claassen and family, Messrs. Bruine de Rochebrune; per Zuid-Holland, Messrs. Lubbink Weddik, Valentien.

LONDON: MONDAY, SEPT. 23, 1872.

THE GLEDSTANES' FAILURE.

IT is long since commercial confidence has received so severe a shock as the failure of Messrs. GLEDSTANES and Co., and the revelations made by those who were most disposed to take a favourable view of their transactions, at the meeting of creditors reported in another column. It is one more illustration of the disaster and disgrace—to say nothing of the wide-spread ruin—that must ever attend those merchants who, blind to the advantages and responsibilities of their position, lack the moral courage to look their affairs in the face, and, heedless alike of their own fair fame and the interests of those whom justifiable confidence has induced to trust them with their all, continually put off the day of reckoning, "hoping against hope," and drifting into a condition of moral insensibility in the frantic expectation of "something turning up." Here was a house which, through a long course of honourable trading, had acquired a confidence second to few in the mercantile world. One of the partners was a director of the Bank of England, another of the London and Westminster Bank, and a third occupied a prominent position in a leading insurance company. They were reputed to be wealthy, as well as honourable, men, and those who trusted them have certainly no cause to reproach themselves with imprudence. Yet this firm, when the inevitable crisis comes, is found to have been hopelessly insolvent for five years, and, throughout that time to have been surely and rapidly drifting from bad to worse. Their deficiency which, five years ago, was £120,000, has since that time been multiplied many times; and, when the crash came, the estates of the reputedly wealthy partners proved to be almost nominal. One member of the firm appears to have had eleven thousand pounds; another, two thousand; while, in the balance sheet, to the credit of the third stands—nothing. Yet upon this capital they traded to millions, fortified by their name; and, severe as must be the loss to creditors, we cannot but regard their own loss in this last respect—though less entitled to sympathy—as the greater of the two. Enjoying confidence practically unlimited, they failed to impose on themselves the limits which their moderate capital, and the continual pressure on their resources, must have suggested. Had they faced the world in 1867, they would have commanded a degree of sympathy which is now withheld from them. Creditors, who are themselves commercial men, are by no means an ungenerous or hardhearted race; fraud or shamefull extravagance may make them a little savage, but a straightforward intelligible case of misfortune will rarely be severely dealt with. Instead of meeting their creditors, however,—and, indeed, it would seem without ever making themselves acquainted with the true state of their affairs, though they could not but have known how disordered they were—they determined to "carry on the war" at any cost—to their creditors. All the capital they had ever possessed had long since melted away, except their reputation; and that they threw into the crucible which turns such things not into gold, but into paper. As the chairman of the Agra Bank showed, they allowed bills to be drawn on them to the amount of £390,000, which they knew they could not pay. It is pitiable to see men, who are capable of such actions, wearing the broad phylactery of credit, and standing in high places in the midst of the commercial world. It is perhaps even more to be regretted that a natural wish to save as much as possible out of the fire, and an instinctive dread of law expenses, should, in a manner, compel the creditors to consent to a private liquidation, instead of insisting on such transactions being sifted in the Court of Bankruptcy. If ever there was a case which proved the necessity for a sweeping revision of Bankruptcy Law—for the benefit of the public as much as the immediate creditors of an estate—it is that of Messrs. Gledstanes.

CEYLON.

THE coffee crop of the coming season, at one time expected to be large, it is now believed will only be but an average one. It looked exceedingly well and full of promise at the blossoming time, but unfavourable weather afterwards destroyed a considerable portion of the newly-formed fruit, and but for the new land coming into bearing, of which there is a good deal, we should have to deplore a much more serious deficiency. However, the spirits of planters are not depressed. In fact, a very sanguine feeling exists as to the future of coffee, and the Crown lands cannot be put up to sale fast enough to meet the demand. At a sale lately some ground at Bagawantalaven, the upper portion of the new valley of Dickoya, was bid for up to £9 per acre. A short time since blocks of private land in the same district barely realised £3 per acre. But it is not in that district alone that land is being inquired for. The whole of the district between Dimbulla and Happotella would sell were there a certainty of the railway being extended thither. Already—with only the prospect before us—considerable progress has been made. Small lots, not a few, adjoining the Horton Plains, have been sold at a good price, while applications for several large blocks near Hapootella, in what is now designated New Galway, have been made. Maskelliya yet contains a good deal, as does also the Balangodde side of the Peak range. Then in Ouvah there are some large tracts of forest yet untouched, especially on the Moonerakande Mountain, close to which runs the new Batticaloa road. Matale also has yet considerable stores, which will be available when the Dimboola and Dickoya fever has run its course. There is plenty of land for all comers for a good while yet, and there is no necessity for intending purchasers running each other up, as has been the case recently.

THE members of the Japanese Embassy who are connected with the Finance Department of the Japanese Government visited the Custom House on Thursday last, and were initiated by Sir FRANCIS DOYLE and Mr. GOULBOURN into the working of that institution.

OPENING OF WESTERN CHINA.

MR. T. T. COOPER has proceeded to Calcutta with the Panthay Envoys, at the request of our Government, visiting Vienna and Constantinople *en route*. On arriving at Calcutta he will report to the Governor-General, and will subsequently proceed on to Talifoo, their final destination. Mr. COOPER has the support of some Manchester firms to push his explorations as to the best route for introducing our manufactures into Western China. The following is an extract from the letter addressed by Mr. COOPER to the Chamber of Commerce:—

One of the most erroneous and prejudical statements, which has been freely expressed, is that the annexation of Burmah proper is alone requisite to enable us to trade with Western China. This opinion is not only based on unsound reasoning, but has operated most fatally against the realisation of our object, inasmuch as his Majesty the King of Burmah, although fully alive to the advantages of a transit trade through his territory, is not likely to countenance a scheme the promoters of which advocate the annexation of his kingdom.

Another and more prevalent impression is that which leads many commercial representatives to unite in pressing the Government to undertake the survey of a country between Rangoon and Yunnan, with a view of constructing a railway. The promoters of this scheme assume that Yunnan is ready to receive and reciprocate a profitable trade, and that nothing is needed but an outlay of capital to secure communication, but I contend that this assumption rests only on conjectures based on the past history of the province, for we are at present in ignorance of the social and commercial state of Yunnan under those altered conditions of its population and Government which have resulted from the political changes of the past twenty years.

Until, therefore, we are possessed of trustworthy information, the advocacy of this scheme is premature, and obstructive of private enterprise.

It is also assumed that the commerce of Sz-chuan will avail itself of such an outlet, but this seems to be barely probable; personal observation enables me to state that the central trading depot of Sz-chuan is Chung-Ching, and thence her products can reach Hankow in ten, and Shanghai in fourteen days, and it is thus obvious that the market of Shanghai would still be more easy of access than that of Rangoon, even supposing a line of rail existed from the latter port to the frontiers of Yunnan.

That portion of the province of Sz-chuan, lying to the west of the river Min, is an absolutely wild country, with no pretensions to population, and although comprising more than half the area of the province, it has been calculated in the estimate of that trade, which it is conjectured would benefit the proposed line of rail.

As far as I was able to ascertain, only one-fifth of the products of Sz-chuan are suitable for foreign exchange, whilst the remainder are used

Digitized by Google

for native consumption, and are most saleable in the east of China, to which the Yangtsze river affords a comparatively rapid and safe transit, both for products and a return cargo of foreign manufactures.

Having thus stated an opinion as to the extent, and our present want of knowledge of the country likely to be opened up by the development of a route to Western China, I will nevertheless venture to express a hope that at some future time we may possess such reliable information as will warrant the investment of a moderate-sized capital in the Rangoon and Yunnan Railway Company.

In the meantime it appears to me that the most practicable way of establishing a trade route is to penetrate Yunnan, and gain such statistical knowledge of the country, its population, products, and capabilities of sustaining a large trade, as will justify us in asking the assistance and protection of the Indian Government; but I would dismiss the idea of pressing that Government to send expeditions, which must necessarily be burdened with political instructions and responsibilities, as well as a parade requisite to uphold the dignity of the Sovereign, and thereby occasion a lavish expenditure of money, customary when travelling officially amongst Eastern tribes, but nevertheless fatal to the true interests of commerce.

In conclusion, I would assure you that I shall endeavour to find out what are the requirements of Yunnan, and also the best mode of supplying them, when it will be for you to select whatever route is the safest and most convenient; Government, I feel sure, will protect us as merchants in the honest pursuit of trade, and should that trade become a source of national wealth, we can invite the nation, with some show of reason, to invest its capital in railways or tramways, no matter what the route, so that it be the most profitable.

JAPANESE COMMERCE AND FINANCE.

(STOCK EXCHANGE EXPRESS.)

There is no doubt that a new Japanese Loan is intended, and the abundant and interesting information about Japan as it is, and as its best friends are trying to make it, will enable financiers, no less than merchants and diplomatists, to become familiar with the real life and prospects of that ever-surprising country. In this market we have already had some experience of the financial aptitude of the Japanese. In 1870 a loan for £1,000,000 for railway purposes, bearing 9 per cent. interest, was successfully brought out in London at the price of 98, and it is now quoted at 110 to 112. The foreign finances of Japan are under the control of the Oriental Bank, evidently in all respects most desirable, that institution having the greatest facilities for such duties, as an English bank, with branches in Japan and elsewhere in the East. The object of the loan was the construction of railways from Yedo to Hiogo, from Yedo to Yokohama, and from Osaka to Tsurnga, and according to reliable accounts the works are being constructed with expedition and efficiency. Whatever new loans are required will certainly bear a smaller rate of interest, probably eight per cent. Their object may be either the consolidation of the miscellaneous forms of indebtedness which have for ages prevailed in Japan, or the prosecution of public works. Both are objects deserving and requiring attention, and they may fitly be assisted by the aid of foreign financial operations. As to public works, a great deal has been done during the past three years. Lighthouses, harbours, and dockyards render the coast safe, and afford facilities for the protection and repair of vessels from all parts of the world. Inland rivers are being banked and made navigable, new roads are being made, the railway from Yedo to Yokohama is open, and telegraphs are being rapidly laid to every important part of the Empire.

The finances of Japan are in good order, and though in many respects they are backward as compared with those of some European nations, they are so far deserving imitation by many more advanced countries that the revenue exceeds the expenditure. The budget for this year 1872 shows receipts £12,229,581, and expenditure £11,420,385, leaving a surplus of £809,146. The method of taxation is, however, crude. Rice, the main food of the people, is taxed, for the reason that it is easily collected. Inasmuch, however, as luxuries and not the bare necessities of life should bear the main burden of taxation, we rejoice that the Government is considering the means of substituting some other duty for that on rice. The public debt of Japan is larger than might be expected. As much as £15,204,000 is represented by the paper currency. £10,412,000 is due to Japanese subjects for loans obtained by local governments and other authorities. The balances due to foreign creditors include the loan of £1,000,000 raised in London in 1870.

The population of Japan is 32,866,161, and its foreign trade is very considerable, and is rapidly growing. So recently as 1859 the trade of Japan with the United Kingdom was not equal to £100,000 a year, while it has since advanced to two millions. The people are quick to learn, industrious and frugal. They easily acquire foreign arts, of which an example is that they built their first steamboat and its engine solely by a description in a Dutch book, while in metal-working and in "japanning," and in the manufacture of porcelain and silk crape, they still excel all other nations. They are now practising, with increasing success, the making of window glass, and they are cultivating the grape vine and brewing beer. As regards agriculture, there is not much for the Japanese to learn, except the use of machinery. They are great economists in tilling the soil, using every scrap of land, and stimulating production by what is described as ably-organised irrigation. Rice is the main product, but tea is becoming a very important branch of industry, every season seeing the extension of the tea fields, while the Japanese leaf is esteemed in the European tea market. Silk and silkworms' eggs, beans, peas, and many minor crops are largely grown. The forests of Japan produce many trees of commercial value, and gardening seems a native art, and is carried to the most delightful perfection. The mineral resources of the country are very rich, but as yet few mines are opened. It is, however, assumed that before very long the Japanese will be able to produce all the hardware they now take of us. Pearls and corals are found round the coast but, no precious stones. The efforts of the governing body in Japan, their enlightenment, activity, and the aptness of the people justify the highest expectations of the future of Japan.

THE FAILURE OF MESSRS. GLEDSTANES AND CO. MEETING OF THE CREDITORS.

The first general meeting of the creditors of Messrs. Gledstanes and Co. was held on the 17th inst., Mr. J. H. GWYTHER, manager of the Chartered Bank of India, Australia, and China, in the chair. The following approximate statement of affairs was submitted to the meeting :—

DR.

To unsecured creditors :			
Holders of acceptances and marginal drafts (a*) ...	...£390,503 9 4		
Depositors	166,954 14 2		
Sundries...	1,303 10 9		
Amounts under £10	28 3 8		
			£558,789 17 11
Creditors fully secured ...	...£939,532 1 7		
Estimated value of securities	...1,005,684 19 2		
Surplus to contra	£66,152 17 7		
Creditors partly secured	£52,014 4 7		
Less estimated value of securities	27,833 12 1		
			24,180 12 6
Other liabilities (a*)	£53,985 12 5		
Amount expected to rank on this estate ...			6,395 0 0
Creditors for rent, rates, taxes, salaries, &c.	£439 9 0		
(Payable in full, see contra.)			" " "
Liabilities on bills receivable discounted	...£117,473 16 2		
Amount expected to rank against this estate for dividend			" " "
			£589,365 10 5

(a*) Certain of these creditors claim to be entitled to the assets on the other side, marked (a*), it being alleged by them that the bills they hold were drawn against the same.

CR.

By Debtors :			
Good			£14,044 13 10
Doubtful	£223,997 15 9		
No reliable estimate can at present be formed of the value of these debts.			
Cash in hand...			512 16 11
Bills receivable			1,660 19 7
Furniture, fittings, &c.—estimated			200 0 0
Property—estimated			34,720 6 11
Surplus from securities in the hands of creditors fully secured per contra (a*)			66,152 17 7
Remittances or consignments advised by telegraph (a*)			63,750 0 0
Estimated surplus from the separate estates of the partners:			
W. Wallace	£10,960 0 0		
W. E. Gledstanes ...	2,042 0 7		
			13,002 0 7
Subject to reduction in respect of the claims of certain creditors who may elect to rank against separate estates,			
			£194,043 15 5
Deduct :			
Creditors for rent, salaries, &c., payable in full			439 9 0
			£193,604 6 5

The notice convening the meeting having been read, Mr. R. P. HARDING commenced by reading through, and commenting on, an approximate statement of the affairs of this company on the 26th August last. He pointed out, in the first place, that the list of "unsecured creditors" comprised three classes, the first being holders of acceptances and marginal drafts. Certain of those creditors—the Indian banks, for instance—claimed to have a right to stop certain goods coming over here. That was a question which would have to be decided elsewhere. The two other classes consisted of "depositors" and "sundries," which, with the first item, made a total, under the head of "unsecured creditors," of £558,789. The next item, "creditors secured in full," amounted to £939,532; against which must be placed the estimated value of securities, £1,005,684. With regard to those securities, they consisted in some instances of bills of lading attached to a draft on the firm, and, in other cases, on goods consigned abroad to holders of the bills having a lien on those goods. In respect to the "creditors partly secured," they were of a similar class—the securities in regard to this item being uncertain. The other liabilities were in respect to acceptances and endorsements amounting to £53,985, but of which sum only £6,395 was expected to rank on this estate. The following item was "liabilities on bills receivable," discounted, £117,473. Of this, however, they had no reason to believe any amount would come against the estate. The total liabilities amounted, therefore, to £589,365. On the other side of the statement there were debtors to the estate, which they had reason to believe would produce £14,044. The amount of doubtful debts was £223,997, but in regard to that no reliable estimate could at present be formed of those debts. The amount was chiefly made up by claims on Messrs. Shand, Fairlie, and Co., of Calcutta; Messrs. Hogg and Co., whose debt was possibly under £5,000; Messrs. Leggatt and Co.,

Digitized by Google

of Bombay; and Messrs. Chapman, King, and Co., of Shanghai; and, until the account between the estate and those firms had been adjusted, they could not say what amount could be obtained from those houses. Having briefly mentioned the following items:—"Cash in hand, £512;" "bills receivable, £1,660;" and "furniture, fittings, &c., £200;" Mr. Harding said, in reference to the item "property, estimated at £34,720," that it consisted of various amounts, the largest item being a tea estate at Chittagong, valued at £12,000; some shares in another tea estate, valued at £3,500; another item under a similar head amounted to £5,000; another estate in Demerara, valued at £5,600; a few shares in the Estate Company (Limited); an estate in Penang estimated at £2,560; and the lease of the premises in Austin-friars. Then there was the surplus from the securities in the hands of creditors fully secured, amounting to £66,152. That amount was, of course, subject to increase or decrease, according to the state of the market when the goods were sold. The next item was, "remittances or consignments advised by telegraph £63,750." That was produce that was now coming forward. In regard to this item, however, there were questions which would also have to be decided elsewhere. The estimated surplus for separate estates of the partners—namely, W. Wallace £10,960, and W. E. Gledstanes £2,042, total £13,002. In respect to "claims on the estates of deceased partners," an investigation into this matter had led him to the conclusion that the sum of £5,600 had been paid to the representatives of Mr. King in excess of any interest he had in the concern at the time of his death. There might also be possibly a claim made against the estate of the late Mr. Gledstanes, who had died in 1865. The total assets of the estates amounted, therefore, according to this statement, to £194,043, from which must be deducted the amount due on account of rent, salaries, &c., payable in full, leaving a balance of £193,604, against liabilities, as previously stated, amounting to £589,365. Those figures showed something like 6s. 8d. in the pound; but he would not have the meeting suppose it was probable such an amount would be divided. The investigation which he had considered it necessary to make had put him in possession of the following information:—On the 31st Dec. 1867, there appeared in the books of the firm as capital the sum of £75,000, in round figures, together with a reserve fund of £240,000. Since then, by the realisation of shipments and closing of accounts, &c., which had been continued from 1867, a result was shown by which it became evident that at the time in question there was no capital at all in the concern. He did not mean to suggest that the partners were aware of this state of things, because the books did not show it. At the time when he commenced his investigation of the firm's affairs — namely, 1867 — there was an amount due from Messrs. Hogg and Co. of £140,000, the whole of which had been written off, with a further sum of £35,000 at a later date. The other amounts which made up the deficiency shown were the results of various other transactions. It was now apparent that at the close of 1867, had the affairs of the firm been wound up, a deficiency would have been reported to the extent of about £120,000; that deficiency had been increased since that time by losses on consignments, losses on shipments, and bad debts, while there were also the losses, not yet determined, arising from transactions with Chapman, King, and Co., and Hogg and Co., unless those firms were enabled to carry out their engagements, and satisfy all their creditors. The sum of £2,900 had been the total amount drawn out by the three partners since 1867.

In reply to questions, it was stated that Mr. Wallace had joined the company in 1841, Mr. Buxton in 1851, and Mr. W. Gledstanes in 1857. At that latter date Messrs. Gledstanes, sen., and King were alive, the former of whom had subsequently died in 1865, the latter in 1867. He did not know the capital brought in by the partners.

After a slight discussion in respect to the rumours afloat, to the effect that transactions had taken place immediately subsequent to the firm stopping on the 22nd August last, but which were distinctly refuted by Mr. Harding,

Mr. THOMSON, chairman of the Agra Bank, proceeded to animadvert in strong terms on the state of affairs disclosed, and complained that for years the firm must have lived solely on credit. Its borrowed capital had been not much short of £600,000, the mode adopted for raising it being to send six months' bills for disposal in India, where implicit confidence was felt in the London firm, and hence there was no difficulty in disposing of these bills. The firm had not stopped payment at a proper time, but had waited until it had actually run dry. In all his experience he had never seen the affairs of a firm of such magnitude in such a state before a meeting of creditors. They had been told that the cause of the failure was bad markets; but surely, even if markets were bad, that was no reason for carrying on so hazardous a trade. He believed the real cause of the failure to have been the wonderful credit of the firm, which enabled the partners to accomplish their own ruin, and to damage the property of other people. It was quite clear that they perfectly knew the state of their affairs, and that the system of bill discounting was done with the knowledge and connivance of their agents in the East. He found in a letter dated the 4th January, 1872, the following passage:—"In deference to your wishes, and to facilitate the working of the account, we freely and willingly place as large a quantity of your paper in circulation as circumstances will permit." Was it not disgraceful in gentlemen of such standing to allow bills to the amount of £390,000 to be drawn in this way, which they knew they could not pay? One of the partners was a director of the Bank of England, and another of the London and Westminster Bank. A third held a similar post in one of the oldest of our insurance companies; and they lived on their credit until they could do so no longer, when they left those who had trusted them deprived of their property, and almost without a remedy. His opinion was that the proper course would be to put the estate into bankruptcy. If, however, they elected for liquidation, he trusted that economy would be attended to.

Mr. RAWLINS, as representing a large body of unsecured creditors, deprecated bankruptcy as leading to delay and expense, and supported trusteeship and liquidation. He was quite willing that Mr. Harding should be appointed trustee. He moved the following resolutions collectively:—

"1st. That the firm of William Wallace, Travers Buxton, and William Evans Gledstanes shall be liquidated by arrangement, and not in bankruptcy."

"2nd. That Robert Palmer Harding, of 8, Old Jewry, in the City of London, public accountant, be, and he is hereby, appointed trustee."

"3rd. That David Trail Robertson, general manager of the Chartered Mercantile Bank of India, London and China; and Richard James Ashton, of the firm of Ashton and Co., be, and they are hereby, appointed a Committee of Inspection."

"4th. That the trustee do receive such remuneration for his services as shall be determined by the Committee of Inspection."

"5th. That Messrs. Clarke and Son and Rawlins, of 60, Gresham-house, Old Broad-street, London, be entrusted with the registration of this special resolution."

These, having been seconded, were put to the meeting, and carried and the proceedings were closed.]

Monetary and Commercial.

At the meeting of the creditors of Messrs. Gledstanes and Co. a balance-sheet was presented by Mr. R. P. Harding, the accountant, showing liabilities to the extent of £1,722,235, of which £589,365 is expected to rank upon the estate, against assets representing £193,604, or about 6s. 8d. in the pound. It was explained, however, that these figures are subject to various contingencies, and the impression was very general that nothing like 6s. 8d. will be distributed amongst the unsecured creditors. The books of the firm, it was added, showed a deficiency of about £120,000 at the end of 1867, and this has since been largely increased by losses on consignments, bad debts, &c. Stock had been taken from time to time, but no losses were written off. These and other explanations were received with strong expressions of indignation, and it was proposed that, with a view to a thorough investigation, the estate should be wound up in bankruptcy. It was eventually decided, however, to liquidate by arrangement, and Mr. Harding was appointed trustee, with a committee of inspection. A full report of the meeting and the statement of accounts which was presented are given above. By a singular informality no list was taken of the creditors who attended the meeting, but the Registrar of the Bankruptcy Court has given leave to compile one from such data as might be available.

We are informed that the statement made in the Bankruptcy Court last week, to the effect that Messrs. Gledstanes and Co. were creditors of the firm of Leggatt and Co. for the sum of £65,000, is incorrect. The present firm of Messrs. Leggatt and Co. were not, at the time of their recent suspension, indebted in any way to the first-named firm.

At an adjourned general court of the Bank of England, the payment of a dividend of 5 per cent. for the half-year was formally confirmed, and Mr. Henry Hulse Berens was elected a director, in the room of Mr. Travers Buxton, of Gledstanes and Co.

In anticipation of the meeting to be held on the 9th proximo, the report of the Delhi and London Bank (Limited) has been issued. The net profit for the half-year amounted to £9,465, making, with the balance brought forward, a total of £9,798 at credit of profit and loss account. It is proposed to pay a dividend at the rate of 4 per cent. per annum.

Subjoined is an account of the quantities of the principal articles of imported merchandise subject to Custom's duties remaining in the bonded warehouses of the United Kingdom on the 31st of August, 1872, compared with the quantities in warehouse on the 31st of August, 1870 and 1871:—

	1870.	1871.	1872.
Coffee (lbs.)	61,270,264 ..	72,122,677 ..	67,551,041
Sugar, unrefined (cwts.) ..	3,345,701 ..	3,028,880 ..	2,913,552
Tea, (lbs.)	75,728,705 ..	80,641,244 ..	90,554,575
Tobacco, (lbs.)	42,926,325 ..	69,959,947 ..	59,503,238

These figures show that, compared with the corresponding date of last year, the stocks now held are larger in the case of only four out of the 12 articles named, while those of the remaining 8 exhibit a diminution. The instances of increase are cocoa 32 per cent., currants 59 per cent., tea, 12 per cent., and wine 2 per cent. The instances of decrease are coffee 6 per cent., raisins 39 per cent., rum 5 per cent., brandy 6 per cent., sugar (refined) 16 per cent., unrefined 4 per cent., molasses 40 per cent., and tobacco 15 per cent.

There having been an increased demand for Bar Silver for the Continent, the price improved to 60½d. per oz. standard; but as the orders were supplied the rate receded slightly, and may now be quoted at 60⅜d. per oz. standard. We have received about £60,000 from New York during the week. Mexican Dollars continue in good demand, the amounts to hand have been but small, and the prices remain as last quoted, viz., 62½d. and 60d. per oz. for the old and new coinages respectively.

Digitized by Google

ARTICLES OF IMPORT.

—o—

TEA.

The market has undergone no change; merchants continue to give support to prices, but the buyers act with caution, merely taking for the supply of their immediate wants. The export trade to the Continent is limited, but for New York a fair business has been done in Canton and country Greens, for immediate shipment, so as to arrive there before Oct. 1, when a 10 per cent. duty is to be levied on indirect imports. The public sales have comprised 10,988 packages, chiefly new Green Teas, from Shanghai, and Scented Teas and Green Teas, from Canton, all being sold without reserve. The deliveries for the week amount to 3,373,000 lbs., against 3,253,500 lbs. last year.

Black.—Red-leaf kinds, old season's under 11d., show no change; the good common and useful grades at 1s. 0½d. to 1s. 1½d. are in request at firmer prices, but superior grades are difficult to move at any advance on these rates. Fair to medium Kaisows, new crop, market very irregular and business limited; Choice Teas scarce and easy of sale at extreme prices. Pakling: Small sales at easier rates. Taysan leaf: Good demand for fair to medium at 11½d. to 1s. 2d., excellent value being obtainable at the latter figure. Black leaf: Low and common Teas of old import sell slowly at 7d. to 9d., but there is more demand for useful Teas about 1s. 2d. per lb. The steamers Ulysses and Nestor bring a supply of new season's, chiefly flavoury Hohow kind, and strong rough Teas, with a tarry smack, which are selling slowly from 1s. 4d. to 1s. 6d. per lb., good medium to finest grades are firmly held, and anything with decided character is very marketable. Souchongs and Oolongs unaltered; the chief demand being for finest qualities. Scented Teas: Canton kinds are steady, but Foochow make is tending lower; business in either class is unimportant. *Green*: About 10,000 packages, chiefly ex Ulysess, were offered the past week, which has led to some derangement in prices; at public sale on the 16th values gave way about 2d. per lb. on the rates current the previous week, but at auction the following day this decline was nearly recovered, though the market has since gone flat again. We estimate the decline during the fortnight at 1d. to 2d. per lb., most noticeable in the lower grades. No. 1 Ping Suey Gunpowder, in boxes, selling at 3s. 3d. to 3s. 7d. per lb. No. 1 Young Hyson at 2s. 5d. to 2s. 7d. per lb. Canton kinds were in some request for export, without change in price. Uncoloured leaf, good to fine Teas, also Pekoes, in fair request, but few on offer.

SILK.

The market has been dull, and prices of most descriptions have slightly given way. China Silk is difficult of sale, purchases, owing chiefly to the belief in lower prices, being restricted to actual requirements. Japan Silk, with the exception of good fine Mibash, is in little or no demand. Deliveries, 1st to 18th inclusive:—China, 1,674 bales; Canton, 439 bales; Japan, 364 bales; total, 2,477 bales.

LONDON QUOTATIONS.—SEPT. 20.

CHINA.	
Tsatlee, No. 1	31s. 0d. to 31s. 6d.

Hatchoji	20s. 0d. to 24s. 0d.

COFFEE.

The result of the Dutch sale has been more favourable than was anticipated, and since its occurrence Plantation Ceylon has been in improved demand at a further slight advance. The market otherwise shows no alteration. The latest prices paid for Plantation Ceylon have been triage and ordinary, 66s. to 74s.; small, 75s. to 77s. 6d.; low middling, 77s. 6d. to 79s.; middling, 80s. to 81s.; peaberry, 96s. 6d. to 100s.

The landings last week were 670 tons less than last year, the deliveries only 150 tons less, and the stock shows an enlarged deficiency of 2,800 tons. The quantity of Ceylon Coffee afloat for Great Britain is estimated as follows:—Plantation, 59,277 cwt., against 117,731 cwt. at the corresponding date of 1871; Native, 14,862 cwt., against 17,960 cwt. The quantity of Coffee landed in the thirty-seven weeks ended Sept. 14, 1872, was, of Ceylon, 25,473 tons, against 30,413 tons during the corresponding period of 1871; of all descriptions, 48,765 tons, against 55,780 tons. The quantity entered for home consumption was, of Ceylon, 7,645 tons, against 8,043 tons; of all descriptions, 13,461 tons, against 14,159 tons. The quantity exported was, of Ceylon, 17,552 tons, against 23,404 tons; of all descriptions, 33,937 tons, against 42,621 tons. The stock on Sept. 14, was, of Ceylon, 9,209 tons, against 12,751 tons; of all descriptions, 20,981 tons, against 23,809 tons.

The Dutch Trading Company's September sale was held on the 18th inst., when 81,500 bags Java, &c., were offered, and with a better demand than has been experienced privately; the whole was sold, prices were about ½ cent below the valuations, but nearly 1 cent above recent private sales. Good ordinary Java sold at 44¾c. to 45c., against 46¾c. to 47c. at the August sale.

SUGAR.

A somewhat improved tone has prevailed during the past week, and moderate supplies placed upon offer have all been taken at steady prices. The sales of East India have been as follows:—

Penang.—In auction of 743 bags offered only a small part sold, good brown (duty 4s.) at 27s., low yellow (duty 4s. 9d.) at 28s.; 1,560 bags Native sold were offered and bought in at 23s. Privately 1,400 bags dry date have been quitted at 23s.; also 400 bags soft at 28s.

Manila.—Privately 11,000 bags clayed have been sold at 24s. 6d. to 25s. 6d., and 3,000 bags Taal unclayed at 21s.

Java, &c.—In auction 114 bags good yellow (duty 5s. 3d.) have been sold at 31s. 6d. to 32s., and 5,000 bags (250 tons) soft brown China at 29s.

The deliveries for last week were within 450 tons of last year, but as the landings were heavy, exceeding those of 1871 by 3,150 tons, the stock is again increased, and the deficiency reduced to 3,500 tons. Stock, Sept. 7, 65,959 tons, against 73,030 tons; Sept. 14, 68,751 tons, against 72,257 tons. The quantity of Sugar landed in the thirty-seven weeks ended Sept. 14, 1872, was, of Penang, 3,397 tons, against 974 tons in the corresponding period of 1871; of Manila, Java, and China, 17,892 tons, against 16,399 tons; the quantity entered for home consumption was, of Penang, 1,761 tons, against 2,952 tons; of Manila, Java, and China, 19,560 tons, against 22,942 tons. The quantity exported was, of Penang, 85 tons, against 184 tons; of Manila, Java, and China, 1,120 tons, against 1,065 tons. The stock on Sept. 14, was, of Penang, 1,987 tons, against 814 tons; of Manila, Java, and China, 10,470 tons, against 20,186 tons.

CAMPHOR.—*China* is firmer, and private sales have been effected to the extent of about 1,500 cases at £3 15s. per cwt. *Japan* continues scarce, and there have been no transactions.

CARDAMOMS.—The sale is reported of one case Ceylon at 4s. 3d. per lb.

CHINA GRASS.—The market is at a complete standstill, and not a single transaction has been effected during the interval.

COCOA-NUT OIL.—The market is steady; Ceylon has been quitted at £35 10s. to £36 10s. for fair to good, and Cochin at £36 5s. to £38 5s. per ton for fair to fine quality.

COPRA continues quiet.

COIR GOODS are in moderate demand at last-quoted rates, and a fair amount of business has been done.

CUBEBS.—The market is still dull, and prices rule lower, 141 bags having been sold at 19s. 6d. to 22s.

CUTCH.—The demand remains inactive, and if sales were pressed lower rates would result. At auction 893 cases Singapore were bought in at 22s. to 25s.; 341 boxes Penang sold at 23s. for good; privately 1,000 bags have been sold at 22s. to 23s. partly damaged, and a little fine Elephant mark at 25s. per cwt.

DRAGON'S-BLOOD.—No demand; 7 cases offered at auction were retired.

EBONY.—Ceylon firm, but quiet.

ESSENTIAL OILS.—*Aniseed* has been held for very high prices, and further small sales are reported at 13s. per lb., but for delivery this month, large parcels are offering at 11s. 6d. *Cassia* is firmly held, but little has been done. *Nutmegs* unchanged, 6 cases retired. *Cinnamon*: Wanted, very little fine in stock; 50 cases at auction retired. *Citronelle*: In steady request; 37 cases at auction sold, native at 2¾d. to 2¾d. per oz. *Lemon Grass* steady; 3 cases at auction brought 5d.

GALANGAL ROOT.—Steady, with small sales at previous value, viz., 15s. to 16s. per cwt.

GALLS.—*China* are firm, with fair business doing privately at £2 17s. to £2 17s. 6d. per cwt.; at auction 20 cases have been sold at the higher quotation. *Japan*: No transactions.

GAMBIER has met very litte inquiry, and both on the spot and for arrival prices must be quoted in buyers' favour. At auction 530 bales block were taken in at 24s. 6d.; and 2,500 bales fine pressed Cubes at 27s. to 30s. per cwt.; privately 500 to 600 bales block have been sold on the spot at 24s. 6d., for arrival 22s. 6d. to 23s. 6d. the nearest quotations.

GUMS.—*Benjamin*: Siam without change; Sumatra continues steady, and of 210 cases brought to auction, half sold at £7 7s. 6d. to £7 12s. 6d. for middling seconds; and 70s. to 77s. 6d. for good 3rds; and 45s. to 46s. inferior. *Copal*: Cheaper; of 952 cases at public sale nearly the whole sold; fine bright scraped 37s. 6d. to 38s.; good, partly scraped, part rather dark 33s. *Damar* very dull, and 118 cases retired. *Gamboge* steady; 2 cases sold at £14 2s. 6d. for good bright pipe part run.

GUTTA-PERCHA.—Market very dull; there have been no transactions during the interval.

HEMP.—The market for Manila has continued steady, and a good trade has been done at fully former prices, viz., £47 10s. to £48 10s. for fair to good roping; at auction 319 bales brought £48 10s. for good roping.

HIDES.—There was less demand for East India Kips at the auctions yesterday, and a little over two-thirds of the quantity offered were disposed of. Singapore and Penang sold at about late rates. Large supplies of Buffalo were offered, but there was little demand for any description, and sales were effected slowly at previous rates.

INDIA-RUBBER.—The market continues very dull, and no business has been done.

ISINGLASS.—The auctions have embraced 52 packages, of which half was sold; pipe, bright pale at 3s. 7d. to 3s. 10d.; more mixed, 3s. 2d. to 3s. 3d.; small and part rough, mixed, 1s. 9d. to 2s.; pickings, 1s. 5d. to 1s. 6d.; cake, good bright clean strong, 2s. 3d. to 2s. 4d.; ordinary, 1s. 5d.

JAPAN WAX.—More inquiry has been manifested than of late, and a considerable business has been done up to £4 10s. for good quality. At the close holders are asking still higher figures.

MUSK has slightly declined; 43 caddies Tonquin at auction were all sold—good to fine selected well-shaped pods, 32s. 6d. to 34s. 6d.; rough and bally fair to good, 19s. to 22s.; pickings very wet, 20s. 6d. to 22s. 6d. per oz.

Digitized by Google

PEPPER.—*Black* is steady but quiet at previous value. At public sales supplies of Singapore and of Siam were all retired. Of Penang a small portion only sold at 6⅞d. to 6¼d. per lb. *White* very firmly held, and a considerable trade done up to 1s. 2⅝d. for fair. At auction 768 bags offered and the bulk sold—Singapore at 1s. 2½d. to 1s. 2¾d. (a few lots 1s. 3d.) for fair to fine, and Penang good bold at 1s. 2d.

PLUMBAGO.—Ceylon is firm and scarce; no transactions have been effected.

RHUBARB.—The market for China is steady, and the stock of new import is firmly held; of 112 cases at auction, half sold; well trimmed good pinky selected bold root at 4s. 1d.; ditto paler fracture 3s.; bright coated, small, and medium 2s. 3d.; high dried 1s. 2d. to 1s. 4d. per lb.

RATTANS.—An active demand has been shown, and the market is firm at an advance. At auction 4,190 bundles, ex Franz Schubert and Vanguard, realised from £25 to £30 per ton. The parcels were not carefully selected and packed, or they would have fetched better prices.

RICE.—The demand has continued strong both on the spot and for arrival, and a very large business has been transacted. Bengal sorts on the spot are about 3d. dearer, distant cargoes of soft grain also bringing some advance. On the spot sales comprise about 50,000 bags; old Necransie 9s., Rangoon 9s. to 10s. 1½d., Madras 10s. 3d., Askoolie 10s. 3d. to 11s., and low to very fine white Bengal at 10s. 1½d. to 14s. 4½d. per cwt. Afloat, 800 tons Rangoon, August sailing at 10s. 6d., Continental terms, 1,420 tons do. (off coast) at 10s. 7½d., Liverpool quay terms, 900 tons do, June sailing, at 10s. 6d. Continental terms, 1,200 tons do., July sailing, at 10s. 6¾d., Continental terms, 1,800 tons do., July sailing, at 10s. 6d., Continental terms; 2,400 tons do. at 10s. 7½d.; 860 tons Necransie (broken), August sailing, at 8s. 4½d., Continental terms, without guarantee, 440 tons do., April sailing, at 9s. 6d. Continental terms, 1,000 tons do., April sailing, at 9s. 7½d., Continental terms, 1,000 tons do., July sailing, at 9s. 9d., Continental terms; 440 tons do. (off coast), at 9s. 4½d., Continental terms; 650 tons Dacca, August-September, at 10s. 3d. to 10s. 6d., ex quay; and 150 tons good white at 12s. 1½d., quay terms.

SAGO.—The market is steady, but prices continue to rule low; 760 bags have been sold, small fair to good at 16s. 6d. to 17s., medium 19s. to 19s. 6d. *Flour* is steady, but there is only a small trade doing, 905 bags retired.

SHELLS.—There has been no change since the periodical sales reported on in our last issue.

SAPANWOOD.—*Manila* and *Siam* continue dull. *Ceylon* is quiet but firm.

STAR ANISEEDS.—In short supply and good demand.

SOY.—Slightly lower; of 170 casks China offered in public sale about one-fourth was taken at the sale and afterwards at 1s. 10d. per gallon.

STICKLAC.—Has been in fair demand without change in price; privately about 500 boxes, which had been previously bought in at public sales, have been placed at the previous value, viz., £4 7s. 6d. for good quality, while 27 cases at auction sold at 85s. to 85s. 6d. per cwt. for good, slightly blocky.

SPICES.—*Cinnamon*: There is a moderate business doing at a shade advance on the rates obtained in the last public sale. *Cassia Lignea*: Market steady; of 160 cases offered, only a few sold at 92s. for very good unworked; private sales of good unworked are reported at 90s. to 91s. *Buds* firm. *Cloves*: Penang firm, but little business done; 2 cases retired. *Nutmegs*: Steady, and the larger nuts dearer, of 72 cases at auction a few sold, 64's at 4s. 2d.; (1 lot) 75's at 3s. 6d.; 101's 3s. to 3s. 1d. *Mace*: Steady, but quiet. Of 20 cases offered, part sold up to 4s. 8d. for fine.

TAPIOCA.—Market rather quiet; of 915 bags Singapore offered at public sale about half sold at 2¼d. to 2½d. per lb. for fair to very good bright; 324 bags Pearl sold at 2¾s. to 28s. for medium to fine small bright. *Flour* firm; 506 bags brought 1⅞d. to 2⅛d. per lb.

TIN.—Straits has declined to £149, but there is very little doing at that price, holders for the most part being firm at £150. Banca is quoted £163, and Billiton £152 per ton.

ARTICLES OF EXPORT.

—o—

MANCHESTER GOODS.

There has been no improvement in demand here, and the tendency of prices has been in favour of buyers, both for Yarns and Goods. Producers have shown more anxiety to make progress with sales, but buyers still hold aloof. Prices are, however, nearing a point that will probably induce a revival in demand, and spinners and manufacturers abstain from making more than fractional concessions on the now quoted rates.

WOOLLEN AND WORSTED GOODS.

The current quotations in the Leeds market for Woollens and Worsteds rule as follows:—

Spanish Stripes, 62 in., 19 yards, Elephant Chop, 3s. 6½d. per yard for scarlet; Long Ells, 30/31 in., 24 yards, Lion Chop, 34s. 6d. per piece for scarlet; Camlets, best SS, 30/31 in., 58 yards, Elephant Chop, 80s. per piece for scarlet; Lastings, 31 in., 30/31 yards, Lion Chop, 72s. per piece for gentian; Brocades, 31 in., 29 yards, Half Moon Chop, 25s. 6d. per piece for scarlet.

METALS.

IRON.—Welsh: Rails, £11 10s. to £12 10s. Bars, £12 to £13 Staffordshire Best: Bars, £16 to £16 10s.; Nail Rods, £15 10s. to £16 10s.; Hoops, £17 to £17 10s.; Sheets, £20 to £24; Scotch Pig, No. 1, £6 10s. to £8 5s.; Swedes, Bars, Hammered, £16 10s. to £17. Swedes, Steel in kegs, ½ and ⅝ in., £18.

YELLOW METAL.—Sheets, 4 by 4 ft., 8¾d. to 9½d.; Sheathing and Rods, 9d. to 9½d. per lb.

TIN.—English Refined, £160. Tin Plates: Charcoal I C, per box, 43s. to 47s.; Coke, 40s. to 43s.

LEAD.—W.B., nominal; do., other brands, £20 10s. to £20 12s. 6d.; Spanish, soft, ex ship, £19 15s. to £20; Sheet, £21 10s.; Shot (kegs extra), £23 10s.; White, do., £27 10s.; Red do., £23 5s.

SPELTER.—Silesian, £23; English, smelted from ores, £23 10s.

QUICKSILVER.—In bottles of 75 lbs. each, £13.

Messrs. French and Smith's Circular says:—Iron, since the rise in the value of money, has become rather easier, excepting for best brands. Copper is lower than a week since, further outside speculators having failed to meet their engagements. Chili has been sold as low as £85, but is now rather firmer, £86 being offered. Lead very firm. Tin Plates not so much in demand. Spelter firm. Quicksilver has been advanced 10s. per bottle during the past week.

NEW YORK MARKET REPORT.—SEPT. 7.

—o—

TEA.

Japan is weaker, and has a downward tendency. Black is also weak, and Green steady at our quotations, the market being in buyers' favour. The following are the current rates:—Hyson: common to fair, 45c. to 52c.; superior to fine, 55c. to 68c.; extra fine to finest, 70c. to 95c. Young Hyson: Canton-made, nominal; common to fair, 38c. to 45c.; superior to fine, 52c. to 75c.; extra fine to finest, 80c. to $1.15. Gunpowder and Imperial: Canton-made, nominal; common to fair, 55c. to 65c.; superior to fine, 75c. to 92c.; extra fine to finest, 95c. to $1.40. Hyson Skin and Twankay: Canton-made, nominal; common to fair, 28c. to 31c.; superior to fine, 33c. to 35c.; extra fine to finest, 36c. to 40c. Uncoloured Japan: common to fair, 40c. to 46c.; superior to fine, 50c. to 65c.; extra fine to finest, 70c. to $1.05. Oolong: common to fair, 35c. to 40c.; superior to fine, 45c. to 62c.; extra fine to finest, 68c. to $1.05. Souchong and Congou: common to fair, 25c. to 35c.; superior to fine, 40c. to 57c.; extra fine to finest, 60c. to $1.05.

SILK.

There has been a slightly improved business, with a better demand from spinners, but in view of full stocks holders incline to some concession in prices. We quote:—China:—Tsatlee, usual reel, none; Taysaam, usual reel, No. 1, $8.12½ to 8.50; No. 2, $7.75 to 8; Tsatlee, re-reeled, $8.75 to 9.25; Taysaam, re-reeled, $7 to 8; Haining, re-reeled, $9 to 9.25; Canton, re-reeled No. 1, $6.75 to 7.25; Cotengown, Nos. 1 and 2, $7.50 to 8. Japan:—Maybash, $9.50; Oshu, $9.

COFFEE.—The market is dull for all descriptions, and a lower range of prices has been established. The business in East India has been of a jobbing character, and confined to the actual requirements of purchasers. No sales of large parcels are reported.

CAMPHOR.—China is quoted 18c. to 20c. gold in bond.

CHINA PRESERVED GINGER rules at $8 to 8.50 currency, duty (35 per cent. *ad val.*) paid.

ESSENTIAL OILS.—Aniseed is quoted $2.25 to 2.50 gold, and Cassia $1.60 gold, duty free.

GAMBIER is quoted at 4⅛c. to 4¾c. gold; market dull; stock light.

HEMP.—A somewhat more active tone has pervaded the market for Manila, and about 1,800 bales—chiefly per James Shepherd—have been quitted at 10½c. gold, 60 days' prompt, also 1,100 bales on private terms. At the close the market is firm at 10½c. to 10⅝c. gold.

	1872. Bales.	1871. Bales.	1870. Bales.
Manila Hemp imported into the United States from Jan. 1 to date	135,062	101,928	102,276
On the way to the United States from Manila, Aug. 31	32,888	29,764	30,962
Stock in importers' and speculators' hands in Boston, Aug. 31	6,264	600	11,500
Stock in importers' and speculators' hands in New York, Aug. 31	41,000	5,500	19,872

INDIGO.—A moderate amount of activity has been shown, and a fair business has been done at 85c. to $1.10 currency for Manila.

Digitized by Google

RICE.—Rangoon has been in fair demand, but has slightly declined in price, owing to being in heavy supply. The current rates are duty paid $6.87½ to 7.25 currency, in bond $3 gold. About 1,550 bags have changed hands during the week.

SPICES.—The buoyancy noted for some time past continues, and the jobbing trade is active and pretty well distributed. There has also been some movement in invoices, but the details have not transpired. Among other sales we notice 150 cases Mace, for export to London, at full prices; Singapore Pepper, in lots, 17¾ to 18 cents; Cloves, 22½; Nutmegs, 95 to 97½; Government, 95, all in gold.

SUGAR.—There is a good demand for Raw for refining purposes, the market being strong at an improvement in prices. The receipts are light, the stock gradually recedes, and, as holders continue to offer their stocks sparingly, especially the good and better grades, which are the kinds most wanted, prices are supported without difficulty, especially as the daily needs of buyers bring them constantly into the market. Holders in view of these facts and the probable light receipts for the remainder of the year are extremely firm. The only sale of East India has been 7,310 bags Manila, ex Surprise, on private terms.

TIN.—The market is depressed; Straits is quoted 33c. to 33⅜c., and Banca 40c. to 41c. gold.

PAULITA, Batavia to Falmouth, July 16, 21 S., 1 E.

FREIGHTS AND CHARTERS.

We have no alteration to report in outward freights, and current quotations are firmly maintained. Great delay still takes place in the loading of coal ships at the outports, and consequently business is much restricted. A good inquiry exists for vessels suitable for homeward cargoes.

Current Rates of Freight for Vessels on the Berth.

Per STEAMERS VIA SUEZ CANAL.—To Yokohama: 70s. meast. To Hiogo: 70s. meast. To Nagasaki: 90s. meast. To Shanghai: 40s. meast. To Hong Kong: 40s. meast. To Manila: 80s. meast. To Singapore and Penang: 40s. meast. To Sourabaya and Samarang: 70s. meast. To Batavia: 65s. meast. To Padang: 80s. meast. To Saigon: 100s. meast. To Galle: 40s. meast.

Per SAILING VESSELS.—To Yokohama: 40s. meast. To Shanghai: 45s. weight, 30s. meast. To Hong Kong: 25s. meast. To Singapore: 20s weight, 25s. meast. To Penang: 35s. weight or meast. To Ceylon: 30s. weight, 25s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—To Yokohama or Nagasaki: £42 10s. To Shanghai: £45. To Hong Kong: £33. To Singapore: £25 to £26. To Penang: £25. To Galle: £21. To Trincomalee: £22.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama or Nagasaki: 40s. to 42s. 6d. To Shanghai: 45s. To Hong Kong: 35s. To Manila: 27s. 6d. to 30s. To Singapore: 23s. 6d. to 25s. To Ceylon: 21s.

From Birkenhead, per ton.—To Shanghai: 35s. To Hong Kong: 27s. 6d. To Singapore, 21s. To Colombo: 15s. to 16s. To Galle: 17s.

Insurances.

By steamers via S.C., or sailing vessels, f.p.a.:—To Yokohama, steamer 35s., ship 40s.; to Shanghai, steamer 30s., ship 40s.; to Hong Kong, steamer 25s., ship 35s.; to Singapore, steamer 20s., ship 25s. to 27s. 6d.

CASUALTIES.

In our last issue we announced that the Isa (str.), from Galle, for Falmouth, had been posted at Lloyd's as a missing vessel; later telegraphic advices received from Aden, dated Sept. 15, state that the Peshawur (str.), had arrived there and reported that the Isa (str.) had been wrecked off Socotra, and her crew were on board H.M.S. Briton, Gardin, which vessel was spoken steering for Aden 13th.

Advices received at Rotterdam, Sept. 12, from Sunda, state that the Voorlichter, de Willegen, from Shields to Batavia, passed through the Straits, July 30, with her mainmast broken.

The Wells (str.), Stevens, from Colombo to Amsterdam, put into Malta, Sept. 9, to repair damage to her boiler, caused by defective staying; she would probably be detained there about a week.

MISCELLANEOUS.

At Mauritius, Aug. 12, Mary E. Ray, Laker, from Manila, and sailed, 14, for Liverpool; 13, Georges, Jego, from Cardiff, and sailed, 16, for Galle; 10, Calumet, Kezer, and sailed same day for Batavia; 11, Mary, Boulton, and sailed same day for Singapore.

The Glendarrock (str.), from Foochow, for London, about which some anxiety had been felt, put into Saigon Aug. 12 for coals, having run short through bad weather. She left on the 13th, and arrived at Galle 25th.

The master (Manson) of the Canaan, from Ilo Ilo, writes to contradict the statement that his vessel grounded going into Queenstown Harbour.

GLYCERINE
DE
TOILETTE.

(HEALTH.) **NEW PERFUMERY.** (BEAUTY.)

INVENTED BY

EUG. DEVERS, QUIMICO.

PATENTED S.G.D.G.

PREPARATIONS for the Toilet, and particularly Soaps; Powders, &c. for the Teeth; Toilet Washes, and Vinegars, have of late assumed an importance in proportion to the demand for them. Foremost amongst these is GLYCERINE, a remarkable unctuous substance, which softens the skin without greasing it; its valuable qualities were quickly recognised by the most eminent physicians. Experimented on by MM. Dumarquay and Sutom (See "Reports and Memoirs of the Biological Society, 1836," &c.).

GLYCERINE CREAM for the skin.
GLYCERINE TOILET WATER for baths and ablutions.
GLYCERINE ELIXIR for the mouth.
GLYCERINE POMADE against scurf.
GLYCERINE SOAP for chaps and chilblains.
GLYCERINE ANTIPELLICULAIRE to prevent the hair falling off.
DULCIFIED GLYCERINE CREAM SOAP for the beard.
PATE DENTIFRICE à la GLYCERINE for the teeth.

GELLÉ FRÈRES, 35, Rue d'Argout, 35,.

(ANCIENNE RUE DES VIEUX AUGUSTINS),

PARIS.

SUCCESS IN INDIA,

AND HOW TO ATTAIN IT.

EFFINGHAM WILSON, Royal Exchange.

The writer is evidently well acquainted with the East, and the information afforded by him is both useful and interesting.—*Daily News.*

The honest yet hopeful way in which practical information is communicated in these pages concerning actual life in India will awaken the dormant enterprise of young men of education and ability, whose prospects may be somewhat indifferent at home.—*Globe.*

A valuable little pamphlet.—*Morning Post.*

The author of this very sensible work appears quite at home in his subject.—*Financier.*

We leave the little book with much the same impression as would be derived from the conversation of an intelligent and observant man of the world.—*Bullionist.*

A real and practical knowledge has been brought to bear upon the subject.—*Money Market Review.*

The author of the above-named pamphlet formerly editor of the *Indian Examiner*, and since on the staff of daily and weekly journals in London, seeks a re-engagement as editor in China, Japan, or Ceylon. The advertiser has a thorough knowledge of the practical working of a newspaper, and could undertake the business department also.

Address, J. D. B., care of the Editor of the *London and China Telegraph*, 2, Cowper's-court, Cornhill, to whom references are kindly permitted.

HOLLOWAY'S OINTMENT

AND PILLS.—At all seasons and in all climates few ailments are more disheartening, and none more ominous than ulcerations on the surface of the body. Wherever they are situated it is difficult to cure them, unless treated judiciously with some cooling, healing, invigorating application like this never-falling Ointment. It has worked wonders in making bad legs sound and strong, even when the power of the blood vessels had nearly been destroyed, the valves in the veins perfectly powerless to sustain the column of blood contained in them, and almost entire stagnation of the circulation had rendered every other curative means abortive. No sore or ulcer can withstand its healing influence, few skin diseases its sanitary virtues.

THE MAILS, &c.

The P. and O. mail, bringing advices as above, was delivered, *via* Brindisi, this morning, its due date. The next inward (French) mail, with dates Yokohama Aug., 14, Shanghai Aug. 18, Hong Kong Aug. 24, Singapore Sept. 2, is due, *via* Marseilles, on Monday next, the 7th proximo.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, four to five hours in transmission.

List of Passengers.

PASSENGERS INWARD.

To San Francisco, per Pacific mail steamer *Great Republic*, arrived Sept. 12.—For New York: A. Garcia, E. Hasphin Mrs. John Baker, Mrs. Chan Laisun and two children, Miss Lena Laisun and Miss Anna Laisun, J. G. Paget, and thirty-four Chinese students. For Chicago: A. C. Westall, H. S. Shonach, J. S. Drysdale. For Philadelphia: H. G. Gotts, United States Navy. For Boston: J. B. Lovejoy.

By this mail to Brindisi, per P. and O. steamer *Malta*, arrived Sept 26.—To Venice, from Hong Kong: Mr. Sutherland.

To Southampton, per P. and O. steamer *Mongolia*, expected to arrive Oct. 7.—From Yokohama: Mr. Goose, Mr. Mitchell. From Hong Kong: Captain Lorange, Dr. Pottinger, R.N., and one second-class passenger. From Singapore: Mr. Bazley. To Alexandria, from Yokohama: Mr. Le Duc. To Malta, from Yokohama: Mr. Mallia, Mr. Darawny, Mr. Arnaud, Mr. Johra. To Gibraltar, from Singapore: Captain Salgado and servant, Don Lemberano and child, Don Carmen de Llus, five children, and servant.

PASSENGERS OUTWARD.

Per French mail steamer *Hoogly*, from Marseilles, Sept. 29 (booked from London). To Batavia: Mr. and Mrs. Hooykaas and family, Mr. C Bellart, Mr. Van der Louteuvante, Mr. Van Hement, Mr. J. Dunlop. To Hong Kong: Mr. and Mrs. Bertrand, Mr. Rogerson, Mr. J. H. Cox. To Singapore: Mr. and Mrs. Burn, Mrs. Engster, Mr. and Mrs. Brasier. To Galle: Mr. Qurura.

Per French mail steamer *Tigre*, from Marseilles, Oct 13 (booked from London).—To Yokohama: Mr. Bossman, Mr. Fraissinet. To Shanghai: Mr. W. F. Loy, Mr. R. E. Rennie, Mr. H. Broughman Miller, Mr. and Mrs. Medhurst and child. To Hong Kong: Mr. F. Bowden, Mr. and Mrs. Heard, Mr. J. Heard. To Batavia: Mr. C. A. Henry, Mrs. Lacey, Mr. and Mrs. G. Van and son, Mr. and Mrs. Engelbronner and family. To Galle: Mr. A. S. Daniell, Mrs. W. Daniell, Mrs. Geddes and child. To Saigon: Mr. Lory.

Per French mail steamer *Donnai*, from Marseilles, Oct. 27 (booked from London).—To Hong Kong: Mr. E. Moore. To Singapore: Mr. and Mrs. Labhart Lutz.

Per French mail steamer *Ava*, from Marseilles, Nov. 10 (booked from London).—To Singapore: Mr. and Mrs. W. Ullemeister. To Batavia: Mr. and Mrs. Nogel, Miss Kiins, Mr. A. Matkins, Miss Clona, Miss Mees.

Per French mail steamer *Cambodge*, from Marseilles, Nov. 29 (booked from London).—To Batavia: Mr. and Mrs. Hora Siccoina.

Per P. and O. steamer *Hydaspes*, from Southampton, Sept. 21.—To Hong Kong (*via* Bombay): Capt. and Mrs. Tracey.

Per P. and O. steamer *Woolfan*, from Brindisi, Sept. 30.—To Ceylon (*via* Bombay): Mr. Duncan.

Per P. and O. steamer from Suez, Sept. 27.—To Shanghai (*via* Bombay): Mr. H. G. Learer, Mr. H. W. French.

Per P. and O. steamer *Massilia*, from Southampton, Sept. 26.—To Hong Kong: Commander Hon. J. Fitzmaurice, Mrs. Andrews. To Singapore: Rev. H. Francis To Ceylon: Mr. and Mrs. C. B. Collinson.

Per P. and O. steamer *Malta*, from Brindisi, Oct. 7.—To Yokohama: Mr. Short. To Shanghai: Mr. Fauvit. To Singapore: Mr. R. B. Carnegy.

Per P. and O. steamer *Mirzapore*, from Southampton, Oct. 3.—To Ceylon: Mr. W. Owen.

Per P. and O. steamer *Simla*, from Southampton, Oct. 10.—To Yokohama: Mr. F. C. Hayes. To Shanghai: Mr. A. B. Steel. To Hong Kong: Miss Simpson, Mr. T. B. Hooper. To Singapore: Mrs. Trotter, Mrs. Dunlop and child. To Penang: Mrs. Speedy.

Per P. and O. steamer from Venice, Oct. 18.—To Penang: Mr. Speedy, Mr., Mrs., and Miss Vermont. To Singapore: Mr. J. M. Matson. To Ceylon: The Mackintosh of Mackintosh, Mr. S. Holmes.

Per P. and O. steamer *Pera*, from Brindisi, Oct. 21.—To Yokohama: Mrs. Marshall. To Hong Kong: Mrs. C. A. Sinclair, Mr. M. Murray. To Singapore: Capt. and Mrs. Caldbeck. To Ceylon: Mr. R. Morris.

Per P. and O. steamer *Poonah*, from Southampton, Oct. 24.—To Hong Kong: Mr. H. H. Thornton, Mr. J. Alexander. To Singapore: Miss Rickards.

Per P. and O. steamer *Pekin*, from Southampton, Nov. 7.—To Ceylon: Mrs. Bayley and child. To Hong Kong (*via* Bombay): Mr. W. H. Fittock.

Per steamer *Drummond Castle*, from London, Sept. 28.—To Singapore: Capt. Kirk, Mr. Hoskyn. To Hong Kong: Mr. Hochne. To Shanghai: Mr. Litchfield, Mr. Milne.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The P. and O. mail *via* Brindisi, and the Pacific mail *via* San Francisco, bring advices to the same date, the 7th August; the French mail from London, June 7, arrived out on the 24th, and the following P. and O. mail of June 14 on the 27th July. The following summary of news is from the *Japan Mail* and *Japan Herald*:—

Several official changes have lately been made, Mutzu Munemitzu, Governor of Kanagawa, being appointed to the Finance Department, and Nakayama, Inspector of Customs, being transferred to Kobe. The Vice-Governor here has been assigned to fill Mutzu's post.

A meeting was held on the 31st July, at the Chamber of Commerce, for the purpose of organising a branch of the Royal Asiatic Society. There were present the Rev. W. E. Syle, Admiral Shadwell, Messrs. E. Satow, W. H. Smith, E. Van Reed, C. B. Watson, Howell, Brooke, Lowder, Patow, Robertson, Walsh, Wilkin, Captain Arthur, and Dr. Hadlow; Mr. R. G. Watson, H.B.M.'s *Charge d'Affaires*, presided, and in opening the proceedings said it might well be considered a reproach to Japan that a Society which they had met to organise had as yet never been formed in this country. Every country in Europe possessed three or four societies of a similar learned nature; foremost among them, which stood out in honourable relief, was the Royal Asiatic Society of London. That Society was largely indebted to correspondents abroad. He knew of an affiliated Asiatic Society in India, established at Bombay, which had furnished much information to that of London. There was also a Society for China, whose headquarters were at Shanghai, but at present Japan had none. It should be considered how little we know of this country, how much there is to learn of its laws and manners, its sciences, including ethnology, geography, and geology, and what a promising field is opened up in Japan for inquiry. Such a Society would help to preserve records of the establishments of Japan which now were fast becoming obsolete, perpaps soon to be erased from the memory of mankind. Admiral Shadwell, who is a member of the Royal Asiatic Society, was present. The following rules, forming the constitution of the proposed Society, were then read:—

Digitized by Google

I. The Asiatic Society of Japan has for its object to collect and publish information of permanent value respecting Japan and parts adjacent. II. Residents of Yokahoma may become members by payment of an annual subscription of $5; honorary and corresponding members by election, without payment. III. The officers are a president, two vice-presidents, a secretary, a librarian, and a curator. These officers, together with resident members chosen for the purpose, form the council of the society, by whom all its affairs are managed. IV. Meetings of the society are held monthly, or oftener, at the discretion of the council. V. This constitution may be amended by a vote of two-thirds of the members present at a regular meeting.

These rules were adopted on the motion of Vice-Admiral Shadwell, and it was arranged that the society should communicate with the Royal Asiatic Society of London, with a view to its becoming the Japan branch of that institution.

It is hardly a month since (says the *Mail*) that we spoke in very plain terms of the infamous character of the correspondence admitted into the *Hiogo News* under the head of Yokohama. The scoundrel who writes these letters—and whom, if we can track him, we will assuredly gibbet, name, nationality, profession, and all—has at last brought about precisely the kind of trouble his letters were calculated to produce. Exasperated by the insults levelled unmistakably at himself, Dr. Tryon, an officer of the United States Navy, a gentleman well and most favourably known to the residents of this port, went in company with Flag Lieutenant Emory, of the *Colorado*, to the office of the *Hiogo News*, and demanded an apology for the insults put upon him. A form of apology was agreed upon by the respective parties, and the two officers left. But instead of this apology being published, an explanation was made in the paper, which was deemed insufficient—as it was. The two gentlemen again went to the office of the *Hiogo News*, high words arose, and Dr. Tryon struck the representative of the paper—whoever he may have been. The inevitable consequences ensued; the matter comes before the American Consul, and, of course, eventually before the American Admiral.

We are not (continues the *Mail*) in the least surprised at the affair, however great may be the regrets it causes us. The letters of the anonymous Yokohama correspondent of the *Hiogo News* ought never to have been published by any paper whatsoever; they were scandalous and disgraceful, and reflected the gravest discredit upon those who permitted their publication. We trust the Admiral or the authorities at Washington will take a common-sense view of the matter, reprimand the officers, and reinstate them. As to the cowardly ruffian from whom the correspondence emanates, the sooner sufficient tangible evidence of his identity comes out, the sooner his punishment will come. It is high time a stop was put to these things, which disgrace every foreign resident in this country.

A meeting to receive the report of the commission elected to inquire into the management of the General Hospital during the past year was held on the 29th July. The report consisted mainly of a number of suggestions for the future management of the institution.

An act of piracy is reported. Six armed men during the night attacked the European built but Japanese owned ship *Honai Maru*, lying off Kanagawa, and, after a short conflict with the crew, in which one was killed and several wounded, the pirates managed to possess themselves of the ship. They secured all the valuables they could lay their hands upon, including a sum of $2,185, bound fast the crew, and escaped.

The cause of Findlay, Richardson, and Co. *v.* Pitman and Co. was to have been heard on Aug. 2, the Chief Judge having, as already reported, given the plaintiffs the option of showing cause why the case recently heard before the Acting-Assistant Judge should not be appealed to Shanghai or reheard in part, or of declining to take any action. Mr. Davidson, who represented the plaintiffs, adopted the latter course. The Chief Judge will now consider the argument put in by Mr. Dickins on behalf of the defendants, and will render his decision on his return from Hakodate, whither he is going in the *Iron Duke*.

Mr. Davis has brought his plans for watering the streets of this settlement into operation, and the community have had abundant opportunity of experiencing the grateful change he has brought about. Some decided action will have to be taken to prevent Mr. Davis losing money by his efforts. In the first place, he has laid out $500 for his carts, $250 for his pumps, and labour costs him $10 a day. On the other hand, his receipts only amount to $240 a month, and thus he loses money on the employment of labour alone, to say nothing of the $750 first cost of his material.

On the 22nd July, at the Bluff Gardens, a pyrotechnic display took place with every success. The Gardens were fairly attended, and soon after the appointed time the display commenced—serpents, rockets, and a thousand other fireworks, whose names are unknown, being let off, and apparently giving very general satisfaction.

Telegraphic communication between this port and Nagasaki is completed, and now only awaits the arrival of batteries from England.

A great number of shipping cases have been heard at H.B.M.'s Consulate; they consist chiefly of the refusal of the crews to work.

The weather has been seasonably warm. The general health of the settlement remains unaltered. The crops appear to promise well.

The man Schnerr, who was recently brought before the Austro-Hungarian Court on a charge of robbery, is to be removed to Shanghai for trial.

The buildings in connection with the new Custom-house are progressing satisfactorily.

The Pacific Mail Company's steamer *Great Republic*, with advices from Yokohama to the 21st August, arrived at San Francisco on the 12th inst. The summary of news brought by this steamer as telegraphed to the New York press is unimportant, the only item of interest consisting of the statement that the Mikado has returned to Yedo.

NAGASAKI.

(FROM OUR OWN CORRESPONDENT.)

NAGASAKI, AUG. 2 (VIA SAN FRANCISCO).

Yesterday morning the French and English mails of the 7th and 14th June arrived by the Pacific mail steamer *New York*; the latter in forty-four days from London. The mail leaving San Francisco on the 30th ultimo is not due here until the 31st instant. Almost every steamer bringing the mails *via* Europe, and taking them *via* San Francisco, have had their due dates to arrive fixed for Sunday morning at daylight, and their departures fixed for midnight on the same day. The company have much to answer for on the charge of Sabbath-breaking, and I believe that if another company starts who will give their attention to the avoiding of such inconvenient arrangements they will have the sympathies and support of shippers of cargo on their side. The public are getting very tired of the continual Sunday work, and are growling considerably, and I hear that the Rev. Henderson Burnside is endeavouring to get a memorial addressed to the agent here for transmission to headquarters, as the present state of things is the means of causing his church to be almost deserted. It would not matter in the least if people could see their way to prepare on the previous day, but this it is almost impossible to do before the receipt of the inward mail. To close all up on Saturday would suit everybody, and if the steamer came in on that day and left the same night it could make no difference to the company, whose vessels are often lying at Shanghai for several days.

Since my last letter of the 15th inst. the chief event has been the visit of the Mikado, who landed here on Friday afternoon, the 19th inst., at six o'clock, and left again on the Monday following at the same hour. His visit is regarded as one of very great importance, owing to the sweeping changes it will assuredly bring about. The appearance of the Sovereign in a foreign suit of clothes has been too much for the native population, who, instead of regarding him as a heavenly being, and being awed by his presence, have changed their views now that they find him to be but human. Of course rumours have been plentiful amongst a superstitious and ignorant people like the Japanese lower class, and foreigners who are looked up to for information by the former have been treated to some of the wildest inventions imaginable. It is quite clear to everyone that so far as Nagasaki is concerned the Mikado's spiritual reputation is irrecoverably gone, and that to secure the feelings of loyalty from his subjects it will be necessary to raise the minds of men to a higher standard by educational measures, by the diffusion of useful knowledge of every kind. I have even heard that foreigners are to be found who are of opinion that a great mistake has been made by his Majesty's advisers in allowing him to appear as he did. When you hear of such expressions as these, and from those who are supposed to entertain progressive views, it leads one to suppose that Japanese statesmen are in advance of some of the Western folks. Nothing short of breaking down and destroying old prejudices will do any good for Japan. The people of the present generation require treating like children at first, as without being led they cannot be expected to do anything of their own accord after being in the leading strings of a paternal Government so many years. The *Nagasaki Express* gives the following account of the Mikado's movements during his stay here:—

On Sunday morning, the 22nd July, as early as 7 A.M., his Majesty paid a visit to the Gon Rei of Nagasaki-ken at his official residence, and later in the morning the two Government works—the Akanora factory and the Patent Slip—were visited. At the latter the Japanese steamer *Swatow* was hauled on the gridiron in his presence. After this had been accomplished, he inspected the machinery, and had the working of it explained to him, in which he appeared to take great interest. Mr. Blaikie, the manager of this establishment, and his assistants, Messrs. Gill and Douglas, were presented with a *souvenir*, which will no doubt be regarded by them as a pleasant reminiscence of his Majesty's visit. The site of the dry dock on the other side of the harbour, where the work has been suspended for a long time, was not inspected, probably as it is an undertaking existing only on paper. It was originally intended that a visit should be made to the Custom-house, and to the Great Northern Telegraph Company's office, but this was not carried out. We understand that his Majesty was desirous of exchanging messages with the principal crowned heads of Europe, but this it was found would occupy too much time. In the evening the harbour presented a very pretty appearance; the Japanese fleet and several merchant steamers responded to the shore illuminations previously displayed. Every vessel had its bulwarks, &c., covered with lanterns from stem to stern, and their yards dressed in the same manner. The town and

Digitized by Google

suburbs were again illuminated, and fire-balloons were sent up. On the following morning, at six A.M., the Mikado left Obata in his barge, and proceeded to the *Rufo-kan*, with a similar escort to what he had on landing, and embarked on board under the customary salute from the Russian corvette *Vetiaz*, the U.S.S. *Monocacy*, and Japanese vessels, and by eight o'clock the squadron had passed the point *en route* for Kumamoto, with the exception of the *Kasugo kan*, which did not leave until Wednesday.

The temporary apartments occupied by his Majesty have been thrown open to visitors, and numbers have availed themselves of the permission given to make an inspection of them during the week. The native tradesmen who have supplied articles for his Majesty's use are proud of the honour conferred upon them, and will not be slow in turning it to account. "Confectioner, &c., to his Majesty," will no doubt be inserted in their business announcements in a similar manner to that adopted in Europe. By command of the Mikado the Governor of Nagasaki has addressed a letter to the Consuls representing the Treaty Powers, requesting them to thank their countrymen for the cordiality displayed.

The illuminations which this community exhibited on the occasion of the Mikado's visit were extremely successful, and, as these were the first which have been given to him, they are rendered of much greater interest than they would have been had they been simply a copy from some other place. This is the second occasion on which Nagasaki has been first in the field in this line—the first being when the Duke of Edinburgh paid a visit here. The next attempt at a similar display will be made when the Grand Duke Alexis of Russia, who is expected here next month, arrives.

Of general news there is not much to give. The case of "P.M.S.S. Company *v.* Gribble" has been heard, but the verdict has not yet been given by Sir Edmund Hornby, who left by last steamer for Yokohama, from whence judgment is to be delivered. Another case, "Boeddinghaus, Dittiner and Co. *v.* Gribble," as agents for Holt's line of steamers, has been heard before Mr. Marcus Flowers in H.B.M.'s Provincial Court, and has resulted in a verdict for the defendants. The claim was for cargo delivered in bad condition, and part of which had been lost, owing to the cases being broken.

Business has scarcely revived since the Mikado's departure, but some extensive settlements of tobacco have been made, which it is believed are intended for London. Nebus are quoted 395 per $100. Exchange on London 4s. 8d. nominal. Freight to London nominal, as there is no vessel on the berth.

CHINA.

—o—

TIENTSIN.

(FROM A CORRESPONDENT.)

TIENTSIN, July 30.

The French corvette *Linois* arrived at Taku on the 22nd July with M. L. de Geoffroy and suite, and on their arrival the gunboat *Couleune* steamed alongside, and his Excellency was received by Mr. Dillon, French Consul. They proceeded at once to Tientsin, and arrived there on the evening of the 23rd. On the 25th his Excellency and suite, with his mounted escort, paid an official visit to Li-Hung Chang, the Viceroy—the first time a Foreign Minister has gone to Tientsin with a fully mounted escort and staff; and no doubt the Viceroy was rather surprised to see such a contrast to the suite of other Foreign Ministers, which generally consists simply of an interpreter. Li-Hung Chang returned the Minister's call on the 26th inst.; arriving with a miserable suite of a few Mandarins on ponies, and dirty followers. Mons. Geoffroy's dignified tone and gentlemanly bearing rather surprised the Viceroy. In the cool of the evening Mons. Geoffroy rode into the city, attended by his suite, and visited the graves of those who were so cruelly massacred by the Chinese on the 20th June, 1870, and was deeply affected at the sight before him. He also visited the Cathedral, which is to be restored by the Chinese Government. On Saturday, the 27th, Mons. Geoffroy left by boats for Tungchow, *en route* to Peking. His escort was fully mounted, and the boats left whilst the French gunboat *Couleune* was firing a salute of fifteen guns. Mons. Dillon, the French Consul, Count de Kergamint, and other gentlemen on H.E.'s staff, with the mounted escort, left on the 29th by road, to await the arrival of Mons. Geoffroy at Tungchow, when the procession will be formed for Peking, and Mons. Geoffroy is expected to arrive at the French Legation on the 1st August. Whilst Mons. Geoffroy was at Tientsin a battery of Krupp's steel guns arrived per *Shantung*, costing the Chinese Government, they say, about $8,000 each gun; and Li-Hung Chang lost no time in sending them to the new forts between this and Taku. A further lot of guns is shortly expected; together with a supply of torpedoes lately arrived from England, by the steamer *Craigforth*.

Heavy rains have set in at this place.

SHANGHAI.

We have advices from this port to the 11th August. The P. and O. mail from London June 28 arrived out on the 7th August, the same steamer bringing the French mail of 21st June, which had been delayed by the accident to the Messageries Maritimes steamer *Donnai* The following summary of News is from the *North China Herald* and *Shanghai Courier*:—

M. Vignale, Consul-General for Italy, has resigned the position of Senior Consul, which had fallen to him on the departure of Mr. G. F. Seward, United States Consul-General. During the few months for which he has held the position, M. Vignale has been indefatigable in his exertions to fulfil the duties devolving upon the senior in the consular body, in a way creditable to that influential corporation and advantageous to the foreign community, both in its commercial and municipal relations with the Chinese authorities. M. Vignale leaves shortly for Japan, and Mr. Alabaster, H.B.M.'s Acting-Consul, has been appointed Consular Delegate, to act in the name of the Senior Consul.

The bulk of the Grey Shirtings settled during the week have been mildewed. It is matter for surprise, and, we may add, no little regret, that our Chamber of Commerce does not give this evil some consideration. It is surely widespread and serious enough to call for some remonstrance. We know that it is altogether vain for individuals to seek redress in Manchester, for, by some mysterious process, unknown to us and to the majority of China merchants, the damaged specimens (bales and pieces selected by disinterested surveyors, and packed in tin lined cases) forwarded to Manchester have turned out cleaner and sounder than when they were originally despatched from the warehouses, and Manchester men have hitherto repudiated all responsibility in consequence. Would it not be worth while to have the question of liability tried in a court of law at home? We believe every member of our Chamber of Commerce would heartily endorse any action the committee might see fit to take in this respect. Mildews are now the rule, and even the very best makes are no longer free from the imputation.

A meeting of the promoters of the Tramways Company has been held, at which the opposition likely to be raised to the scheme at the ratepayers' meeting was discussed. It was finally resolved that, to meet the views of those who are indisposed to see an experiment tried on the Bund, and also considering the probable delay which would occur in even the commencement of the present plans, the Tramways Company should at the forthcoming meeting only ask for permission to lay a single line of rails from the Soochow Creek end of the Fuhkien-road to the Yang-king-pang Creek. The sanction of the French Municipal Council for continuing the line to the North gate of the city will be afterwards sought for.

The new light at Woosung was shown for the first time on August 1. The new illuminated apparatus is a dioptric one of the fourth order, showing a fixed light over three-fourths of the circle, while the light of the remaining fourth is utilised by means of a reflector of silvered copper, which throws it across the entrance to the Woosung River. A white light is seen over the navigable channel, on each side of which a red light only is visible. There is but one lamp, in the centre of the apparatus, the colouring being effected by means of screens of ruby glass. The light consists of five lens rings in the centre, with as many prisms placed over, and three under it; these collect the rays of light diverging from the flame and throw them out towards the horizon. The lamp, which burns kerosine, is of peculiar form, to suit the apparatus. A lightning conductor of copper wire rope extends from the blocking deep into the soil at the base of the tower, where it is attached to a sheet of copper placed in a pit filled with charcoal. The tower is 48 feet high, square on the exterior, but round in the interior, with a spiral staircase of 68 steps. Bricks have been chiefly used in its construction, but the door facings, stairs, and top course are of stone from Ningpo. Mr. Hart, Inspector-General of Customs, has taken his departure for the North, accompanied by Mr. Henderson, Chief Lights' Engineer, in the steamer *Feihoo*, in conjunction with whom he will make a tour of inspection of the lights existing, in progress, or projected, for the guidance of navigation on the northern coasts and islands of China. The tour will occupy about a month, after which Mr. Hart will proceed to Peking, where he will arrive in time to see the transmission of proper documents to ensure the long-deferred and much-bungled opening of Hainan, which is semi-officially announced to take place early in October. An action likely to attract considerable public attention has been commenced in H.B.M.'s Supreme Court on the suit of Mr. James L. Brown, barrister-at-law, and formerly a member of the Imperial Maritime Customs Service, against Mr. Hart. Mr. Brown claims something like Tls. 7,000 for surveys, plans, estimates, superintendence, &c., in connection with certain lighthouses, harbour works and improvements in navigation at Ningpo, Fooshow, and Canton, and for recommendations as to the clearing of harbour approaches by steam dredges—for some of which works Mr. Brown claims the merit of being the first of their kind in China.

At the Mixed Court, on the 7th August, a case was heard which may prove of some public interest. The captain and owners of the *Fuhle* steam-tug, through Mr. J. S. Baron, agent, handed over to the Court some 1,500 Foochow poles, the cargo, more or less, of a junk from Foochow to Canpu, which the *Fuhle* found in a state of distress near the light-ship, and brought safely into port. The object of placing the lumber in the custody of the Court was in order that it might adjudicate on the same, so as to secure to the *Fuhle* the reward claimed per agreement for salvage services. Mr. J. L. Brown appeared on behalf of the captain, with the view of resisting the claim of the *Fuhle* to salvage, on the ground that she rendered only the customary

Digitized by Google

services of a tug steamer. After hearing the pleadings at some length, the Court reserved judgment.

The English mail last received has taken only thirty-eight days and fifteen hours in transit from London. From a few notes of the voyage of the *Hindostan* as far as Aden, we find that in one day's steaming she did 336 miles, or fourteen knots an hour. If the P. and O. Company's new boats go on like this, we may count on a material shortening of the tedious voyage to and from England.

The last of the road steamer has been shipped by the *Sin Nanzing* for Tientsin. As the machinery had to be taken rather minutely to pieces, however, to facilitate shipment, it will be some time before it can be put together again, but we may hope to hear in a month or two that this interesting innovator has at last developed into a thing of life and action.

Mr. Burge R. Lewis, the United States Consul-elect for Hainan, has arrived here on a visit, to recruit his health, which has been seriously impaired by the discomforts and privations to which he was exposed during a visit he made to Kiungchow, to make preliminary arrangements for his consulate. The voyage back to Hong Kong, in a native junk, occupied eight days of most unwholesome weather.

The rebuilding of the British Consulate has reached the pitch of the eaves, and the massive roof-trees are being prepared to cover it in.

By an Imperial edict of the 8th July, the father of the Empress elect was raised to a dukedom of the third rank, while the mother was raised to a ladyship of the first degree, with all the honours of a duchess.

NINGPO.

(FROM A CORRESPONDENT.)

NINGPO, JULY 23, 1872.

The summer through which we are now passing, and the strength of which was broken, we hope, two days ago by a thunderstorm of unusual severity, has been remarkable for its late arrival, and its fierce heat when once upon us. There was no real summer heat till June 30, though we had many hot days in April; but from June 30 till July 21, with little cessation, the heat by night as well as by day has been very great. In some foreign houses the thermometer has touched 100 deg.; and in none did it fail to rise above 90 deg. for three weeks in succession. The heat of summer and the sleeplessness caused thereby are supposed by some persons to excite the otherwise apathetic Chinese to thoughts of violence if not to deeds of blood. Certain it is that not only the Tientsin massacre, but also the numerous kidnapping excitements and assaults on mission or mercantile premises have taken place chiefly in the summer. The Chinese, like the Athenians, having an eager appetite for news, are driven in the sultry summer nights and under the full moon to invent intelligence and concoct rumours, and now that the "long-haired" are extinguished the most fertile topic is, of course, the "red-haired." I notice, therefore, with thankfulness the remarkable freedom from rumour and excitement amongst the people during this remarkably trying summer. Earlier in the year the word was passed from mouth to mouth amongst the city and country people that the foreigners' prestige was gone in Ningpo, and that we should soon be driven out, but nothing has yet occurred in fulfilment of the reports.

I trust this repose is not a lull before a storm. There must be, one would hope, *some* sincere friendly feeling at head quarters to account for this quiet below. The Imperial marriage in October, however, and the Audience Question, more weary and protracted, though more direct than the Indirect Claims, make one somewhat anxious for the future. One longs for a little of the more positive policy of Japan. Either honestly persecute or honestly tolerate Christianity. Either say to foreigners be good enough to clear out, or cease muttering such sentiments in secret; and open the gates of the Empire wide to mercantile and philanthropic enterprise. I confess that when reading the extract from Lord Elgin's correspondence I tremble for England's future in China. Have overbearing conduct, injustice, harshness and meanness, stained too often our past career in dealing with this Empire; and must not the retribution come? One turns with some comfort to the list of philanthropic efforts for the good of the Chinese given by your correspondent, "E. W. S.," from Shanghai. Ningpo and other open ports and cities of the Empire could add to that list; and one ventures on the hope that those "troublesome people," the missionaries, to whom your correspondent alludes, "always getting themselves and others into trouble," will yet be found to have averted trouble from their fellow countrymen.

HONG KONG.

Our advices by this mail extend to 17th Aug.; the French mail from London 5th July arrived out on the 11th August. The following items of intelligence are taken from the *Overland China Mail*:—

The half-yearly meeting of the Hong Kong and Shanghai Banking Corporation was held on the 14th August, Mr. T. Pyke presiding. The chairman having read the report—which was published in our last issue—said that he would draw the attention of shareholders to one item in the accounts. As most present knew, the Bank was interested in the sugar refinery at East Point. To meet any possible liability the directors had deemed it prudent to set aside a sufficient sum in this connection to place the accounts of the Bank on a satisfactory footing. The report was then carried unanimously, as was also a motion that Messrs. Forbes and Lemann be confirmed as directors, and the meeting separated.

A meeting of the China Sea, Saigon, and Straits Steamship Company was held the same day. The statement of the working of the company for the half year ending 31st December, 1871, was not satisfactory, inasmuch as only $1,192.54 appeared at the credit of the working account, and, after appropriating $400 to the compensation of themselves and the auditors, the directors recommended the balance to be carried forward to the next account. The report was adopted.

The following is the report of the Hong Kong and Whampoa Dock Company, for the six months ended 30th June, to be presented at the meeting of shareholders, to be held on the 20th August:—

The Docks have been well employed during the six months under review. The sum of $25,000.00 has been written off, as recommended in last report. The gross earnings of the company for the six months amount to $334,278.79, on which there is a net profit of $59,715.75. The debt due to the estate of John Lamont in the last report stood at $70,000.00, and within the last half year $45,000.00 has been paid off, (including the $30,000.00 mentioned in last report), thus leaving the debt at $25,000.00. The directors recommend that a dividend at the rate of 3 per cent. for the half year be paid, together with $6,000.00 to contributing shareholders. The amount available for distribution, including $1,680.32 brought forward from last half year, is $61,396.07, which is distributed thus:—Dividend 3 per cent. for the half year, $30,000.00; to contributing shareholders, $6,000.00; directors' fees, $2,500.00; auditors' fees, $250.00; total, $38,050.00, leaving $22,646.07. And the directors also recommend to write off for depreciation a sum of $20,617.34, leaving a balance to be carried to new account of $2,028.73.

Mr. Keswick having left the colony, the board have filled the vacancy by electing Hon. Mr. Whittall as chairman. The board have appointed Mr. A. F. Chambers as auditor, in place of Mr. James Hart, and this appointment will have to be confirmed by the shareholders.

The Austrian Consul-General has received a telegram from his Government authorising him to charter a steamer, or arrange for steam freight, for all articles intended for the Vienna Exhibition. This will allow intending exhibitors to send home their articles free of charge, and will doubtless add considerably to the inducements before held out. Nearly all the ports are contributing more or less fully, Shanghai and Canton, as is natural, offering the best field wherein to obtain suitable objects. The arrangements for transit will, we understand, be completed in two or three months.

The steamer *Sunshine* went on shore on a reef three miles west of Breaker Point at daylight of 12th August, during thick weather. The fore compartment is full of water, and it is said that the stern swings clear of the reef. Fortunately she has but little cargo on board. The steamer *Kwangtung* arrived at the scene of the wreck on the 13th, and left again for the purpose of getting assistance.

The Chinese procession is fixed to come off on the 20th August, but the *Ta Chiu* ceremony (exhibition) will be opened on the 19th at West Point. We learn that the amount of subscription is verging on $16,000. The two largest subscribers are the Fook Mow Loong and Hung Foong Hongs, each contributing $373, and we understand that lots were cast to determine which of the two should appear at the head of the list of subscribers. The procession will parade the streets for three days, but the exhibition will be kept up for five days and nights.

The Pier and Godown Company laid down a screw mooring on the west side of the new pier on 12th Aug. As the permanent buoy is not ready, the chain will be buoyed by a small buoy for the present. The company have also one screw buoy moored in its place off the east side of the new pier.

A large "peep show" is now open in one of the rooms below the new Chinese Theatre. It contains views of several of the battle-fields in the late Franco-German war, and includes portraits of Napoleon III. and two or three French generals. The Chinese appear to patronise the show somewhat extensively.

The notorious character Lee Ayee, who was sentenced last year to seven years' penal servitude and three whippings for robbery with violence, has made a desperate attack on Mr. Alfred Grey, warden of the gaol. This he did striking him a heavy blow with his fist on the back of the head. Lee Ayee was the same man who attacked Dr. Kane, and who subsequently attempted to throw Inspector Grey over a precipice. The matter was reported to the Governor, and Lee Ayee was sentenced to receive thirty-six strokes of the lash.

A daring attack has been made upon an opium shop at Fatshan by an armed party of five men, who threatened the inmates should they raise any alarm. They succeeded in plundering money and property to the value of over $800.

The circumstances of the duel between the Spanish Consul, M. Checa and the ex-Peruvian Consul at Macao have been investigated at the Police-court. M. Checa has been committed for trial at the Criminal Sessions, on a charge of conspiracy with others to take away human-life.

The share and general brokers held a meeting on the 12th

Digitized by Google

August, and drew up a resolution adverse to the proposed Ordinance.

A temple has been burned at Canton, involving an estimated loss of $40,000.

(FROM A CORRESPONDENT.)

HONG KONG, Aug. 16, 1872.

Since I last wrote the most important topic of political interest —of which, by the way, you will see no mention in the northern papers, though the *China Mail* publishes it as authentic—is the renouncement by Germany of her treaty with China. You will doubtless be able to ascertain full particulars from authentic sources at home, so I shall not risk carrying coal to Newcastle by giving you our crude ideas out here. If, as I believe, the news be true, it will have an important effect on Chinese policy.

Locally the chief subject of interest is the committal of Senor Checa, Consul for Spain at this port, for trial at the next criminal sessions on a charge of conspiracy with others not in custody to attempt to take human life. The Acting French Consul, who acted for his notorious opponent—fancy an affair of honour with a convicted murderer, for convicted Torre Bueno was, and sentenced, moreover, to fourteen years' incarceration, though the Macao council, composed of men who are supposed to be above bribery, quashed the conviction—was put in the witness-box and literally "bounced" out of his evidence. However, you will find all that in the papers. Mr. Whitall, much to the indignation of a good many, who don't see why councillorship should be hereditary in the East Point firm, has taken Mr. Keswick's place as M.L.C., at least he has been sworn in since my last—and signalised his first appearance by a furious onslaught upon the Pier Company, which at a distance of a mile has dared to project an obstruction remotely affecting East Point waters. Sir Arthur Kennedy is much liked, but is rather too pro-Chinese, not quite understanding that there are not above six Chinese in Hong Kong who would be deemed eligible visiting friends by a mandarin's runner. The conduct of the Chinese Hospital is just at present being strongly discussed. According to the statements made in defence of the Government, Sir R. Macdonnell gave it $115,000, to encourage the native system of dirt, inhumanity, and gross ignorance. Others maintain that, though the *medical* treatment of the patients was left to Chinese discretion, what may be termed "the surgery of common sense" was to be insisted on—that is, that though no patients could be obliged to submit to operations or take our medicine, clean bandages and sensible general treatment was to be insisted on under the supervision of the Colonial surgeon. My private impression is that the common sense party will carry their point of insuring either proper treatment or the withdrawal of the grant. It is a pity that we cannot get at Sir R. Macdonell's intention. If he sees the *London and China Telegraph* with this letter he might perhaps be induced to let us know what it was.

Who is to be the China champion in Parliament now that Colonel Sykes is dead? We want some one badly. The blockade question still aggravates the mercantile mind, and nothing but Imperial interferenee will settle it. The question put in a familiar way is "If you live in a bottle has anyone a right to station himself in the neck and levy tolls on everything passing?" The idea of conceding to a Power whom we are afraid to trust in matters regarding a few dollars—*vide* exterritoriality clause in the Treaty—full sovereign rights in her own waters is intensely absurd, and would be amusing if it did not hamper our trade. Sir Arthur says he cannot go beyond his instructions from home, but frankly acknowledges that another war with China is almost inevitable before things will get straightened out properly.

Our local debating society has proved a great success. Forty-eight members have enrolled themselves, and more promise to come. The amateur philharmonic now numbers twenty-four volunteer instrumentalists, but the society is not yet constituted.

The Great Northern Telegraph has broken down again. There is a mystery about that cable. Some say it was tampered with on the way out; others say that, owing to neglect in not keeping the cable-tanks full of water, the insulating material got softened and injured. At all events it is constantly breaking down. We want opposition lines here badly; there is plenty of work for them, and if the shareholders would be content to pay expenses for a couple of years, a *reliable* line would yield a handsome dividend in a few years.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings dates from this port to the 25th August; the French mail, with London advices to the 19th July, arrived out on the 19th, and the following P. and O. mail of July 26 on the 24th August. The following summary of news is from the *Straits Times*:—

The business transacted by the Legislative Council has not been of a very interesting character, though one or two matters of importance were brought forward. There have been three meetings, viz., on the 15th, 20th, and 22nd Aug. Several Bills have been passed, among them being the Steam Vessels Bills, a Bill to amend the law relating to the Transportation of Prisoners, and a Bill to amend the Penal Code. Several other Bills have been brought in and passed their second reading, notable among them being a Bill to make perpetual the preservation of the Peace Ordinance, and another to perpetuate the Dangerous Societies Ordinance. The former ordinance has been the subject of hot debate in times past, but it has been persisted in by Government as a necessity. Whether the making such a law perpetual will be permitted by the Secretary of State remains to be seen. The Dangerous Societies Suppression Ordinance, as it is called, is believed by many to be a most useless piece of legislation, and the desirability of making it a permanent statute may be doubted. At the meeting on the 20th, the Hon. Dr. Little called the attention of Government to the manner in which the Colonial medical officers carried out the provisions of an Order in Council of 1870 regarding infectious diseases, and also inquired regarding the quality of rice supplied to patients at the Pauper Hospital. At the next meeting, on the 22nd, H.E. the Governor said sufficient care had not been taken in carrying out the provisions of the Order, but that the matter would now be remedied, and with regard to the rice supplied to the paupers in the hospital, the Colonial Secretary said he had found it to be very good, but to have been badly cooked. Who is to blame for this does not transpire in the official minutes. It is to be feared that the hospitals need a little sharper supervision.

At last the Contagious Diseases Ordinance is to be put into force, though, as a preliminary measure, it is only put into operation in the north division of the town. It comes into operation on the 1st Sept. It is hoped that the ordinance, as it exists here, will exert a very beneficial influence.

The Sporting Club have issued the programme for the autumn races, which are to extend over three days, commencing on the 30th September. As there are a number of horses in training, very good sport is anticipated.

From Klang and Salangore we hear very conflicting reports concerning the progress of the contending parties. At one time it asserted that Tunku dia Oodin has been actually driven out of the territory, and at another we hear that Mahdie and his followers are getting the worst of it. The truth, so far as we can ascertain, is that Tunku dia Oodin is holding his ground, and hopes to be able to restore order in a short time. The police have made several seizures of arms and gunpowder, believed to have been destined for Mahdie's forces. Some people think that H.M.S. *Zebra*, at present idle in harbour, might repeat the *Rinaldo's* visit to Salangore river last year, with a beneficial influence on the cause of order and peace.

Commercial Report.

—o—

(*For dates see first page.*)

IMPORTS.

YOKOHAMA.—The demand had been inactive throughout the interval. A moderate business had been done in Grey Shirtings at reduced figures. Yarns had declined in value, especially Nos. 16 to 24, of which large supplies had come to hand, causing a great depression in the market; a moderate demand had been made for Taffachelass at unaltered rates. Blankets had attracted some attention, and a few parcels had changed hands; other Woollens remained quiet. Small sales of T-Cloths had taken place, and the closing rates showed a tendency to advance. Metals continued dull of sale. Quotations were as follows:—GE Grey Shirtings, 7 lbs., $2 35 to 2.40 per piece; ditto, 8¼ lbs. to 8½ lbs. $2.57½ to 2.62½; ditto, 9 lbs., $2.92½ to 2.97½; GE White Shirtings, 56 to 60 reed, $2.40 to 2.55; ditto, 64 to 72 reed, $2.70 to 2.85; T-Cloths, 6 to 7 lbs., $1.70 to 2 15. Turkey Reds Shirtings, $0.85 to 1.00 per lb. Taffachelass, double weft, $2.60 to 2.95; ditto single weft, $2.40 to 2.70. Velvets, Black, $12.00 to 14.00 per piece. Cotton Yarn: Nos. 16 to 24, $43.50 to 44.50 per picul; ditto, 28 to 32, $48.75 to 49.50; ditto, 38 to 42, $48.00 to 50.00. Cloth, Medium and Broad, $1.10 to 1.85 per yard; Lastings, $13.00 to 13.50 per piece; Long Ells, Assorted, $6.00 to 6.50. Lead, $5.50 to 6.00 per picul. Iron: Nail rod, $3.50 to 4.65 per picul; Bars, $4.00 to 4.60.

HANKOW.—The business of the fortnight had not been large, but there had been an improvement in the demand, especially for Woollens. The River Yangtsze was steadily falling, and all probability of a continued flood seemed at an end. Grey Shirtings: Quotations much about the same as for last mail, the only change being a decline of about one candareen per piece in best qualities of all weights. White Shirtings only saleable in retail quantities. T-Cloths continued neglected. Drills: A comparatively large business transacted in English at rather enhanced rates, demand running upon medium qualities. Jeans: Limited inquiry. Fancy Cottons: Moving more freely, but without improvement in value. Woollens and Worsteds: Long Ells: Good inquiry, chiefly speculative character, and fair sales at rather higher rates. Camlets: More doing; prices ranged from Tls. 13.60 to 15.80. Spanish Stripes have sold in moderate quantities at former rates. Figured Orleans realised fully previous prices; marked improvement in the demand. Metals: Lead: Very small business done; rates as previously advised. Quicksilver: Nominally quoted Tls. 72.00 per picul; no sales reported.

SHANGHAI.—The Piece Goods market had been quiet, and a slight decline in the price of 8¼ lbs. Grey Shirtings and Mexican T-Cloths was noticeable. Other fabrics, however, had fairly maintained former values, and the holders of Drills, and of all kinds of Woollens, were firm for higher rates. The deliveries, chiefly for the river ports, continued satisfactory, and the stock of Grey Shirtings for the first time since November last year was under two million pieces. Grey Shirt-

Digitized by Google

ings: Buyers steadily refused to give over Tls. 1.71 for 7 lbs. goods, at which their wants had been fairly supplied; 8¼ lbs. Dewhurst's Eagles realised from Tls. 1.90 to 1.93, and ordinary chops Tls. 1.85 to 1.89; mildewed Tls. 1.82 to 1.84. Heavy Shirtings sold at Tls. 2.64 to 2.67. White Shirtings: Ordinary 64-reed asked for, and Tls. 1.94 refused for Stewart's "Lion and Flag;" Dewhurst's 64-reed placed at Tls. 2.18; 56-reed at Tls. 1.74. T-Cloths: No market for Mexican, and business entirely in the lower counts; extra fine quality Dewhurst's 6 lbs. "T." sold at Tls. 1.25; 7 lbs. "T." at Tls. 1.43. Drills: A further rise in value established; Dutch, Tls. 3.00 to 3.05; English, Tls. 3.10 to 3.16. Jeans and Sheetings very slow of sale. Fancy Cottons: Damasks, Tls. 4.30 to 4.68; Chintzes, Tls. 1.55 to 1.67½; Dyed Brocades and Gentian Shirtings, Tls. 2.75 and 2.50; Muslins, 8 mace; Velveteens, 1m. 3c.; Spotted Shirtings, White and Dyed, and White Brocades unsaleable. Woollens: There had not been a large trade; Cumlet, Tls. 15.35 to 15.65; Long Ells, Tls. 6.55 to 6.60 for C.P.H. Scarlet, Tls. 5.75 for Assorted; Lastings, Tls. 11.15 to 12.00; Crape Lastings, Tls. 9.00 to 9.60; Crape Lustres, Tls. 4.35; Figured Orleans, Tls. 3.85 to 4.10 for ordinary, Tls. 4.75 to 5.00 for fine; Spanish Stripes, Tls. 0.63 to 0.66½ per yard. Metals: Nail Rod Iron, No transactions. Lead: With but little inquiry, and news of a dull market in Hankow, prices were somewhat easier.

HONG KONG.—The import market during the interval had been quiet. The dealers appeared to be fairly supplied, and as importers all appeared to be desirous of realising in the expectation of lower prices ruling in Manchester, values of Cotton Goods showed no improvement upon former quotations. Cotton Yarn: 16/24s changed hands to a very limited extent; common chops very quiet, and really fine makes although in small stock neglected. 28/32s in limited supply, but inquiry slack. Importers firm. 38/42s. of inferior chops slightly declined, but favourite kinds steady. Grey Shirtings: 7 lb., no alteration owing to absence of demand. 8.4 lb. met few buyers at a decline of 5 cents. Large clearances of spotted and mildewed made. 9 to 10 lb. not in request. White Shirtings: 54/60 reeds declined 10 cents. owing to forced sales. 64/60 reeds nominal. 68/72 reeds had a downward tendency. T-Cloths: 6 lb. difficult to move even at a decline. 7 lb. common exceedingly quiet at a decline of 1 to 2 cents. 6 lb. Mexicans not moved. 7 lb. Mexicans only wanted to a very retail extent. Dewhurst's MT $2.08, Hand and Branch, $2.12½. 8 lb. Mexicans showed a further decline. Fancy Goods neglected. Woollens and Worsteds: unchanged. Metals: A further considerable advance in Bar, Hoop and Round Iron. Lead is neglected.

MANILA.—The market for Plain Staples continued very languid and values had further declined. Considerable quantities of sea-damaged goods had been forced on the market, which had had the effect of weakening the demand for perfect goods. Coloured Goods were, on the whole, in better demand, and particular styles were fairly saleable at remunerative rates. The bulk of the stocks was, however, of poor patterns and only saleable at losing prices. Yarns were in heavy supply and extremely difficult of sale even at low and losing rates.

SINGAPORE.—The following is taken from Messrs. Boustead's Circular:—39-inch Grey Shirtings: 8¼ lbs. in poor inquiry at $2.55 to $2.57½; 7 lbs. pressed for sale, and lower; 6 lbs. taken at $1.92½ to $1.95. 45-inch in little request. 32-inch T-Cloths: 4 lbs. to 4½ lbs. low qualities sold at irregular prices; 5 lbs. asked for at $1.35 to $1.37½; 6 lbs. in less demand; 7 lbs. dull sale. 32-inch Grey Madapollams: 2½ lbs. in moderate inquiry at $18 to $18.50. All other Cotton Goods had been very quiet, and no sales of importance had transpired. Camlets firm at previous rates. Long Ells quite neglected. Scarlet Spanish Stripes in moderate request, and stocks reduced. Lastings not inquired for. 40s Grey Yarn: Prices without change, but hardly any inquiry.

PENANG.—There has been no improvement in the market; great inactivity prevailed, and prices ruled in favour of buyers, who, however, were only purchasing for immediate requirements.

EXPORTS.

—o—

TEA.

YOKOHAMA.—Owing to the receipt of discouraging advices by mail from America business for some time was quiet, but had since become brisker, and settlements of all grades from Medium to Choice had been made to the extent of 8,000 piculs, the bulk having been of Fine leaf. Supplies had been plentiful, the quality was fair, but showed a falling off, being rather mixed with the second crop coming in. Prices had been irregular, owing to some dealers being anxious to sell before the close of the native half-year, and in some instances concessions had been obtained for the Medium grades, of which there had been some lower classes on offer; the higher grades however maintained previous quotations; the stock was slightly increased, and large supplies of the second crop were expected. The P.M.S.S. Japan sailed on the 22nd July with 190,690 lbs. for New York, 149,788 lbs. for San Francisco, 29,218 lbs. for Chicago, and 10,287 lbs. for Boston; the Clara Bell took 120,345 lbs. for San Francisco, and the Polly Lewis sailed on the 26th July, with 451,722 lbs. from this port for New York, but had since put back for repairs; the Leander and Eastern Chief were loading for New York. Quotations ruled as follows:—Common and good common, nominal, $28 per picul; medium, $31 to 35; good medium, $37 to 40; fine $42 to 45; finest, $46 to 50; choice, $52 and upwards.

KIUKIANG.—The arrivals of Green had been 4,637 half-chests, out of which one chop had been settled at Tls. 36.25 per picul.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s report says:—The high range of price current on our market has greatly curtailed business during the past fortnight, compared with what had been doing previously, although settlements aggregate more than during the corresponding fortnight last year. As compared with then, however, the shipments to Shanghai on native account show a marked difference—21,770 chests, against 39,570 chests in 1871. The second crop is now pretty well all to hand, and shows a falling-off of between two and three million pounds. Third crop Teas will be down in a day or two; three or four musters are being shown privately already, but they are insufficient to form any opinion with regard to quality. There is no change much to notice in prices, considered in regard to the value of the Tea; the range of price is lower, but only in keeping with the quality on offer. While last year the bulk of the secon l crop Teas were settled between Tls. 15 to 20 per picul, in the present season it is only during the past fortnight that anything has been settled under Tls. 18 per picul, of course with the exception of Shuntam packed Teas; and it is also noteworthy that nothing has been settled so far under a laid-down cost in London of 1s. 1d. We estimate total arrivals to date, exclusive of Ningchow Tea at 42,784,100 lbs., against last year 44,774 100 lbs. Customs export to 1st August was 39,604,624 lbs., against 41,816,123 lbs., or including Ningchows 44,542,663 lbs., against 45,169,647 lbs. The steamer Russie is in port loading for Odessa.

SHANGHAI.—Black: The settlements which had transpired since the 27th July amounted to 20,400 chests and 24,900 half-chests, against 33,400 chests, and 21,500 half-chests in corresponding period last year. Previous quotations had been fairly maintained throughout the fortnight, and there was no change in rates. Fair to medium Oopacks and Ningchows still commanded prices about Tls. 3 per picul over those current last year, the lower grades costing Tls. 18 to 19.50, equal to 1s. 1d. to 1s. 2d., we make fully Tls. 4 dearer, the same class of Teas being procurable then at Tls 14 to 15.50, and realised at home on a good market 1s. to 1s. 1½d. per lb. Attention of buyers had been principally directed to Oopacks and Ningchows selling at Tls. 22, equal to 1s. 3½d., to Tls. 26, equal to 1s. 6d. A few parcels slightly better than the ordinary run of the Teas on offer had brought Tls. 28 to 32, equal to 1s. 7½d. to 1s. 9½d., we consider them relatively dear. The quantity of Shuntam packed Tea to hand was limited, there was, however, a fair quantity of common Hohow offering without finding buyers, low grades being in disfavour and rates asked above those current at home. Early in the fortnight supplies came to hand more freely than for some time past, but at the close they were coming in more moderate quantities. Late arrivals of second crop were very inferior in quality, there were but few desirable Teas amongst them; particular attention was called to this, as it enhances the value of the early shipments and should give confidence at home. Export 38,948,071 lbs. against 37,652,121 lbs., and stock 39,260 chests against 46,500 same date last year. Green Tea: Advices from America continued unsatisfactory, the stock held there was large, and rates for fine lines not remunerative; prices here in consequence had given way, and a decline of one to two taels were quoted; holders were anxious to quit at ruling rates, but buyers continued to act with caution. Settlements for the fortnight about 40,000 half-chests and 14,000 boxes at Tls. 35.00 to 60.00 proportion for Pingsuey, some fine lines selling at Tls. 70.00. Fychow and Teenkais Tls. 37.00 to 50.50, and Shanghai packed Tls. 35.00 proportion.

FOOCHOW.—During the greater part of the interval the Congou market had been quiet, with drooping prices, until near the close, when Teamen made a concession of about one tael in prices of grades above common, which led to increased purchases, particularly on Australian account, and for that quarter there were several buyers. The stock of Congou was tolerably large, and, as third crop leaf cost less than the second, Teamen were anxious to realise at the ruling quotations, but they refused at the moment to give way more. The third crop Congous were more satisfactory in quality, having more point and character than the second crop, but many of them were objectionably dusty. In Souchongs a few transactions had taken place at slightly easier rates. The Ooloong market remains unopened, owing to the excessive demand on the part of the holders; most of the fine parcels had been placed on the market. Scented Teas had been sold to a fair extent at a reduction of about one tael. Settlements had been—Congou: 27,467 chests at Tls. 7.8 to 8.8 o.b for dust to siftings; Tls. 10.8 to 13.8 o.b. for broken leaf; Tls. 15.8 to 18.3 o.b. for ordinary to good common; Tls. 19.8 to 23.3 o.b. for flavoury to medium; to Tls. 27.8 o.b. for good medium. Souchong: 1,253 chests at Tls. 18.3 to 22.8 o.b. for low common to common; Tls. 26.8 o.b. for medium; Tls. 31.8 to 38.8 o.b. for fine to finest. Ooloong: 287 half-chests at Tls. 18.8 o.b. for low common; Tls. 24.8 o.b. for a chop called Ooloong but not true Ooloong. Scented Tea: 10,763 boxes Caper at Tls. 21.55 to 25.5 o.b. for common to medium; Orange Pekoe, at Tls. 24.8 to 2.93 o.b. for medium to good medium. Flowery Pekoe, at Tls. 20.8 to 48.3 o.b., 616 chests.

AMOY.—Since the 7th Aug. about 8,000 half-chests of Oolongs had been settled at the quotations then ruling. Choice Teas continued to command full prices, but the demand for medium and lower grades was weak at the close. Arrivals had been 131,237 half-chests, and settlements 126,783 half-chests, leaving a stock of 4,454 half-chests. The Aurora Australis and Tamerlane were still loading for New York, and the Kin Lin for Boston. Rate of freight by all three vessels was £3 10s. per ton. The steamship Cyphrenes is expected for New York.

CANTON.—Fair transactions had resulted, as holders had made concessions which induced buyers to resume operations. Common to medium Scented Capers had been bought at a decline of one to two taels, though the better kinds had not given way so much in price. Scented Orange Pekoes, though lower than previously quoted, had been less freely parted with than Capers.

SILK.

YOKOHAMA.—The market had continued in the same active state as last reported, and a large business had been done, resulting in the settlement of about 1,000 bales, the bulk of which were Hank sorts. Arrivals had been exceedingly large, consequently dealers had shown some anxiety to meet buyers, and a decline in prices of about $25 per picul for medium and inferior Hanks had resulted. A parcel of Kakeda Oshu had been purchased at $760 per picul. Settlements, Hank sorts, 850 bales; other sorts, 150 bales; total, 1,000 bales. Quotations, including all charges in Yokohama and London, Exchange 4s. 8d. 6 months' sight, were as follows:—Hanks, Mybash and Sinchu, extra, 31s. 6d. to 32s. 3d.; best, 29s. 7d. to 31s. 2d.; medium, 27s. 8d. to 29s. 3d.; inferior, 25s. 7d. to 27s. 4d.; Hamatski medium, 28s. 1d. to 29s. 3d.; Coshu medium, 26s. 7d. to 27s. 8d.

Digitized by Google

SHANGHAI.—Messrs. Skeggs and Co.'s Circular is as follows:—Our last circular was dated the 27th July, and the following week's business was limited to about 1,500 bales, buyers being less sanguine since the receipt of unfavourable telegrams, and dealers on the other hand determinedly refusing to lower the prices of any Silk with charactor. Chops were taken at Tls. 590, Blue Elephant Tls. 530, and Red Peacocks Tls. 515. Market sorts were quoted Tls. 5 to 10 lower, but frequently so only in the buyer's opinion. During the present week business has again been limited to about 1,800 bales, of which over 300 are Re-reels and best Kahings for America. Purchases for the European market are on a much smaller scale than has lately been usual, as dealers maintain the price of good Silks, and it is only in the common and undesirable sorts that a decline of Tls. 5 to 10 can be quoted. Blue Elephants have fetched Tls. 530, and Red Peacocks Tls. 510.

CANTON.—Since the 31st July the market had been very active for the descriptions of Silks suitable for shipment to Europe, and a large business had been done. Prices being $5.00 to 10.00 lower, a great many orders with limits had been executed, which the high rates ruling previously kept in abeyance. The third crop was all in, and musters of the fourth were expected in about a week from date; the crop was reported larger than the average, but the Silk again failed in cleanliness. Re-reeled Silks had not been in much demand; some contracts had been entered into, but particulars were not known. Settlements for the last French mail supposed to be 950 bales, and for this mail 500 bales, a large proportion of which was composed of Market, or No. 4 Tsatlee Reels. Stock estimated at from 600 to 700 bales.

GLYCERINE
DE
TOILETTE.

(HEALTH.) **NEW PERFUMERY.** (BEAUTY.)

INVENTED BY

EUG. DEVERS, QUIMICO.

PATENTED S.G.D.G.

PREPARATIONS for the Toilet, and particularly Soaps; Powders, &c. for the Teeth; Toilet Washes, and Vinegars, have of late assumed an importance in proportion to the demand for them. Foremost amongst these is GLYCERINE, a remarkable unctuous substance, which softens the skin without greasing it; its valuable qualities were quickly recognised by the most eminent physicians. Experimented on by MM. Dumarquay and Sutom (See "Reports and Memoirs of the Biological Society, 1836," &c.).

GLYCERINE CREAM for the skin.
GLYCERINE TOILET WATER for baths and ablutions.
GLYCERINE ELIXIR for the mouth.
GLYCERINE POMADE against scurf.
GLYCERINE SOAP for chaps and chilblains.
GLYCERINE ANTIPELLICULAIRE to prevent the hair falling off.
DULCIFIED GLYCERINE CREAM SOAP for the beard.
PATE DENTIFRICE à la GLYCERINE for the teeth.

GELLÉ FRÈRES, 35, Rue d'Argout, 35,.

(ANCIENNE RUE DES VIEUX AUGUSTINS),

PARIS.

SUCCESS IN INDIA,

AND HOW TO ATTAIN IT.

EFFINGHAM WILSON, Royal Exchange.

The writer is evidently well acquainted with the East, and the information afforded by him is both useful and interesting.—*Daily News.*

The honest yet hopeful way in which practical information is communicated in these pages concerning actual life in India will awaken the dormant enterprise of young men of education and ability, whose prospects may be somewhat indifferent at home.—*Globe.*

A valuable little pamphlet.—*Morning Post.*

The author of this very sensible work appears quite at home in his subject.—*Financier.*

We leave the little book with much the same impression as would be derived from the conversation of an intelligent and observant man of the world.—*Bullionis*.

A real and practical knowledge has been brought to bear upon the subject.—*Money Market Review.*

The author of the above-named pamphlet formerly editor of the *Indian Examiner*, and since on the staff of daily and weekly journals in London, seeks a re-engagement as editor in China, Japan, or Ceylon. The advertiser has a thorough knowledge of the practical working of a newspaper, and could undertake the business department also.

Address, J. D. B., care of the Editor of the *London and China Telegraph*, 2, Cowper's-court, Cornhill, to whom references are kindly permitted.

HOLLOWAY'S OINTMENT

AND PILLS.—At all seasons and in all climates few ailments are more disheartening, and none more ominous than ulcerations on the surface of the body. Wherever they are situated it is difficult to cure them, unless treated judiciously with some cooling, healing, invigorating application like this never-failing Ointment. It has worked wonders in making bad legs sound and strong, even when the power of the blood vessels had nearly been destroyed, the valves in the veins perfectly powerless to sustain the column of blood contained in them, and almost entire stagnation of the circulation had rendered every other curative means abortive. No sore or ulcer can withstand its healing influence, few skin diseases its sanitary virtues.

Per steamer *Drummond Castle*, from London, Sept. 28.—To Singapore: Capt. Kirk, Mr. Hoskyn. To Hong Kong: Mr. Hochne. To Shanghai: Mr. Litchfield, Mr. Milne.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The P. and O. mail *via* Brindisi, and the Pacific mail *via* San Francisco, bring advices to the same date, the 7th August; the French mail from London, June 7, arrived out on the 24th, and the following P. and O. mail of June 14 on the 27th July. The following summary of news is from the *Japan Mail* and *Japan Herald*:—

Several official changes have lately been made, Mutzu Munemitzu, Governor of Kanagawa, being appointed to the Finance Department, and Nakayama, Inspector of Customs, being transferred to Kobe. The Vice-Governor here has been assigned to fill Mutzu's post.

A meeting was held on the 31st July, at the Chamber of Commerce, for the purpose of organising a branch of the Royal Asiatic Society. There were present the Rev. W. E. Syle, Admiral Shadwell, Messrs. E. Satow, W. H. Smith, E. Van Reed, C. B. Watson, Howell, Brooke, Lowder, Patow, Robertson, Walsh, Wilkin, Captain Arthur, and Dr. Hadlow; Mr. R. G. Watson, H.B.M.'s *Charge d'Affaires*, presided, and in opening the proceedings said it might well be considered a reproach to Japan that a Society which they had met to organise had as yet never been formed in this country. Every country in Europe possessed three or four societies of a similar learned nature; foremostamong them, which stood out in honourable relief, was the Royal Asiatic Society of London. That Society was largely indebted to correspondents abroad. He knew of an affiliated Asiatic Society in India, established at Bombay, which had furnished much information to that of London. There was also a Society for China, whose headquarters were at Shanghai, but at present Japan had none. It should be considered how little we know of this country, how much there is to learn of its laws and manners, its sciences, including ethnology, geography, and geology, and what a promising field is opened up in Japan for inquiry. Such a Society would help to preserve records of the establishments of Japan which now were fast becoming obsolete, perpaps soon to be erased from the memory of mankind. Admiral Shadwell, who is a member of the Royal Asiatic Society, was present. The following rules, forming the constitution of the proposed Society, were then read:—

Digitized by Google

I. The Asiatic Society of Japan has for its object to collect and publish information of permanent value respecting Japan and parts adjacent. II. Residents of Yokahoma may become members by payment of an annual subscription of $5; honorary and corresponding members by election, without payment. III. The officers are a president, two vice-presidents, a secretary, a librarian, and a curator. These officers, together with resident members chosen for the purpose, form the council of the society, by whom all its affairs are managed. IV. Meetings of the society are held monthly, or oftener, at the discretion of the council. V. This constitution may be amended by a vote of two-thirds of the members present at a regular meeting.

These rules were adopted on the motion of Vice-Admiral Shadwell, and it was arranged that the society should communicate with the Royal Asiatic Society of London, with a view to its becoming the Japan branch of that institution.

It is hardly a month since (says the *Mail*) that we spoke in very plain terms of the infamous character of the correspondence admitted into the *Hiogo News* under the head of Yokohama. The scoundrel who writes these letters—and whom, if we can track him, we will assuredly gibbet, name, nationality, profession, and all—has at last brought about precisely the kind of trouble his letters were calculated to produce. Exasperated by the insults levelled unmistakably at himself, Dr. Tryon, an officer of the United States Navy, a gentleman well and most favourably known to the residents of this port, went in company with Flag Lieutenant Emory, of the *Colorado*, to the office of the *Hiogo News*, and demanded an apology for the insults put upon him. A form of apology was agreed upon by the respective parties, and the two officers left. But instead of this apology being published, an explanation was made in the paper, which was deemed insufficient—as it was. The two gentlemen again went to the office of the *Hiogo News*, high words arose, and Dr. Tryon struck the representative of the paper—whoever he may have been. The inevitable consequences ensued; the matter comes before the American Consul, and, of course, eventually before the American Admiral.

We are not (continues the *Mail*) in the least surprised at the affair, however great may be the regrets it causes us. The letters of the anonymous Yokohama correspondent of the *Hiogo News* ought never to have been published by any paper whatsoever; they were scandalous and disgraceful, and reflected the gravest discredit upon those who permitted their publication. We trust the Admiral or the authorities at Washington will take a common-sense view of the matter, reprimand the officers, and reinstate them. As to the cowardly ruffian from whom the correspondence emanates, the sooner sufficient tangible evidence of his identity comes out, the sooner his punishment will come. It is high time a stop was put to these things, which disgrace every foreign resident in this country.

A meeting to receive the report of the commission elected to inquire into the management of the General Hospital during the past year was held on the 29th July. The report consisted mainly of a number of suggestions for the future management of the institution.

An act of piracy is reported. Six armed men during the night attacked the European built but Japanese owned ship *Honai Maru*, lying off Kanagawa, and, after a short conflict with the crew, in which one was killed and several wounded, the pirates managed to possess themselves of the ship. They secured all the valuables they could lay their hands upon, including a sum of $2,185, bound fast the crew, and escaped.

The cause of Findlay, Richardson, and Co. *v.* Pitman and Co. was to have been heard on Aug. 2, the Chief Judge having, as already reported, given the plaintiffs the option of showing cause why the case recently heard before the Acting-Assistant Judge should not be appealed to Shanghai or reheard in part, or of declining to take any action. Mr. Davidson, who represented the plaintiffs, adopted the latter course. The Chief Judge will now consider the argument put in by Mr. Dickins on behalf of the defendants, and will render his decision on his return from Hakodate, whither he is going in the *Iron Duke*.

Mr. Davis has brought his plans for watering the streets of this settlement into operation, and the community have had abundant opportunity of experiencing the grateful change he has brought about. Some decided action will have to be taken to prevent Mr. Davis losing money by his efforts. In the first place, he has laid out $500 for his carts, $250 for his pumps, and labour costs him $10 a day. On the other hand, his receipts only amount to $240 a month, and thus he loses money on the employment of labour alone, to say nothing of the $750 first cost of his material.

On the 22nd July, at the Bluff Gardens, a pyrotechnic display took place with every success. The Gardens were fairly attended, and soon after the appointed time the display commenced—serpents, rockets, and a thousand other fireworks, whose names are unknown, being let off, and apparently giving very general satisfaction.

Telegraphic communication between this port and Nagasaki is completed, and now only awaits the arrival of batteries from England.

A great number of shipping cases have been heard at H.B M.'s Consulate; they consist chiefly of the refusal of the crews to work.

The weather has been seasonably warm. The general health of the settlement remains unaltered. The crops appear to promise well.

The man Schnerr, who was recently brought before the Austro-Hungarian Court on a charge of robbery, is to be removed to Shanghai for trial.

The buildings in connection with the new Custom-house are progressing satisfactorily.

The Pacific Mail Company's steamer *Great Republic*, with advices from Yokohama to the 21st August, arrived at San Francisco on the 12th inst. The summary of news brought by this steamer as telegraphed to the New York press is unimportant, the only item of interest consisting of the statement that the Mikado has returned to Yedo.

NAGASAKI.

(FROM OUR OWN CORRESPONDENT.)

NAGASAKI, AUG. 2 (VIA SAN FRANCISCO).

Yesterday morning the French and English mails of the 7th and 14th June arrived by the Pacific mail steamer *New York;* the latter in forty-four days from London. The mail leaving San Francisco on the 30th ultimo is not due here until the 31st instant. Almost every steamer bringing the mails *via* Europe, and taking them *via* San Francisco, have had their due dates to arrive fixed for Sunday morning at daylight, and their departures fixed for midnight on the same day. The company have much to answer for on the charge of Sabbath-breaking, and I believe that if another company starts who will give their attention to the avoiding of such inconvenient arrangements they will have the sympathies and support of shippers of cargo on their side. The public are getting very tired of the continual Sunday work, and are growling considerably, and I hear that the Rev. Henderson Burnside is endeavouring to get a memorial addressed to the agent here for transmission to headquarters, as the present state of things is the means of causing his church to be almost deserted. It would not matter in the least if people could see their way to prepare on the previous day, but this it is almost impossible to do before the receipt of the inward mail. To close all up on Saturday would suit everybody, and if the steamer came in on that day and left the same night it could make no difference to the company, whose vessels are often lying at Shanghai for several days.

Since my last letter of the 15th inst. the chief event has been the visit of the Mikado, who landed here on Friday afternoon, the 19th inst., at six o'clock, and left again on the Monday following at the same hour. His visit is regarded as one of very great importance, owing to the sweeping changes it will assuredly bring about. The appearance of the Sovereign in a foreign suit of clothes has been too much for the native population, who, instead of regarding him as a heavenly being, and being awed by his presence, have changed their views now that they find him to be but human. Of course rumours have been plentiful amongst a superstitious and ignorant people like the Japanese lower class, and foreigners who are looked up to for information by the former have been treated to some of the wildest inventions imaginable. It is quite clear to everyone that so far as Nagasaki is concerned the Mikado's spiritual reputation is irrecoverably gone, and that to secure the feelings of loyalty from his subjects it will be necessary to raise the minds of men to a higher standard by educational measures, by the diffusion of useful knowledge of every kind. I have even heard that foreigners are to be found who are of opinion that a great mistake has been made by his Majesty's advisers in allowing him to appear as he did. When you hear of such expressions as these, and from those who are supposed to entertain progressive views, it leads one to suppose that Japanese statesmen are in advance of some of the Western folks. Nothing short of breaking down and destroying old prejudices will do any good for Japan. The people of the present generation require treating like children at first, as without being led they cannot be expected to do anything of their own accord after being in the leading strings of a paternal Government so many years. The *Nagasaki Express* gives the following account of the Mikado's movements during his stay here :—

On Sunday morning, the 22nd July, as early as 7 A.M., his Majesty paid a visit to the Gon Rei of Nagasaki-ken at his official residence, and later in the morning the two Government works—the Akanora factory and the Patent Slip—were visited. At the latter the Japanese steamer *Swatow* was hauled on the gridiron in his presence. After this had been accomplished, he inspected the machinery, and had the working of it explained to him, in which he appeared to take great interest. Mr. Blaikie, the manager of this establishment, and his assistants, Messrs. Gill and Douglas, were presented with a *souvenir*, which will no doubt be regarded by them as a pleasant reminiscence of his Majesty's visit. The site of the dry dock on the other side of the harbour, where the work has been suspended for a long time, was not inspected, probably as it is an undertaking existing only on paper. It was originally intended that a visit should be made to the Custom-house, and to the Great Northern Telegraph Company's office, but this was not carried out. We understand that his Majesty was desirous of exchanging messages with the principal crowned heads of Europe, but this it was found would occupy too much time. In the evening the harbour presented a very pretty appearance; the Japanese fleet and several merchant steamers responded to the shore illuminations previously displayed. Every vessel had its bulwarks, &c., covered with lanterns from stem to stern, and their yards dressed in the same manner. The town and

Digitized by Google

suburbs were again illuminated, and fire-balloons were sent up. On the following morning, at six A.M., the Mikado left Ohara in his barge, and proceeded to the *Rufo kan*, with a similar escort to what he had on landing, and embarked on board under the customary salute from the Russian corvette *Vetiaz*, the U.S.S. *Monocacy*, and Japanese vessels, and by eight o'clock the squadron had passed the point *en route* for Kumamoto, with the exception of the *Kasugo kan*, which did not leave until Wednesday.

The temporary apartments occupied by his Majesty have been thrown open to visitors, and numbers have availed themselves of the permission given to make an inspection of them during the week. The native tradesmen who have supplied articles for his Majesty's use are proud of the honour conferred upon them, and will not be slow in turning it to account. "Confectioner, &c., to his Majesty," will no doubt be inserted in their business announcements in a similar manner to that adopted in Europe. By command of the Mikado the Governor of Nagasaki has addressed a letter to the Consuls representing the Treaty Powers, requesting them to thank their countrymen for the cordiality displayed.

The illuminations which this community exhibited on the occasion of the Mikado's visit were extremely successful, and, as these were the first which have been given to him, they are rendered of much greater interest than they would have been had they been simply a copy from some other place. This is the second occasion on which Nagasaki has been first in the field in this line—the first being when the Duke of Edinburgh paid a visit here. The next attempt at a similar display will be made when the Grand Duke Alexis of Russia, who is expected here next month, arrives.

Of general news there is not much to give. The case of "P.M.S.S. Company *v.* Gribble" has been heard, but the verdict has not yet been given by Sir Edmund Hornby, who left by last steamer for Yokohama, from whence judgment is to be delivered. Another case, "Boeddinghaus, Dittiner and Co. *v.* Gribble," as agents for Holt's line of steamers, has been heard before Mr. Marcus Flowers in H.B.M.'s Provincial Court, and has resulted in a verdict for the defendants. The claim was for cargo delivered in bad condition, and part of which had been lost, owing to the cases being broken.

Business has scarcely revived since the Mikado's departure, but some extensive settlements of tobacco have been made, which it is believed are intended for London. Nebus are quoted 395 per $100. Exchange on London 4s. 8d. nominal. Freight to London nominal, as there is no vessel on the berth.

CHINA.

—o—

TIENTSIN.

(FROM A CORRESPONDENT.)

TIENTSIN, July 30.

The French corvette *Linois* arrived at Taku on the 22nd July with M. L. de Geoffroy and suite, and on their arrival the gunboat *Couleune* steamed alongside, and his Excellency was received by Mr. Dillon, French Consul. They proceeded at once to Tientsin, and arrived there on the evening of the 23rd. On the 25th his Excellency and suite, with his mounted escort, paid an official visit to Li-Hung Chang, the Viceroy—the first time a Foreign Minister has gone to Tientsin with a fully mounted escort and staff; and no doubt the Viceroy was rather surprised to see such a contrast to the suite of other Foreign Ministers, which generally consists simply of an interpreter. Li-Hung Chang returned the Minister's call on the 26th inst.; arriving with a miserable suite of a few Mandarins on ponies, and dirty followers. Mons. Geoffroy's dignified tone and gentlemanly bearing rather surprised the Viceroy. In the cool of the evening Mons. Geoffroy rode into the city, attended by his suite, and visited the graves of those who were so cruelly massacred by the Chinese on the 20th June, 1870, and was deeply affected at the sight before him. He also visited the Cathedral, which is to be restored by the Chinese Government. On Saturday, the 27th, Mons. Geoffroy left by boats for Tungchow, *en route* to Peking. His escort was fully mounted, and the boats left whilst the French gunboat *Couleune* was firing a salute of fifteen guns. Mons. Dillon, the French Consul, Count de Kergamint, and other gentlemen on H.E.'s staff, with the mounted escort, left on the 29th by road, to await the arrival of Mons. Geoffroy at Tungchow, when the procession will be formed for Peking, and Mons. Geoffroy is expected to arrive at the French Legation on the 1st August. Whilst Mons. Geoffroy was at Tientsin a battery of Krupp's steel guns arrived per *Shantung*, costing the Chinese Government, they say, about $8,000 each gun; and Li-Hung Chang lost no time in sending them to the new forts between this and Taku. A further lot of guns is shortly expected; together with a supply of torpedoes lately arrived from England, by the steamer *Craigforth*.

Heavy rains have set in at this place.

SHANGHAI.

We have advices from this port to the 11th August. The P. and O. mail from London June 28 arrived out on the 7th August, the same steamer bringing the French mail of 21st June, which had been delayed by the accident to the Messageries Maritimes steamer *Donnai* The following summary of News is from the *North China Herald* and *Shanghai Courier*:—

M. Vignale, Consul-General for Italy, has resigned the position of Senior Consul, which had fallen to him on the departure of Mr. G. F. Seward, United States Consul-General. During the few months for which he has held the position, M. Vignale has been indefatigable in his exertions to fulfil the duties devolving upon the senior in the consular body, in a way creditable to that influential corporation and advantageous to the foreign community, both in its commercial and municipal relations with the Chinese authorities. M. Vignale leaves shortly for Japan, and Mr. Alabaster, H.B.M.'s Acting-Consul, has been appointed Consular Delegate, to act in the name of the Senior Consul.

The bulk of the Grey Shirtings settled during the week have been mildewed. It is matter for surprise, and, we may add, no little regret, that our Chamber of Commerce does not give this evil some consideration. It is surely widespread and serious enough to call for some remonstrance. We know that it is altogether vain for individuals to seek redress in Manchester, for, by some mysterious process, unknown to us and to the majority of China merchants, the damaged specimens (bales and pieces selected by disinterested surveyors, and packed in tin lined cases) forwarded to Manchester have turned out cleaner and sounder than when they were originally despatched from the warehouses, and Manchester men have hitherto repudiated all responsibility in consequence. Would it not be worth while to have the question of liability tried in a court of law at home? We believe every member of our Chamber of Commerce would heartily endorse any action the committee might see fit to take in this respect. Mildews are now the rule, and even the very best makes are no longer free from the imputation.

A meeting of the promoters of the Tramways Company has been held, at which the opposition likely to be raised to the scheme at the ratepayers' meeting was discussed. It was finally resolved that, to meet the views of those who are indisposed to see an experiment tried on the Bund, and also considering the probable delay which would occur in even the commencement of the present plans, the Tramways Company should at the forthcoming meeting only ask for permission to lay a single line of rails from the Soochow Creek end of the Fuhkien-road to the Yang-king-pang Creek. The sanction of the French Municipal Council for continuing the line to the North gate of the city will be afterwards sought for.

The new light at Woosung was shown for the first time on August 1. The new illuminated apparatus is a dioptric one of the fourth order, showing a fixed light over three-fourths of the circle, while the light of the remaining fourth is utilised by means of a reflector of silvered copper, which throws it across the entrance to the Woosung River. A white light is seen over the navigable channel, on each side of which a red light only is visible. There is but one lamp, in the centre of the apparatus, the colouring being effected by means of screens of ruby glass. The light consists of five lens rings in the centre, with as many prisms placed over, and three under it; these collect the rays of light diverging from the flame and throw them out towards the horizon. The lamp, which burns kerosine, is of peculiar form, to suit the apparatus. A lightning conductor of copper wire rope extends from the blocking deep into the soil at the base of the tower, where it is attached to a sheet of copper placed in a pit filled with charcoal. The tower is 48 feet high, square on the exterior, but round in the interior, with a spiral staircase of 68 steps. Bricks have been chiefly used in its construction, but the door facings, stairs, and top course are of stone from Ningpo. Mr. Hart, Inspector-General of Customs, has taken his departure for the North, accompanied by Mr. Henderson, Chief Lights' Engineer, in the steamer *Feihoo*, in conjunction with whom he will make a tour of inspection of the lights existing, in progress, or projected, for the guidance of navigation on the northern coasts and islands of China. The tour will occupy about a month, after which Mr. Hart will proceed to Peking, where he will arrive in time to see the transmission of proper documents to ensure the long-deferred and much-bungled opening of Hainan, which is semi-officially announced to take place early in October. An action likely to attract considerable public attention has been commenced in H.B.M.'s Supreme Court on the suit of Mr. James L. Brown, barrister-at-law, and formerly a member of the Imperial Maritime Customs Service, against Mr. Hart. Mr. Brown claims something like Tls. 7,000 for surveys, plans, estimates, superintendence, &c., in connection with certain lighthouses, harbour works and improvements in navigation at Ningpo, Foochow, and Canton, and for recommendations as to the clearing of harbour approaches by steam dredges—for some of which works Mr. Brown claims the merit of being the first of their kind in China.

At the Mixed Court, on the 7th August, a case was heard which may prove of some public interest. The captain and owners of the *Fuhle* steam-tug, through Mr. J. S. Baron, agent, handed over to the Court some 1,500 Foochow poles, the cargo, more or less, of a junk from Foochow to Canpu, which the *Fuhle* found in a state of distress near the light-ship, and brought safely into port. The object of placing the lumber in the custody of the Court was in order that it might adjudicate on the same, so as to secure to the *Fuhle* the reward claimed per agreement for salvage services. Mr. J. L. Brown appeared on behalf of the captain, with the view of resisting the claim of the *Fuhle* to salvage, on the ground that she rendered only the customary

Digitized by Google

services of a tug steamer. After hearing the pleadings at some length, the Court reserved judgment.

The English mail last received has taken only thirty-eight days and fifteen hours in transit from London. From a few notes of the voyage of the *Hindostan* as far as Aden, we find that in one day's steaming she did 336 miles, or fourteen knots an hour. If the P. and O. Company's new boats go on like this, we may count on a material shortening of the tedious voyage to and from England.

The last of the road steamer has been shipped by the *Sin Nanzing* for Tientsin. As the machinery had to be taken rather minutely to pieces, however, to facilitate shipment, it will be some time before it can be put together again, but we may hope to hear in a month or two that this interesting innovator has at last developed into a thing of life and action.

Mr. Burge R. Lewis, the United States Consul-elect for Hainan, has arrived here on a visit, to recruit his health, which has been seriously impaired by the discomforts and privations to which he was exposed during a visit he made to Kiungchow, to make preliminary arrangements for his consulate. The voyage back to Hong Kong, in a native junk, occupied eight days of most unwholesome weather.

The rebuilding of the British Consulate has reached the pitch of the eaves, and the massive roof-trees are being prepared to cover it in.

By an Imperial edict of the 8th July, the father of the Empress elect was raised to a dukedom of the third rank, while the mother was raised to a ladyship of the first degree, with all the honours of a duchess.

NINGPO.

(FROM A CORRESPONDENT.)

NINGPO, JULY 23, 1872.

The summer through which we are now passing, and the strength of which was broken, we hope, two days ago by a thunderstorm of unusual severity, has been remarkable for its late arrival, and its fierce heat when once upon us. There was no real summer heat till June 30, though we had many hot days in April; but from June 30 till July 21, with little cessation, the heat by night as well as by day has been very great. In some foreign houses the thermometer has touched 100 deg.; and in none did it fail to rise above 90 deg. for three weeks in succession. The heat of summer and the sleeplessness caused thereby are supposed by some persons to excite the otherwise apathetic Chinese to thoughts of violence if not to deeds of blood. Certain it is that not only the Tientsin massacre, but also the numerous kidnapping excitements and assaults on mission or mercantile premises have taken place chiefly in the summer. The Chinese, like the Athenians, having an eager appetite for news, are driven in the sultry summer nights and under the full moon to invent intelligence and concoct rumours, and now that the "long-haired" are extinguished the most fertile topic is, of course, the "red-haired." I notice, therefore, with thankfulness the remarkable freedom from rumour and excitement amongst the people during this remarkably trying summer. Earlier in the year the word was passed from mouth to mouth amongst the city and country people that the foreigners' prestige was gone in Ningpo, and that we should soon be driven out, but nothing has yet occurred in fulfilment of the reports.

I trust this repose is not a lull before a storm. There must be, one would hope, *some* sincere friendly feeling at head quarters to account for this quiet below. The Imperial marriage in October, however, and the Audience Question, more weary and protracted, though more direct than the Indirect Claims, make one somewhat anxious for the future. One longs for a little of the more positive policy of Japan. Either honestly persecute or honestly tolerate Christianity. Either say to foreigners be good enough to clear out, or cease muttering such sentiments in secret; and open the gates of the Empire wide to mercantile and philanthropic enterprise. I confess that when reading the extract from Lord Elgin's correspondence I tremble for England's future in China. Have overbearing conduct, injustice, harshness and meanness, stained too often our past career in dealing with this Empire; and must not the retribution come? One turns with some comfort to the list of philanthropic efforts for the good of the Chinese given by your correspondent, "E. W. S.," from Shanghai. Ningpo and other open ports and cities of the Empire could add to that list; and one ventures on the hope that those "troublesome people," the missionaries, to whom your correspondent alludes, "always getting themselves and others into trouble," will yet be found to have averted trouble from their fellow countrymen.

HONG KONG.

Our advices by this mail extend to 17th Aug.; the French mail from London 5th July arrived out on the 11th August. The following items of intelligence are taken from the *Overland China Mail*:—

The half-yearly meeting of the Hong Kong and Shanghai Banking Corporation was held on the 14th August, Mr. T. Pyke presiding. The chairman having read the report—which was published in our last issue—said that he would draw the attention of shareholders to one item in the accounts. As most present knew, the Bank was interested in the sugar refinery at East Point. To meet any possible liability the directors had deemed it prudent to set aside a sufficient sum in this connection to place the accounts of the Bank on a satisfactory footing. The report was then carried unanimously, as was also a motion that Messrs. Forbes and Lemann be confirmed as directors, and the meeting separated.

A meeting of the China Sea, Saigon, and Straits Steamship Company was held the same day. The statement of the working of the company for the half year ending 31st December, 1871, was not satisfactory, inasmuch as only $1,192.54 appeared at the credit of the working account, and, after appropriating $400 to the compensation of themselves and the auditors, the directors recommended the balance to be carried forward to the next account. The report was adopted.

The following is the report of the Hong Kong and Whampoa Dock Company, for the six months ended 30th June, to be presented at the meeting of shareholders, to be held on the 20th August:—

The Docks have been well employed during the six months under review. The sum of $25,000.00 has been written off, as recommended in last report. The gross earnings of the company for the six months amount to $334,278.79, on which there is a net profit of $59,715.75. The debt due to the estate of John Lamont in the last report stood at $70,000.00, and within the last half year $45,000.00 has been paid off, (including the $30,000.00 mentioned in last report), thus leaving the debt at $25,000.00. The directors recommend that a dividend at the rate of 3 per cent. for the half year be paid, together with $6,000.00 to contributing shareholders. The amount available for distribution, including $1,680.32 brought forward from last half year, is $61,396.07, which is distributed thus:—Dividend 3 per cent. for the half year, $30,000.00; to contributing shareholders, $6,000.00; directors' fees, $2,500.00; auditors' fees, $250.00; total, $38,050.00, leaving $22,646.07. And the directors also recommend to write off for depreciation a sum of $20,617.34, leaving a balance to be carried to new account of $2,028.73.

Mr. Keswick having left the colony, the board have filled the vacancy by electing Hon. Mr. Whittall as chairman. The board have appointed Mr. A. F. Chambers as auditor, in place of Mr. James Hart, and this appointment will have to be confirmed by the shareholders.

The Austrian Consul-General has received a telegram from his Government authorising him to charter a steamer, or arrange for steam freight, for all articles intended for the Vienna Exhibition. This will allow intending exhibitors to send home their articles free of charge, and will doubtless add considerably to the inducements before held out. Nearly all the ports are contributing more or less fully, Shanghai and Canton, as is natural, offering the best field wherein to obtain suitable objects. The arrangements for transit will, we understand, be completed in two or three months.

The steamer *Sunshine* went on shore on a reef three miles west of Breaker Point at daylight of 12th August, during thick weather. The fore compartment is full of water, and it is said that the stern swings clear of the reef. Fortunately she has but little cargo on board. The steamer *Kwangtung* arrived at the scene of the wreck on the 13th, and left again for the purpose of getting assistance.

The Chinese procession is fixed to come off on the 20th August, but the *Ta Chiu* ceremony (exhibition) will be opened on the 19th at West Point. We learn that the amount of subscription is verging on $16,000. The two largest subscribers are the Fook Mow Loong and Hung Foong Hongs, each contributing $373, and we understand that lots were cast to determine which of the two should appear at the head of the list of subscribers. The procession will parade the streets for three days, but the exhibition will be kept up for five days and nights.

The Pier and Godown Company laid down a screw mooring on the west side of the new pier on 12th Aug. As the permanent buoy is not ready, the chain will be buoyed by a small buoy for the present. The company have also one screw buoy moored in its place off the east side of the new pier.

A large "peep show" is now open in one of the rooms below the new Chinese Theatre. It contains views of several of the battle-fields in the late Franco-German war, and includes portraits of Napoleon III. and two or three French generals. The Chinese appear to patronise the show somewhat extensively.

The notorious character Lee Ayee, who was sentenced last year to seven years' penal servitude and three whippings for robbery with violence, has made a desperate attack on Mr. Alfred Grey, warden of the gaol. This he did striking him a heavy blow with his fist on the back of the head. Lee Ayee was the same man who attacked Dr. Kane, and who subsequently attempted to throw Inspector Grey over a precipice. The matter was reported to the Governor, and Lee Ayee was sentenced to receive thirty-six strokes of the lash.

A daring attack has been made upon an opium shop at Fatshan by an armed party of five men, who threatened the inmates should they raise any alarm. They succeeded in plundering money and property to the value of over $800.

The circumstances of the duel between the Spanish Consul, M. Checa and the ex-Peruvian Consul at Macao have been investigated at the Police-court. M. Checa has been committed for trial at the Criminal Sessions, on a charge of conspiracy with others to take away human-life.

The share and general brokers held a meeting on the 12th

Digitized by Google

August, and drew up a resolution adverse to the proposed Ordinance.

A temple has been burned at Canton, involving an estimated loss of $40,000.

(FROM A CORRESPONDENT.)

HONG KONG, Aug. 16, 1872.

Since I last wrote the most important topic of political interest —of which, by the way, you will see no mention in the northern papers, though the *China Mail* publishes it as authentic—is the renouncement by Germany of her treaty with China. You will doubtless be able to ascertain full particulars from authentic sources at home, so I shall not risk carrying coal to Newcastle by giving you our crude ideas out here. If, as I believe, the news be true, it will have an important effect on Chinese policy.

Locally the chief subject of interest is the committal of Senor Checa, Consul for Spain at this port, for trial at the next criminal sessions on a charge of conspiracy with others not in custody to attempt to take human life. The Acting French Consul, who acted for his notorious opponent—fancy an affair of honour with a convicted murderer, for convicted Torre Bueno was, and sentenced, moreover, to fourteen years' incarceration, though the Macao council, composed of men who are supposed to be above bribery, quashed the conviction—was put in the witness-box and literally "bounced" out of his evidence. However, you will find all that in the papers. Mr. Whitall, much to the indignation of a good many, who don't see why councillorship should be hereditary in the East Point firm, has taken Mr. Keswick's place as M.L.C., at least he has been sworn in since my last—and signalised his first appearance by a furious onslaught upon the Pier Company, which at a distance of a mile has dared to project an obstruction remotely affecting East Point waters. Sir Arthur Kennedy is much liked, but is rather too pro-Chinese, not quite understanding that there are not above six Chinese in Hong Kong who would be deemed eligible visiting friends by a mandarin's runner. The conduct of the Chinese Hospital is just at present being strongly discussed. According to the statements made in defence of the Government, Sir R. Macdonnell gave it $115,000, to encourage the native system of dirt, inhumanity, and gross ignorance. Others maintain that, though the *medical* treatment of the patients was left to Chinese discretion, what may be termed "the surgery of common sense" was to be insisted on—that is, that though no patients could be obliged to submit to operations or take our medicine, clean bandages and sensible general treatment was to be insisted on under the supervision of the Colonial surgeon. My private impression is that the common sense party will carry their point of insuring either proper treatment or the withdrawal of the grant. It is a pity that we cannot get at Sir R. Macdonell's intention. If he sees the *London and China Telegraph* with this letter he might perhaps be induced to let us know what it was.

Who is to be the China champion in Parliament now that Colonel Sykes is dead? We want some one badly. The blockade question still aggravates the mercantile mind, and nothing but Imperial interferenee will settle it. The question put in a familiar way is "If you live in a bottle has anyone a right to station himself in the neck and levy tolls on everything passing?" The idea of conceding to a Power whom we are afraid to trust in matters regarding a few dollars—*vide* exterritoriality clause in the Treaty—full sovereign rights in her own waters is intensely absurd, and would be amusing if it did not hamper our trade. Sir Arthur says he cannot go beyond his instructions from home, but frankly acknowledges that another war with China is almost inevitable before things will get straightened out properly.

Our local debating society has proved a great success. Forty-eight members have enrolled themselves, and more promise to come. The amateur philharmonic now numbers twenty-four volunteer instrumentalists, but the society is not yet constituted.

The Great Northern Telegraph has broken down again. There is a mystery about that cable. Some say it was tampered with on the way out; others say that, owing to neglect in not keeping the cable-tanks full of water, the insulating material got softened and injured. At all events it is constantly breaking down. We want opposition lines here badly; there is plenty of work for them, and if the shareholders would be content to pay expenses for a couple of years, a *reliable* line would yield a handsome dividend in a few years.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

The present mail brings dates from this port to the 25th August; the French mail, with London advices to the 19th July, arrived out on the 19th, and the following P. and O. mail of July 26 on the 24th August. The following summary of news is from the *Straits Times*:—

The business transacted by the Legislative Council has not been of a very interesting character, though one or two matters of importance were brought forward. There have been three meetings, viz., on the 15th, 20th, and 22nd Aug. Several Bills have been passed, among them being the Steam Vessels Bills, a Bill to amend the law relating to the Transportation of Prisoners, and a Bill to amend the Penal Code. Several other Bills have been brought in and passed their second reading, notable among them being a Bill to make perpetual the preservation of the Peace Ordinance, and another to eerpetuate the Dangerous Societies Ordinance. The former ordinance has been the subject of hot debate in times past, but it has been persisted in by Government as a necessity. Whether the making such a law perpetual will be permitted by the Secretary of State remains to be seen. The Dangerous Societies Suppression Ordinance, as it is called, is believed by many to be a most useless piece of legislation, and the desirability of making it a permanent statute may be doubted. At the meeting on the 20th, the Hon. Dr. Little called the attention of Government to the manner in which the Colonial medical officers carried out the provisions of an Order in Council of 1870 regarding infectious diseases, and also inquired regarding the quality of rice supplied to patients at the Pauper Hospital. At the next meeting, on the 22nd, H.E. the Governor said sufficient care had not been taken in carrying out the provisions of the Order, but that the matter would now be remedied, and with regard to the rice supplied to the paupers in the hospital, the Colonial Secretary said he had found it to be very good, but to have been badly cooked. Who is to blame for this does not transpire in the official minutes. It is to be feared that the hospitals need a little sharper supervision.

At last the Contagious Diseases Ordinance is to be put into force, though, as a preliminary measure, it is only put into operation in the north division of the town. It comes into operation on the 1st Sept. It is hoped that the ordinance, as it exists here, will exert a very beneficial influence.

The Sporting Club have issued the programme for the autumn races, which are to extend over three days, commencing on the 30th September. As there are a number of horses in training, very good sport is anticipated.

From Klang and Salangore we hear very conflicting reports concerning the progress of the contending parties. At one time it asserted that Tunku dia Oodin has been actually driven out of the territory, and at another we hear that Mahdie and his followers are getting the worst of it. The truth, so far as we can ascertain, is that Tunku dia Oodin is holding his ground, and hopes to be able to restore order in a short time. The police have made several seizures of arms and gunpowder, believed to have been destined for Mahdie's forces. Some people think that H.M.S. *Zebra*, at present idle in harbour, might repeat the *Rinaldo's* visit to Salangore river last year, with a beneficial influence on the cause of order and peace.

Commercial Report.

—o—

(*For dates see first page.*)

IMPORTS.

YOKOHAMA.—The demand had been inactive throughout the interval. A moderate business had been done in Grey Shirtings at reduced figures. Yarns had declined in value, especially Nos. 16 to 24, of which large supplies had come to hand, causing a great depression in the market; a moderate demand had been made for Taffachelass at unaltered rates. Blankets had attracted some attention, and a few parcels had changed hands; other Woollens remained quiet. Small sales of T-Cloths had taken place, and the closing rates showed a tendency to advance. Metals continued dull of sale. Quotations were as follows:—GE Grey Shirtings, 7 lbs., $2 35 to 2.40 per piece; ditto, 8¼ lbs. to 8½ lbs. $2.57½ to 2.62½; ditto, 9 lbs., $2.92½ to 2.97½; GE White Shirtings, 56 to 60 reed, $2.40 to 2.55; ditto, 64 to 72 reed, $2.70 to 2.85; T-Cloths, 6 to 7 lbs., $1.70 to 2 15. Turkey Reds Shirtings, $0.85 to 1.00 per lb. Taffachelass, double weft, $2.60 to 2.95; ditto single weft, $2.40 to 2.70. Velvets, Black, $12.00 to 14.00 per piece. Cotton Yarn: Nos. 16 to 24, $43.50 to 44.50 per picul; ditto, 28 to 32, $48.75 to 49.50; ditto, 38 to 42, $48.00 to 50.00. Cloth, Medium and Broad, $1.10 to 1.85 per yard; Lastings, $13.00 to 13.50 per piece; Long Ells, Assorted, $6.00 to 6.50. Lead, $5.50 to 6.00 per picul. Iron: Nail rod, $3.50 to 4.65 per picul; Bars, $4.00 to 4.60.

HANKOW.—The business of the fortnight had not been large, but there had been an improvement in the demand, especially for Woollens. The River Yangtsze was steadily falling, and all probability of a continued flood seemed at an end. Grey Shirtings: Quotations much about the same as for last mail, the only change being a decline of about one candareen per piece in best qualities of all weights. White Shirtings only saleable in retail quantities. T-Cloths continued neglected. Drills: A comparatively large business transacted in English at rather enhanced rates, demand running upon medium qualities. Jeans: Limited inquiry. Fancy Cottons: Moving more freely, but without improvement in value. Woollens and Worsteds: Long Ells: Good inquiry, chiefly speculative character, and fair sales at rather higher rates. Camlets: More doing; prices ranged from Tls. 13.60 to 15.80. Spanish Stripes have sold in moderate quantities at former rates. Figured Orleans realised fully previous prices; marked improvement in the demand. Metals: Lead: Very small business done; rates as previously advised. Quicksilver: Nominally quoted Tls. 72.00 per picul; no sales reported.

SHANGHAI.—The Piece Goods market had been quiet, and a slight decline in the price of 8¼ lbs. Grey Shirtings and Mexican T-Cloths was noticeable. Other fabrics, however, had fairly maintained former values, and the holders of Drills, and of all kinds of Woollens, were firm for higher rates. The deliveries, chiefly for the river ports, continued satisfactory, and the stock of Grey Shirtings for the first time since November last year was under two million pieces. Grey Shirt-

Digitized by Google

lings: Buyers steadily refused to give over Tls. 1.71 for 7 lbs. goods, at which their wants had been fairly supplied; 8¼ lbs. Dewhurst's Eagles realised from Tls. 1.90 to 1.93, and ordinary chops Tls. 1.85 to 1.89; mildewed Tls. 1.82 to 1.84. Heavy Shirtings sold at Tls. 2 64 to 2.67. White Shirtings: Ordinary 64-reed asked for, and Tls. 1.94 refused for Stewart's "Lion and Flag;" Dewhurst's 64-reed placed at Tls. 2.18; 56-reed at Tls. 1.74. T-Cloths: No market for Mexican, and business entirely in the lower counts; extra fine quality Dewhurst's 6 lbs. "T." sold at Tls. 1.25; 7 lbs. "T." at Tls. 1.43. Drills: A further rise in value established; Dutch, Tls. 3.00 to 3.05; English, Tls. 3.10 to 3.16. Jeans and Sheetings very slow of sale. Fancy Cottons: Damasks, Tls. 4.30 to 4.68; Chintzes, Tls. 1.55 to 1.67½; Dyed Brocades and Gentian Shirtings, Tls. 2.75 and 2 50; Muslins, 8 mace; Velveteens, 1m. 3c.; Spotted Shirtings, White and Dyed, and White Brocades unsaleable. Woollens: There had not been a large trade; Camlet, Tls. 15.35 to 15.65; Long Ells, Tls. 6.55 to 6.60 for C.P.H. Scarlet, Tls. 5.75 for Assorted; Lastings, Tls. 11.15 to 12.00; Crape Lastings, Tls. 9.00 to 9.60; Crape Lustres, Tls. 4.35; Figured Orleans, Tls. 3.85 to 4.10 for ordinary, Tls. 4.75 to 5.00 for fine; Spanish Stripes, Tls. 0.63 to 0.66½ per yard. Metals: Nail Rod Iron, No transactions. Lead: With but little inquiry, and news of a dull market in Hankow, prices were somewhat easier.

HONG KONG.—The import market during the interval had been quiet. The dealers appeared to be fairly supplied, and as importers all appeared to be desirous of realising in the expectation of lower prices ruling in Manchester, values of Cotton Goods showed no improvement upon former quotations. Cotton Yarn: 16/24s changed hands to a very limited extent; common chops very quiet, and really fine makes although in small stock neglected. 28/32s in limited supply, but inquiry slack. Importers firm. 38/42s. of inferior chops slightly declined, but favourite kinds steady. Grey Shirtings: 7 lb., no alteration owing to absence of demand. 8.4 lb. met few buyers at a decline of 5 cents. Large clearances of spotted and mildewed made. 9 to 10 lb. not in request. White Shirtings: 54/60 reeds declined 10 cents. owing to forced sales. 64/66 reeds nominal. 68/72 reeds had a downward tendency. T-Cloths: 6 lb. difficult to move even at a decline. 7 lb. common exceedingly quiet at a decline of 1 to 2 cents. 6 lb. Mexicans not moved. 7 lb. Mexicans only wanted to a very retail extent. Dewhurst's MT $2.08, Hand and Branch, $2.12½. 8 lb. Mexicans showed a further decline. Fancy Goods neglected. Woollens and Worsteds: unchanged. Metals: A further considerable advance in Bar, Hoop and Round Iron. Lead is neglected.

MANILA.—The market for Plain Staples continued very languid and values had further declined. Considerable quantities of sea-damaged goods had been forced on the market, which had had the effect of weakening the demand for perfect goods. Coloured Goods were, on the whole, in better demand, and particular styles were fairly saleable at remunerative rates. The bulk of the stocks was, however, of poor patterns and only saleable at losing prices. Yarns were in heavy supply and extremely difficult of sale even at low and losing rates.

SINGAPORE.—The following is taken from Messrs. Boustead's Circular:—39-inch Grey Shirtings: 8¼ lbs. in poor inquiry at $2.55 to $2.57½; 7 lbs. pressed for sale, and lower; 6 lbs. taken at $1.92½ to $1.95. 45-inch in little request. 32-inch T-Cloths: 4 lbs. to 4½ lbs. low qualities sold at irregular prices; 5 lbs. asked for at $1.35 to $1.37½; 6 lbs. in less demand; 7 lbs. dull sale. 32-inch Grey Madapollams: 2½ lbs. in moderate inquiry at $18 to $18.50. All other Cotton Goods had been very quiet, and no sales of importance had transpired. Camlets firm at previous rates. Long Ells quite neglected. Scarlet Spanish Stripes in moderate request, and stocks reduced. Lastings not inquired for. 40s Grey Yarn: Prices without change, but hardly any inquiry.

PENANG.—There has been no improvement in the market; great inactivity prevailed, and prices ruled in favour of buyers, who, however, were only purchasing for immediate requirements.

EXPORTS.

TEA.

YOKOHAMA.—Owing to the receipt of discouraging advices by mail from America business for some time was quiet, but had since become brisker, and settlements of all grades from Medium to Choice had been made to the extent of 8,000 piculs, the bulk having been of Fine leaf. Supplies had been plentiful, the quality was fair, but showed a falling off, being rather mixed with the second crop coming in. Prices had been irregular, owing to some dealers being anxious to sell before the close of the native half-year, and in some instances concessions had been obtained for the Medium grades, of which there had been some lower classes on offer; the higher grades however maintained previous quotations; the stock was slightly increased, and large supplies of the second crop were expected. The P.M.S.S. Japan sailed on the 22nd July with 190,690 lbs. for New York, 149,788 lbs. for San Francisco, 29,218 lbs. for Chicago, and 10,287 lbs. for Boston; the Clara Bell took 120,345 lbs. for San Francisco, and the Polly Lewis sailed on the 26th July, with 451,722 lbs. from this port for New York, but had since put back for repairs; the Leander and Eastern Chief were loading for New York. Quotations ruled as follows:—Common and good common, nominal, $28 per picul; medium, $31 to 35; good medium, $37 to 40; fine $42 to 45; finest, $46 to 50; choice, $52 and upwards.

KIUKIANG.—The arrivals of Green had been 4,637 half-chests, out of which one chop had been settled at Tls. 36.25 per picul.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s report says:—The high range of price current on our market has greatly curtailed business during the past fortnight, compared with what had been doing previously, although settlements aggregate more than during the corresponding fortnight last year. As compared with then, however, the shipments to Shanghai on native account show a marked difference—21,770 chests, against 39,570 chests in 1871. The second crop is now pretty well all to hand, and shows a falling-off of between two and three million pounds. Third crop Teas will be down in a day or two; three or four musters are being shown privately already, but they are insufficient to form any opinion with regard to quality. There is no change much to notice in prices, considered in regard to the value of the Tea; the range of price is lower, but only in keeping with the quality on offer. While last year the bulk of the second crop Teas were settled between Tls. 15 to 20 per picul, in the present season it is only during the past fortnight that anything has been settled under Tls. 18 per picul, of course with the exception of Shuntam packed Teas; and it is also noteworthy that nothing has been settled so far under a laid-down cost in London of 1s. 1d. We estimate total arrivals to date, exclusive of Ningchow Tea at 42,784,100 lbs., against last year 44,774 100 lbs. Customs export to 1st August was 39,604,624 lbs., against 41,816,123 lbs., or including Ningchows 44,542,663 lbs., against 45,169,647 lbs. The steamer Russie is in port loading for Odessa.

SHANGHAI.—Black: The settlements which had transpired since the 27th July amounted to 20,400 chests and 24,000 half-chests, against 32,400 chests, and 21,500 half-chests in corresponding period last year. Previous quotations had been fairly maintained throughout the fortnight, and there was no change in rates. Fair to medium Oopacks and Ningchows still commanded prices about Tls. 3 per picul over those current last year, the lower grades costing Tls. 18 to 19.50, equal to 1s. 1d. to 1s. 2d., we make fully Tls. 4 dearer, the same class of Teas being procurable then at Tls 14 to 15.50, and realised at home on a good market 1s. to 1s. 1½d. per lb. Attention of buyers had been principally directed to Oopacks and Ningchows selling at Tls. 22, equal to 1s. 3½d., to Tls. 26, equal to 1s. 6d. A few parcels slightly better than the ordinary run of the Teas on offer had brought Tls. 28 to 32, equal to 1s. 7½d. to 1s. 9½d., we consider them relatively dear. The quantity of Shuntam packed Tea to hand was limited, there was, however, a fair quantity of common Hohow offering without finding buyers, low grades being in disfavour and rates asked above those current at home. Early in the fortnight supplies came to hand more freely than for some time past, but at the close they were coming in more moderate quantities. Late arrivals of second crop were very inferior in quality, there were but few desirable Teas amongst them; particular attention was called to this, as it enhances the value of the early shipments and should give confidence at home. Export 38,948,071 lbs. against 37,652,121 lbs., and stock 39,260 chests against 46,500 same date last year. Green Tea: Advices from America continued unsatisfactory, the stock held there was large, and rates for fine lines not remunerative; prices here in consequence had given way, and a decline of one to two taels were quoted; holders were anxious to quit at ruling rates, but buyers continued to act with caution. Settlements for the fortnight about 40,000 half-chests and 14,000 boxes at Tls. 35.00 to 60.00 proportion for Pingsuey, some fine lines selling at Tls. 70.00. Fychow and Teenkais Tls. 37.00 to 50.50, and Shanghai packed Tls. 35.00 proportion.

FOOCHOW.—During the greater part of the interval the Congou market had been quiet, with drooping prices, until near the close, when Teamen made a concession of about one tael in prices of grades above common, which led to increased purchases, particularly on Australian account, and for that quarter there were several buyers. The stock of Congou was tolerably large, and, as third crop leaf cost less than the second, Teamen were anxious to realise at the ruling quotations, but they refused at the moment to give way more. The third crop Congous were more satisfactory in quality, having more point and character than the second crop, but many of them were objectionably dusty. In Souchongs a few transactions had taken place at slightly easier rates. The Ooloong market remains unopened, owing to the excessive demand on the part of the holders; most of the fine parcels had been placed on the market. Scented Teas had been sold to a fair extent at a reduction of about one tael. Settlements had been—Congou: 27,467 chests at Tls. 7.8 to 8.8 o.b for dust to siftings; Tls. 10.8 to 13.8 o.b. for broken leaf; Tls. 15.8 to 18.3 o.b. for ordinary to good common; Tls. 19.8 to 23.3 o.b. for flavoury to medium; to Tls. 27.8 o.b. for good medium. Souchong: 1,253 chests at Tls. 18.3 to 22.8 o.b. for low common to common; Tls. 26.8 o.b. for medium; Tls. 31.8 to 38.8 o.b. for fine to finest. Ooloong: 287 half-chests at Tls. 18.8 o.b. for low common; Tls. 24.8 o.b. for a chop called Ooloong but not true Ooloong. Scented Tea: 10,763 boxes Caper at Tls. 21.55 to 25.5 o.b. for common to medium; Orange Pekoe, at Tls. 24.8 to 2.93 o.b. for medium to good medium. Flowery Pekoe, at Tls. 20.8 to 48.3 o.b., 616 chests.

AMOY.—Since the 7th Aug. about 8,000 half-chests of Oolongs had been settled at the quotations then ruling. Choice Teas continued to command full prices, but the demand for medium and lower grades was weak at the close. Arrivals had been 131,237 half-chests, and settlements 126,783 half-chests, leaving a stock of 4,454 half-chests. The Aurora Australis and Tamerlane were still loading for New York, and the Kin Lin for Boston. Rate of freight by all three vessels was £3 10s. per ton. The steamship Cyphrenes is expected for New York.

CANTON.—Fair transactions had resulted, as holders had made concessions which induced buyers to resume operations. Common to medium Scented Capers had been bought at a decline of one to two taels, though the better kinds had not given way so much in price. Scented Orange Pekoes, though lower than previously quoted, had been less freely parted with than Capers.

SILK.

YOKOHAMA.—The market had continued in the same active state as last reported, and a large business had been done, resulting in the settlement of about 1,000 bales, the bulk of which were Hank sorts. Arrivals had been exceedingly large, consequently dealers had shown some anxiety to meet buyers, and a decline in prices of about $25 per picul for medium and inferior Hanks had resulted. A parcel of Kakeda Oshu had been purchased at $760 per picul. Settlements, Hank sorts, 850 bales; other sorts, 150 bales; total, 1,000 bales. Quotations, including all charges in Yokohama and London, Exchange 4s. 8d. 6 months' sight, were as follows:—Hanks, Mybash and Sinchu, extra, 31s. 6d. to 32s. 3d.; best, 29s. 7d. to 31s. 2d.; medium, 27s. 8d. to 29s. 3d.; inferior, 25s. 7d. to 27s. 4d.; Hamatski medium, 28s. 1d. to 29s. 3d.; Coshu medium, 26s. 7d. to 27s. 8d.

Digitized by Google

SHANGHAI.—Messrs. Skeggs and Co.'s Circular is as follows:—Our last circular was dated the 27th July, and the following week's business was limited to about 1,500 bales, buyers being less sanguine since the receipt of unfavourable telegrams, and dealers on the other hand determinedly refusing to lower the prices of any Silk with character. Chops were taken at Tls. 590, Blue Elephant Tls. 530, and Red Peacocks Tls. 515. Market sorts were quoted Tls. 5 to 10 lower, but frequently so only in the buyer's opinion. During the present week business has again been limited to about 1,800 bales, of which over 300 are Re-reels and best Kahings for America. Purchases for the European market are on a much smaller scale than has lately been usual, as dealers maintain the price of good Silks, and it is only in the common and undesirable sorts that a decline of Tls. 5 to 10 can be quoted. Blue Elephants have fetched Tls. 530, and Red Peacocks Tls. 510.

CANTON.—Since the 31st July the market had been very active for the descriptions of Silks suitable for shipment to Europe, and a large business had been done. Prices being $5.00 to 10.00 lower, a great many orders with limits had been executed, which the high rates ruling previously kept in abeyance. The third crop was all in, and musters of the fourth were expected in about a week from date; the crop was reported larger than the average, but the Silk again failed in cleanliness. Re-reeled Silks had not been in much demand; some contracts had been entered into, but particulars were not known. Settlements for the last French mail supposed to be 950 bales, and for this mail 500 bales, a large proportion of which was composed of Market, or No. 4 Tsatlee Reels. Stock estimated at from 600 to 700 bales.

LATEST TELEGRAMS.

EARTHQUAKE AT SHANGHAI.

SHANGHAI, SEPT. 22.—A slight shock of earthquake was felt here at 7.30 yesterday morning.

COMMERCIAL.

CHINA.

HONG KONG, SEPT. 8.—Grey Shirtings, 6½ catties, 8¼ lbs., $2.40 to 2.45. Cotton Yarn 16-24, $123. T-Cloths, 6 lbs., ordinary $1.63; 7 lbs. Mexicans, $2.07. Canton Tea market quiet; prices lower; total of settlements, 440,000 boxes; stock, 50,000 boxes. Foochow market active at steady prices; total of settlements, 490,000 chests; stock, 84,000 chests. Total export of Tea from China and Japan for the season, 101,000,000 lbs. Exchange on London: Bank bills, six m.s., 4s. 7⅛d.

SHANGHAI, SEPT. 28.—Grey Shirtings 6½ catties, 8¼ lbs., Tls. 1.8.7; T-Cloths, 6 lbs., ordinary, Tls. 1.1.3; 7 lbs. Mexicans, Tls. 1.5.1. Tea: Hankow and Shanghai markets quiet; stock, Shanghai black 24,000 chests, green 26,000 chests; freight by steamers, £3 10s. Silk: Quiet, No. 3 Tsatlees, Tls. 580, No. 4, Tls. 520; total export from China and Japan for the season to England 33,000 bales, to the Continent 13,000 bales; stock, Shanghai 8,500 bales, Japan 1,500 bales. Exchange on London bank bills six m.s., 6s. 1½d.; Mexican dollars, Tls. 77.

STRAITS SETTLEMENTS.

SINGAPORE, SEPT. 26.—Cotton Yarn, 40's, $131; Grey Shirtings, 39-in., 8¼ lbs., $2.52½; 7 lbs., $2.15. T-Cloths, 6 lbs., ordinary, $1.65. Gambier, $4.32½. Pepper: Black, $12.50; White, nom. Tin $38. Exchange on London: Bank bills, six m.s., 4s. 6¾d.

PENANG, SEPT. 26.—Tin, $37; Pepper, black, $12.85; white, $23.85; Sugar, No. 2, $5.10, No. 3, $3.25; Cotton Yarn (Mule Twist) 40's $130, 30's 117; Grey Shirtings, 8¼ lbs., $2.55; T-Cloths, 6 lbs. $1.70. Exchange on London: Bank bills, six m.s., 4s. 7¼d.

SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Sept. 23, at Bremerhaven, from Bassein, Nicolo Balestrero; 26, at Falmouth, from Sourabaya, Professor v.d. Boon Mesch; 28, at London, from Colombo, Calisto; off the Lizard, from Batavia, Vier Gebroeders; at New York, from China (via S.C.), Craigforth (str.); 29, at Liverpool, from Singapore, Robert Kerr; at Queenstown, from Macao, C. L. Hanning; 30, at London, from Ceylon, Khimjee Oodowjee.

DEPARTURES.—Sept. 25, from Newcastle; for Amboyna, Jacoba Helena; 24, from Hamburg, for Shanghai, Furst Bismark; 28, from Glasgow, for Singapore (via S.C.), Jeddah (str.); from Liverpool, for Batavia, Metis.

WE understand that the steamers *Cheops* and *Galley of Lorne* will each take out about 900 tons of material for the extension of the Japan railways.

LONDON: MONDAY, SEPT. 30, 1872.

BONDED WAREHOUSES.

CONSIDERABLE surprise has recently been felt and expressed in China that no steps have been taken by the Inspector-General of Customs towards establishing bonded warehouses at those ports on the coast where they are most urgently required. This delay is the more astonishing since the Chinese Government, in reply to the representations and memorials of the British merchants in China, has expressed itself willing to sanction their introduction, and went so far as to agree to the insertion of a rule in Sir RUTHERFORD ALCOCK's Convention which provided that "at such of the Treaty Ports as "may be expedient, bonded warehouses will be established, "and regulations for their working will be drawn up by the "Inspector-General of Customs, and the Superintendent at "the port concerned." To the advantages of this system the merchants in China are fully alive, and we can therefore only suppose that the delay which has arisen in its adoption has been due to unwillingness on the part of the Custom-house authorities to co-operate with them. This supposition receives some colour from a remark made by Mr. HART at a meeting of the Mixed Commission appointed by the English and Chinese Governments to confer on points of international interest, with a view to the revision of the treaty, to the effect that "the rate of duties is so low "in China that few merchants, if any, would take advan-"tage of the bonded system if inaugurated." To this individual opinion of Mr. HART we would oppose the earnest desire for the establishment of such warehouses repeatedly advanced by some of the leading mercantile communities in China, and which found expression in the Rule of the ALCOCK Convention above-referred to. No one will deny the great ability which Mr. HART has very generally shown in dealing with international mercantile questions; but he will make a great mistake if on this point he any longer allows his own private opinion to outweigh the expressed conviction of those who are far better able to judge of the advantages of the bonded system than he can possibly be.

A BANQUET has been given by the Lord Mayor of London in honour of the visit of the Japanese Embassy. The proceedings are fully noticed in another column. The Ambassadors will proceed to Liverpool this day, and remain until the 4th proximo, and during their stay they will attend dinners to be given by the Mayor and by the Chamber of Commerce of the town. Several of the junior members of the Embassy are engaged in inspecting the tin mines of Cornwall.

THE case of the Messageries Maritimes against the Suez Canal Company has been concluded in Paris, but the judgment will not be given for a fortnight. The case was heard before the Tribunal of Commerce, and Judge DAGUIN was President, assisted by Judges SEGUIER and BOUILLET.

WE understand that the Japanese Prince HIGASHI, who has been for some time studying in England, will shortly return to Japan, owing to the death of his father.

THE CHINA CONSULAR SERVICE.

WE need offer no apology for again recurring to the subject of the inadequacy of the pay of the Consular officers in China, since even the recent Parliamentary Committee has gone so far as to admit that the salary of the juniors is insufficient to defray the expenses which must necessarily be incurred by them. Unfortunately the recommendation which accompanied this admission, namely, that some allowance should be made to those at that time holding appointments as Student Interpreters, has not been adopted, and no hope of any increase of pay has been held out to the eight young gentlemen who have lately been appointed to the service, and who have thus begun their official career with the comforting assurance that they will not be able to live upon their pay. Such a state of things should not be allowed to exist for an hour. In no other branch of the public service is there such a marked and acknowledged inequality between the work performed and the pay received. Low as are the salaries of Government clerks in England they are yet adequate for the supply of the necessaries of life, and even ensigns in Her MAJESTY'S Regiments of Foot have been known to live upon their pay, but here are men who are compelled to exchange the comforts and congenial climate of their native land for the unhealthy ports of China, where fevers, dysentery, cholera, and the uncertain temper of the natives severally produce a depressing effect on the chances of their enjoying a long lease of life, and they are told they must either "borrow, beg, or steal" an annual sum to supplement their official income, or they must look forward to a career fruitful of debts and embarrassments. It cannot be argued that the nature of Consular duties is of so agreeable a character as to make their performance a pleasure, for it is well known that the work which falls to the portion of, at least, the juniors in a Consular office is little short of the dreariest drudgery, nor can it be said that the position enjoyed by the officials is of so elevated a kind as to form any recompense for their toil and labour. No, it is merely a question of giving a fair day's wage for a fair day's work. It is no light thing to accept banishment, for the greatest part of one's life, from home and friends, and to work hard day after day in a climate that taxes the powers both of the mind and body to the utmost, and in common justice men who make this sacrifice and incur the numerous risks incident to life in China, deserve to be treated liberally by the country whose cause they serve.

The line of conduct pursued by the Foreign-office in making the appointments above-referred to is somewhat inexplicable. The evidence given before the Committee by Sir HARRY PARKES, Sir RUTHERFORD ALCOCK, and others well qualified to give opinions, tended to show that the Consular duties in China might be efficiently performed by a smaller staff of officials than are at present employed; and it was suggested that this alteration might best be effected by reducing the number of Student Interpreters at Peking to six. Had this advice been followed the saving effected in numbers would have enabled the Government to increase the scale of pay throughout the Service without adding a single penny to the estimates. But the bare idea of giving an increase of pay, however small, appears to be abhorrent to our present rulers, and, rather than perform this act of justice to men who well deserve every consideration, they, in the teeth of the most weighty evidence, have appointed eight Student Interpreters to swell the ranks of those at present studying at Peking, and eventually to add to the crush in a service which is already confessedly overmanned. In the multiplicity of interests near home which daily attract the attention of the English public, it is but too natural that the righteous claims of its servants in the Far East should be either overlooked or forgotten; but we are sure that a few moments' reflection on the present condition of the Consular officers in China would be sufficient to convince any unprejudiced person that to grant them the benefit of an increased scale of pay would be nothing more than is both just and reasonable.

SECOND-CLASS PASSAGES.

(To the Editor of the *London and China Telegraph.*)

SIR,—During, and some time anterior to, the Franco-Prussian war extensive alterations were made in the fleet of the Messageries Maritimes, with reference to an improved second-class ac-

Digitized by Google

commodation. There are now three classes instead of two, as formerly. The third corresponds with the P. and O. second, the passengers sleeping in a common room, and not being allowed the use of the quarter-deck. But it is the second-class of which I would speak. This is really now nothing but a slightly inferior first, the passengers being allowed full use of the quarter-deck, the same as the first-class. The hours of meals are the same, and the cabins are so arranged as to be all on one deck, indeed, they are only a continuation of the first-class berths. The second-class cabins are limited in number, and contain four berths each; the size both of berths, cabins and ports are exactly the same as the first, as also are the cabin fittings, and the linen is served as freely to one as to the other. The attendance is also similar. At every meal a sufficient number of French (not Chinese) *garçons* are ever ready to satisfy the wants of the passengers. Tea and coffee are served at six A.M. At 9.30 A.M. and five P.M. respectively, breakfast and dinners are served, the same as first-class. An unlimited allowance of good, sound claret, is placed on the table at both these meals, which may be exchanged for Bass's ale for those who give the preference to the Anglican beverage. Sherry and other wines must be paid for extra, and are not free, as in the first-class. The only material differences are, that no regular tiffin is served to the second-class passengers at noon, and perhaps taking their health into consideration, this is an advantage rather than otherwise. Also that ices and a few luxuries (not necessaries) are not so frequently placed on the table as in the first class. The second-class saloon is situate in the forward part of the ship, and is therefore somewhat cooler than aft. It is amply fitted with punkahs and deck lights. The second-class have the use of bath rooms, &c., in common with the first. tea is served at eight o'clock; but in the second no liquors are placed on the table at nine; these of course can be procured by purchase. Brandy is served only with coffee, after breakfast and dinner. It is obvious, therefore, that second-class accommodation is such that no gentleman need be ashamed to travel by it. It is not considered inconsistent with a gentleman's position to travel second-class in railway carriages, because in the railway arrangements there is nothing offensive or objectionable to gentlemen. And now that the French mail service have organised so convenient, economical, and comfortable a system, which cannot but be acceptable to persons of limited incomes, or it may be growing families, the arguments advanced in favour of second-class railway carriages hold good with regard to ocean travelling. Indeed, in the steamers of the Messageries Maritimes there is nothing common, nasty, repulsive, or in any way objectionable in the second-class accommodation. The only real hindrance to travelling in this cheaper manner is that it *is* second class. There are many persons, especially Englishmen, who would, perhaps, shun a second-class traveller, whose only social deficiency may be that, in order to cut his coat according to his cloth, he is seeking to save £24, the fares respectively from Shanghai being Tls. 314 and Tls. 234.

I have ventured on these remarks knowing that a really trustworthy and inexpensive means of transit must be a great boon to many young men whose incomes are by no means too much for their requirements, and when health and happiness so much depend on an occasional trip home. Moreover, few persons care to trust themselves on regular traders and occasional steamers, which, as far as carrying capacity goes, perhaps, leave nothing to be desired; but there their good qualities may be said to terminate; the greater speed, more roomy accommodation, better trained staff of stewards, &c., in the French mail service help to make the voyage so much more comfortable than even the first-class accommodation in steamers which have been rather severely, but truthfully, denominated "cargo boats." These latter vessels are not unfrequently detained some time in port while their agents are fishing for cargo; and when a very tempting bait is offered—say, for instance, five hundred pilgrims from Singapore—remonstrance is vain, and the unfortnate passengers have only to grin and bear it; and it may not be out of place to remark that the ports of the "cargo boats" are sometimes fixed so as not to open outside; hence the cabin is ventilated from the saloon, and in the best of steamers they are little better than "bulls eyes," while on the *Ava*, *Meikong*, and *Peiho*, and other French mail steamers, the ports are something like eighteen inches by eighteen. Of course those who can afford first-class had better travel by the means that offered the best accommodation and greater social advantages; but we are not all quite as rich as we should like to be, and my remarks are written in the hope that when that great, and to many persons, important, question is raised—"How shall I go home?" if their fortunes are small, and their respectability and love of comfort great, they cannot do better than go by the route I have referred to in this letter. Meanwhile, it is to be hoped that other lines of steamers will follow the example of the Messageries Maritimes, and that an universal second class may be organised, wherein there may be no fear of gentlemen travelling by it being mixed up with servants, sailors, prisoners, and objectionable people generally. Such, indeed, never occurs on the French mail boats, all servants messing and sleeping with the third-class or some part in the lower regions of the steamer, and never come in contact with, or are rarely seen by, the second-class travellers.—I am, &c., &c.,

C.

THE PANTHAY EMBASSY.

(THE TIMES).

The announcement that the Panthays had sent an Embassy to this country conveys little definite information to the English mind, and our readers have probably been at a loss to understand how this communication between a semi-barbarous Asiatic tribe and the English Government can have become, as we were lately reminded, a subject of serious controversy in India. Our correspondent at Calcutta has dwelt upon the importance of our relations with the Panthays. It must be borne in mind that the Panthay Envoys have to encounter in this country a very formidable rivalry in the Burmese Embassy, the magnificence of which must throw into the shade the less splendid representatives of the Panthay Power.* We have no desire whatever to undervalue the worth of the Burmese alliance, or to cast doubts upon its stability; but while showing all hospitality to the Envoys from the Court of Ava, it would certainly be unwise to neglect the friendly overtures of the sturdy Moslems who have thrown off the Chinese yoke. For many years the re-opening of the South-Western trade with China by one of the two routes through Burmah which have been in part surveyed has excited the hopes of the mercantile classes in England. From time to time we hear that a certain pressure has been exerted upon the Indian Government to induce the adoption of more vigorous efforts for the development of this almost extinct trade. The expectations upon which these praiseworthy endeavours are based may prove, we fear, in the main illusory: but we do not think the India-office would be well advised in throwing away this opportunity, which may not again occur, of making friends with the Panthay Government. That the King of Burmah, an Asiatic despot and a Buddhist devotee, should feel jealous of the young, audacious, self-reliant Moslem Power which has grown up on his frontiers is only natural, and it appears to be suspected in India that one of the objects aimed at by the Burmese Embassy at present accredited to the English Court was a circumvention of the Panthay Envoys who were expected about the same time to make friendly overtures to England. With every wish to be courteous to the Envoys of the King of Burmah, we must be careful—not less careful than we should be in European politics—to hold the balance even between them and their rivals. We must remember that while the Burmese Government has frequently been hostile to England and generally obstructive of English trading enterprise, the Panthays, so far as we have known them, have been frank and friendly, glad to welcome the harbingers of English commerce, and ready to aid its progress within the straightened limits of their power.

Scarcely a dozen years have elapsed since we learnt, in an imperfect and roundabout fashion, the story of the Panthay war of independence. The Chinese Empire is, or was, divided into eighteen provinces, of which the one lying at the extreme South-East on the frontier of Burmah was known as Yunnan. This region had for many centuries been peopled by an energetic and independent Moslem population, derived, according to tradition, not from strayed and scanty emigrants across the Central Asian plateau, but from the direct importation of Arab auxiliaries, sent in the eighth century by one of the Abbasside Caliphs to the aid of a Chinese Emperor. This Mahomedan community at all events has had no connection, traditional or immediate, with the strongholds of Islam in Western Turkestan, and it is unlikely to have been moved in any degree by the wave of the Wahabee Revival which has produced results so remarkable in Arabia or India. The rise, indeed, of the Panthays seems to be traceable not so much to the religious enthusiasm of the people as to the patent and growing weakness of the Imperial authority in China combined with the outrageous and increasing tyranny of the local Governments. No doubt, the temporary success of the Taeping rebels gave the Panthays in 1855 an opportunity of revolt for which they had long been waiting. The occasion arose out of some cruelties practised by the Chinese officials upon the Panthay workmen in the silver mines of Yunnan. The miners rose and massacred their masters, and the flame of insurrection spread rapidly through the entire province. The struggle against the Chinese was obscure, prolonged, and fluctuating, but gradually the Panthays succeeded in establishing an independent Mahomedan Government in the city of Talafu. Hostilities still continue on the frontiers of Yunnan between their guerilla bands and the Chinese forces; but it is scarcely within the bounds of possibility that the feeble Government at Peking will at any time succeed in re-establishing its authority over the now independent Panthays.

This chapter of history, it may be said, exhibits the Panthays as a very remarkable nation, but it does not show why England has a special interest in cultivating the friendship of a new, isolated, and as yet uncivilised Power. The Panthay dominion in Yunnan is shut out from direct intercourse with European civilisation on the West by the jealous Buddhist despotism of Burmah, and on the East by the dogged resistance of China to the advances of trade. Yet the Panthays form a link, and a very important link, in a chain of international traffic which it may one day be in our power, as it will always be for our interest, to weld together. The trade between the hundreds of millions of Chinese and the manufacturing industries of Europe ought, some time or other, to find a more direct course than it now finds through the few open ports on the Eastern and Southern Coasts of China. But, in addition to this, the export trade from China to Further and Hither India might become an immensely important traffic conducted mainly by English agencies. Before the insurrection of the Panthays in 1855 a considerable trade, valued at half a million sterling annually, was carried on between Burmah and China, and the Panthays themselves were among the most eager participators in this traffic. Bhamo, a town situated upon the Irrawaddy, near the North-Eastern frontier of Burmah, became the *entrepot* of this trade. But when the Panthays revolted from the Chinese rule, the stream of traffic from China to Burmah was stopped at once, and from the internecine character of the struggle between

* *The Times* appears to be unaware of the fact that the Ambassadors have departed.—Ed. *L. and C. T.*

Digitized by Google

the Chinese and the Panthays it is to be feared that the circulation of commerce upon this line will not be easily renewed. This consideration affords some reason for doubting whether the schemes for establishing a regular line of trading connection with Yunnan are likely to result in any substantial advantage either to English commerce or to the welfare of our Indian dominions. It is very easy to talk of the re-opening of the trade with Western China; but, were we even to overcome the jealousy of Burmah and the natural difficulties of a country still in part unexplored, we have little ground for hoping that, either by Captain Sladen's route up the Irrawaddy to Bhamo, or by the wilder project of a railway to the Panthay frontier, we should, in effect, "tap," as the Manchester merchants assert, the trade of China at all. We should merely, as it seems, open up traffic with the Panthays, whose dominion in Yunnan is now as completely separated from the Chinese Empire as it is possible for two contiguous countries to be. We ought, therefore, to be cautious before committing ourselves to any of those ambitious projects of commercial advance by the costly conquests of the railway and the telegraph to which Manchester is so anxious to pledge the Indian Government. At the same time this is no reason for declining to make friends with the Panthays. The commercial possibilities of overland traffic between India and China are almost boundlessly magnificent, and some day or other the break-up of the Chinese Empire, or the separation from it of the South-Western Provinces, may realise what is now accounted by statesmen a vision of Utopia.

EDUCATION IN CHINA.

(WEEKLY REVIEW.)

Some notice of the educational movement in contemplation by the Chinese Government will be interesting to our readers. The Chinese Government, it appears, has appropriated over £200,000 to carry it out. The purpose is to take one hundred and fifty youths to the United States for their education. They are to go in companies of thirty during each of five successive years, and to remain there for fifteen years. The purpose, therefore, would appear to be to make them thorough scholars in all Western learning. The youths are selected of the ages of twelve to fifteen at the time of their selection. As they go at an early age, they are to be accompanied by a staff of Chinese teachers, who will instruct them in their own language, literature, and philosophy, while pursuing their study of Western language and science. The whole scheme has been planned and worked out by Mr. Yung Wing, a Chinese gentleman, who graduated at Yale College, United States, with distinction in 1856. He studied English in the Morrison Education Society and School. The principal of that school was the Rev. S. R. Brown, D.D., now of the Dutch Reformed Mission in Japan. When Mr. Brown returned to America in 1846 he took three young men with him. One named Wong Ashing returned after some three years' absence, and he has long been the efficient superintendent of the large mission press of the London Mission Press at Hong Kong, and sustains the character of a worthy Christian man. A second one after spending some three or four years in the United States went to Edinburgh, and graduated with honour in medicine at the University of Edinburgh, and Dr. Wong Fun is now the resident physician to the foreign community at Canton. He also renders Dr. Kerr efficient assistance in his large hospital there. The third was Mr. Yung Wing, who, after years of laborious and painstaking effort, has succeeded in inducing China to take this advanced step in the way of training a corps of educated men for its service.

It is admitted by all that now, since China has taken her place among the nations of the earth, she greatly needs men of her own country with a thorough education in Western language and science to carry on the international intercourse that this new position requires of her. With a view to meet that pressing want, as well as other needs, she has established the University at Peking, to instruct Chinese students in the knowledge of European languages and sciences, which is under the presidency of the Rev. W. A. P. Martin, D.D., LL.D.; and to prepare a staff of men with still higher attainments she proposes to send off to the United States these one hundred and fifty youths for a course of study extending over a period of fifteen years. No one interested in the progress of his fellow men can regard this movement with indifference. Mr. Yung Wing will accompany the first company of thirty this summer, and after their arrival he will arrange for their studying, and then leave them there under the particular care of their instructors in Chinese and of Mr. Lai Sin. This gentleman received his education in English in the United States, having gone home to America with the Rev. Dr. Morrison from Singapore. As he is to remain in America in charge of these students for so long a time, he takes his family with him. His wife was educated by the late Miss Aldersey, who did so much for female education at Ningpo. Two of their daughters have quite a good education, having been to England. It is said that Wong Shing, of Hong Kong, will go over to America in charge of the second company of thirty next year. It will be obvious to everyone that the first four years of their arrival will be spent in acquiring the rudiments of the English language and the common branches of education before they can ever enter an academy to study for college. Then allowing six years for their preparatory and college course, it will leave five years after graduation at some college to study some profession of medicine or law, and some specialty in science and art, or diplomacy, or international law.

MISCELLANEOUS.

THE LORD MAYOR'S BANQUET TO THE JAPANESE EMBASSY.

On Tuesday last, the 24th inst., the Lord Mayor, Sir Sills John Gibbons, and the Lady Mayoress, entertained the principal members of the Japanese Embassy at dinner in the Egyptian Hall of the Mansion-house. The company included the Ambassador Extraordinary Iwakura; the Associate Ambassadors Extraordinary Kido, Privy Councillor; Okubo, Ito, and Yamagutsi, the First, Second, and Third Secretaries; Soogiwoora, Foreign Department; and the Japanese Minister in London (Terashima Munenori). In attendance upon the Embassy were Sir Harry Parkes, General Alexander, C.B., and Mr. W. G. Aston. Among the other guests were Alderman Sir Benjamin Phillips, Mr. Broadwater (the Upper Warden), and Mr. Deputy Malcolm (the Rent Warden) of the Fruiterers' Company, with the members of the Court of Assistants; Mr. Deputy Heath, the chairman, and the members of the General Purposes Committee of the Corporation; Mr. Under-Sheriff Beard, Mr. Deputy Fry, Mr. Deputy Elliott, Mr. ex-Sheriff Cotterell, Mr. Deputy Banister, Mr. Deputy Barnes, Mr. J. Whittaker Ellis, Mr. Bedford, chairman of the City Commissioners of Sewers; Mr. E. W. Cooke, R.A., and others. The band of the Coldstream Guards was in attendance.

The Ambassador Extraordinary occupied a seat at dinner immediately on the right of the Lord Mayor, and the rest of the Japanese guests, eight or ten in number, on his Excellency's right, each according to his rank. On the removal of the cloth, the choir chanted the Grace from the *Laudi Spirituali*. The Lord Mayor and the Lady Mayoress then drank to the guests in a loving cup, according to custom. The usual loyal and constitutional toasts were afterwards duly honoured. The Lord Mayor, in proposing the toast of the evening, said he was sure the remarks he was about to make would be kindly received by the whole company. The English nation, he said, had been always distinguished for its desire to obtain information relating to remote regions of the world. A long time had elapsed since we first attempted to get a knowledge of Japan. Fortunately, we had men associated with missions in China who were afterwards asked to take part in investigations in relation to the Japanese islands, and who so well performed the duties assigned them and so ingratiated themselves with the inhabitants with whom they came in contact, that we now stood on a far better footing in regard to Japan than to China, which we knew 140 years ago. He was not going to say anything of a laudatory character in reference to the Japanese people; but he would venture to say this—pointing to the Japanese Ambassador on his right—that the citizens of London hailed with very great delight the advent of his Excellency in this country. He hoped that all his countrymen to whom an opportunity had been afforded had received them in the cordial manner in which they deserved to be received. He had paid most marked attention to everything that had occurred in Japan during the last three or four years, and he could only say, in common with most people probably who had interested themselves in the subject, that the advancement which had been made by the Japanese people in that time was perfectly surprising. They were, first of all, entirely unselfish, seeing that all the great men in the country had abandoned privileges, power, and revenue, and had given in their adhesion to a system of Government more consonant, as they believed, with the existing state of things in that enormously populated country. He had as his guest that evening the Ambassador Extraordinary from Japan—a man of great intelligence, as he was given to understand, and his Excellency was accompanied by those who were well able to assist him in making reports in his own country as to the way in which Government was conducted here. His Excellency might be assured that we were well disposed to find every facility in our power to encourage trade between his country and ours. The works of art, especially, and the products of Japan had been long and highly appreciated and admired in England, and it was a circumstance affording him great satisfaction that he had been the first Lord Mayor who had ever had the honour to welcome an ambassador from Japan in the city of London. He now begged to offer to his Excellency "the right hand of fellowship," and to assure him, as he might well do, that when he returned to his own country he might safely assure the Japanese people that we would be always disposed to deal righteously with them. The intercourse ought to be perfectly reciprocal, and they and we might be convinced that the more intimate the acquaintance the greater would be the prosperity of the two countries. He had the greatest pleasure in proposing the health of the Japanese Ambassador, and in expressing to his Excellency his belief that in the city of London, and among the English community generally, there was an earnest desire to cultivate good offices with his country. He trusted his Excellency would be enabled to form right opinions of the English people during his stay, and that they and we would be friends for ages to come.

The Ambassador, through Mr. Aston, expressed his high sense of the complimentary and flattering address delivered by the Right Hon. the Lord Mayor, and of the good will which his Lordship had evinced towards his country, adding that those expressions of amity would be the most welcome tokens he could take home to his Sovereign. His countrymen at the same time would no doubt be highly gratified with their splendid reception in the City of London.

Some other toasts appropriate to the occasion followed, the Ambassador proposing the health of the Lady Mayoress.

THE BURNING OF THE "AMERICA."

It will be remembered that a short time since telegrams were received reporting the destruction by fire of the Pacific mail steamer *America*. With reference to that announcement a New York commercial newspaper says:—The Pacific Mail Steamship Company, on account of advices received from parties whom it has reason to believe reliable, entertains serious doubts regarding the authenticity of the telegram received from its agent at Yokohama, Japan, reporting the loss of the steamer *America*, together with the cargo and treasure, and is disposed to regard the whole affair as a *canard*, conceived and executed by unscrupulous parties for the purpose of "bearing" stock. Of course the destruction of a steamer which is valued at more than $1,000,000 must seriously affect the value of the stock of the Pacific Mail Steamship Company, and that the report of its burning did depress it is evident in the sudden fall of more than four per cent. So soon as the company received the telegram, which it had reason to suppose was from its

Digitized by Google

agent, it immediately telegraphed in every direction whence it was supposed information could be obtained, but it has been unable to obtain confirmatory despatches, and the conviction is rapidly becoming fixed in the minds of the directors that the telegram was a hoax. No confirmatory information has been received by the company or its agents, or at the office of the Lloyds, nor have the shippers of freight received advices from any of their agents, nor have any telegrams been received by friends of passengers on board, who would naturally spare no time nor effort to inform their relatives and friends at home of their safety in such a disaster as that reported had occurred to the steamer. The company, therefore, has been inclined to doubt the authenticity of the telegram, although the despatch was received in the cipher supposed to be known only to itself and agents.

DEPARTURE OF MISSIONARIES TO CHINA.—A meeting for the purpose of bidding farewell to several missionaries of the English Presbyterian Church who are about to proceed to China has been held in St. George's Presbyterian Church, Liverpool. The missionaries are Dr. Gauld, who returns as a medical missionary to Swatow; the Rev. Robert Gordon, who goes for the first time to Amoy; and the Rev. John Kirkwood, who will be stationed at Penang. The Rev. R. H. Lundie presided, and after prayer by the Rev. Dr. V. M. White, Mr. Lundie addressed the meeting, and entreated the prayers of the congregation on behalf of their missionary brethren. The Rev. Dr. Carstairs Douglas, the senior Chinese missionary—who is at the present time on leave in England, and engaged in compiling a Chinese dictionary in Roman letter, a work entrusted to him by the Amoy missionaries generally—delivered a short address, and Dr. Gauld then gave a sketch of his missionary experience. The scene of his labours, he said, was at one time peculiar for the barbarism and savage character of its people, and when he first commenced to work there was scarcely a city where the missionary could freely enter. Now every town was open to them, and they could freely go in and out. A great change had come over the people. The missionaries were no longer looked upon as enemies—as spies seeking the injury of the country and its inhabitants—but as their truest friends. Ten years ago the mission had scarcely thirty converts, and only two or three stations in a district comprising 120 miles of coast and penetrating forty miles inland. Now it had 300 converts and thirteen mission stations. Mr. Gordon also addressed the meeting, and Mr. T. Matheson, who spoke briefly, announced that the missionaries would be accompanied by a Chinese boy who had been converted to Christianity.

THE corvette Thalia having undergone the necessary repairs at Devonport dockyard is now in Plymouth Sound, where she will embark her stores, and be finally prepared for her voyage to China. The following appointments have already been made of officers to the China Station, who will proceed in the Thalia:—To the Midge, Commander J. T. G. Grant, Sub.-Lieutenant Abraham H. Lindsay; to the Ringdove, Sub-Lieutenants Robert B. Maconochie and H. C. Kenyon-Slaney; to the Iron Duke (for disposal on arrival on the Station) Lieutenants Frederick A. Blackett, Frederick H. Johnstone, and Charles J. Norcock; Sub-Lieutenants Philip E. Cresswell and James S. Muggeridge; Midshipmen: Leicester F. G. Tipping and Herbert B. Dillon.

AMONG the officers promoted in, and appointed to, the Order of the Bath, in recognition of their services with the Loshai Expedition, is Brigadier General C. H. Brownlow, K.C.B., who served throughout the campaign of 1860, in China, including the action of Sinho, taking of Tangku, and the Taku Forts, and occupation of Peking, for which services he received the medal with two clasps, brevet of major, and was appointed C.B.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ANTON—On the 24th Sept., at Elgin House, Hong Kong, the wife of James Ross Anton, of a daughter.
BORRADAILE—On the 26th Sept., at Westbourne-park, the wife of J. O. Borradaile, of a son.
CAMPBELL—On the 22nd Sept., the wife of Alexander Campbell, of Yokohama, of a son.
CRUM-EWING—On the 26th Sept., at Glasgow, the wife of H. E. Crum-Ewing, jun., of a daughter.
DUNLOP On the 22nd Sept., at Clock House, Ashford, Middlesex, the wife of R. V. Dunlop, of Colombo, Ceylon, of a daughter.
FAIRBAIRN—On the 12th Aug., at Hong Kong, Mrs. John Fairbairn, of a son.
FROHLICH—On the 21st Sept., at 43, Eardley-crescent, West Brompton, S.W., the wife of C. G. Frohlich, prematurely, of a daughter.
HADOW—On the 17th Sept., at Crayford, Kent, the wife of the Rev. G. R. Hadow, of a daughter.
KUSTERMANN—On the 21st Sept., at Poseldorf, Hamburg, Mrs. Franz Kustermann, of a son.
MILLS—On the 29th Sept., at Dudley House, Sutton, the wife of Thos. Mills, of a daughter.
RICHARD—On the 9th August, at Shanghai, Mrs. J. B. Richard (Comptoir d'Escompte de Paris), of a son.
STYAN—On the 22nd Sept., at Upper Brunswick-place, Brighton, the wife of G. H. Styan, of a son.
WEST—On the 27th Sept., at Woodford, Essex, wife of James West, of a son.
WILD—On the 20th Sept., at Foochow, the wife of Chas. A. Wild, of a son.

MARRIAGES.

DOLBY—BORTTI.—On the 5th Sept., at Milan, Miss Dove Dolby, daughter of Mr. Henry Dolby, of London, to Signor Alessandro, primo tenore, Milan.
LEROY—DE CRETY.—On the 7th Aug., at Shanghai, M. E. Leroy, of Messrs. Nachtrieb, Leroy, and Co., to Marie, daughter of the Baron de Crety, agent of the Messageries Maritimes.
SATOW—LANCASTER.—At St. Thomas' Church, Stamford-hill, Charles Mason Satow, fourth surviving son of H. D. C. Satow, of Upper Clapton, Middlesex, and Sidmouth, Devon, to Mary Ann Margaret, eldest daughter of the late Major Henry Lancaster, 20th Regiment, B.N.I.

DEATHS.

FRITH—On the 20th Sept., at Meerut, Lieut.-Col. John Sabatier Frith, Royal Horse Artillery, aged 44.
HORSFORD—On the 21st Sept., at Endsleigh terrace, Tavistock-square, Elizabeth fifth daughter of the late Sir Joseph Wallis Hoare, Bart., and widow of the late Prebendary James Payne Horsford, formerly Chaplain at Ceylon.
KATZ—On the 20th Aug., at Singapore, the infant daughter of Mr. Aaron Katz.
PALMER—On the 8th Aug., at Shanghai, Mr. S. T. Palmer, aged 35.
STAEL—On the 18th Sept., at Hong Kong, at the residence of her son, Mrs. Johanna Stael, late of Montague-street, Russell-square, aged 52.
WALKINSHAW—On the 10th Aug., at Hong Kong, in his 28th year, Constantine, second surviving son of James Walkinshaw, of St. Andrew's.

Monetary and Commercial.

The autumn meeting of the Associated Chambers of Commerce has been held at Southampton, under the presidency of Mr. Sampson Lloyd, of Birmingham, who explained that the association had determined to hold this conference in order to prepare the way for the discussion of subjects requiring legislation in the coming session. Among other matters decided was the proposal to memorialise Government in favour of the introduction of the Merchant Shipping Bill, also on the necessity of taking steps to secure to British shipping the treaty rate of tolls for the use of the Suez Canal, and for securing, if possible, its neutralisation. It was also determined to request the Government to complete the survey of the route from Rangoon to Kiang Hung and to ascertain generally the best means of communication with the south-west of China.

The directors of the Chartered Bank of India, Australia, and China, have issued the following circular to the shareholders:—

The directors, in now furnishing the shareholders with a statement of the bank's affairs for the half-year ended 30th June last, beg to report that the net profits earned during that period amounted to £43,269 9s. 4d., and that a sum of £4,867, previously treated as a loss, has become a good asset. These amounts extinguish the deficiency which was shown at 31st December last, and leave at the credit of profit and loss account on 30th June a balance of £19,361 1s. 7d. Under these circumstances, the directors would have been justified in recommending an interim dividend for the past half-year, but for a loss which has since been incurred through the failure of Messrs. Gledstanes and Co., and their correspondents in India, upon whose several estates the bank may have to claim for £28,000. This sum may possibly be lessened by certain securities, the right to which has yet to be legally established; but, in any case, the directors see no reason to anticipate an eventual loss exceeding the above amount at credit of profit and loss. This information the directors hope will tend to remove the misconception which apparently exists with regard to the position of the bank, as evinced by the present undue depreciation in the market value of its shares. They are able to state that the general business of the bank is progressing satisfactorily.

Since the last annual meeting, Mr. Emile Levita, of Messrs. Levita and Hudson, of London and Manchester, has consented to join the direction. The election of this gentleman, whose services will be a valuable acquisition to the board, will be proposed to the shareholders at the earliest date permitted by the bank's deed of settlement. Mr. Frederick William Heilgers has been provisionally elected a director in place of Mr. James Fraser, deceased. To confirm that appointment, as well as for the election of Mr. William Patterson as a director, an extraordinary general meeting of shareholders will be held on the 9th day of October next.

At the annual meeting of the Anglo-Indian Tea Company (Limited) a dividend at the rate of 10 per cent. per annum was declared, £500 was written off the preliminary expenses account, £500 off the goodwill account, and £982 carried forward to the next year's account. It was resolved to issue the remaining shares of the company at par to the present shareholders, and at 20s. per share premium to the public.

The report of Palmer's Shipbuilding and Iron Company (Limited), shows a net profit for the year ending June last of £103,551, out of which the directors recommend the payment of a dividend of 6 per cent., making, with the interim dividend, 10 per cent. for the twelve months on the present capital entered as paid up. It is also proposed to add £10,000 to the reserve fund, increasing it to £30,000.

The Anglo-American and French telegraph companies are about to declare interim dividends for the quarter ending the 30th inst.

Extraordinary meetings of the Eastern, Falmouth, Gibraltar, and Malta, British Indian Submarine, Anglo-Mediterranean, and Marseilles, Algiers, and Malta Telegraph Companies will be held on the 3rd prox., to receive reports from the directors as to the progress of the arrangements for the amalgamation of these undertakings.

The suspension is announced by circular of the firm of Mr. Thomas Sutcliffe, cotton-spinning and yarn and cloth agent, car-

Digitized by Google

rying on business at Manchester. The liabilities are about £25,000, and it is stated that the estate will yield a dividend of 17s. in the pound.

By a singular informality no list was taken of the creditors who attended the meeting of the creditors of Messrs. Gledstanes and Co. last week, but the Registrar of the Bankruptcy Court has given leave to compile one from such data as might be available.

Mr. R. W. Barker, of Messrs. King and Co., Liverpool and Bombay, and Mr. W. Leedham Crowe, of Messrs. W. Leedham Crowe and Robarts, have joined the board of directors of the Realm Marine Insurance Company.

Bar silver has been in fair demand during the week, but the price has remained without variation at 5s. 0⅜d. Mexican dollars remain as last quoted, the old coinage at 5s. 2¼d., the new at 5s.

The amount of bullion by the P. and O. Company's steamer *Massilia*, which left Southampton on the 26th inst., was in gold —to Galle, £1,355; to Madras, £475; to Gibraltar, £8 000— in silver—to Penang, £5,000; to Singapore, £2,500; to Hong Kong, £18,250; to Shanghai, £25,760; to Hobsons Bay, £280; to Sydney £3,400; total, in gold, £9,830; in silver, £55,190.

ARTICLES OF IMPORT.

TEA.

Messrs. Capel and Co.'s Circular says:—

There is no improvement in the tone of the market, business still being limited, but prices show little if any variation. Importers hold very firmly; their views, however, are above those of the buyers, which checks business. Large parcels of Green Tea continue to be offered for public sale without reserve from day to day. There have been no further advices by letter this week. The deliveries for the week amount to 3,671,000 lbs., against 3,233,000 lbs. last year.

Black: Red-leaf kinds: Siftings and broken-leaf kinds remain much as before, the demand being moderate. Fair to good common have been firm from 1s. 0½d. to 1s. 1½d. per lb. In fair to good Kaisows the few sales made have been at previous prices. Fine to finest show no change, but the sales have been very trifling. Pak Lin kinds: The good qualities have been wanted from 1s. 7d. to 1s. 8d. per lb; in fine to finest but little has been done. Black-leaf kinds: There is no improvement in the price of low to common kinds; good common remains unaltered, fair to good medium kinds have been freely offered, but sales have been restricted by the high prices required by importers. In fine to finest there is no alteration to notice, prices being firmly maintained. New-make kinds: For these there has been a fair enquiry, especially for good quality, which is scarce. Oolongs: Fair to good have been dull of sale, but fine to finest in fair request. Souchongs: Fair to good have been but little in demand; fine have been saleable at about previous prices. In Flowery Pekoes business has been small, and prices are somewhat uncertain. Scented Teas: Canton Capers have been taken at the decline last quoted for common to fair kinds; good to fine have been maintained. Foochow kinds have been firm. Canton Orange Pekoes have realised last week's prices. Foochow kinds have sold rather better, some of recent arrival having rather more scent. In uncoloured Japans business has been limited, but prices remain as before. *Green*: The market has been fully supplied. Several invoices have been offered privately, and further parcels sold at public sale, without reserve, in all about 4,400 packages, whilst to-day 3,158 packages have been offered, of which 2,648 packages were sold at lower rates, 630 packages were withdrawn, and 580 packages postponed until to-morrow, when also 1,834 packages are advertised for sale without reserve. In face of such large quantities prices have been fairly maintained, but recently they have ruled in favour of buyers. Canton kinds show no material change.

SILK.

No alteration has taken place in the market since our last report.

CHINA PRESERVES.—About 266 cases Ginger have been sold at 8¼d. to 9¼d.

COIR GOODS.—A large supply of Yarn has been offered by auction, but of the bulk consisted of second-hand parcels, which met no offers, and was withdrawn, the remainder fresh imports selling at steady rates. Of 46 bales Ceylon *Yarn* offered 11 bales fine sold at £46; of 43 tons ditto 20 tons sold, very common, £25 5s.; common to low middling, £28 to £29 10s.; medium to good medium, £31 15s. to £33 10s. Of 19 tons Ceylon *Fibre* offered only 4 tons sold—low mattress at £9 15s. to £10, fair ditto £18, bristle at £39 5s., also 8 tons Ceylon *Rope* 3 to 3½ inch at £18, 2½ to 3 inch at £20 5s., 1¾ to 2¼ inch at £24 5s. per ton.

COCOA-NUT OIL.—The market is quiet but steady at £35 10s. for Ceylon, and £38 for Cochin. In public sale a considerable quantity has been offered but has met but little demand, and only a small portion sold; of 761 casks Cochin 32 casks sold—good fair to good at £37 10s. to £38, but about 20 tons good have been sold privately at the latter price; 309 casks Ceylon were bought in at £35 to £35 10s., except 5 hogsheads good which sold at £35 10s.

CUTCH continues dull; the only sale has been of 300 boxes fine Pegu old import at 22s. per cwt.

EBONY.—At auction 60 logs (13 tons) cocoa-nut oil damaged Ceylon were sold at £24.

GALLS.—China continues firm at £2 17s. 6d., at which price 200 cases have been quitted during the week.

GAMBIER.—The market has presented a more steady appearance, and transactions establish a slight advance upon last week's prices. On the spot a small business has been doing in block at 24s. 6d., and in fine cubes at 29s. 9d.; afloat, 23s. 1½d. to 23s. 3d., ex ship, has been realised for June-July, and 22s. 6d. for July-August shipment.

HEMP.—The demand for Manila is inactive, and but little business has been done; prices show a slight decline, fair roping being quoted at £45 10s. per ton.

JAPAN WAX.—Without alteration. In auction of 125 boxes saucers offered 30 boxes good hard yellowish sold at 93s. to 94s., and 5 boxes stained at 87s. per cwt.

PEPPER.—*Black*: Privately the market is quiet but steady, small sales being made on the spot in Singapore at 6¾d. for September delivery, and in Penang at 6 5-16d. Of the offers at auction the bulk was bought in—Singapore at 7d., Siam at 6¾d., Penang at 6⅞d. to 6½d.; sea-damaged Penang sold at 6¼d. to 6⅜d., and Trang at 6⅜d. *White* has met less demand, and has sold at rather lower prices—Singapore fair 1s. 2¼d., good bold 1s. 2⅝d., Penang at 1s. 1⅜d.

RICE.—There is a quiet market on the spot, and no business has been done in that position, but transactions to considerable extent have been effected in floating cargoes, the following having been sold:—The Emmanuel 970 tons Necransie, arrived off coast, at 9s. 9d. Liverpool quay terms; the Admiral Tegethoff 1,250 tons Necransie, arrived also, at 9s. 9d. Liverpool quay terms; the Albert Wilhelm 960 tons Rangoon, arrived off coast, at 10s. 7½d. Liverpool quay terms; the Eliza Querolo 875 tons Bassein, May sailing, at 10s. 6d. Liverpool quay terms; the Catalina 840 tons Necransie, off coast, at 9s. 3⅞d. for the Continent; the Kong Eystein 680 tons Necransie at 9s. 5½d. also for the Continent; a cargo of 1,500 tons Rangoon, per steamer August sailing, at 10s. 1½d. ex ship London; the Rurick 1,070 tons Bassein at 10s. 6d. Liverpool quay terms; the G. C. Michels 475 tons Necransie at 9s. 4½d. for the Continent; the Peppina Mignona 650 tons Rangoon, off coast, at 10s. 1½d. for the Continent; the Lutterworth 1,100 tons Bassein, June sailing, at 10s. ex ship London; the Suomi 1,020 tons Bassein, May sailing, at 10s. 6d. Liverpool quay terms; and a cargo of about 1,000 tons Bassein, distant shipment, at 10s. 3d. Continental terms.

STICLAC.—Good free Siam continues to realise the previous price, viz., £4 7s. 6d. per cwt.

SAGO.—In auction 212 boxes fine large and medium sold at 19s. 6d., two lots 20s., 377 bags medium partly sold at 19s. 6d.; *Flour*: Singapore has been sold to some extent at 16s. cash.

SPICES.—*Cassia Vera*.—9 cases mouldy Penang sold at 32s. *Lignea*: Of 340 boxes unworked offered 130 boxes sold at 90s., being cheaper. *Cinnamon Chips*: Of 247 bags Ceylon offered 187 bags sold at 5½d., coarse bark at 2⅝d. *Cloves*: 24 cases low dull Penang sold at 6⅝d. to 7⅛d., 3 cases Amboyna sort at 7⅞d. *Nutmegs*: A large supply, amounting to 441 packages, was offered, and with a better demand the greater part was disposed of at firmer rates; of 162 cases 272 boxes Penang and Singapore 60 cases and 272 boxes sold, average 68 nuts to the lb. at 3s. 9d. to 3s. 10d., 72 and 71's at 3s. 8d. and 3s. 9d., 79 to 74's at 3s. 5d. to 3s. 6d., 94 to 90's at 3s. 2d. to 3s. 4d., 113 to 109's at 3s., 160 to 140's at 2s. 7d. to 2s. 9d., shrivelled and lined 1s. 4d. to 2s. *Mace*: 20 cases Penang and Singapore met a steady demand, and 16 cases sold at dearer rates, ordinary dark 3s. 10d. to 4s., good ordinary 4s. 1d., middling to fair pale and reddish 4s. 4d. to 4s. 6d., of 41 cases ordinary Java only one lot sold at 3s. 9d.

TIN.—Owing to the near approach of the Dutch sale prices here have been irregular; the last quotation for Straits is £146 to £146 10s.; Banca rules at £163; Billiton at £152 per ton.

From Birkenhead, per ton.—To Shanghai: 35s. To Hong Kong: 27s. 6d. To Manila: 30s.

Insurances.

By steamers via S.C., or sailing vessels, f.p.a.:—To Yokohama, steamer 35s., ship 40s.; to Shanghai, steamer 30s., ship 40s.; to Hong Kong, steamer 25s., ship 35s.; to Singapore, steamer 20s., ship 25s. to 27s. 6d.

The Admiralty have invited tenders for the conveyance of 40 tons of stores to Hong Kong.

CASUALTIES.

Advices received from Hamburg, dated Sept. 20, state that the Elena Cardano, Schiaffino, which arrived there on the 17th, from Nicolajefsk, ran into a schooner lying at anchor off Blankenese, but sustained no serious damage.

The Radore, from Cardiff for Singapore, has put back to Penarth Roads, with loss of anchor.

MISCELLANEOUS.

The committee of Lloyds will be glad of any information respecting the Robin Hood, Lewis, which vessel is reported to have sailed from Sourabaya, for Rotterdam, on Feb. 11 last, and was spoken March 1, in lat. 15 S., lon. 115 E.

At ST. HELENA.—July 27, Adriana Petronella, de Breuk, from Batavia, and sailed Aug. 1, for Falmouth; July 28, Kennemerland, de Jong, and sailed 29, for Amsterdam.

At PORT SAID.—Canton, from London, for Singapore, China, &c.

THE P. AND O. STEAMER "HYDASPES."—This vessel, which has been built and engined by Messrs. Denny and Co., of Dumbarton, for the P. and O. Company, has been taken to Stokes Bay, under the command of Captain J. M. Rogers, for a trial at the measured mile, preparatory to being employed in the Eastern mail service. Among the gentlemen present were Messrs. P. D. Hadow, H. Bayley, E. Thornton, and Captain J. R. Engledue, directors of the company; Messrs. E. H. Rea, A. Maclean, and G. W. Smythe, of the General Post-office; Messrs. P. Denny and Brock, of Dumbarton; Captain T. Black, and Mr. A. Lamb, general and engineering superintendents at Southampton; Captain T. Jamieson, Messrs. T. S. Begbie, W. Barnes, Witt, Firth, &c. With an average pressure of steam of 57 lb., vacuum 25½ inches, and the engines making 66 revolutions per minute, she ran the measured mile twice with the following results:—1st (against a very strong tide), 5 min. 32 sec., or 10·843 knots per hour; 2nd, 4 min. 32 sec., or 13·235 knots, giving a mean speed of 12·039 knots. Having as yet taken very little cargo on board, and but a comparative light weight of coals and stores, the vessel's draught forward was only 15 ft. 10 in., and 16 ft. aft, and the fans of the screw were consequently some distance out of the water, thereby materially diminishing her rate of speed, and there can be no doubt that when in proper trim the Hydaspes will be quite equal to her sister ship, the Cathay, which, while her engines made eight revolutions per minute less than the Hydaspes, attained a speed of 13·478 knots on the occasion of her trial some two or three months since. The following are the leading dimensions of the Hydaspes:—Length between the perpendiculars, 365 ft.; breadth of beam, 39 ft. 4 in.; depth from top floor to spar deck, 29 ft. 4 in.; registered tonnage, 1,890·79; gross tonnage, 2,983·52. She is fitted with compound engines of 450 nominal horse power, indicating 2,052 during the trial; diameter of cylinders, 86 and 50 inches respectively, with 4 ft. 6 in. length of stroke; diameter of screw (Griffiths solid four-bladed), 17 ft. 9 in., and 25 ft. pitch. The vessel has accommodation for 130 first and 50 second-class passengers and 2,000 tons of cargo, and is beautifully fitted in every department with all the latest improvements and conveniences. The engines worked admirably throughout the trial, and the builders were congratulated by Mr. Hadow on having added to the company's fleet another noble vessel, which had given the directors every satisfaction. The Hydaspes has left Southampton as an extra steamer for Bombay, with passengers and cargo, via the Suez Canal.

LAUNCH OF A STEAMER FOR THE SIAM TRADE.—An iron screw-steamer named the Kromahtah was successfully launched from the building yard of Messrs. Lewis and Stockwell, Blackwall-point, Greenwich, on the 21st inst. This vessel has been constructed especially for the Siam trade to the order of Essmailjee Soulamanjee, Esq., of Bangkok, from the designs and under the superintendence of Mr. W. B. Haffenden, who built and took out some three years ago the steamer Bangkok for the same service. The Kromahtah is a remarkably fine looking vessel, and promises from her yacht like and still-stable appearance to be not only fast but an unusually good sea boat; her dimensions are—216 ft. 6 in. between pependiculars, 226 ft. 10 in. over all, 27 ft. 6 in. beam, 15 ft. depth of hold moulded, and measures 805 tons B.M.; she will carry about 1,000 tons weight and measurement, together with fuel and equipment, on a mean draft of 13 feet, and will be propelled by a pair of Messrs. James Watts and Co.'s direct acting compound engines of 150-horse power nominal; she is fitted with all the latest improvements, and has most superior accommodation for a limited number of first and second-class passengers. The launch was attended by a very select party, including many ladies, and a platform was erected at the bow of the vessel from which, notwithstanding the inclemency of the weather, the visitors were enabled to view the launch in comfort. Mrs. Howard Smith performed the ceremony of naming the vessel, which was taken into the East India Docks for completion, and is expected to be ready early in November to leave for Singapore and Siam, via the Suez Canal, for which places she is chartered by Messrs. Smith, Son, and Cole. The visitors were after the launch taken by special steamer to the Trafalgar Hotel at Greenwich, where an entertainment was provided, and the toasts, which were numerous, were responded to with the greatest enthusiasm.

LAUNCH OF A STEAMER FOR CHINA.—Messrs. Hall, Russell, and Co., Aberdeen, have launched a fine steamer intended for the China coast trade. This vessel is of the following dimensions: Length 240 feet, beam 31 feet 6 inches, depth 24 feet to spar deck, and 1,400 tons register. She is splendidly fitted up for European and Chinese passengers, having all the most modern and improved appliances in the fittings of the cabins and saloon; is to be propelled by engines of 135-horse power, on the compound principle, and she is fitted with water ballast, and the most approved steam winches for the loading and discharge of cargo. The vessel will be complete for sea in a few weeks, and will steam direct to China. Messrs. Hall, Russell and Co., have on hand another fine steamer for Chinese waters, of the following dimensions: Length 250 feet, beam 34 feet and 22 feet to upper deck, 1,500 tons register, and 210-horse power surface condensing compound engines. She is fitted all fore and aft in the Chinese cabins and large house on deck after the style of American river steamers, and it is expected from her beautiful lines she will have a speed of over 12 knots an hour.

residing abroad would find this a most desirable home. References can be given for England, India, China, and Japan.

For terms, &c., address M. H., *London and China Telegraph* Office, 2, Cowper's-court, Cornhill, E.C.

HOLLOWAY'S PILLS

PROTECTORS OF HEALTH.—In the hand-to-hand struggle for existence in the present day, good health is everything. Holloway's purifying, digestive, and gently laxative Pills are admirably adapted for restoring soundness to invalids whose functions are so feebly performed that life itself seems most precarious. The stomach may have its many maladies removed by a judicious use of these Pills, the torpid liver is roused to active secretion, and every other organ subserving digestion is placed at its natural standard, and better fitted for its duties. It is impossible to have a doctor at our elbow at all seasons and places, but these Pills will supplant that loss, for they universally act beneficially in every ailment.

JAPAN AND CHINA.

Great Mail Route via New York and San Francisco.

THE PACIFIC MAIL STEAMSHIP COMPANY, under their new arrangement with the United States Government, despatch the following magnificent STEAMERS, of 3,000 tons burden and upwards, with Mails and Passengers, from San Francisco, on the 1st and 16th of every month, for Yokohama, Hiogo, Nagasaki, Shanghai, and Hong Kong, connecting at Hong Kong with the Peninsular and Oriental Line, for Ports in India:—

America	Japan	China
Great Republic	Alaska	Costa Rica
Colorado	Constitution	New York
Golden Age	Oregonian	Ariel

Returning from Hong Kong on the 12th and 27th of every month.

The Pacific Mail Steamship Company's steamers also leave New York on the 10th, 20th, and 30th of every month for San Francisco, via Panama, calling en route at Kingston, Jamaica, and ports along the North Pacific coast.

For rates of fare from England, which include railway transit across the American continent, and other information, apply to H. STARR and Co., Agents, 22, Moorgate-street, London.

UNION PACIFIC RAILWAY.—THROUGH LINE from NEW YORK to SAN FRANCISCO.

San Francisco,	18 days from England.
Japan	in 38 ,, ,,
China	in 44 ,, ,,
New Zealand	in 42 ,, ,,
Australia	in 47 ,, ,,

Passengers for California and intermediate points on this road are now booked through from England at the established rates of fare; and from San Francisco to Japan, China, Australia, &c., by the magnificent steamers of the Pacific Mail Steamship Company and United States, New Zealand, and Australian Mail Steamship Company.

For Rates, Tickets, &c., apply to H. STARR and Co.' Agents, 22, Moorgate-street, London.

AROUND the WORLD in NINETY DAYS, by Steam and Rail, by Land and Sea, via North America, Japan China, Sandwich Islands, New Zealand, Australia, Ceylon, India, Egypt, and Continent of Europe.—By authority of the various mail steamship and railway lines comprising the above routes, FIRST-CLASS PASSAGE COUPON TICKETS are now issued for the ROUND JOURNEY, either by way of Japan and China or New Zealand and Australia, at one reduced and inclusive fare.

The route will be over the Great Union and Central Pacific Railway to San Francisco, passing through some of the grandest and most interesting scenery in the world. From San Francisco the tourist will be taken to Japan and China by the Pacific Mail Steamship Company, or to New Zealand and Australia, by the United States, New Zealand, and Australia Mail Steamship Line, and thence by the Peninsular and Oriental Company, via Galle, Madras, Calcutta, and Bombay (over the Great Indian Railway) to Southampton, or London, via Brindisi.

The journey may be broken at any point, and resumed at pleasure

Fare, via China, £221 via New Zealand and Australia, £197.

For further particulars apply to H. STARR and Co. 22, Moorgate-street, London. Agents Union and Central Pacific Railway, &c.

Steam via the Suez Canal To sail on the 12th October

FOR SINGAPORE, YOKOHAMA, and HIOGO, with liberty to call at Hong Kong, the splendid full-powered screw-steamer GALLEY OF LORNE, 100 A 1.; 1,390 tons register, 240-horse power, nominal; RICHARD ROBINSON, Commander; South West India Docks. This ship has a large portion of her cargo engaged, deliverable at Japan without transhipment. Has elegant accommodation for first-class passengers, including cabin fittings, bedding, and linen.

For Freight or Passage, apply to SHAW, MAXTON and Co., 2, Royal Exchange-buildings, London, E.C

FOR Tanjong Pagar, SINGAPORE.—The following VESSELS are now on the berth in LONDON.

	Tons	Brokers.	To Sail
Kromatah, s.s.	805	Smith, Son, & Cole	Oct. —
Havelock	455	Wright Bros. & Co.	Oct. 25
LIVERPOOL.			
Menelaus, s.s.	1,519	Alfred Holt	Oct. 3
Ulysses, s.s.	1,520	,, ...	Oct. 13
GLASGOW.			
Maggie Leslie, s.s.	434	Thos. Skinner & Co.	Sept.—

Scale of wharf and dock charges may be had on application to the Company's London Agents, Messrs. MACTAGGART, TIDMAN, and Co., 34, Great St. Helens, E.C.

STEAM to BANGKOK

(Crossing the Bar.)

Via the Suez Canal, with all possible despatch, calling at Tanjong Pagar Wharf, Singapore, the new, powerful, first-class screw steamer KROMATAH, 805 tons, 150-horse power nominal, W. B. HAFFENDEN, Commander; South West India Docks. Splendid accommodation for passengers.

For Freight, Passage, or further particulars apply to SMITH, SON, and COLE, 12 George-yard, Lombard-street, London, E.C.

HONG KONG DIRECT, now loading in the West India Docks, the well-known clipper ship CŒUR DE LION, now named NUEVA PROVIDENCIA, A1 13 years, 818 tons register, Captain V. de VIDAURRAZAGA. This ship, noted for quick passages, has the greater part of her cargo engaged, and will have immediate despatch.

Apply to Messrs. W. and J. LOCKETT, 12, King-street, Liverpool; or the brokers, KNEVITT and Co., 3, Sun-court, Cornhill, London.

* By Pacific mail *via* San Francisco.

THE MAILS, &c.

The French mail, bringing advices as above from China and the Straits, was delivered, *via* Marseilles, this evening at nine P.M., thirty-six hours late, having been detained by bad weather. The Pacific mail, with the Japan advices, reached us, *via* San Francisco, on the 2nd inst. The next inward (P. and O.) mail, with dates Yokohama Aug. 21, Shanghai Aug. 25, Hong Kong Aug. 31, Singapore Sept. 8, is due, *via* Brindisi, on Monday next, the 14th inst.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, four to five hours in transmission. The Great Northern line is interrupted between Japan and Wladiowostok, but the Hong Kong and Shanghai section is in working order.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Donnai*, arrived Oct. 6.—From Yokohama: None. From Shanghai: Messrs. Conolly, De Cretz. From Hong Kong: Messrs Such, Torre-Bueno, Campo, Tuesada, Celestino. From Saigon: Messrs. Picot, Larage, Mrs. Smith. From Singapore: Messrs. Villeton, Anailly, Dr. Fegan. From Galle: Mr. MacDonald.

PASSENGERS OUTWARD.

Per P. and O. steamer *Massilia*, from Southampton, Sept. 26.—To Yokohama: Mr. Short. To Hong Kong: Commander Hon. J. Fitzmaurice, Mrs. Andrews and child and three second-class passengers. To Singapore: Rev. H. Francis. To Ceylon: Mr. and Mrs. C. B. Collinson, Rev. W. F. Creeny, and four second-class passengers.

Per P. and O. steamer *Malta*, from Brindisi, Oct. 7.—To Yokohama: Mr. Beatto and one second-class passenger. To Shanghai: Mr. Fauvit. To Singapore: Mr. R. B. Carnegy.

Per P. and O. steamer *Mirzapore*, from Southampton, Oct. 3.—To Ceylon: Mr. W. Owen.

Per P. and O. steamer *Simla*, from Southampton, Oct. 10.—To Yokohama: Mr. F. C. Hayes. To Shanghai: Mr. A. B. Steel, Mr. T. B. Hooper. To Hong Kong: Mr. L. Robertson, Miss Simpson, Mr. E. Moore. To Singapore: Mrs. Trotter, Mrs. Dunlop and child. Nai Sootchai Bhaunwongse. To Penang: Mrs. Speedy. To Ceylon: St. Surg. W. B. Dalby, R.N., Mr. G. C. Rosmalecocq.

Per P. and O. steamer *Pera*, from Venice, Oct. 18.—To Penang: Mr. Speedy, Mr., Mrs., and Miss Vermont. To Singapore: Mr. J. M. Matson. To Ceylon: The Mackintosh of Mackintosh, Mr. S. Holmes.

Per P. and O. steamer *Pera*, from Brindisi, Oct. 21.—To Yokohama: Mrs. Marshall. To Shanghai (*via* Bombay): Mr. J. E. W. Stewart. To Hong Kong: Mrs. C. A. Sinclair. To Singapore: Capt. and Mrs. Caldbeck. To Ceylon: Mr. R. Morris.

Per P. and O. steamer *Poonah*, from Southampton, Oct. 24.—To Shanghai: Mr. Brewer. To Hong Kong: Mr. H. H. Thornton, Mr. J. Alexander. To Singapore: Miss Rickards.

Per P. and O. steamer *Pekin*, from Southampton, Nov. 7.—To Shanghai: Mr. Wulff. To Ceylon: Mrs. Bayley and child. To Hong Kong (*via* Bombay): Mr. W. H. Fittock.

Per P. and O. steamer from Brindisi, Nov. 18.—To Shanghai: Mr. and Mrs. H. Robinson.

Per French mail steamer *Tigre*, from Marseilles, Oct. 13 (booked from London).—To Yokohama: Mr. Bossman, Mr. Fraissinet, Mr. Jacobs. To Shanghai: Mr. W. F. Loy, Mr. R. E. Rennie, Mr. H. Broughman Miller, Mr. and Mrs. Medhurst and child. To Hong Kong: Mr. F. Bowden. Mr. and Mrs. Heard, Mr. J. Heard. To Batavia: Mr. C. A. Henry, Mrs. Lacey, Mr. and Mrs G. Van and son. Mr. and Mrs. Engelbronner and family, Mr. van Hemert. To Galle: Mr. A. S. Daniell, Mrs. W. Daniell, Mrs. Geddes and child. To Saigon: Mr. Lory, Mr. G. Boller.

Per French mail steamer *Donnai*, from Marseilles, Oct. 27 (booked from London).—To Hong Kong: Mr. E. Moore. To Singapore: Mr. and Mrs. Labhart Lutz.

Per French mail steamer *Arca*, from Marseilles, Nov. 10 (booked from London).—To Singapore: Mr. and Mrs. W. Ullemeister. To Batavia: Mr. and Mrs. Nogel, Miss Klins, Mr. A. Matkina, Miss Clona, Miss Mees.

Per French mail steamer *Cambodge*, from Marseilles, Nov. 29 (booked from London).—To Batavia: Mr. and Mrs. Hora Siccolina.

Per steamer *Drummond Castle*, from London, Sept. 28.—To Singapore: Capt. Kirk, Mr. Hoskyn. To Hong Kong: Mr. Hochne. To Shanghai: Mr. Litchfield, Mr. Milne.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The Pacific mail, *via* San Francisco, brings advices to the 22nd August, eight days later than those by the present French mail. The P. and O. mail from London, June 28, arrived out on the 10th, and the following French mail of July 5 on the 19th August. The following summary of news is from the *Japan Mail* and *Japan Herald*:—

The authenticity of the reply of the Koreans to the despatch of the Japanese, sent some three years ago, demanding payment of the arrears of tribute, as published in the *Nishin Shinjishi*, has been denied by the Foreign Office, which states that those who have read it are to consider it untrue, inasmuch as the Mikado sent a letter to the Korea three years ago, but as yet no answer has been received. The official denial is discredited.

On the 15th Aug., quite unexpectedly, his Imperial Majesty the Mikado visited Yokohoma, no intimation of his intended call being received by the Saibansho officials until he had almost actually landed. The first boat reached the hatoba just in time to despatch a messenger to the acting governor informing him of it. Oye Tak, accompanied by another gentleman, then repaired to the landing place, and received his Majesty. The Mikado left the *Joshiu Maru* in his launch, accompanied by his chief chamberlain, Toku Dai Jikunaiki; second chamberlain, Yoshikunai Shoyu; and the lord high admiral, Kawamura Shoyu, and reached the hatoba shortly before eleven. In the bow of the boat was an officer officiating as flag bearer, displaying the Imperial ensign. His Majesty was dressed in European diplomatic style—dress coat, with the tails lined with rich purple silk, black beaver cocked hat, with the Imperial bird in gold on either side, pants with very broad gold stripes down the side, and the usual dress sword. His staff, consisting of ten members, were habited in naval uniform. After landing, which was not attended by any official ceremony, in consequence of the visit being made unexpectedly, his Majesty, accompanied by Oye Tak, passed through the Custom-house, and made his way to the Saibansho, followed by his suite, flag-bearer, and two attendants carrying a large box covered with green damascene embroidered in white with chrysanthemums. The entry to the Saibansho was devoid of any pomp, inasmuch as it was made by the back entrance. The Mikado was then conducted to private apartments, where some slight refreshment, consisting of ice-creams and cakes, was partaken of. No presentations whatever were made. His Majesty and party left by special train for Yedo the same afternoon. The Kanagawa fort fired several royal salutes.

Mutzu, Governor of Ganagawa, has been invested with the

Digitized by Google

title of Sozyai-no-kami, which, translated, means Governor of Customs.

The following extraordinary letter, directed against the progressive policy of the Japanese Government, has been addressed to the Mikado by Jiusanimi Hisamitsu, an ex-official of the Government, who has from time to time evinced great opposition to the admission of foreigners.

The establishment of national principles of action and the execution of the laws. The adoption of a system of dress and strict regulation of the outward man. The reform of learning. The careful selection of human talent. The careful conduct of foreign relations and the establishment of a clear distinction between the rights of Japanese and foreigners. The cultivation of a military spirit and the reform of the army laws. The establishment of a clear distinction between the rights of noble and mean. The banishment of greed, the prizing of virtue, the rejection of deceitful arts and the reverencing of truthfulness. The strict prohibition of debauchery and the establishment of a strongly marked line between the sexes. The right of all to address the Sovereign. The careful judgment of disputes and rightful apportioning of reward and punishment. The lightening of taxes and the abatement of burdens. The careful calculation of income and expenditure.

The above contains a summary of the opinions held by your Majesty's servant during many years, and he entertained them at the time of his short visit to the capital four years ago (1869), but finding no convenient opportunity for expressing them, and not being favoured either with your Majesty's gracious interrogation, he was obliged to be silent. But now he has, in your Majesty's tour, been fortunate enough to worship the heavenly countenance, and he can no longer refrain from giving vent to his humble sentiments. In this critical moment he can no longer sit by and look on with indifference at passing events, and though he is convinced that your Majesty cannot adopt his retrograde and unenlightened views, still he feels that a convenient occasion will perhaps never offer itself again, and he ventures to make this abrupt representation. He most humbly apologises for his audacity, but the fact is that by your Majesty's present system of government the fortunes of this country are daily declining; the Imperial line which should last for ever and ever is in danger of falling into the vice called republicanism, and he can see as clearly as in a mirror that Japan will eventually become a dependency of the Western barbarians. He can only sigh and weep.

The judgment of Sir Edmund Hornby in the case of Findlay, Richaidson and Co. *v.* Pitman and Co., which was decided a short time since by Mr. Acting Assistant Judge Hannen, from whose decision the defendants wished to appeal, is that no appeal can be made from the Supreme Court, except to the Privy Council. The effect of the decision is of high importance to British subjects in Yokohama, inasmuch as it affirms that the Court here is not a Supreme, but a provincial, Court under the jurisdiction of Her Majesty's Assistant Judge.

A Peruvian barque, the *Maria Luz*, with coolies from Macao, bound to Peru, has been driven here by stress of weather, and having completed repairs, was just about proceeding to sea, when one of the coolies, wishing to escape from the ship, jumped overboard to swim ashore, but, getting exhausted, he could get no further than H.B.M.'s ship *Iron Duke*, where, being observed, he was picked up and carried on board, praying for protection. He was handed over to the Japanese authorities, who sent him on board the barque again. The captain then beat him, and cut off his queue for attempting to escape. This coming to the knowledge of Mr. Watson, H.B.M.'s *Charge d'Affaires*, an investigation into the matter was suggested by him to the Japanese Government. Since then others have attempted to escape in the same manner. The acting Governor has been engaged in the matter for several days in the Japanese Court, the evidence of those coolies examined showing that they have been badly treated and insufficiently fed. One man had been forcibly conveyed to the ship, confined in irons in the hold, and starved and threatened with a revolver, but had persistently refused to sign an agreement to proceed in the ship. He had been kept in irons during the entire voyage. Another man who had also refused to sign an agreement declared that his "chop" appearing on such a document was a forgery. Other evidence elicited proved conclusively that measures of the worst kind were resorted to in order to entrap the coolies on board, and punishments of great severity have been inflicted upon those of them who attempted their escape. Several more coolies have yet to be examined. The captain has meanwhile protested against the detention of the ship, and has notified the authorities that he shall hold them liable to the extent of $100 for every day that his ship is detained.

Apropos of this matter the editor of the *Japan Mail* has been indulging in severe strictures, and has been called upon to give an apology and to publish a retraction. This was refused, and the captain instituted a libel suit against the editor of that journal, but the suit was subsequently withdrawn, the captain apparently choosing to submit to the imputations of the journal rather than submit his conduct to investigation in an English court.

It is stated that when the members of the Japanese Embassy presented themselves at Washington, they produced a form of treaty for acceptance by the American Government, which did not meet Mr. Fish's approval. On behalf of America, Mr. Fish in turn submitted a draft treaty, to which the Japanese were not disposed to agree, or had not sufficient powers. Since which we learn that some concessions have been made on the part of both, but their precise nature has not yet been divulged.

The Tunisian steamer, *Sadkia*, which has been the cause of so many lawsuits, as reported in our last issue, was sold on the 8th August under a writ of sale by the Japanese Government to satisfy judgments. The bidding up to $40,000 was shared by Mr. Kirby and another foreigner; past that sum, two new bidders appeared in the field in the persons of Kimura Mompe, a native broker, for whom Captain Batchelder bid, and Takaschimaya, whose name has recently been before the community in connection with the gas works. After a long spiritless bidding between these two she was knocked down to Kimura Mompe for $58,500. The three claims against her just adjudicated by the Saibansho amount in themselves to over $50,000, so, what with other expenses that have been necessarily incurred, all claims cannot possibly be met. The new purchaser has bought her for a company that has recently been started in Yedo for the purpose of conveying emigrants and merchandise from that port to Yesso.

H. B. M.'s store-ship *Manila* was sold by auction on the 13th Aug. by Messrs. Bourne and Co. for the small sum of $1,000, the purchaser being Mr. D. Cook, a shipwright. The attendance was meagre,and the bidding without spirit. The stores realised $700.

The traffic on the railway has increased to such an extent that two more trains a day have been put on; even this does not meet the requirements of the public, but we understand on the opening of the line through to Yedo in a short time, they will again be increased.

The China giant, Chang, in company with some Japanese dwarfs (who go through a threatrical entertainment), is drawing full houses within the pleasure haunted precincts of Asakusa, in Yedo. The price of admission is three tempos, and an average of 3,000 visitors attend daily. In about thirty days hence Chang is to be transferred to Hong Kong, to be on view there.

The French mail steamer *Godavery*, that arrived at 5.30 P.M. on 13th Aug., has made, we believe, the quickest passage on record from Hong Kong to this port, having left there on the 8th, at six A.M., thus making the passage in 131½ hours, or 5½ days.

The 18th Aug. being the birthday of the Emperor of Austria, the Austrian man-of-war and the war ships of other Powers in Yokohama Bay fired a salute.

Pillar posts are being placed about the settlement by order of the Government, and promise to be great conveniences now that the postal system is being so much extended.

The batteries for the Telegraph line between this and Kobe have arrived in the *Thracian*, and we may now hope that telegraphic communication will shortly be established.

The Hon. C. E. De Long, the representative of the United States Government, returned to his post by the last American mail.

The Italian frigate *Vettor Pisani* arrived on 7th Aug., from a cruise among the Loochoo Islands.

HIOGO-OSAKA.

Our advices extend to the 18th August; the American mail, from New York July 6, and the P. and O. mail, from London June 28, arrived out on the 12th August. We take the following from the *Hiogo News*:—

The Mikado left Nagasaki on the morning of the 22nd July, for Kumamoto, stayed at that place two days, visiting the Prince of Hiogo, and left on the 25th for Kagosima, where he arrived on the morning of the 27th. On the day of his arrival there was nothing special done, but on the following day a grand naval sham fight was held, on the plan of the battle at that port in the autumn of 1863. The ships formed line, and steamed past the batteries, amidst much firing on both sides. On the 30th there was a heavy north-easterly gale, which lasted till noon on the 31st. The Mikado was on shore during the gale, but the Japanese were extremely afraid of disaster happening to the fleet. His Majesty stayed in Kagosima for ten days in all, during which time there was a bull-fight and several other amusements, at which he attended. He left for Sanuki at daylight on the 6th August, and arrived here on the 9th.

At half-past four in the afternoon a royal salute from the fleet, which, together with the other vessels in harbour, were dressed with flags, announced that his Majesty had left for the shore. Soon afterwards he landed amongst one company of soldiers from Tokio and one from Osaka, and was immediately surrounded by his suite and marched off to Saibansho, following the course of the main streets, over the Minato bridge. Nearly the whole of the local officials were in the procession. Several foreigners assembled in the tea house on the bridge, and had a splendid view of him. The Japanese turned out in crowds, and though they bent low as he passed, yet they were not afraid to look at him and scrutinize his appearance. After he entered the Saibansho he was no more to be seen, indisposition detaining him within doors on the first day and rain during the rest of his stay. He left from the Western Custom-house landing, on the 14th Aug., but owing to the report having been spread that he would embark from the same place at which he landed, very few foreigners were in attendance. There was but little display here during the Imperial stay. The *Colorado* manned yards and saluted when the ship conveying the Mikado anchored off Hiogo Point, and at night lit up with yardarm lights. A few rockets were discharged, but beyond that there was little display on the occasion.

Digitized by Google

Another new screw steamer, the *Kobe-maru*, has been launched from the shipbuilding yard of Messrs. Fitzgerald, Strome, and Co. at Benten-no-hama. She has every appearance of being one of the most successful vessels yet turned out here. Her dimensions are as follows:—Total length, 103 feet 6 inches; breadth, 16 feet, 6 inches; depth from upper deck to keelson, 11 feet. She will be propelled by direct acting high-pressure engines of 25 h.p. nominal. Her passenger acommodation is large and looks convenient, and her greatest draught of water, with a full cargo, will be about five feet. The usual christening ceremony was performed by Mrs. Marshall, and the launch was satisfactorily performed without a hitch, after which the usual toasts were drunk. We believe that after the usual trial trip she will be placed on the Kobe and Osaka line.

A boat race of a novel character has been rowed between the twelve-oared barge of the *Colorado* and a four-oared outrigger of the Kobe Rowing Club., distance about 200 yards. The outrigger jumped off with the lead, and ultimately won by two lengths, without being caught. Another race between the same crews is to be rowed, distance one mile, and as none of the Club crew are in training the result may be different.

NAGASAKI.

NAGASAKI, AUG. 14 (VIA SAN FRANCISCO).

The mails of the 21st and 28th June arrived here this morning, and the American and the mail leaving San Francisco on the 16th July reached us this afternoon.

Of general news I have but little to give, the community having settled down to its normal condition of quietude since the Mikado's departure. The *Oregonian* copper salvage case has been decided in favour of the defendant, which has somewhat surprised the public, as they were evidently under the impression that even one man in charge of property at the bottom of the sea was sufficient to show that it was not abandoned. I must beg leave to decline expressing any opinion on the merits of the case. Whether the public had made up their minds how the end of it should be I cannot say, but they are almost unanimously in favour of law, in preference to equity, by which the case was decided.

The Municipal controversy is as far off a friendly adjustment as ever it was. A very childish circular letter has been issued by the Consuls to the land renters, accusing them of all sorts of things, and winding up with an ultimatum as undignified as it is impotent. A meeting is to take place on the 20th instant. My letter of the 15th April last, appearing in the *Express*, has somewhat startled the United States Consul, whose anger appears to have got the best of him, as it is said that he is determined to spare no pains to find me out—which means that he will try to arrive at some sort of conclusion after pumping everyone he meets and by laying the blame upon whoever is bold enough to entertain views tending in other direction to his own. It is a great pity he cannot see that a continuance of his present policy is the means of causing greater unanimity amongst his opponents, who would not make the stand they do if they were treated in a proper manner and allowed to discuss the question without interference. My opinion of this community is that they are very easy to lead but most difficult to drive. One particularly horsey friend, speaking of the Municipal question, observed to me that "*we don't go well in a tandem.*"

Exchange on London remains unchanged. Nebukin 382 per $100. The new coinage is at 3 to 4 per cent. premium against Mexican dollars, which are ¼ to ½ per cent. lower than the value of the old coin. The only arrival from the home side during the interval is the steamship *Surprise*, on the 1st inst., from Hull. She left again on the 3rd for the Amoor river.

CHINA.

—o—

SHANGHAI.

We have advices from this port to the 18th August. The French mail from London July 5 arrived out on the 16th August. The following summary of news is from the *North China Herald* and *Shanghai Courier*:—

The new magistrate of Paoshan has won for himself golden opinions by the clever way in which he has discovered and seized a set of cash forgers. The hamlets in the neighbourhood of Peng-wang-miao, a village about ten *li* directly north of Sinzah, have for many years carried on a profitable business by making small cash, and selling it to the money-changers to be mixed up with good cash, and thus passed into circulation. About ten years ago a man belonging to one of these hamlets was beheaded for this crime, but the trade went on as briskly as ever, and of late has greatly increased. The new magistrate, anxious to signalise himself, determined to put a stop to the game, and hit on the following plan for doing so. Taught by experience that his police-runners were at the service of the highest bidder, he knew it was quite useless to trust to them. He therefore dressed himself up like an ordinary tradesman, and set out for Peng-wang-miao. There he drank tea with the villagers and entered into their conversations. Being able to speak the Soochow dialect, he was not suspected of being other than he appeared to be. After awhile he let out, as a great secret, that he had come to buy two or three hundred dollars' worth of small cash, and inquired if it could be purchased thereabouts. Thus thrown off their guard, the villagers fell into the trap and conducted him to the principal mints in the neighbourhood. Several bargains were struck, delivery to be taken next day. The magistrate then returned to his yamen, rejoicing over his success. Next morning, before sunrise, taking with him an escort of soldiers, he set out ostensibly for Shanghai, on business of importance. But when he arrived at the largest mint he alighted from his chair, burst open the door, and seized the head man, ordering his escort to seize the others. Six persons were thus apprehended. The news, however, spread like lightning among the other hamlets, and the guilty parties escaped before the magistrate arrived, but as he knows who they are, he will doubtless bring them to book sooner or later. Report further says that the magistrate has found out that one of the leading gentry of Paoshan has been receiving regular fees from the forgers to keep things all right for them at the yamen, and to give them warning in case of danger.

A correspondent of the *North China Daily News*, writing from Cheefoo on the 5th August, says:—A number of men doing business at Cheefoo have left for their homes in the interior, owing to the rumour that a band of robbers is now near Tsi-nan-foo, and coming eastward. The people of Lai-chow, Lai-yang, and other districts are taking their cattle and movable property to the walled cities and Weitsz'. No one seems to have any certain information in regard to the robbers, not even of their existence. It does not require much, however, to frighten brave Chinamen. The crops have never been better than they are this year. Plenty abounds everywhere. There seems to be no obvious reason for men to plunder when food can be had almost without effort. Some who pretend wisdom say this report has no foundation in fact, but has been circulated by interested parties to get the people to help to repair the city walls. It is several years since there has been any rebel or robber excitement in this province, and the city walls in many places are out of repair. It requires some such stimulant to get men to work without pay. Others say the beggar fraternity, to the number of two hundred or more, held a meeting at a town beyond Chin Chowfoo, and made a raid on a melon patch, hence the report of robbers. If the Chinese people had only the good sense and the courage to arm themselves and join together in self defence, they would have but little to fear from all ordinary robbers. Five years ago, twenty horsemen came to a village near this place, shot one man, put to flight more than 8,000 inhabitants, and drove off the cattle and mules which were left behind.

There has been a great mortality among the dogs of the Settlement. If this mortality had appeared among, and confined itself to, the hundreds, not to say thousands, of wretched unowned quadrupeds and tripods that infest the Settlement and its environs, it might have reasonably been regarded as a public blessing. But unfortunately this class of animals seem to pass unscathed, while some of the most valuable foreign dogs, both sporting dogs and pets, have been cut off, and their ailment, whatever it was, ran its course rapidly. In these circumstances there is a natural tendency to suspect poisoning, and arsenic is spoken of as the agent used. On the other hand, the deaths have been so numerous, so widely distributed over the Settlement, so various in their surroundings, so apparently unconnected with each other, that the poison theory is rendered improbable, and some begin to think that some distemper or pest is becoming epidemic.

The municipal council seems resolved to use all diligence in carrying out the instructions of the ratepayers in the matter of the Soochow Creek. Already working plans have been elaborated, detailed estimates made and accepted, and the contractors (Messrs. Farnham and Co.) instructed to proceed forthwith with the construction of pontoons, and other matters necessary to the formation of the free ferries sanctioned by the ratepayers. It is said that part of the contract is that the ferry over the mouth of the creek is to be ready for use by the public by the 1st of October; and if this information is correct, it speaks highly for the energy alike of the council and of the contractors.

The autumnal religious processions and observances, against which the Shanghai Taotai directed a proclamation, seem to be engaged in as freely as ever, and they are not the kind of thing to render the Bubbling Well road a safer drive when they encounter its crowd of carriages of an evening. The transmission of garments and mock sycee through the medium of fire might be undertaken at a more opportune hour than between five and six in the evening, and at a more suitable place than by the side of a public drive. One night, at that time, there were two fires on the bridge over the defence Creek at the head of the Maloo; and on another occasion there was a regular bonfire opposite the row of Chinese houses looking on the race-course, which might very readily have caused an accident.

It is rumoured that the steamers of the P. and O. Steam Navigation Company and the Messageries Marine Company intend to make Nagasaki a port of call. This will afford great facilities to the residents there, in the regular delivery of their home mails, and it is to be hoped will stir up trade which has been so long stagnant.

The steamer *Relief*, originally a P. and O. boat, and latterly well known as the *Osaka*, arrived on the 15th Aug. from Nagasaki, flying the flag of the Pacific Mail Company, but brought no Japan mail.

Digitized by Google

We understand that the Chinese frigate now building at Kaou-Chang-Meaou is expected to be ready in about a month. She has not received a name, and will have to proceed to Nanking to receive one from the Viceroy; at present she is known as the No. 5.

One of the northern steamers, leaving on the 14th Aug., took away treasure to the amount of Tls. 100,000 for Peking, as an instalment, it is said, towards the expenses of the approaching Imperial marriage.

HONG KONG.

Our advices by this mail extend to 24th Aug.; the P. and O. mail from London 12th July arrived out on the 18th August. The following items of intelligence are taken from the *China Mail* and the *Daily Press*:—

On the night of the 22nd inst. the fire alarm was rung, and the word passed with the rapidity of lightning that the matshed building at Syingpoon, in which the Chinese Exhibition was displayed, had caught fire. Towards the westward there shone a vast blaze of light, which rapidly increased in magnitude, lighting up the whole district, and bringing out the contour of the hill as though the sun were shining upon it. The excitement among the crowd which was pushing its way to the scene of the disaster was intense, and much sympathy with the calamity was manifested, both among the foreigners and the natives. Onward pushed the motley mass, which was soon overtaken by a detachment of the police at double quick pace, with whom a large portion of those going towards the fire joined. Captain Deane, Mr. Rice, and Messrs. May and Stewart were soon on the spot, and Major-General Whitfield was observed on horseback taking an active part in the proceedings. Whatever could be done was at once undertaken, but unfortunately little or no assistance could be rendered, as the flames spread with so much rapidity that within a quarter of an hour of the fire breaking out the whole building was one mass of flaming ruins. The engines soon arrived, but great difficulty was experienced in getting water; and indeed it was apparent that no engines could possibly be of service, as the mischief was done before they could be brought into play. Fortunately, there was no wind, or the buildings on Battery-road would in all likelihood have caught, and the vermillion factory would also have gone. The origin of the fire was from the heat of one of the large chandeliers, which ignited the matting on the roof. It broke out from one in the centre. The building at the time was crowded with Chinese, and a large number of Europeans were also present, among whom was Chief Justice Ball and many ladies. As soon as the fire was discovered, a general rush was made towards the sides of the building and the doors, and fortunately the means of egress through the flimsy matting were easy to effect. Some difficulty was experienced in getting out a portion of the Chinamen, who were stupified by opium and samshu, and some of the small footed women, several of whom were rescued at no little personal risk by Inspector Orley, who was obliged to use the point of his sword on one occasion to bring a native to his senses. Inspector Grey, who was at the head of the detachment sent down, was also very active, and maintained perfect order throughout.

The value of the property which has unfortunately been lost is estimated at more than $100,000, a large portion of which was guaranteed by native merchants in Hong Kong to the owners in Canton. We hear that the Governor, who together with his Aide-de-camp and the Hon. C. C. Smith was present, expressed great sympathy with the Chinese, observing that the matter was not only to be regretted on account of the loss of property, but also because it put an end to the pleasures of the people. Scarcely anything worth mentioning was saved, and many of the articles lost were such as could not be compensated for in money, such, for example, as the wonderful dwarf trees, and other curiosities, some of the plants alone being valued at no less than three or four hundred dollars. Perhaps one of the matters most to be regretted was the small amount of assistance which could be rendered. Everybody aided as far as he could, but it was scarcely possible to do anything. The theatre in the matshed was, of course, in much danger, and during the excitement a thousand dollars' worth of property was looted, but the spectators got clear without any casualties. At half-past eleven the fire had burnt itself down, but the engines were still playing on the embers. It is stated that seven bodies have been found among the debris.

The ordinary half-yearly meeting of the Hong Kong and Whampoa Dock Company has been held, the Hon. Jas. Whittall in the chair. The chairman laid the report and accounts before the meeting. He observed that the progress of the company was undoubtedly slow, more like that of the tortoise than the hare, but it was sure, and, on the whole, satisfactory. He then proposed, and Mr. Arthur seconded, that the report and accounts be passed. This was carried unanimously. The appointment of the Hon. Jas. Whittall as director was confirmed unanimously, on the proposition of Hon. P. Ryrie, seconded by Mr. Linstead. It was proposed by Mr. Chas. Morgan, seconded by Mr. W. M. Morgan, and carried, that Mr. A. F. Chambers be appointed auditor in place of Mr. James Hart. This brought the proceedings to a close, and after passing a vote of thanks to the chairman and the directors the meeting separated. The report was published in our last issue.

The *Chinese Mail* notices the departure of the educational mission to America. Previous to their embarkation the chief commissioner, Chan Lai Chow, accompanied by the assistant commissioner, the interpreter of the mission, the native tutor, and the thirty boys, visited the American Consul at Shanghai, and met with a most cordial reception. Subsequently the mission called on the Taoutai at his yamen, where the boys performed the ceremony of kow-tow with wonderful accuracy, which called forth the admiration of his Excellency the Taoutai, who passed some complimentary remarks on them, and offered each a cup of tea. The *Chinese Mail* further learns that each of the boys, by order of the Emperor, was decorated with the button of "Government Students," an honour which is seldom conferred, and confined hitherto to those who have distinguished themselves in Chinese classics.

A man named Chau-Fun-Kwae is said to have been shot by pirates off Hok-tsui Wan, near Stanley, on the 14th Aug. His widow had him buried near Aberdeen next morning, and carefully concealed the circumstance from the police. Rumours of it got abroad, however, and the coroner went with the jury, surgeon, &c., to exhume the body, and to hold an inquest over it. Inspector Batten is in pursuit of the pirates. The body, strange to say, was not much decomposed, although it had been buried six days. It presented, however, a most abject appearance. The doctor found a wound in the back penetrating through the lung.

We are glad to note that the boat-house and swimming-bath scheme is progressing; about 250 of the 300 shares have been taken, and applications for the remainder will be received until the bath and building are opened. The foundations of the boat-house have been laid, and we learned from a contemporary some time since that a similar ceremony had been performed for the swimming-bath, though, as the first course must be some fathoms down, it is, of course, invisible.

The Criminal Sessions of the Supreme Court, which were to have been resumed on the 20th August, had to be further postponed, owing to the indisposition of the Acting Chief Justice. It appears that his Lordship was suddenly taken ill while on his way to the Court House, and upon his chair being set down in front of the line of policemen drawn up at the door to receive him, he was found apparently insensible, and it was half an hour before consciousness returned.

The boy Peter Nielson, who was sentenced to five years' penal servitude for attempting to set fire to the ship *Benefactor*, has again been brought down to the Supreme Court for the purpose of having his sentence amended. It appeared that by some oversight the prisoner was not ordered to be flogged as his Lordship intended. The prisoner was therefore ordered to receive a flogging of twenty strokes with a rattan, in addition to his five years' penal servitude.

The Chinese annual procession paraded the streets on the 21st Aug. and the three following days. The usual parapharnalia was carried about, and the whole procession took nearly an hour to drag past a given spot, including all stoppages.

Commercial Report.

(*For dates see first page.*)

IMPORTS.

Yokohama.—There had been an entire suspension of business, in consequence of the attention of native dealers having been occupied in the balancing of their regular half yearly accounts. Prices were in consequence nominal.

Hiogo-Osaka.—Cotton Yarns had declined, arrivals having been in excess of requirements. Grey Shirtings: In the beginning of the month a large business was done at former quotations, since when, owing to the half-yearly settlement of accounts and the Japanese holidays, the dealers had not entered into any fresh engagements. Arrivals heavy and prices weak. Woollens: Mousselines de Laine were in steady demand, without any improvement in price; other Woollens continued very quiet. Quotations Cotton Yarn: Nos. 16 to 24, $130.00 to 133.00 per bale; 28 to 32, $145.00 to 148.00; 38 to 42, $143.00 to 146.00. Cotton Piece Goods.—G E Grey Shirtings: 7lbs., 38 yards 39 inches, $2.20 to 2.32 per piece; 8¼ to 8½ lbs., $2.55 to 2.57; 9 lbs., 44 inches, $2.85; T-Cloths, 6 to 7 lbs., $1.70 to 1.80; Mousselines de Laine: 30 to 31 inches, Plain $0.20 to 0.24 per yard; 44 to 45 inches, $0.29 to 0.35; 30 to 31 inches, figured $0.28 to 0.45. Iron: Nail Rod, $4.50 to 5.00 per picul; Hoop, $6.50.

Nagasaki.—The demand for Cotton Goods had continued throughout the greater part of the month, and owing to the scarcity and consequent dearness of Niboos, prices for most descriptions of staples showed considerable improvement. Niboos had fallen from 375 to 390 per $100, and imports had declined proportionately. In Metals the principal inquiry had been for Nail Rod Iron, and as stocks were very small further arrivals would realise full prices.

Shanghai.—Manufactured Cotton Goods: A quieter tendency had prevailed during the week. In Grey Shirtings only a moderate business had been done at Tls. 1.7.0 to 1.7.2 for 7 lbs. chops, and Tls. 1.8.6 to 1.9.3 for 8.4 lbs. The settlements of White Shirtings had been very trifling, and prices were nominally unchanged. T-Cloths had declined in value 2 to 3 candareens per piece, the demand being very limited; Mexican qualities were quoted at Tls. 1.4.8 to 1.5.7. English and Dutch Drills had continued in fair request at previous quotations. American manufactures had not been inquired for. The market for Woollens had remained firm, and business in Fancy Cottons had been done to a moderate extent.

Digitized by Google

HONG KONG.—Cotton Yarns were unchanged but steady. Grey Shirtings were quiet and T-Cloths weaker. Drills of 14 lb. weights asked for and 5c. to 10c. dearer. In Woollens, Long Ells had somewhat advanced in price, and Blankets were still wanted. The advance in Metals was maintained. Quicksilver had declined, however, and American was quoted $96 to 97 per picul. Rice had advanced in value, and quotations were 15c. to 20c. above those ruling last mail.

EXPORTS.

TEA.

YOKOHAMA.—Business had continued brisk, more especially during the week preceding the close, and settlements amounted to about 7,500 piculs of most grades, the bulk being of good medium and fine kinds. A reduction of from $2 to $3 in prices had occurred, and the market closed with quotations as under; the quality was fair for the second crop, and supplies had about been on a par with settlements, leaving stocks without change; there was still a notable absence of common leaf. The last American mail steamer Alaska took 184,689 lbs. for New York, 91,154 lbs. for San Francisco, 58,585 lbs. for Chicago, and 27,446 lbs. for Boston. The Polly Lewis sailed again on Aug. 5 without any change in her cargo, and the Eastern Chief had sailed for New York with 456,370 lbs. The Leander and Jessie Isabel were loading for New York. Quotations:—Common, nominal; good common, $26 to 29 per picul; medium, $30 to 33; good medium, $34 to 37; fine, $39 to 42; finest, $44 to 47; choice, $50 and upwards. Export from June 1 to date:—To New York, 2,101,876 lbs.; to San Francisco, 617,272 lbs.; to England, nil; total, 2,719,148 lbs.

NAGASAKI.—The principal feature of interest had been the continued demand, at greatly hardening rates, for all classes of Tea suitable for Greens. The supply of Ooreshinos being very limited, purchasers had to content themselves with the commoner kinds of leaf from the Higo districts, for which very full prices had been paid. Quotations—Common to medium, $13 to 16 per picul; medium to fine, $17 to 19; finest, $21 to 24.

HIOGO-OSAKA.—Notwithstanding discouraging advices received from New York, purchases had continued steadily throughout the month, medium to fine grades having been most in request. This inquiry had tended considerably to harden prices for these grades, and quotations showed that an advance had been established. Higher grades were without any material alteration. First crop Teas were getting scarce and much mixed with second crop leaf. Settlements since the 16th July amounted to 8,000 piculs, making a total for the season of 20,800 piculs, against 13,600 piculs for the corresponding period last year. Stocks were estimated at 3,000 piculs. The vessels which were expected to load for New York had not arrived. Quotations:—Common, $16 to 20 per picul; good common, $23 to 26; medium, $28 to 32; good medium, $33 to 37; fine, $38 to 43; finest, $44 to 48; choice, $49 to 52; choicest, $53.

HANKOW.—Advices to 13th August reported limited settlements at unchanged prices.

SHANGHAI.—Black—A steady business had been transacted during the week at rather easier rates, and we have to advise a decline in prices of from five mace to a tael on all descriptions offering. Arrivals continued on a moderate scale. The reported settlements were 15,473 chests, at from Tls. 16¾ for common Oonam to Tls. 29¾ for good to fine Ningchow; reshipments 3,301 chests, stock estimated at 41,000 chests. Green—For country descriptions somewhat less activity had existed in the market, but the total of the business reported was still considerable, amounting to 25,500 half-chests of all kinds, and comprising 13,500 half-chests Teenkai and Fychow, 1,500 half-chests Moyune, 8,000 half-chests Ping-uey and 2,500 half-chests local-packed. An easier tendency in values had continued throughout the week, fully establishing the decline before advised, while a further reduction of about a tael per picul was noticeable in some instances. A fair number of Moyune chops had lately been shown, but they were generally unsatisfactory both in quality and style. The stock was estimated at 41,000 half-chests, including 30,000 half-chests Pingsuey, and 2,000 half-chests local-packed.

FOOCHOW.—A fair business had been done in Congous at prices which had undergone no material change. Several buyers were operating for Australia, and the market had thus been kept steady; but Teamen were anxious sellers, and a decline was looked for as soon as the requirements were satisfied. Small settlements of Souchong and Scented Teas had been made at former rates. Transactions in Oolongs amounted to 2,200 half-chests, of which 1,000 half-chests—a small second-class fine string—were purchased at Tls. 30 short for the first six lines, and Tls. 19 short for the last line, giving a proportion price of Tls. 28.25 or 31 o.b. These, as well as a portion of the others settled, had gone forward in the Cyphrenes. The basis of price for the above was Tls. 27.8 o.b. for good cargo grade. The remaining 1,200 packages consisted of odd lots, purchased on a basis of Tls. 26 to 28 o.b. for good cargo. The finest strings were still untouched, as the holders demanded too much. Stock of Oolong 96,489 half-chests.

AMOY.—Some further small settlements of Oolongs had been made, and the market was firm at previous quotations. The S. S. Cyphrenes was loading for New York.

CANTON.—Holders had continued firm and transactions had been limited. Buyers also had been less anxious to operate, prefering to wait till the quality of the fourth crop, shortly expected at market, should be ascertained. It was reported to be of good quality, but as likely to be limited in quantity.

SILK.

YOKOHAMA.—An exceedingly large business had been done, amounting to about 1,700 bales, which had the effect of raising prices about $25 per picul; since then arrivals had continued large, and the market closed a little easier at quotations given below. Silk Worms' Eggs began to arrive on the 10th August, and amounted to 12,500 cards in all; no sales had as yet been made. Settlements to date, 3,800 bales; stocks, 900 bales. Quotations, including all charges in Yokohama and London, Exchange 4s. 7⅛d. Hanks, Mybash and Sinchu, extra, 31s. 11d.; best 30s. to 31s. 2d.; medium, 27s. 9d. to 29s. 3d.; inferior, 24s. 8d. to 26s. 7d.; Oshu best, 30s. to 31s. 2d.; Hamatski medium, 27s. 9d. to 28s. 10d.; Coshu medium, 26s. 2d. to 27s. 4d.

SHANGHAI.—The market was very quiet in the beginning of the week, but Silkmen having abated their demands to a small extent, buyers had been induced to operate more freely, and the additional settlements aggregated about 2,000 bales. No 3 Taatlees had been taken at Tls. 590, King-chang chop at Tls. 527½, Blue Eleph t at Tls. 525, and Red Peacock at Tls. 507½. Arrivals from the coun had continued on about the previous scale, and the stock was maint d at 8,500 bales. Total settlements for the season, 27,500 bales.

CANTON.—There had been a fair business done at slightly reduced rates, $485 to 490 for market or No. 4 Taatlee Reel, and the settlements amounted to about 460 bales—going forward by this mail. Loongkongs were very flat, and there had been no demand for that description except for the Curio quality which was very scarce, though plenty of so-called Curio was offering but was not up to the classification Stock was estimated at from 400 to 500 bales. Market for rereels very quiet, and discouraging reports having been circulated as coming from New York buyers were not very eager, most of the usually large purchasers having bought to a great extent of the first and second crops. No. 1 rereeled Lacklow ready for shipment could be bought at $575, and No. 1 rereeled Kotengon at $670. Dealers were not willing to enter into contracts at the prices offered—generally from $550 to 555 for No. 1. The fourth crop musters of Kowkong and Kotengon were of particularly good colour, and appeared slightly cleaner than the previous crops, but were coarse in size.

ARRIVALS.

At Yokohama.—From London, Aug. 11, Englebert, Thacrian, Devana; Oct. 5, Sarah Nicholson, Dilkoosh, Olympia, Antenor (str.), Sunda (str.); from Cardiff, Aug. 12, Kate Covert; 20, Ceylon, f.o.

At Hiogo.—From Liverpool, via Yokohama, Aug. 25, Penrith.

At Nagasaki.—From Hull, Aug 1, Surprise.

At Shanghai.—From London, Aug. 6, Trafalgar, Mary Whitridge; 11, Ailsa, Hopewell; from Shields, 12, Conqueror; from Cardiff, 12, Grassmere, Caller Oo; from Glasgow, 13, Merse; from Cardiff, 13, Harwich; from London, 14, Fort Regent, Teviot; from Cardiff, 15, Belted Will, Red Deer; from Sunderland, Paragon.

At Hong Kong and Canton.—From Portsmouth, previous to Sept. 10, Sunda (str.); from Liverpool, Antenor (str.); from London, Benledi; from Cardiff, Aug. 21, Tarquin; from Callao, 21, Cecelia; from Liverpool, 22, Ajax (str.); from Callao, 23, Isabel.

At Manila.—From Cardiff, Aug. 4, Giovani.

At Saigon.—From Reunion, Aug. 21, Anais.

At Bangkok.—From Havre, July 31, Calcutta.

DEPARTURES.

From Yokohama.—For New York, Aug. 5, Polly Lewis; 20, Eastern Chief.

From Shanghai.—For New York, Aug. 6, Duke of Athol; for London, 14, Deucalion; 16, Northampton, Weymouth.

From Foochow.—For London, Aug. 16, Sirius (str.); for New York (via Amoy), 18, Cyphrenes (str.).

From Hong Kong and Canton.—For New York, Aug. 22, Cymbeline, for Cork, 22, Tynedale; for San Francisco, 22, Geo. Croshaw.

From Manila.—For Channel, July 24, Antipodes; Aug. 3, Cumberland; for London, 1, Jubilee.

From Singapore.—For London, Sept. 27, Hope.

From Bangkok.—For London, July 16, Loochoo; for San Francisco, 24, Reveil; for Callao, 31, Ceres; for Marseilles, Aug. 11, Boussole; for San Francisco, 11, Androklos; for London, 20, George Shotton.

SHIPPING POSTSCRIPT.

—o—

Arrivals not in the Tables.—Oct. 3, at Falmouth, from Akyab, Inspector; Sept. 14, at Odessa, from Foochow (via Suez Canal), Danube (s.); Oct. 5, at London, from China, Singapore, &c. (via S.C.), Maud (str.); Sept. 30, at Long Island Sound, from Akyab, Bergenseren; Oct. 5, at London, from Akyab (via S.C.), Tertia (str.); from China, Singapore, &c. (via S.C.), Ravensworth Castle (str.); at Falmouth, from Akyab, Maria Giasapphina, Hudicksvall; 6, at Liverpool, from Rangoon, Clenesk; from Rangoon (via S.C.), Brazilian (str.); at Queenstown, from Akyab, Annot Lyle; Aug. 30, at Callao, from Macao, Camilio Cavour; Oct. 8, off Deal, from China, Sirius (str.); 7, at New York, from Hiogo, Prince Alfred.

Departures.—Oct. 3, from London, for Yokohama, Laurel; from Newcastle, for Singapore, Virginia; 1, from Hamburg, for Singapore, Richard; 4, from London, for Colombo, &c. (via S.C.), Vibilia (str.), Yorkshire (str.); from Swansea, for Galle, Filatori; from Liverpool, for Batavia, Metis; 5, from London, for Shanghai, Portland; from Liverpool, for Manila, Aurorita; 6, from Cardiff, for Singapore, Vittoria Canestro, Grain Sadj; for Trincomalee, Astee Guiseppe; 5, from Newcastle, for Singapore, Amandine; Sept. 4, from Callao, for China, Augustina.

Sioken.—A Dutch Ship, Amsterdam, to Java, Aug. 7, 31 S., 24 W., 43 days out; No. 0,593 (American), from Singapore, June 4, 52 S., 28 E.; Undine (ship), Shanghai to London, Aug. 30, off Cape Agulhas; H. G. V. W., Cardiff to Shanghai, Aug. 25, 1 S., 22 W., 27 days out; Oneiza, Manila to London, July 17, 23 S., 57 E.; Thermopylæ, Shanghai to London, Aug. 22, 32 S., 13 E.; Duke of Abercorn, Foochow to London, Aug. 23, 34 S., 15 E.; Cashmere (ship), Shields to Singapore, Aug. 16, 9 N., 25 W.; Sunda (ship), Cardiff to Hong Kong, Aug. 4, 30 S., 33 W.; Cornelis Smit, Liverpool to Batavia, Aug. 31, 31 S., 89 E.; Meander, Singapore to New York, Aug. 16, 35 S., 20 E.; Kosmopoliet II., for Batavia, Aug. 29, 13 N., 26 W.; Anna Johanna, Batavia to Amsterdam, Aug. 17, 34 S., 17 E.; H. V. N. F. (Havilah barque), Tyne to Singapore, Aug. 13, 3 N., 21 W.; N.Q.D.J. (Lady Ann, of London), Newport to Galle, Aug. 29, 10 N., 24 W.; Gysbertus Hermanus, Cardiff to Sourabaya, Aug. 28, 14 N., 26 W.

Steamers Passed the Suez Canal.—Chaldea, from London, for Colombo, &c.; Ormsby, from Ceylon, for London; Diomed, from Liverpool, for Singapore, China, &c.

CASUALTIES.

The Dexterous, Robinson, from Colombo to New York, put into St. Helena Aug. 31, and reported that during a very severe gale 14, in lat. 36 S., lon. 18 E., she lost sails, boats, &c., and had her bulwarks carried away.

The Sophia Kouingen der Nederlanden, Klein, from Batavia, &c., to London, put into St. Helena Sept. 7, and reported having experienced heavy weather Aug. 18, off the Cape of Good Hope, during which she lost bulwarks and split sails, &c.

The Europa, Supcke, from Singapore and Batavia, to London, put into St. Helena, Sept. 7, having met with heavy weather, Aug. 22, in lat. 35 S., lon. 22 E., during which she sprung her rudder head.

The Cutty Sark (ship), Moodie, from Shanghai to London, passed St. Helena, Sept. 10, and reported by signal that she had lost her rudder off Algoa Bay.

The Robert Kerr, McClure, which arrived at Liverpool, Sept. 29, from Singapore, reports having experienced head winds in the China Sea, being 20 days to the Straits of Sunda, and that when clearing Java head the ship was caught in a terrific squall, which stripped her of all her canvas.

Advices from Amsterdam, Oct. 3, state that the Kennemerland, de Jong, had arrived at Nieuwe Diep from Batavia, and reported having encountered a hurricane, Aug. 21, off the Cape de Verds, which carried away several sails and swept everything movable from off her deck.

The Queen of India, from Manila to Liverpool, put into Algoa Bay, Sept. 2, with loss of bulwarks, &c.

The Sarpedon (str.), Ferguson, which arrived at New York Sept. —, from Shanghai (via S.C.), reports having encountered a hurricane, 23, in lat. 36 N., long. 56 W., lasting eight hours, during which she was hove on her beam ends, and had four feet of water in her engine-room.

MISCELLANEOUS.

At St. Helena.—Aug. 28, Osaka, Leslie, from Ilo Ilo, and sailed 29 for Falmouth; 30, Caroline Coventry, Ellery, from Manila; 31, Wilhelmina, Willenbrink, from Manila, and both sailed 31 for New York; Sept. 1, St. Brycedale, Pearce, from Formosa, and sailed same day for London; Banda, Evans, from Batavia, and sailed same day for Falmouth; 2, Seadrift, Pybus, from Colombo, and sailed same day for London; 4, Canton, Goedt, from Singapore, and sailed 5 for Stettin; Evening Star, La Bœuf, from Singapore; Concord, Park, from Colombo, and both sailed 5 for New York; 6, Veritas, Stahre, from Manila, and sailed 7 for Belle Isle; 8, Java Packet, Trappen, from Batavia, and sailed 9 for Amsterdam.

Off St. Helena.—Sept. 4, Craigie Lee (barq.), from Singapore, for Boston; 9, Aleppo (barq.), from the Phillipines, for London; an English ship, with blue streaks and white ports, from Java, for Queenstown, fifty days out.

The master, De Breuck, of the Andriana Petronella, which vessel arrived at Falmouth Oct. 3, from Batavia, had died at sea.

The Admiralty have invited tenders for the conveyance of 113 tons of stores to Hong Kong.

BIRTHS, MARRIAGES, AND DEATHS.

—o—

BIRTHS.

Addyman—On the 19th Aug., at Hong Kong, the wife of Mr. R. F. Addyman, of a son, prematurely.

Allen—On the 15th Aug., at Shanghai, Mrs. J. W. Allen, of a son.

Bardey—On the 2nd Oct., at Dorset Villa, Sutton, Surrey, the wife of Amedee Louis Eugene Bardey, of a son.

Brown—On the 2nd Oct., at Fulwood-park, Aigburth, near Liverpool, the wife of Stewart H. Brown, of a son.

Duffus—On the 18th Aug., at Swatow, the wife of the Rev. William Duffus, English Presbyterian Mission, of a son.

Cater—On the 1st Oct., at Calder Cottage, Beech-lane, Liverpool, the wife of Charles A. Cater, of a daughter.

Goddard—On the 11th Aug., at Yokohama, the wife of John Goddard, of a daughter.

Mills—On the 29th Sept., at Dudlay House, Sutton, the wife of Thos. Mills, of a daughter.

Meyer—On the 27th July, at Kochi, Tosa, the wife of Frederick Adrian Meyer, of a son.

Pearl—On the 2nd Oct, at Windsor, the wife of E. Pearl, of a daughter.

Rappard-Boeke.—On the 6th Aug, at Osaka, Mrs. G. G. Rappard-Boeke, of a daughter.

MARRIAGES.

Bannatyne—Jamieson.—On the 26th Sept., at Glasgow, by the Rev. Donald Macleod, William Bannatyne, Captain 8th (the King's) Regiment, to Aimée, daughter of the late James Jamieson.

Bergau—Fredericie.—On the 2nd Aug., at Hiogo, by the Rev. D. C. Greene, Julius Bergau, of Memmel, Germany, to Emma Fredericie, of the same place.

Hutchinson—De Moulin.—On the 30th Sept, at Batavia, Java, Richard Hutchinson to Anna Maria Louisa, youngest daughter of the late Major-General De Moulin, of the Netherlands Army.

Jerdein—Fraser.—On the 2nd Oct, at the Church of England Chapel, Nairn, by the Rev. Charles Jerdein, M.A., rector of Gayhurst and Stoke Goldington, Bucks, brother of the bridegroom, assisted by the Rev. E. Wrenford, D.D., Frederick, fourth son of John Jerdein, Porchester-square, London, to Mary Helen, eldest daughter of Robert Fraser, of Brackla, near Nairn, N.B.

Newitt—Rickomartz.—On the 21st Aug., at Hong Kong, by the Rev. J. Piper, William Thomas Newitt, of the China Submarine Telegraph Company, to Louisa Jane Rickomartz, of the Diocesan Home and Orphanage.

Roper—Coleby.—On the 3rd Oct., at Coleby, Norfolk, by the Rev. E. M. Goslett, LL.D., rector, assisted by the Rev. H. T. Kenny, rector of Banningham, Alfred Roper, of Hong Kong, fifth son of the late Snelling Drosier Roper, of Coleby, to Jane Elizabeth, only daughter of the late Rev. George Coleby, rector of Coleby, and great niece of the late Rear-Admiral Sir Robert Sharpe, of Portsmouth.

Digitized by Google

STURGIS—BRAND.—On the 2nd Oct., at the parish church, Glynde, by the Rev. B. Harvey, vicar of Tring, Buckinghamshire, and uncle of the bride, assisted by the Rev. W. de St. Croix, vicar of Glynde, Henry Parkman Sturgis, son of Russell Sturgis, to Mary Cecilia, fourth daughter of the Right Hon. the Speaker.
THORNTON—BROOKS.—On the 4th Sept., at Trinity Church, Bow, J. W. Thornton, late Civil Service, Hong Kong, to Mary, eldest daughter of W. Brooks, of Bow.

DEATHS.

CLAY—On the 3rd Aug., at Hiogo, Arthur Hanley Clay, aged 34 years.
ELIAS—On the 2nd Oct., at Shanghai, from an accident, Edward, fourth son of Ney Elias, Inverness-terrace, Kensington-gardens.
KROM KOON WARACHAKT'ARANUP'AP—On the 14th Aug., at Bangkok, H.R.H. Krom Koon Warachakt'aranup'ap, in the 56th year of his age.
LINTON—On the 14th of Aug., at Shanghai, A. J W. Linton, aged 28 years.
ONDAATJE—On the 27th Sept., at the Hague, very suddenly, and deeply regretted, in his 71st year, Adrianus Marius Elaartst Ondaatje, late resident at Banjermassing, Borneo, and the elder and only surviving son of the celebrated Dr. Quint Ondaatje, formerly of Ceylon.
REY—On the 15th Aug., at Shanghai, Mons. A. Rey, Chevalier of the Legion of Honour, Chancelier of the French Consulate-General, aged 64 years.
SNOWDEN—On the 13th Aug., at Shanghai, Walter Robert Snowden, a native of Scotland, aged 41 years.
WARE—On the 10th Aug., at Nagasaki, Dr. N. A. Ware, a native of Virginia, U.S.A.

THE CHINESE ARMY.

(PALL MALL GAZETTE.)

The news just received *via* New York from China, to the effect that the Chinese Government has declared its intention of siding with Korea in the event of the present dispute between that country and Japan ending in an open rupture, gives an additional interest to the inquiry in what state of preparation would a war find the Chinese forces at the present time? From an article which appeared in a recent number of the *Revue des Deux Mondes* by M. Giquel, the superintendent of the Foochow arsenal, and from various notices contained in some of the later issues of the *Overland China Mail*, we gather the following particulars on the subject:—Like all the rest of the world China has, during the last few years, been arming rapidly. At the present moment the Government has under its orders a force of 50,000 men armed with Enfield and Remington rifles, and drilled on the European model by European officers, supplemented by thirty field and mountain batteries. At Shanghai, Nanking, Foochow, and Tientsin arsenals and dockyards have been established under foreign superintendence, where the manufacture of guns, powder, and rifles, and the construction of ships of war, have for some time been actively carried on. At Foochow 2,500 Chinese artisans work under the superintendence of seventy-five Europeans, and have so far become skilled at their labour as to be able to build and fit up three steamers a year. Five men-of-war have already been launched from the dockyard at Shanghai, and at the present moment there are two iron despatch boats and a sister frigate to the one just launched, on the stocks at that place. Besides these a large iron steamer is to be built measuring 220 feet in length, and of 1,300 tons in burden; and also a fleet of sailing transports.

If we turn to the coast defences, we find an equal degree of activity—notably in the neighbourhood of the capital and on the approaches thereto. The Taku forts, which proved so fatally destructive to our gunboats in 1859, and which offered such a firm resistance to the allied armies in the following year, have been completely rebuilt, and the old-fashioned native smoothbore guns have been displaced by rifled cannon of foreign manufacture. The comparatively harmless fortifications at the mouth of the Peh-tang river have been made into formidable works, while along the coast connecting these two fortified places, as well as above and below them, a series of rifle-pits have been dug. The road between Taku and Peking has been raised, and made available for the rapid transport of men and war material; and halfway between the former place and Tientsin a fortified camp has been constructed, and armed with five Krupp guns. These military reforms, however, appear only in the neighbourhood of the principal ports and of Peking. Elsewhere, in Kweichow, Yunnan, and the North-Western Provinces, the Mian-tsze and Mahommedan rebels have to contend with forces armed and drilled after the manner of their forefathers. A correspondent, writing from the first-named province, gives an account of the melancholy condition of the troops who are supposed to be there engaged in combating the Mian-tsze. Of the numerous battalions returned by the general as fully manned, the merest skeletons only exist in reality. The pay issued to those actually serving is uncertain and various in kind; sometimes, but very rarely, it is represented by specie; at other times rice is given as an equivalent, and often the men are sent away from the pay-office empty-handed. The natural results follow. Powder is to be bought for twopence a pound in the streets of Kwei-yang Foo, and matchlocks are offered at something less than two shillings apiece. These are constantly purchased and repurchased by the general, who thus succeeds in satisfying the wants of his men, at the same time that he gains to himself credit for buying military stores at a remarkably cheap rate. Mr. Cooper in his book of travels gives much the same account of the Imperial forces operating in the province of Yunnan.

MR. W. H. MEDHURST, who has been for some time in this country on leave, returns to his post as Consul at Shanghai by the present mail. We regret that Lord GRANVILLE, the Secretary of State for Foreign Affairs, has not conferred on Mr. MEDHURST the dignity of a Consul-General. It would have been a fitting tribute to his services, and greatly facilitated his official duties at Shanghai.

THE steamer *Galley of Lorne*, which sails shortly for Yokohama and Hiogo, takes out a number of boilers for the copper mint now in course of erection at Osaka. She also takes out a quantity of stores for the Japanese Railway.

NAVAL AND MILITARY.

The corvette Thalia, which will convey fresh crews to the Ringdove and Midge, and take the place of the Juno on the China station, sailed on the 7th instant. The corvette Juno, which is to be relieved by the Thalia, left England in November, 1870, and was sent to China with a battalion of Royal Marine Light Infantry, and very much overcrowded, which led to deservedly adverse comments being made in the public press on the inconsiderate arrangements of the Admiralty. We subjoin the appointments made to the Thalia since our last issue:—To the Ringdove, Commander T. M. Maquay (re-appointed); to the Iron Duke, for disposal on arrival at the station, Lieutenant Reginald O. C. Brenton, Sub-Lieutenants Charles S. Nicholson, John Walcot, Midshipman J. G. Duberley; to the Thalia, Midshipman Percy C. Raith. Lieutenant Nepean, of the Royal Marines, will take passage in the Thalia, to join the battalion now serving in Japan.

Some interesting facts and figures are given in the first report o the Director-General of Military Education, which has just been published. The number of attendances of adults on the school books, and the average number of lessons per man, in the various regiments and corps stationed in China, Japan, &c., during the year 1871, was—75th Regiment, China, 11,229 attendances, 17 lessons; 10th Japan, 11,897 attendances, 45 lessons; 73rd Colombo, 14,380 attendances, 24 lessons; Royal Artillery, Hong Kong, 2,497 attendances, 9 lessons; Royal Artillery, Singapore, 488 attendances, 2 lessons. The number of children in regimental schools receiving instruction from the schoolmasters and schoolmistresses, and of those attending the industrial schools, in the year 1871 was—10th Regiment, 114; 73rd, 57; 75th, 88; Royal Artillery, Hong Kong, 10; Royal Artillery, Singapore, 8. The number of volumes and issues during the year ending December 31st, 1871, in the following army libraries was—Ceylon, 3,669 volumes, 9,452 issues; Hong Kong, 2,953 volumes, 2,755 issues; Singapore, 349 volumes, 4,514 issues; Yokohama, 1,270 volumes, 1,803 issues. In connection with the above-named regiments there are recreation rooms, with refreshment bars.

Notice has been given to all persons interested that the distribution of the bounty awarded for services against pirates on October 20, 1864, by Her Majesty's ship *Haughty*, will commence this day, the 4th inst., in the Prize Branch of the department of the "Accountant-General of the Navy, Admiralty, Somerset House." The following are the shares due to an individual in the several classes:—Lieutenant-commanding, £22 15s. 6d.; fourth class, £13 8s. 3d.; fifth class, £7 9s.; sixth class, £6 14s. 2d.; seventh class, £4 9s. 5d.; eighth class, £2 4s. 8d.; ninth class, £1 9s. 10d.

In the Navy List for the present quarter, just issued, the following alterations appear in connection with the ships on the China station:—Adventure: Navigating Lieutenant J. W. McFarlane, *vice* Commander J. E. M. Wilson; Avon: Commander J. C. Patterson, no commander in previous list; Barrosa: Captain L. I. Moore, ordered home; Elk: Commander J. B. Barnett, *vice* Commander N. Osborn; Hornet: Commander N. Osborn, *vice* Commander J. B. Barnett; Teazer: 4, 120, Commander Hon. J. T. Fitzmaurice, *vice* Commander R. M. Blomfield.

H.M.S. Barrossa, Captain L. J. Moore, 17 guns, 400-horse power, is ordered to England from the China station, to be paid off. The Barrossa was commissioned at Devonport on June 9, 1869, and left England the same month.

Captain J. S. Hudson has been appointed to the command of the Spartan, in the West Indies. For three years he was in command of the Leven gunboat, on the East India and China station.

MISCELLANEOUS.

JAPAN.

An article appears in *Macmillan's Magazine* on the Embassy and the country generally, in which the writer concludes:—"The writer in *Blackwood* insists that it is time 'to recognise that Japan merits the same treatment, the same consideration, as are extended to what we call organised and civilised Governments;' and again, that 'she surely is justified in requiring that when she shall have completed her new code, based on the Code Napoleon—on which a commission assisted by an able barrister from Paris is now at work at Yedo—we shall recognise her right to claim the sole administration of justice within her realm.' No nation, we are sure, is more ready than our own to see equal rights accorded to Japan, when she can plainly show by actual experience that she can and will dispense full justice and afford full protection to foreigners. But we must first be well assured of this, and it would be the height of folly to grant to a nation which at the present moment possesses no civil code at all, and whose system of criminal procedure is still barbarous and tainted with cruelty, the sole administration of justice over British subjects, simply on the production of a code drawn up by a French barrister, with the assistance probably of an English and an American lawyer, who have been also engaged by the Government. That code must have been in operation for some time, and must have been proved to work satisfactorily, before we entrust full jurisdiction over our countrymen to the tender mercies of Japanese judges."

What, however, is to be the end of all this? and is there no danger to Japan? Is not the pace too great to last, and is there no fear that the speedy horse may break down when pressed so hard? That there is danger to the country seems to us clear. It should always be recollected that the revolution came from below; it was the work principally of Daimios' retainers. These men are now in power. That they are gifted with great intelligence no one can doubt, but they have come into their position on the ruins of the aristocracy—their former masters. They are revolutionary, and lack that Con-

Digitized by Google

servative element which is so necessary in such a crisis, and which does not seem to be sufficiently supplied by the minority of court nobles belonging to the Government. Add to this the notorious corruption of the officials—a corruption almost as universally prevalent as in Russia—together with a recklessness in matters of finance which seems to grow with every month, and thinking men are entitled to pause ere they give unqualified praise to the path along which Japan is hurrying so rapidly.

There is danger, too, as it seems to us, in the great influence obtained by young men who, after passing two or three years abroad, return to their native country with a smattering of some science gained from books, and, on the strength of this, are immediately entrusted with high office in the Home Government. Indeed, the whole question of these students is a very serious one, and is bound up with the future of Japan. The present system is not satisfactory. By almost every steamer that leaves Yokohama for Europe and America the exodus of youths continues. They are dispersed in different countries, and, without any previous instruction at home, they sit down, many only for a couple of years, to pursue their studies very much as they please, under no adequate control. The result of such a system will be that at no very distant period Japan will be flooded with young men possessed of a superficial knowledge, which will be magnified by their own conceit into profound learning, and will impose upon the former generation who have never left their native shores. And each youth will naturally be prejudiced in favour of the particular country where he has studied; those from America will be republicans, those from England monarchists, and so on—a pretty medley. If in the future the nation is to be governed by these raw students, Heaven help it! Young Japan can make no greater mistake than to rush off to foreign countries without a preliminary education at home. As the editor of the *Japan Mail* in a recent number wisely remarks, "If these lads were first put to primal schools where English was thoroughly well taught, and were then stimulated to the pursuit of more mature studies by the promise that, if successful in their examinations, they should be sent abroad, excellent fruits would be reaped by the nation after a few years." That is what is required, but as yet there are no schools in Yedo. The College, presided over by an American, unfortunately does not offer any guarantee for a solid education; for out of all his assistants there are none, or hardly any, who have had any experience or training in teaching, and many are thoroughly unfit for their posts.

TEA ADULTERATION.

The following interesting facts respecting former legislation on Tea adulteration are taken from the *Food Journal*:—

"The manufacture of spurious Tea in China seems to have been more commonly practised during the past few years, since the low rates of duty on Tea imported into this country have caused our consumption rapidly to increase. As an illustration of this increased consumption, the Customs return show that 32½ million pounds were imported in 1840, 51 million pounds in 1850, 77 million pounds in 1860, and 118 million pounds in 1870, the increase in thirty years having been nearly fourfold. It must also be borne in mind that the consumption of Tea in other countries has also increased, and consequently the Chinese may have lately found some difficulty in supplying a sufficient quantity of Tea for foreign markets, especially in the low descriptions. This demand for Tea seems to have had the same effect on the Chinese as the high rates of duty had on certain persons in this country during the last century, and on whose especial account certain Acts of Parliament were passed to prevent Tea adulteration. The adulteration of Tea continues; but now, instead of being practised in this country, it is carried on in China and other Tea-growing countries; the duty on Tea here is so low, and the fine for adulterating it so great, that the manufacture of spurious Tea is now almost entirely carried on abroad. The Customs authorities seem always to have adhered to their present practice of receiving duty on any importation called Tea, whether genuine or adulterated; and because coloured and spurious Teas have been imported and charged with duty the Excise laws bearing on this subject seem to have almost fallen into disue on account of the difficulty of proving whether Tea when found adulterated has been imported in that state or after its arrival in this country. A brief review of the Acts of Parliament passed for suppressing Tea adulteration in Great Britain will show that many practices of the Chinese are the same as formerly prevailed in this country. Thus, in the year 1725, the Act 11 Geo. I. cap. 30 was passed to prohibit persons, under the penalty of £100, from counterfeiting or adulterating Tea, or manufacturing Tea with terra-japonica, or with any drug or drugs whatsoever. And in 1831 the Act 4 Geo. II. cap. 14 was passed for suppressing the trade which had sprung up among Tea dealers of dyeing or manufacturing 'sloe leaves, liquorish leaves, and the leaves of Tea that have been before used, or the leaves of other trees, shrubs, or plants in imitation of Tea.' And in the year 1777 the last Act passed for suppressing the adulteration of Tea in this country came into force, being the one under which Excise proceedings are now taken. This Act was necessary because the previous one did not include as offenders persons not Tea dealers who carried on the trade of Tea-fabricators. In the Act itself it is stated that there was a necessity for such legislation, because the evil practice of adulteration had increased to a very great degree, 'to the injury and destruction of great quantities of timber woods and underwoods, *the prejudice of the health of his Majesty's subjects*, the diminution of the revenue, the ruin of the fair trader, and to the encouragement of idleness.' It will thus be seen that the present practices of the Chinese in manipulating Tea are similar to those carried on in this country a hundred years ago. We have now low Green Tea faced with blue and yellow colouring matters, the blending of which gives Tea its green appearance; black Tea made of a rough flavour by the addition of catechu or terra-japonica, and leaves of other trees dyed and fabricated to imitate Tea leaves. All these different descriptions of adulterated and spurious Teas are now imported abundantly into this country, while formerly these adulterants were added at home. We thus see history repeating itself even in Tea adulteration, and we heartily wish that history in one respect at least would repeat itself in legislation. In the old Tea Act of 1777 it is stated that the legislature gave as one of their reasons for passing it, that the adulteration which then prevailed was to '*the prejudice of the health of his Majesty's subjects.*'"

THE LOSS OF THE "AMERICA."

The report of the destruction by fire of the Pacific mail steamer *America*, with reference to the correctness of which some doubt had been entertained, is confirmed by telegrams received here, dated Yokohama, 25th ult. It is added that the treasure on board has been recovered.

The *America*, commanded by Captain Doane, sailed from San Francisco on Aug. 1 with a large number of passengers and a valuable cargo. The *America* was 380 feet in length, 50 feet beam, and 32 feet depth of hold, measuring 5,500 tons. Her engine was 105 inches diameter of cylinder, and 12 feet length of stroke. She had two double engines, used for weighing anchor, and also available for the pumps if necessary. She was built at Greenpoint and launched on July 23, 1869, the machinery being constructed at the Novelty Ironworks, New York. The rooms were luxuriantly fitted up; the ladies saloon was magnificently furnished, and the panels were elegantly gilded and polished. Large reading lamps were placed at convenient distances apart, and a rosewood piano stood in the after portion of the apartment. Near the officers' quarters a smoking room was fitted up with glass-stands, drawers for tobacco, and everything necessary for a smoker's enjoyment. On the main deck the dining-saloon and the state-room were tastefully fitted up. Around the state-room a number of steam pipes ran, which, when heated, in cold weather caused the temperature to be more pleasant. The panels were painted white, with rich gilding, and the stanchions were of unpolished mahogany. Large ventilators led from the hurricane deck to the steerage, maintaining the air on the lower decks pure and fresh. The steerage occupied the entire length of the lower decks. The bunks—which were set aside for Coolie passengers—were all on this deck, six in each room. On the main deck there were thirty state rooms and in the steerage seventy-nine. The vessel was not insured. The Pacific Mail Company, from the date of their organisation, have made it a rule not to insure their vessels. They claimed that as they owned so large a number of ships the cost of insuring them would be so great that it would be cheaper to lose one occasionally than to go to that enormous outlay. The loss of the company by the burning of the *America* will prove a severe one. She cost $1,250,000 to build, and was appraised on the company's books at a valuation of $1,000,000. What loss may ensue to her owners from the burning of the cargo of course it is impossible to tell.

A NEW TELEGRAPH ROUTE.

A communication to *The Times*, dated from the Forks of the Saskatchewan, from Captain W. F. Butler, author of the "Great Lone Land," urges a plan for the establishment of telegraphic communications between Europe and Asia *via* Behring Straits. Looking at the points now reached by telegraphic enterprise in Asia and America, he divides the intervening distance into two portions—Fort Garry, in the new Canadian Province of Manitoba, and Nicolaevsk, at the mouth of the Amoor River, in Eastern Asiatic Russia. These are distant along the proposed route about 5,000 miles. The first portion of this distance, from Fort Garry to Behring Straits, is about 3,000 miles; the second, from Behring Straits to the Amoor, is about 2,000 miles. Almost in a direct line from Fort Garry to the Straits of Behring three great river systems and four large lakes lay their lengths towards the north-west for 3,000 miles. These are the Saskatchewan, the Mackenzie, and the Yukon Rivers, and the Lakes Manitoba, Winnipegoosis, Athabaska, and Great Slave. Captain Butler proposes to take advantage of this immense system of inland water by laying a river cable throughout such portions as come within the required line.

JAPAN TEAS.—The *New York Times* has discovered that the Japanese teas, which have lately become so popular in California, possess some qualities not heretofore found in the teas of China. A certain Dr. Fulkerson, of Santa Rosa, in the before-mentioned State, is authority for the statement that a small quantity of Japanese tea proved sufficient to bring four persons, including himself, almost to death's door. Immediately after breakfast they were simultaneously seised with terrible pains and vomiting. The doctor, having examined the tea remaining in the package, has found a considerable quantity of arsenic. The result is that the residents of Santa Rosa have suddenly ceased to expatiate upon the manifest superiority of Japanese teas.

MR. MEDHURST ON CHINA.—In February last Mr. Medhurst, H.B.M.'s Consul at Shanghai, delivered a lecture at Streatham, on the subject of China and the Chinese. This lecture, which bears the title of "The Foreigner in Far Cathay," has been published by Mr. Stanford, and forms a neat volume, embellished with a map of China. The author has made several interesting additions to the original matter of the lecture.

THE P. and O. Co.'s steamer *Indus*, homeward to Southampton, due on 28th October, will pass through the Suez Canal, as also the *Delhi*, due on 9th December. The outward steamer *Khedive*, on 17th inst. and the *Peking*, on the 7th November, will also pass through the Canal.

THE proprietors of the *Illustrated London News* have despatched Mr. Simpson, one of the well-known artists of that paper, to Peking, in order to obtain illustrations of the festivities connected with the forthcoming marriage of the Emperor of China.

ADVICES from St. Helena state that the *Cutty Sark*, Shanghai to London, which passed on 9th Sept., her rudder off the Cape. This will be a serious drawback in her race with the *Thermopylæ*.

SHIPOWNERS who have vessels on the way from China to San Francisco will do well, freights for grain being £6 per ton for Europe.

THE *Osaka*, from Ilo Ilo, on which 40, 50, and 60 guineas premium has been paid, arrived at St. Helena on the 28th August.

THE JAPANESE AMBASSADORS AT LIVERPOOL.

On the 29th ult. the Japanese Ambassadors, accompanied by Sir Harry Parkes, General Alexander, and Mr. W. Aston, arrived in Liverpool, and the next day they visited the Town-hall, where they were received by the Mayor and the President of the Chamber of Commerce, together with a large number of the leading mercantile men of the town. Mr. William Blood, the secretary of the Chamber of Commerce, read the following address:—"The Council of the Liverpool Chamber of Commerce beg most respectfully to offer to yourself and the other members composing the embassy a hearty welcome to Liverpool. The Council have reason for congratulating themselves, and the commercial community they represent, on the presence in this country of an embassy consisting of ministers and nobles who are distinguished as the most eminent amongst the statesmen of the Japanese Empire. Representing as they do the merchants of the greatest trading port of the Empire, the Council hail with the utmost satisfaction a mission which has for its objects the establishment of the most intimate and friendly relations between the Japanese and the British Empires, and the increase of their commercial relations. In the members of the embassy the Council also welcome to this town the representatives of a nation strong in patriotic feeling, full of courage, highly gifted among Eastern races, and unsurpassed in their devotion to the cause of progress."

To the foregoing address the following reply was read by Mr. Aston:—"Gentlemen,—We desire to thank you for the kind words you have spoken, and the hearty welcome you have extended to us. On behalf of the distant Empire we represent, allow us to reciprocate your friendly sentiments, and to express the satisfaction which we feel at the prospect of more intimate relations being established between our respective nations, which, we trust, will favour the rapid development of a mutually profitable trade. You have termed us patriotic, courageous, and progressive. We hope to infuse into our institutions a spirit that shall develop these virtues more and more among our people. To this end we have come among you, and shall gladly avail ourselves of every opportunity to study the method by which you have attained to such a high degree of commercial and administrative greatness." The proceedings in the Town-hall having terminated, the Ambassadors visited the Exchange flags and newsroom, where they were received with cheers. In the afternoon a powerful steam fire-engine was set to work in the space opposite St. George's Hall, to the great admiration of the visitors.

In the evening the Mayor gave a banquet, at which the members of the embassy attended, amongst the other invited guests being Lord Derby, Lord Sefton, Lord Skelmersdale, Mr. Gladstone, Mr. Lowe, Mr. Forster, and Mr. Fortescue, the Governor of the Isle of Man, the chairman and members of the Dock Board, the president of the Chamber of Commerce, and the leading merchants of the port. After the customary toasts, the Mayor proposed the health of his Excellency the Ambassador Extraordinary, and on behalf of the merchants of Liverpool gave the embassy a cordial welcome. The toast was received in the most hearty manner, and the whole assembly, led by the Mayor, gave several rounds of cheers for the illustrious guests. His Excellency, in responding, expressed the great gratification the embassy had experienced by their warm reception in this country. He referred also to the benefits derived from the long term of peace between England and Japan, which he hoped would remain unbroken. The Mayor next proposed the health of Sir Harry Parkes, alluding to the distinguished service he had rendered this country as its representative at the Court of Japan. Sir Harry Parkes, in responding, bore testimony to the zeal and energy with which the members of the embassy had carried out the great work of revolution in Japan. It was almost impossible to conceive the difficulties and prejudices they had had to overcome. Much yet remained to be done, but looking at what had already been accomplished, there was great hope for the future.

On the 1st inst. the members of the Embassy visited the corn warehouses, Sandon Graving Dock, and the Canada Dock, after which they went on board the Cunard steamer *Cuba*, where luncheon was served; and in the afternoon paid a visit to the Allan steamer *Polynesian*. They then proceeded to the tobacco warehouses, and afterwards paid a visit to the Sailors' Home. In the evening they attended a performance at the Alexandra Theatre. The next day, the 2nd inst., was devoted to the inspection of the river and shipping. The Ambassadors visited Messrs. Laird's works at Birkenhead, and inspected the Birkenhead docks. They afterwards went over the *Tacoro*, a fine new vessel belonging to the Pacific Steam Navigation Company, and the *Republic*, one of the White Star vessels, on board of which lunch was provided. In the afternoon the Ambassadors and party re-embarked on the steam-tender *Alert*, and went up the river as far as the southern docks, calling *en route* at several of the training ships.

In the course of the day the Ambassadors were presented with a congratulatory address by the president and members of the East India and China Association. The association was represented by Mr. H. Cope, the president, Messrs. Robertson Gladstone, P. Keith, G. M'Micking, J. Stephen, Aaron Brown, T. Gair, and J. B. Cooper, the secretary. Sir H. Parkes and General Alexander were present, and one of the attachés to the embassy translated the reply made to the members by the chief Ambassador.

BANQUET AT THE ADELPHI HOTEL.

In the evening a banquet was given, at which Mr. Prange, the President of the Chamber, presided. In proposing the health of the members of the Embassy he dwelt on the pleasing evidences given by the Japanese Government of friendly relations with this country.

His Excellency the Chief Ambassador replied in Japanese, and his speech was afterwards read in English by the Chief Secretary, as follows:—

Permit me to express the high sense of gratitude which I feel for the flattering manner in which you have received the toast given in honour of the empire we represent, and which has been coupled with my humble name. (Cheers.) When the cloud of seclusion which hung over us was dispelled by the light of modern civilisation, we learned that in the western part of that world there was an empire called Great Britain, and that she had attained a pre-eminent position amongst the enlightened nations for her industry and commerce. (Cheers.) Having now become more intimately acquainted with her many institutions, we have discovered that their success is due to the liberal and energetic spirit by which they are animated. (Cheers.) We shall be glad to adopt the result of our observations in this country, in so far as we can comprehend and use what we have seen—(cheers)—and in this way we hope, as you have indicated, that Japan will at no distant date take the position in Asia which Great Britain now occupies in Europe. (Cheers.) We take pleasure in thinking that the means to attain this high degree of civilisation are mostly derived from the example of those who have advanced in every science and industry, and especially from a leading international association like that met here to-night. (Loud cheers.)

Lieut.-Col. Trimble next proposed in eulogistic terms the "Health of Sir Harry Parkes, our Minister at Japan."

Sir H. Parkes, in responding, thanked Colonel Trimble for the kind way in which he had spoken of him and of his services in the country in which he had been serving for some time. He was not prepared, he said, for such a flattering notice, and he felt very sensible that he ill deserved it. At the same time he was quite sensible of the good fortune which led the Government to send him to Japan, for he there found a most acceptable work, and a work which was deeply interesting. He was glad that he had been able, in a feeble way, to assist his friends at that table to carry out and effect those great changes which had been alluded to by the previous speakers. He had always found a ready recognition of any assistance that he or others were able to render them; and the position of being a co-worker and co-operator with the members of the Embassy in the work they had undertaken in their own country was to him a very pleasant one, and just the position which he thought a British Minister in those regions would like to fill. (Hear, hear.) He had striven hard to occupy in the sphere of his duties a similar position elsewhere; but he had not in other countries always met with the same encouragement as he had received in Japan. (Cheers). It had been said that only a short time ago Japan was under the curse of seclusion. The great work in which their distinguished guests had been employed was to remove that curse, and to substitute instead a system of unity that should give peace and security to the whole Empire. (Cheers). In his post as British Minister he had done all he could to promote that work, because no one knew better than those present that there could be no commerce without security. Security was the foundation of commercial enterprise, and he had no doubt that the efforts of his friends would result in the increase and prosperity of the trade which they wished to bring about. In fact the result of their efforts had already been seen; for during the last three or four years, since the reform was undertaken, the foreign trade of Japan had risen from nothing to a very considerable figure. It was no mean success to say that at the present time Japan consumed annually two millions sterling of Manchester Goods, and employed 400,000 tons of British shipping. Of course the power and capacity of Japan to consume our manufactured goods would always depend upon her own power of industry, and upon the effort she put forth to produce materials suited to our wants. He could not help thinking that the members of the Embassy were fully sensible of that, and that every endeavour would be made by the present Government of Japan to promote the industry and enterprise of that nation. He was aware that one of the chief objects of the mission to England was to obtain an idea as to how the industry of the country could be best promoted, and he did not doubt that the Chief Ambassador and his colleagues were observing very closely what they in Liverpool had to teach them. He did not know that they could go to a better school than Liverpool and Manchester, and he was sure from what they saw they would learn that it was industry and perseverance that had given England her pre-eminence amongst Western nations. (Cheers.)

Mr. W. B. Forwood proposed "The Houses of Parliament." He said that if there was one thing an Englishman loved more than another it was the constitution under which he lived, the constitution comprising the three estates—Queen, Lords, and Commons. (Cheers.) He might say, with almost equal assurance, that if there was one thing which an Englishman loved to abuse more than another, it was the Government which happened to be in power at the time, and though this might seem a somewhat Irish fashion of showing their affection, yet he believed it was proof of the interest the nation took in the deliberations of these houses, and the closeness with which they watched, on every occasion, the various details of the business they undertook. (Cheers.) He coupled with the toast the name of Mr. Chas. Turner, M.P. (Cheers.)

Mr. Charles Turner, M.P., said some of them might find fault with the House of Lords, but still he thought it was the general opinion of the nation that the House of Lords formed a most important branch of the Constitution of this kingdom, and that it would be a bad day for this country when it ceased to exist. They knew very well that it was an important object of the Legislature to promote commerce in all directions, and particularly with that great country which had been only during the last few years opened to the trade of the Western Hemisphere. He could assure the Embassy that they highly prized the opening up of that country to their shipping, and he had no doubt that it would result in a mutual advantage both to Great Britain and Japan. (Cheers.)

Mr. Philip Rathbone proposed "The Town and Trade of Liverpool," which was responded to by his Worship the Mayor. "The Mersey Docks and Harbour Board," proposed by Mr. Patterson, was responded to by Mr. W. Langton; and "The Health of the Chairman" was proposed by one of the members of the Embassy. Mr. Charles Clark proposed "The Mercantile Associations of Liverpool," coupled with the name of Mr. Bateson, chairman of the Cotton Brokers' Association, who responded.

THE PANTHAYS.

THE announcement contained in our issue of the 23rd ultimo, that Mr. COOPER, the traveller, had accompanied the Panthay Envoys on their return to Yunnan, will have been received with pleasure by those interested in the adoption of a direct trade route with Western China. We have repeatedly advocated in these columns the advisability of establishing such a route through Burmah into Yunnan, and nothing that has been advanced by the opponents of the scheme appears to us to impugn either its praticability or the correctness of our estimates of the results which are likely to flow from it. The chief objection that has been raised is that, even granting the possibility of establishing such a route, it would after all only open up traffic with the impecunious Panthays, and would fail to "tap" the trade of China altogether. At first sight this objection appears plausible, and were the question one affecting European countries it would be unanswerable. But Chinese ways are not our ways, and it by no means follows that because the Panthays are in arms against the Imperial forces the trade between the two countries must therefore be suspended. So far from this being the case there are at the present time recognised Custom-houses established on the frontier between the kingdom of Tali and China, and we have only to remember how little our own trade with China was affected by the war of 1860-61 to prove how entirely mercantile interests are looked upon as separate and apart from political enmities by the practical-minded Chinaman. It is true that when the rebellion first broke out the traffic which had up to that time existed between Yunnan and Burmah was suspended, and that it has never been so prosperous since; but were a strong inducement held out, such as a direct trade with British Burmah would offer, to Chinese merchants to send their goods once again through the accustomed channel, it would, now that the Government of Tali has become more established, doubtless revive and would soon far exceed the modest half a million sterling annually which marked its former limit. This state of things is so completely foreign to the English-official notion of international relations that it is not surprising that the India-office should be unwilling to recognise it, and hence the meagre hospitality which Prince HASSAN and his colleagues received whilst in England, a treatment which was more keenly felt by them since each morning's paper brought to them news of the high honours which were being paid to the representatives of their neighbour the King of BURMAH.

Another stumbling block which stood in the way of the success of Prince HASSAN'S mission was the fact that he was a Mahommedan, representing a Mahommedan Power. Englishmen have so long been accustomed to associate intolerance, bigotry, and defiance with Mahommedan politics and religion, that they find it difficult to believe that the teachings of the Koran bear no such fruit among the peace-loving and industrious Chinamen. Their very nature forbids them to be fanatical, and consequently in no country in the world is greater freedom allowed for the exercise of any and all religions than in China, provided always that no leaven of hostile politics is introduced, or is believed to be introduced, into the doctrines taught. For centuries Buddhists, Taoists, Confucianists, Jews and Mahommedans have dwelt together on terms of brotherly love, and to this list we might have added Christians, were it not that since the days of the first Jesuit missionaries in Peking a suspicion has attached to them of entertaining ideas inimical to the State. In the numerous memorials which have from time to time been presented to the Throne, on the subject of the Mahommedans in China, it has universally been admitted, even by their fiercest opponents that when left to themselves they make good citizens and useful members of society. This testimony in their favour has received repeated confirmation from the evidence of travellers who have visited those parts of China where Mahommedans do chiefly congregate. With Englishmen the Mahommedans, not only of Yunnan, but of China generally, have invariably shown a desire to cultivate friendly relations, a disposition which found public expression in Prince HASSAN'S Embassy to our shores, and we are glad to accept the departure of Mr. COOPER for Tali as a guarantee that our Government is not quite blind to the importance of this alliance.

THE Japanese Ambassadors have paid their promised visit to Liverpool, and have experienced a warm reception. They have inspected the extensive docks and other commercial establishments of the city, and have been entertained at banquets by the Mayor, and by the Chamber of Commerce. On the following day they proceeded to Manchester. It is, we believe, quite decided that no Treaty will be negotiated here by the Foreign-office, but Sir HARRY PARKES will have his instructions to carry it out on his return to Yedo.

MR. J. F. LOWDER, it is stated, has resigned the Consular Service, and entered the Japanese Customs. We presume this is in consequence of the course pursued by Government, in cutting down the superior appointments in the service, as we have recently pointed out.

THE President of the United States has issued a proclamation, abolishing all duties on imports from Japan in Japanese vessels, so long as Japan observes a similar course with exports from the United States.

SAMESHIMA, the Japanese *Charge d'Affaires* in Paris, has been promoted to the rank of Resident Minister, and has presented his credentials to M. THIERS.

MR. WATSON, H.B.M. *Charge d'Affaires* at Yedo, and Judge HORNBY had not returned from a cruise in H.M.S. *Iron Duke* when the mail left on 23rd August.

Monetary and Commercial.

Advices from Manchester report that the feeling of anxiety and distrust continues. It is believed that other firms in the India and China trade must fall. The export of Shirtings to Shanghai for September was 23,413,103 yards, and to Hong Kong 5,754,656, chiefly old contract.

At a meeting of the creditors of Messrs. Leggatt and Co., merchants, of Bombay and London, held on the 30th ult., a resolution was passed to liquidate the estate by arrangement, and not in bankruptcy; and Mr. William Hurlbatt, of the firm of Harding, Whinney, and Co., was appointed trustee. The liabilities amount to £103,878, and assets to £34,999. It was stated that the suspension was due entirely to the failure of Messrs. Gledstanes and Co., acceptances of that house for £104,395, which had been covered by consignments by Leggatt and Co., having been dishonoured, and the creditors expressed themselves perfectly satisfied with the explanations afforded by the firm. The liquidation is expected to result in a dividend of about 5s. in the pound on the total liabilities. The following statement of accounts was presented:—

DR. LIABILITIES.				
To creditors unsecured—				
In respect of Leggatt and Co.'s drafts on Gledstanes and Co., of London, which should have been paid by that firm, the same having been fully covered by consignments	£104,395	0	0	
Less—Sundry cash balances retained by the holders of certain of those bills ...	2,562	10	0	
				£101,832 10 0
Sundries				342 14 0
Ditto under £10				3 0 0
To creditors fully secured ...	£25,105	0	0	
Estimated value of security	25,105	0	0	

Digitized by Google

Surplus per contra		
To liabilities in Bombay—		
As advised by telegraph, but of which there are no particulars in London	1,700 0 0	
	£103,878 4 0	

Cr. Assets.		
By sundry debtors—		
Good	£1,999 0 0	
Doubtful £106 11 11		
Gledstanes and Co.—Estimated £14,627 3 6 Subject to adjustment in respect of sundry produce and consignment accounts not yet closed.		
By sundry assets—		
As advised by telegraph from Bombay, consisting principally of cotton in Bombay and afloat and of remittances on the way to England	33,000 0 0	
And of sundry cash balances in the hands of the banks, retained by them against their claims on Gledstanes and Co.'s acceptances, deducted per contra £2,562 10 0		
By surplus from securities in the hands of creditors fully secured		
By sundry ventures		
	£34,999 0 0	

Note.—From the above statement it will be seen that if Gledstanes and Co. had paid their acceptances there would have been a surplus of assets of £35,515 16 0

Viz.—Assets as above	£34,999 0 0	
Cash retained by banks ...	2,562 10 0	
	£37,561 10 0	
Less liabilities (exclusive of Gledstanes and Co.'s bills)... ...	2,045 14 0	
	£35,515 16 0	

And this surplus or capital belonged exclusively to Mr. Clement D. Leggatt.

The following statement of accounts having reference to the separate estate of Mr. Clement D. Leggatt is appended to that of the firm :—

Dr.		
To creditors unsecured—		
Gledstanes and Co.... ... ... £65,904 10 0		
Less—set off claimed by Mr. Leggatt 21,386 6 0		
	£44,518 4 0	
Sundries £3,612 7 6		
Ditto, under £10 ... ... 20 7 4		
	3,632 14 10	
To creditors in respect of bills of exchange drawn on Gledstanes and Co., London, by C. E. Leggatt and Co., Yokohama, against consignments of silk, the proceeds of which are claimed by the holders of these bills £4,863 7 9		
To creditors holding security—		
Claims £49,015 2 11		
Security—Estimated 59,254 0 3		
Surplus to contra £10,238 17 4		
To creditors to be paid in full ... £62 10 0		
To liabilities—		
On bills receivable discounted ... £19,237 3 0		
Amount expected to rank with this estate for dividend		
To liabilities of Yokohama House—		
No advices have yet been received, but it is believed that there are no liabilities beyond the amount of the bills on Gledstanes and Co. above referred to, drawn against consignments of silk	£48,150 18 10	

Cr.		
By cash	£48 8 7	
By bills receivable in hand	1,146 10 0	
By debtors—good	1,147 8 2	
By advances on consignments	1,054 7 1	
By property	1,075 0 0	
By surplus from securities in the hands of creditors...	10,238 17 4	
By assets in Yokohama, consisting principally either of cash in Yokohama, or remittances on the way to England, about	6,500 0 0	
By sundry ventures		
	£21,210 11 2	
Deduct—		
Creditors to be paid in full	62 10 0	
	£21,148 1 2	
Deficiency	27,002 17 8	

Note.—This deficiency arises from the failure of Messrs. Leggatt and Co., and the consequent lost of Mr. C. D. Leggatt's capital in that firm, amounting to £35,515 16s.

	£48,150 18 10

The Bankruptcy Court has made an order for registration on the estate of Messrs. Gledstanes and Co., subject to formal proof of regularity in the proceedings with regard to the separate estates.

The creditors of Messrs. Shuttleworth and Co., manufacturers, Blackburn, have held a meeting. The statement of accounts showed the total liabilities to be £11,744, of which £6,000 was secured, and the assets £11,487, including the securities. It was unanimously resolved to accept a composition of 15s. in the pound, payable at once. A meeting of the creditors of Mr. T. Lund, commission agent and merchant, Blackburn, has been held, at which the offer agreed to at a previous meeting, of a composition of 10s. in the pound, was confirmed.

The failure is announced of Messrs. William Anderson and Sons, sugar brokers and general provision merchants, of Greenock, with establishments in other principal towns. The liabilities are estimated at £100,000. Mr. Anderson has been arrested and brought before the Liverpool magistrates on a charge of forging bills for about £10,000 on a Scotch bank.

At an extraordinary meeting of the Eastern Telegraph Company, held for the purpose of receiving a report as to the progress of the arrangements for the amalgamation of the Anglo-Mediterranean, Marseilles, Algiers, and Malta, Falmouth, Gibraltar, and Malta, and British Indian Submarine Telegraph Companies, the Chairman (Sir James Anderson) said there were certain formalities to go through, but the amalgamation was practically accomplished The receipts still continued to increase over those of the same period of last year. It was proposed in future to hold half-yearly meetings, and to publish traffic receipts every month. This would have been done before, but the directors did not wish it to be known what each particular section of the line to India was doing; now they were one, of course there could be no objection. The different sections of the line continued in perfect order. The next halfy-pearly meeting would be held in December, and the dividends would be payable quarterly. There was a proposition to duplicate that part of the line from Falmouth to Lisbon, but no further duplication was contemplated nor would be carried out without the consent of the shareholders. The report was adopted. It was announced that the traffic receipts of the Company for the six months ending 30th September amounted to £177,366, against £149,050 during the corresponding period of 1871, being an increase of £28,316.

The directors of the China Submarine Telegraph Company (Limited) have declared an interim dividend of 3s. per share on account of the profits for the three months ending Sept. 30, 1872, payable on the 30th inst. The Company have given notice of an increased scale of charges, viz., to China £6 and to Japan £7, for twenty words, instead of £4 6s. and £5 6s.

The directors of Reuter's Telegram Company (Limited) have declared the usual interim dividend at the rate of 5 per cent. per annum for the half-year ending 30th June last.

At a meeting of the proprietors of the Union Bank of London it was resolved to issue 10,000 new shares at £30 per share, or £15 premium, to the proprietors on the register on the 28th ult. The new shares, upon which £15 will be payable on the 31st December, and £15 on the 30th June next, will be entitled to dividend in July next, rateably with the old—*i.e.*, to one half the dividend declared on the old shares. After the completion of the payments on the new issue, the paid-up capital of the bank will amount to £1,350,000, and the reserve to £450,000.

An extraordinary general meeting of the Singapore Gas Company will be held on the 22nd inst., when an interim dividend will be declared.

The following is the report issued by the directors of the Agra Bank:—

The result of the bank's operations during the half-year ending June 30 last have been very satisfactory. The profits realised, including balance carried forward from last year, represent a dividend at the rate of 8 per cent. per annum upon the bank's capital of £1,000,000. It was accordingly the intention of the directors to have declared a half-yearly dividend at this time at the rate of 5 per cent. per annum out of these profits. Subsequently, however, to the closing of the accounts for the half-year the failure of the old-established firm of Messrs. Gledstanes and Co. has taken place, upon which—drawn by their corresponding firms of Calcutta, Bombay, and Shanghai—the bank holds bills to the extent of £67,500; and under these circumstances, though the directors would perhaps be justified in leaving any loss that may arise on these bills for future adjustment, they have considered it to be their proper course to defer any appropriation of past

Digitized by Google

profits until the probable outturn of the several estates responsible for the bills in question has been ascertained. The credit which the firm of Messrs. Gledstanes and Co. possessed, even up to the very eve of their suspension, was undoubted, and the fact that the bills held by the bank, as above stated (out of an aggregate of £390,503 of similar bills held by the Indian banks generally, and mercantile establishments connected with the East), were negotiated in India and China under credits granted by Messrs. Gledstanes and Co. afforded assurance which left no room for doubt, looking to the acknowledged standing of the firm, that due provision would be made for their payment. The directors regret much that it should have proved otherwise, and that this unexpected commercial failure should have temporarily interrupted the payment of dividend to the shareholders. They feel, however, though it must be attended with inconvenience to many, that it is best, in the interest of the bank, to make the immediate provision, as now stated, for the contingency which has arisen, and not unduly to burden future revenue.

It is gratifying to the directors to be able to add that all the Indian branches have yielded profitable returns during the half-year, with the exception of a small loss at Kurrachee; but, under fresh management, the prospects of that branch are now much more encouraging. The China branches have likewise left a deficiency, but which has been deducted in the amount above stated of profits realised. The directors, however, are satisfied that all the branch establishments have in them the elements of contributing to the remunerative working of the bank, and they look forward to this result at an early date. Meanwhile they are glad to be able to report most favourably of the general increase of the bank's business and of its future prospects.

Advices from Melbourne report that the overland telegraph to Port Darwin has been completed, and is working well, but, pending the repair of the cable to Java, it will not be available for through communication.

Tenders for £650,000 in bills on India were received on the 2nd inst. at the Bank of England. The amounts allotted were:—To Calcutta, £422,600; Bombay, £220,000; and Madras, £7,400. The minimum was fixed, as before, at 1s. 10¼d. Tenders on Calcutta and Madras at 1s. 10⅜d. will receive about 12 per cent., and on Bombay at that price 59 per cent.; above in full. No change of importance is shown, compared with the last occasion.

Bar Silver has declined in value, and may now be quoted 60⅜d. to 60¼d. per oz. standard. Mexican Dollars remain without alteration, viz., 60d. per oz. for the New, and 62¼d. per oz. for the Old Coinage.

ARTICLES OF IMPORT.

TEA.

The tone of the market has continued very quiet. The trade have only bought sparingly, whilst the export demand has been less than usual at this period of the year. Importers have held all kinds of Black Tea very firmly, thus in some measure restricting the amount of business, whilst, on the other hand, they have continued to force off all arrivals of Green Tea, chiefly under the hammer without reserve, and prices show a very serious drop, especially in Ping Suey Gunpowders. Some considerable parcels of old season's common black-leaf have been pressed for sale, the result being the establishment of lower prices. Business for New York and Canada has slackened. Deliveries continue highly satisfactory, being as follows:—

	1872.	1871.
Home consumption for London from Jan. 1 to Sept. 30	69,863,000 lbs.	66,623,000 lbs.
Export do. do.	30,000,000 ,,	27,606,000 ,,
Sent coastwise do.	27,619,000 ,,	26,400,000 ,,
Total delivered	127,482,000 lbs.	120,629,000 lbs.

Black.—There has been some inquiry for new siftings at 7d. to 9d. per lb., and an improved demand for good flavoury and Kaisow kinds at 1s. 1d. to 1s. 4d., medium to fine Kaisow at 1s. 5d. to 1s. 11d., the latter showing better value than black-leaf. Of finest Kaisow supplies are very small, and this grade commands an extreme price Pakling and Taysham leaf: With no fresh supplies but little has transpired. Black-leaf: Ordinary common still continues out of favour; new, good common has sold at 11d. to 1s., fair to good useful quality at 1s. 1d. to 1s. 3d., medium at 1s. 4d. to 1s. 6d., good medium to fine 1s. 7d. to 2s., finest 2s. 1d. to 2s. 3d., extra quality; few transactions at 2s. 4d. to 2s. 6d. per lb. Souchong and Oolong: No change. Scented Tea: Canton Orange Pekoe at 1s. 4d. to 1s. 6d. has met with a fair inquiry; finest is scarce. Caper has been taken more readily at 1s. 3d. to 1s. 6d. for medium, 1s. 7d. to 1s. 9d. for fine. Foochow Orange Pekoe: Slow of sale. *Green.*—Large supplies, nearly all of Ping Suey growth, offering from time to time at public sale and privately without reserve, has frightened buyers, and the result has been a very heavy drop in prices, especially in Ping Suey Gunpowders and Imperials, which are fully 3d. to 4d. per lb. below last month's rates. Young Hysons have been better maintained, the decline being only about 1d. per lb. Moyune kinds have been better supported, but these now show symptoms of weakness—the leaf, both in make and colour, is generally objectionable. Canton kinds show no material change.

The stock in the United Kingdom on the 30th ultimo was estimated at 81,846,600 lbs., against 76,950,000 lbs. last year, and the quantity afloat (advices by letter) at 28,655,100 lbs., against 30,429,310 lbs. of China Tea, and 1,724,428 lbs., against 1,382,600 lbs. of India Tea last year.

SILK.

The market has continued quiet, and business has been difficult, owing to the firmness with which all importers have held their Silk, and buyers not being over anxious to lay in stocks at the present season, have tried hard for lower prices (which, as at present ruling, show a loss of from 5 to 10 per cent. upon invoice cost), but without any appreciable result. In China Silk the constant arrivals have attracted the usual attention, and parcels of good Tsatlees have sold rather freely at firm rates; on the other hand common Silk not being at all wanted has been neglected, and hardly any transactions have taken place. Prices of Chinas generally are firmly maintained on the basis of 25s. for Red Peacock, 26s. 9d. for Blue Elephant, and 29s. for chop 3rds. In Canton Silk there has been a steady demand for new Loong Kongs, and business has been doing at good prices; in Tsatlee reel, however, nothing of importance has taken place; the bulk of the recent large arrivals have been strongly held, and but little business has been doing at 17s. 6d. for common, and 18s. for fair market, at which prices there seems some disposition to continue buying. In Japans there is very little new to report; prices are steady, but business is difficult, owing to the scarcity of desirable sorts. Deliveries last month were fairly good, being 2,487 Chinas, 634 Cantons, 817 Japans, and 450 Bengals; total, 4,438 bales. The usual periodical public sales are fixed to commence on the 23rd inst.

Messrs. Kilburn, Kershaw, and Co. state that generally the position of the market at the present moment is good, although there is so little actual business. Stocks in the total are even less than at this time last year, and prices much about the same. Manufacturers find it somewhat difficult to sell their goods at the moment, but on the other hand their stocks of the raw material are light; the course of the market as regards prices will now mainly depend upon the support which importers may give during the next few weeks of heavy arrivals. Messrs. Durant and Co.'s Circular says:—Prices for all good and good medium Silk are fairly supported, the change being only perhaps 6d. upon the highest moment, but in the lowest classes a reduction of 1s. to 1s. 6d., perhaps even in some few cases 2s. may now be traced without at present attracting attention. The arrivals although considerable are scarcely equal to those of last season. The deliveries too of the last three months, although comparing unfavourably with the three corresponding months, are fairly good, and leave the stocks to-day identical in aggregate with those of last year; so that our figures would scarcely seem to warrant the long continued quiet state of market. The cause must rather be sought in a general want of confidence and the difficulty manufacturers find in the sale of their goods, more or less a peculiarity of the season, but in the present case uncomfortably prolonged.

CAMPHOR.—*China* is steady, with a moderate business doing at last quoted rates, viz., £3 15s., landing weights £3 17s. 6d. re-weights. *Japan*: No transactions.

CARDAMOMS.—Market dull, 9 bags Ceylon have been quitted at 4s. 4d. for good quality.

CHINA GRASS is entirely out of demand, and there have been no transactions.

CHINA PRESERVES.—Ginger meets with ready sale at 7d. to 9d. per lb. according to quality.

COCOA-NUT OIL.—The market is steady, but is entirely devoid of animation. Privately business has been done to some extent in Cochin at £36 to £38 per ton for inferior to fine. Ceylon has been very moderately dealt in at previous value. Fine, in pipes, has been placed at £35 10s. per ton, rather mixed £34 10s. to £35. No transactions in either of the above descriptions afloat have come under our notice, the market in this position being dull.

COIR GOODS.—At the last sales small supplies of Yarn offered met a better demand, and sold readily at dearer prices for common as well as for better qualities. Fibre also sold well. 150 bales Ceylon Yarn sold, good medium to good well made yarn at £36 5s. to £37, 19 tons ditto chiefly sold, low at £25 5s., low medium £29, good £35, 49 bales Cochin sold, common at £29 5s. to £29 10s., medium to good medium £32 to £34, good to fine bright £38 10s. to £40 10s., 63 tons ditto all sold, coarse roping Yarn (80 tons) at £21 10s. to £22 10s., chiefly £22, common to good common £27 15s. to £29 5s., medium at £30 15s., also 18 tons Tellicherry in hanks, coarse roping at £24 5s. to £24 15s. 228 bales Cochin Fibre were chiefly sold, ordinary £18 10s., medium £23 15s., good £30 5s., fine £33 5s., very fine

Digitized by Google

bright £34 15s.; 193 coils (2½ tons) Cochin Rope sold, 1½ to 3 inch at £30 5s. per ton.

Copra continues quiet.

Cubebs are very dull, and have declined, middling to average stalky quality selling by auction at 19s. 6d. to 22s. per cwt.

Cutch.—The market has been very depressed in tone, but as holders still refrain from pressing sales prices show little alteration. Fine Rangoon is nominally worth 23s. to 24s. per cwt. At auction 1,000 boxes fine Rangoon taken in at 24s., and 497 bags damaged Calcutta sold at 18s. to 18s. 6d. per cwt.

Dragon's-blood remains without any activity.

Ebony.—No business done this week; there are increased quantities of Ceylon on the water, viz. 108 tons, and therefore as supplies reach the market, present very high prices may decline. At auction, 34 logs (10 tons) Ceylon were bought in at £27.

Essential Oils.—*Anniseed* dull, 40 cases at auction retired. *Cassia* firmly held, and large business at 6s. 3d. *Nutmeg* firm, 8 cases sold at 9d. *Cinnamon* scarce and wanted. *Citronelle* quiet, 32 cases retired; small private trade at 2½d. *Lemon Grass* steady; 6 cases retired.

Galangal Root.—Nothing doing; prices nominally steady.

Galls.—China are firm, and a fair amount of business has been done, comprising about 500 cases privately and 200 cases at auction, at £2 17s. 6d. Yesterday a further offer of 200 cases in public sale was bought in, at £2 18s. per cwt.

Gambier.—On the spot there has been little doing, but prices are maintained, block selling at 24s. 6d., ex warehouse, and 23s. 9d. to 24s. ex ship. Sales of good pressed Cubes have been effected at 26s. 9d. per cwt. At auction 864 bales block taken in; of 324 bales 1,515 bags Cubes a few lots sold, fine pressed 29s. 9d. per cwt. For arrival there has been more inquiry, and about 250 tons have been sold July-August shipment at 22s. 6d., June-July 23s. to 23s. 3d. per cwt.

Gums.—*Benjamin*: Siam firm for good kinds, but stock of common still large; of 21 cases offered a few sold at £8 10s. to £8 12s. 6d. for middling 2nds. Sumatra steady, and 98 cases brought to auction were retired. *Copal*: Cheaper; of 349 cases at public sale a few only were placed at 24s. per cwt. for drossy hard. *Damar* quiet; of 286 cases offered half sold, fine at 59s. to 60s.; dusty sort s53s. 6d.; inferior 40s *Gamboge* quiet; 75 cases retired.

Gutta-percha.—The market is very dull, and prices are lower. 436 packages have been offered at auction and two-thirds sold, chiefly common kinds, mixed reboiled part barky 1s. 0½d. to 1s. 2½d per lb., more barky and weak 9¼d. to 10¼d., inferior 7d. to 8⅜d. per lb.

Hemp.—Manila still remains in a very depressed condition, and sales have been exceedingly moderate at a further slight decline. Good fair roping is quoted £48, fair £47, fine brown £45 10s. per ton.

Hides.—The market continues to be liberally supplied with East India, and, as the demand both for home use and export has been good, a considerable business has been done. Prices for desirable selections of Dacca and North Western Slaughtered advanced fully ½d. per lb. round at the first sales of the month, but at the last auction some reaction took place, making present rates for these sorts barely ¼d. per lb. higher than on the 31st Aug. In other descriptions no quotable alteration in prices has occurred. *Singapore and Penang Ox and Cow* have barely maintained previous rates and do not sell very freely. Light rule at 9¾d. to 10¾d., heavy 8¼d. to 10¼d., thirds 6¾d. to 7d., fourths 4⅜d. to 5¼d. per lb. *Singapore and Penang Buffalo* have been only in moderate demand, and a decline of ¼d. to ½d. per lb. has occasionally been submitted to. Fair to good, av. 24⅛ to 29⅝ lbs., best 5¼d. to 5⅜d., seconds 5d., av. 14¼ lb. 6d., ordinary and inferior, av. 23¼ to 36 lbs., best 5¼d., seconds 4¾d., av. 10¼ to 17 lbs., unassorted 6¼d., seconds 5⅝d. to 6d. per lb. *Batavia Buffalo* have been in moderate demand at barely previous rates. Av. 26⅛ to 27¼ lbs. 7⅛d. to 8⅜d. per lb. *Java:* av. 17¾ to 20¾ lb. 6d. to 6¼d., av. 11⅛ lb. 6¼d. per lb.

Horns.—Deer Horns have sold freely at full prices, but Heavy Buffalo Horns, being in unusually large supply, have declined 1s. to 3s. per cwt, whilst Light are unchanged. Siam Buffalo are still very unsaleable; the current quotation is 36s. to 39s. per cwt.; Ceylon Deer Horns are quoted at 70s. to 72s. 6d.

India-rubber.—Prices are lower; of 160 cases Borneo offered in auction, over 100 sold at 1s. 7¾d. to 1s. 8d. for good; 4 cases Java have been sold at 2s. 4d., and part of 7 bags Singapore at 1s. 10d.

Isinglass.—Firm, without alteration in prices.

Japan Wax is still improving, and during the past two weeks about 196 cases have been quitted, realising £4 13s. to £4. 14s. per cwt. for good saucers.

Musk.—The market is steady, 58 caddies and tins Tonquin at auction were all sold; fair to fine selected well shaped pods 31s. 6d. to 39s. 6d., rough and bally middling to fair 17s. to 19s., pickings ordinary wet to fine 19s. to 27s. per oz.

Pepper.—*Black* has been very steady, and has sold to a fair extent —Singapore, 6 11-16d.; Penang, at 6¼d. to 6⅜d; Trang, at 6⅜d. *White* continues quiet, with only small business doing, at 1s. 2½d. to 1s. 2¾d. per lb. for fair to fine bright. Market for both Black and White closes firm.

Plumbago.—Ceylon is firm and in short supply, the stock is for the most part held for high prices; at auction 630 barrels were nearly all bought in, lump 28s. to 40s., chips 21s., dust 9s. to 12s., only about 80 barrels being sold, chips 19s. to 22s. 6d., dust 10s. to 14s. per cwt.

Rattans.—Market very firm, at high rates; 9,772 bundles at auction mostly sold at 2s. 8d. to 7s. 10d. per 100 canes.

Rhubarb.—Market steady, and stock of new import firmly held; 43 cases at auction sold, fair at 1s. 9d. to 2s.; high dried 1s. 1d. to 1s. 2d.; low and ordinary 6d. to 10d. per lb.

Rice.—An inactive tone prevails in the market, and but few sales are reported either on the spot or afloat; prices are without alteration. On the spot fine white Bengal rules at 13s. 6d. to 14s., ordinary at 10s. 4½d. to 10s. 9d., fine Ballam at 9s. 3d. to 9s. 6d., ordinary at 8s. 6d. to 8s. 10½d., and Rangoon at 10s. 3d. The floating cargo, per Serafina D, 875 tons Rangoon, July sailing, has been sold at 10s. 4½d. open charter, or 10s. 10½d. Liverpool quay terms; the cargo, per Alphington, 450 tons Necransie, transhipped from Mauritius, at 9s. 4½d. for the Continent, damages at valuations; and a cargo of 1,250 tons, per steamer, at 10s. 3d., ex ship London.

Sago.—Market steady; 538 boxes and 496 bags were offered at auction and the former only sold at 19s. 6d. to 20s. for fair medium and large. *Flour* is very firmly held; fair private sales have been effected at 16s. per cwt. for good, and more is now asked.

Sapanwood continues dull; the only sale to report is of 14 tons of Manila, sugar damaged at £8 to £9 per ton.

Shells.—The next periodical sales will be held on the 8th inst., when considerable quantities both of *Mother o'Pearl* and *Tortoise* will be placed on offer.

Soy.—*China* is still declining, 20 casks having been sold at 1s. 9d. per gallon. The Titani had arrived with 586 casks. *Japan*: No transactions.

Spices.—*Cassia Lignea* quiet; small quantities of unworked quality sold at 90s. The Titania and Earl Dalhousie have arrived, bringing 4,050 cases. *Cassia Vera*: No Padang or Japan offered. *Cinnamon*: There is no alteration of prices to report; in all about 80 bales second and 25 bales third, second hand goods, have found purchasers. The quarterly sales on the 25th November next will include about 1,600 bales. Stock, 5,072 bales, against 7,192 at the same time in 1871; Afloat 3,972 bales, against 3,819 bales. *Mace* brings full prices; 36 cases sold in auction, ordinary Java 3s 9d., ordinary dark to good fair palish Singapore and Penang 3s. 7d. to 4s. 6d. per lb. *Nutmegs* are slightly dearer; 543 cases and boxes in auction nearly all selling, 144 to the lb. 2s. 8d., 140 2s. 9d., 113 to 109 3s., 94 to 90 3s. 2d. to 3s. 3d., 79 3s. 5d., 75 to 74 3s. 6d., 72 3s. 9d., and 68 3s. 9d. to 3s. 10d. per lb. *Cloves*: 24 cases low Penang were disposed of at 6¾d. to 7⅛d. per lb.

Star Anniseeds are in good request, and supplies would realise good prices.

Sticklac.—Siam continues firm and fairly active at £4 5s. 6d. to £4 7s. 6d. for good and very good quality.

Tapioca.—Market steady; auctions have embraced of Singapore 1,723 bags half sold at 2d. to 2¾d. per lb. for middling to fine; of Penang 1,003 bags two-thirds sold at 2d. to 2½d. for middling greyish to very good; and of Pearl 80 bags sold at 25s. to 25s. 6d. per cwt. for good small; *Flour* is firmly held, 260 bags offered and retired.

Tin.—At the Dutch Trading Company's sale of 46,512 slabs Banca and 2,831 slabs Billiton there was more demand, the quantity being considered very small. This sale took place on the 2nd inst., the Banca average being 92⅛ guilders, equal to £156 10s. Holland, and the Billiton 89 1-5 guilders, about £151 in Holland. This price being lower than was expected by some holders of Straits has led to rather lower prices, £148 having been accepted. Banca is quoted £157, Billiton £151 per ton. The probable rates for the next few months will depend mainly upon the demand for consumption, and especially upon the needs of the Tin Plate manufacturers. Importations now cost much more than the price obtainable in Europe.

Tobacco.—*Manila* continues in good demand, and prices for fine descriptions are higher. But little of the 1870 firsts are now to be had. Holders look for better prices further on. A parcel of 3,100 bales, 4a Cagayan 1870 crop, has arrived per the Elena, and will be offered at public auction on the 10th inst., if not previously disposed of. *Cheroots and Cigars* have sold freely, more particularly the former, of which the market is bare. Prices for light weight classes remain firm. *China*: There is no alteration to report; a further arrival has taken place; but the whole is intermixed with dark and almost useless Tobacco, which will be a great drawback to its ready sale; bright well selected descriptions would sell freely. *Java* is held for such high prices that buyers have operated but to a trifling extent. *Sumatra* continues in favour with manufacturers, the even brown classes command full prices. There is but little now on the market. *Japan* is freely used, but there have only been a few trifling sales, as there is little now offering on the market; 270 bales sold at 6d. to 8¾d., and 25 bales damaged at 4¾d. to 7¾d., scraps 3d.

Vermilion.—There is a small business doing in China at 3s. 9½d. per lb.

ARTICLES OF EXPORT.

—o—

METALS.

Iron.—Welsh: Rails, £11 to £12 Bars, £12 to £13. Staffordshire Best: Bars, £15 5s. to £16; Nail Rods, £15 10s. to £16; Hoops, £15 10s. to £17 10s.; Sheets, £20 to £22; Scotch Pig, No. 1, £6 10s. to £8 5s.; Swedes, Bars, Hammered, £16 10s. to £17. Swedes, Steel in kegs, ⅛ and ¼ in., £18.

Yellow Metal.—Sheets, 4 by 4 ft., 8½d.; Sheathing and Rods, 8½d. per lb.

Tin.—English Refined, £160. Tin Plates: Charcoal I C, per box, 45s. to 47s.; Coke, 40s. to 44s.

Lead.—W.B., nominal; do., other brands, £20 10s.; Spanish, soft, ex ship, £20; Sheet, £21 10s.; Shot (kegs extra), £23 10s.; White, do., £27 10s.; Red do., £23 5s.

Spelter.—Silesian, £22 15s.; English, smelted from ores, £23 10s.

Quicksilver.—In bottles of 75 lbs. each, £13.

Messrs. French and Smith's Circular says:—The market in London was very much disturbed last month by the collapse of several speculators in Copper, who appear to have been buying forward to the amount of tens of thousands of pounds, without, in some cases, having as many shillings or even pence to meet possible deficiencies. The

Digitized by Google

marvel is that they should find brokers willing to take them as principals, when it was pretty clear, with a great fall, they (the brokers) would have to pay the loss; of course, with a rise, these speculators are quite willing to receive the profit. The advance in the Bank rate has checked operations generally in Metals, except for actual consumption or shipment.

Copper.—This market has been disturbed, and the drop in prices rapid. The same class of operators who, three months ago, bought eagerly at extravagant rates everything that offered with a prompt, have this month been forced to sell out at ruinous loss to themselves, and thereby depreciating the value of all Copper produce. On the 20th ultimo the smelters declared a reduction of £10 per ton, and although this fall had been pretty much discounted, it has caused buyers to hold back, in the hopes of buying on still easier terms. Stocks in the hands of consumers are bare, and importers of foreign cannot sell without heavy loss; we may therefore anticipate a more healthy market as confidence is regained. We quote Chili Bars £82 to £84 cash; Wallaroo and Burra, £90; Ore and Regulus, 16s. 6d.

Iron.—Although the best makers of Iron, especially for all work connected with railways, are very full of orders, yet there is for some descriptions a considerable falling-off in demand, and the extreme rates lately obtained for Staffordshire Iron are now no longer demanded. We note a decline of £2 per ton on the highest prices of Staffordshire quality. Scotch Pig Iron also is easier, and it is clear that the high rates lately demanded diminishes the consumption. The price of warrants is upheld only by speculation.

Tin Plates.—Buyers have been able to place their orders on easier terms, but, owing to difficulties with the workmen, manufacturers are not very anxious for orders.

Lead has been very firm throughout the month, with tendency to higher prices.

Quicksilver has increased in value, the quotation being now £13, but it is difficult to say from day to day what the exact price may be.

Spelter has been steady during the past month, without much fluctuation in prices. We quote Silesian £22 15s., with a small stock.

EXPORT OF WOOLLENS TO CHINA AND JAPAN.

The following is Messrs. Hayter and Hayter's Monthly Statement of the estimated Exports of Woollens shipped to China and Japan from London, Liverpool, and Southampton:—

		Pieces Long Ells.	Pieces Camlets.	Pieces Lastings and Crape Lastings.	Pieces other Worsted and Union Stuffs.	Pieces Spanish Stripes.	Pieces other Woollens.

MANCHESTER GOODS.

Since the 27th ult. the tone of the market has rather improved, and makers generally have advanced their quotations 1½d. per piece on the lowest prices accepted towards the close of last week, to which buyers have, however, made no response. Spinners have made on change in their quotations, as they have found no inducement to hold for higher prices, and buyers continue to display the same cautious policy they have for some time past adopted, so that the market closes without animation.

WOOLLEN AND WORSTED GOODS.

The current quotations in the Leeds market for Woollens and Worsteds are lower, and rule as follows:—

Spanish Stripes, 62 in., 19 yards, Elephant Chop, 3s. 6½d. per yard for scarlet; Long Ells, 30/31 in., 24 yards, Lion Chop, 33s. per piece for scarlet; Camlets, best SS, 30/31 in., 58 yards, Elephant Chop, 78s. per piece for scarlet; Lastings, 31 in., 30/31 yards, Lion Chop, 66s. per piece for gentian; Brocades, 31 in., 29 yards, Half Moon Chop, 24s. 6d. per piece for scarlet.

NEW YORK MARKET REPORT.

—o—

Coffee.—The market for Brazil is very dull and prices are nominal at previous rates. Disturbances in the money market, and consequent ailures in stock and other circles, with the accompanying distrust and difficulty of negotiating commercial paper, have a depressing influence upon the market generally, and beget an indisposition to enter into new obligations at present. The consequence is that business is much restricted, and confined to the merest necessities of buyer or seller. The same remarks apply to the market for other descriptions, which is extremely quiet at a decline of ¼c. to ½c. There have been no sales of East India since we last reported.

Cordage.—Manila is lower, the current quotations showing a reduction of half a cent per lb. We quote Manila Cordage, sizes above 12-thread, 18½c.; do. 6-thread and 9-thread, ¼ in. and 5-16 in. diam., 19½c.; do., 12-thread, ⅜ in. diam., 19c.; do. Hay Rope, 19c.; do. Cordage, bolt rope yarns, 20½c.; do. 6-thread and 9-thread, 21½c.; Tarred Manila, 18c.; fine Tarred Manila, Lath Yarn, 19½c.; Sisal Rope, sizes above 12-thread, 15½c.; do. 6-thread and 9-thread, 16½c.; do. 12-thread and Hay Rope, 16c., New Zealand Cordage, sizes above 12 thread, 16c.; do. 6-thread and 9-thread, ¼ and 5-16 in., 17c.; do. 12-thread, ⅜ in., and Hay Rope, 16½c.; and Russia Bolt Rope, 18c. cash.

Camphor.—China is quoted 18c. to 20c. gold in bond.

China Preserved Ginger rules at $8 to 8.50 currency, duty (35 per cent. *ad val.*) paid.

Essential Oils.—Aniseed is quoted $2.25 to 2.50 gold, and Cassia $1.60 gold, duty free.

Fire Crackers.—There has been an extensive movement, the sales embracing 58,000 boxes Extra No. 1 in bond on private terms, and re-sales of 5,000 do., mostly at $2.65 currency, duty paid, which figure represents the closing quotation.

Gambier is quoted at 4¾c. to 4¾c. gold; market dull; stock light.

Hemp.—Manila is in fair demand and somewhat short supply, and is firm at 11c. to 11¼c. gold.

Indigo.—Manila is steady at 90c. to $1.05 currency.

Rice.—The market is dull, owing to the same causes which we have alluded to above, as influencing the coffee market. Prices have as yet shown no change, Rangoon being quoted $6.87½ to 7.12½, currency duty paid, and $3.20 gold in bond.

Sugar.—The market generally is steady and fairly active, but no sales of East Indian descriptions have transpired.

Spices.—The distributing demand is active, and the quantity of Spices that have been taken for consumption is unusually large, so that the market for nearly all descriptions may be written firm and buoyant. China Cassia is in request, and, with the stock closely concentrated, prices are firm, and higher. The sales and resales embrace 2,000 to 3,000 piculs at 29½ to 30½ cents for duty paid, including about 900 piculs at or about 18 cents in bond, sold for very prompt cash, and thus under the market price. Mace is firm, and prices harden under favourable European accounts. For other articles there is a good trade demand, and the market, as a whole, retains a firm and buoyant feeling. Sales have been made in lots of Mace at $1.17½ to 1.20; Penang Nutmegs, 95 cents; Cloves, 22½; Clove Stems, 10½; China Cassia, 30 to 30½; Batavia, 28 to 30; Pepper, 17 for Sumatra, and 17¾ for Singapore; White Pepper, 34 to 35, all gold.

Silk.—Messrs. Maury, Westervelt and Co. report a rather more active business in raw silk for the past fortnight. Spinners are showing more disposition to come into the market, and importers are generally willing to make slight concessions to meet them. For medium Cantons there is only a moderate demand, with a fair stock to refer to. Cotengowns are in good supply, but not much inquired after. The stocks of manufacturers in these descriptions are generally light, and we hope to report a more active trade in our next issue. China Silks have been more sought after, and the deliveries in Hainings and Tsatlee re-reels have been considerable, at fair prices. The former are at present in small supply, with a reported short crop of fine Silk in China. There is but little inquiry for Usual Reel Silks, and but a moderate stock to refer to. Stock, 400 bales China, 700 bales and cases Canton, and 40 bales Japan, Grege, &c.—total, 1,140 bales and cases.

Digitized by Google

Tea.—The market is quiet and somewhat unsettled. The demand is principally for Canada, for which several invoices have been taken. By auction 1,040 half-chests Green sold at 27½c. to $1.22; 554 do. Oolong, 33c. to 54c.; 400 do. Japan, 48c. to 53c.; and 108 do. Souchong, 41½c. to 45c., cash. The current scale of line prices is as follows:—Hyson: common to fair, 45c. to 52c.; superior to fine, 55c. to 68c.; extra fine to finest, 70c. to 95c. Young Hyson: Canton-made, nominal; common to fair, 38c. to 45c.; superior to fine, 52c. to 75c.; extra fine to finest, 80c. to $1.15. Gunpowder and Imperial: Canton-made, nominal; common to fair, 55c. to 65c.; superior to fine, 75c. to 92c.; extra fine to finest, 95c. to $1.40. Hyson Skin and Twankay: Canton-made, nominal; common to fair, 28c. to 31c.; superior to fine, 33c. to 35c.; extra fine to finest, 36c. to 40c. Uncoloured Japan: common to fair, 40c. to 46c.; superior to fine, 50c. to 65c.; extra fine to finest, 70c. to $1.05. Oolong: common to fair, 35c. to 40c.; superior to fine, 45c. to 62c.; extra fine to finest, 68c. to $1.05. Souchong and Congou: common to fair, 25c. to 35c.; superior to fine, 40c. to 57c.; extra fine to finest, 60c. to $1.05. Orange Pekoe: common to fine, nominal.

Tin.—The market remains very quiet, and we hear of no sales. Straits and English may be quoted nominally 33½c., and Banca 40c. to 41c. gold.

FREIGHTS AND CHARTERS.

Outward freights for vessels loading for the different ports are without material alteration, and there is a good supply of steamers on the berth. Homeward business continues firm.

Current Rates of Freight for Vessels on the Berth.

Per Steamers via Suez Canal.—To Yokohama: 70s. meast. To Hiogo: 70s. meast. To Nagasaki: 90s. meast. To Shanghai: 40s. meast. To Hong Kong: 45s. meast. To Manila: 80s. meast. To Singapore and Penang: 40s. meast. To Sourabaya and Samarang: 70s. meast. To Batavia: 65s. meast. To Padang: 80s. meast. To Saigon: 100s. meast. To Galle: 40s. meast.

Per Sailing Vessels.—To Yokohama: 40s. meast. To Shanghai: 45s. weight, 30s. meast. To Hong Kong: 25s. meast. To Singapore 20s weight, 25s. meast. To Penang: 35s. weight or meast. To Ceylon: 30s. weight, 25s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—To Yokohama: £40. To Shanghai: £42 10s. To Hong Kong: £36. To Singapore: £25 to £26. To Penang: £25. To Galle: £21.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama or Nagasaki: 40s. to 42s. 6d. To Shanghai: 45s. To Hong Kong: 33s. To Manila: 27s. 6d. to 30s. To Singapore: 23s. 6d. to 25s. To Ceylon: 19s.

From Birkenhead, per ton.—To Shanghai: 35s. To Hong Kong: 27s. 6d. To Manila: 30s.

Insurances.

By steamers via S.C., or sailing vessels, f.p.a.:—To Yokohama, steamer 35s., ship 40s.; to Shanghai, steamer 30s., ship 40s.; to Hong Kong, steamer 25s., ship 35s.; to Singapore, steamer 20s., ship 25s. to 27s. 6d.

CASUALTIES.

Advices received from Aden, dated Sept. 15, state that the Saltee (str.), from Ayr to Singapore, arrived there 13th; she would have to effect some slight repairs to her machinery before proceeding.

The Robin Hood, of London, off. No. 52,675, Lewis, from Sourabaya to Rotterdam, with sugar, rattans, and tobacco, was spoken on March 1 last in lat. 15 S., lon. 115 E., and has not since been heard of; she has been posted at Lloyd's as a missing vessel.

The Mont Cenis (str.), Hybert, which arrived at London Sept. 26, from Manila, reports having experienced on Aug. 21 and 22, when off Ras Haffoon, a very severe gale from S.S.W., with heavy cross sea, making a clean breach over the ship, filling decks, and washing every movable thing off them, capsizing one of the lifeboats in chocks and bilging her; the gale continued with unabated fury for sixteen hours.

A telegram from Aden, Sept. 29, states that the master and crew of the Isa (str.) arrived there that day in H.M.S. Briton, and reported the vessel was wrecked on the island of Socotra June 23, and abandoned by them July 23; salvage hopeless.

Advices from Sourabaya, Sept. 28, state as follows:—Lahloo: considering great expense and risk, salvors stipulate 500 guilders every ton metal delivered there, and 75 per cent. of everything else saved.

Advices from New York, Sept. 21st, state that the Istapha, Richards, which arrived from Singapore, reported that from 26 to 31 Aug., experienced unsettled weather, from N.W. to S.S.E. and S.W., with a heavy confused sea, attended by continuous lightning, during which her foremast was sprung.

NOTICE TO MARINERS.

China—East Coast.—Fixed Light at the Entrance of Wusung River.—With reference to notice to mariners No. 17, dated 10th February, 1872, on the establishment of a light at the entrance of Wusung River: The Marine Commissioners' Office at Shanghai has given notice, that the light is now exhibited. The light is a fixed white light over the navigable channel at the entrance to the Wusung river from the Yangtsze, and a fixed red light on each side of the navigable channel; it is elevated 50 feet above the level of the sea, and in clear weather should be seen from a distance of 12 miles. The illuminating apparatus is dioptrict or by lenses, of the fourth order. The tower, built of brick, is square, 45 feet high, with a total height of 58 feet. Position, lat. 31 deg. 33 min. 22 sec. N., long 121 deg. 29 min. 35 sec. E. The light when seen from the centre of the navigable channel bears S.W. by W. ¾ W. Also that on the 1st September, 1872, the light-junk moored close to the Lismore wreck at the entrance of Wusung river would be removed.

Foochow.—Fixed and Flashing Light on Middle Dog Island.—Also, that from the 12th July, 1872, a light would be exhibited from a lighthouse recently erected on the north-east end of the Middle Dog Island near the entrance to the Min river. The light is a fixed white light, varied by a bright flash every half minute, visible from seaward between the bearings of E. by S. ¾ S., through south and west to N.E. ½ N. The light is obscured when bearing from E. by S. ¾ S., round by east to N.E ½ N., by the Tongsha and Middle Dog islands, except between the bearings of East, and E. ¼ N., and of N.E. by E. ½ E., and N.E. by E.; it is elevated 257 feet above the sea, and in clear weather should be seen from a distance of 22 miles. The illuminating apparatus is dioptric, or by lenses, of the first order. The tower is round, built of stone, 35 feet high, the total height being 64 feet; the tower, with dwellings and boundary wall, are painted white. Position, lat. 25 deg. 58 min. 20 sec. N., long. 120 deg. 2 min. 20 sec. E. All bearings are magnetic. Variation, 1 deg. westerly in 1872. Hydrographic Office, Admiralty 1st October, 1872.

The Corporation grant Drafts upon, and negotiate or collect Bills at any of the Branches or Agencies; also receive Deposits for fixed periods, at rates varying with the period of deposit.

The Corporation issue Letters of Credit and Circular Notes, negotiable in the principal Cities of Europe, Asia, and America, for the use of Travellers.

They open Current Accounts for the convenience of Constituents returning from China, Japan, and India.

They also undertake the Agency of Constituents connected with the East, and receive for safe custody Indian and other Government Securities, drawing Interest and Dividends on the same as they fall due.

Shareholders having their Shares on the London Register receive their Dividends at the fixed rate of 4s. 6d. per Dollar. Dividends are payable in London in April and October on receipt of the advice of meeting in Hong Kong, held in February and August.

Transfer Deeds, Powers of Attorney, and other Forms may be had at their Office on Application. Office Hours 10 to 3—Saturdays 10 to 2.

London, 1st October, 1872. W. H. VACHER, London Manager.

FOURTEENTH REPORT

Of the Court of Directors to the ORDINARY HALF-YEARLY GENERAL MEETING of Shareholders, held at the CITY HALL, HONG KONG, on WEDNESDAY, the 14th August, 1872.

TO THE PROPRIETORS OF THE HONG KONG AND SHANGHAI BANKING CORPORATION.

GENTLEMEN,—The Directors have now to submit to you a General Statement of the affairs of the Corporation, and Balance Sheet for the half-year ending 29th June last.

The net profits for that period, including $18,340.18 brought forward from last account, after paying all charges and deducting interest paid and due, and making full provision for all bad and doubtful debts, amount to $415,814.29, of which, after taking out Rebate on Bills not yet due, and remuneration to Directors, there remains for appropriation $392,826.21.

From this sum the Directors recommend the distribution of a Dividend of $7.50 per share on the Paid-up Shares, and of $6 per share on the New Shares, being equivalent to Six per Cent. for the half-year; which will absorb $270,000. The balance, $122,826.21, they propose to carry forward to the credit of New Account, deferring any appropriation of it until the result of the whole year's working becomes known.

The Directors consider that the result of the past half-year is very satisfactory, and they congratulate the Proprietors on the continued prosperity of the Corporation.

CALLS.

The fifth and last call of $25 per Share on the New Shares, due on the 1st July, has been promptly met on 19,855 Shares out of 20,000; the balance outstanding will doubtless shortly be paid.

ONE DOLLAR NOTES.

His Excellency the Governor having assented to the application of the Directors for power to issue ONE DOLLAR NOTES in Hong Kong, arrangements have been made to introduce these Notes to the Public without delay.

DIRECTORS.

Messrs. R. ROWETT, J. MENKE, and WILLIAM LEMANN resigned their seats at the Board on leaving the Colony, and Messrs. WILLIAM H. FORBES and H. B. LEMANN have been elected to fill two of the vacancies.

Hong Kong, 6th August, 1872. T. PYKE, Chairman.

ABSTRACT OF ASSETS AND LIABILITIES, HONG KONG AND SHANGHAI BANKING CORPORATION, JUNE 29, 1872.

GLYCERINE
DE
TOILETTE.
(HEALTH.) SPECIAL PERFUMERY. (BEAUTY.)

INVENTED BY

EUG. DEVERS, QUIMICO.

PATENTED S.G.D.G.

PREPARATIONS for the Toilet, and particularly Soaps; Powders, &c. for the Teeth; Toilet Washes, and Vinegars, have of late assumed an importance in proportion to the demand for them. Foremost amongst these is GLYCERINE, a remarkable unctuous substance, which softens the skin without greasing it; its valuable qualities were quickly recognised by the most eminent physicians. Experimented on by MM. Dumarquay and Sutom (See "Reports and Memoirs of the Biological Society, 1836," &c.).

GLYCERINE CREAM for the skin.
GLYCERINE TOILET WATER for baths and ablutions.
GLYCERINE ELIXIR for the mouth.
GLYCERINE POMADE against scurf.
GLYCERINE SOAP for chaps and chilblains.
GLYCERINE ANTIPELLICULAIRE to prevent the hair falling off.
DULCIFIED GLYCERINE CREAM SOAP for the beard.
PATE DENTIFRICE à la GLYCERINE for the teeth, sum acid in alkali.

HOLLOWAY'S PILLS

Aids to Health.—So many disturbing causes are at work to undermine the health that it behoves every one occasionally to regulate his system. Professor Holloway has placed this power within the reach of all; his balsamic Pills are equal to any emergency. Come the evil whence it may—from food, atmosphere, or irregularity of life—it is gently met and forcibly expelled by these perfect purifiers. Holloway's Pills have effected the most remarkable recoveries in cases of wasting weakness, nervous decline, and similar dangers of debility. Those persons must surely place a low value on health and life who allow sickness to assault their constitutions when a trifle expended on these Pills would banish it.

CEYLON.
COFFEE ESTATES FOR SALE,

IN all Districts, Ages, Conditions, varying in size from 40 to 1,500 acres, and in price from £200 to £24,000. ALEX. BROWN, Kandy.

ALEXANDER BROWN,
ESTATE AND GENERAL AGENT,
KANDY, CEYLON,

VISITS and reports on Coffee Plantations, estimates Crops, values Properties, buys and sells Lands, Goods, and Produce on Commission, and transacts all kinds of Estate and Agency Business.

SUCCESS IN INDIA,
AND HOW TO ATTAIN IT.
Effingham Wilson, Royal Exchange.

The writer is evidently well acquainted with the East, and the information afforded by him is both useful and interesting.—*Daily News.*

The honest yet hopeful way in which practical information is communicated in these pages concerning actual life in India will awaken the dormant enterprise of young men of education and ability, whose prospects may be somewhat indifferent at home.—*Globe.*

A valuable little pamphlet.—*Morning Post.*

The author of this very sensible work appears quite at home in his subject.—*Financier.*

We leave the little book with much the same impression as would be derived from the conversation of an intelligent and observant man of the world.—*Bullioni*

A real and practical knowledge has been brought to bear upon the subject.—*Money Market Review.*

The author of the above-named pamphlet formerly editor of the *Indian Examiner*, and since on the staff of daily and weekly journals in London, seeks a re-engagement as editor in China, Japan, or Ceylon. The advertiser has a thorough knowledge of the practical working of a newspaper, and could undertake the business department also.

Address, J. D. B., care of the Editor of the *London and China Telegraph*, 2, Cowper's-court, Cornhill, to whom references are kindly permitted.

TANJONG PAGAR DOCK COMPANY
(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.

Messrs. MACTAGGART, TIDMAN, and CO., 34, Great St. Helens.

E. M. SMITH, Manager.

JAPAN AND CHINA.
Great Mail Route via New York and San Francisco.

THE PACIFIC MAIL STEAMSHIP COMPANY, under their new arrangement with the United States Government, despatch the following magnificent STEAMERS, of 3,000 tons burden and upwards, with Mails and Passengers, from San Francisco, on the 1st and 16th of every month, for Yokohama, Hiogo, Nagasaki, Shanghai, and Hong Kong, connecting at Hong Kong with the Peninsular and Oriental Line, for Ports in India:—

America	Japan	China
Great Republic	Alaska	Costa Rica
Colorado	Constitution	New York
Golden Age	Oregonian	Ariel

Returning from Hong Kong on the 12th and 27th of every month.

The Pacific Mail Steamship Company's steamers also leave New York on the 10th, 20th, and 30th of every month for San Francisco, via Panama, calling en route at Kingston, Jamaica, and ports along the North Pacific coast.

For rates of fare from England, which include railway transit across the American continent, and other information, apply to H. Starr and Co., Agents, 22, Moorgate-street, London.

UNION PACIFIC RAILWAY.—THROUGH LINE from NEW YORK to SAN FRANCISCO.

San Francisco, 18 days from England.
Japan ..... in 38 " "
China ..... in 44 " "
New Zealand in 42 " "
Australia ..... in 47 " "

THE MAILS, &c.

The P. and O. mail, bringing advices as above, was delivered, *via* Brindisi, this morning, its due date. The next inward (French) mail, with dates Yokohama Aug. 28, Shanghai Sept. 1, Hong Kong Sept. 7, Singapore Sept. 16, is due, *via* Marseilles, on Monday next, the 21st inst.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, five to six hours in transmission.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Mooltan*, arrived Oct. 11.—From Hong Kong: Mr. Boyd. To Venice, arrived Oct. 13.—From Hong Kong: Mr. Maclean, and two second-class passengers. From Singapore: Mr. Sartorius, Mr. Rickets.

To Southampton, per P. and O. steamer *Cantia*, expected to arrive Oct 21.—From Yokohama: Capt. Spinks. From Hong Kong: Lieut. Annesley, R.N., Dr. Terry, Paymaster Floar, R.N., Mr. Ellis, R.N., Mr. Hicks, R.N., Mr. Bond, R.N., Mr. R. Hall. From Singapore: Sub-Lieut. Bruce, R.N., and one second-class passenger. From Singapore to Suez: Lieut Westhoff.

PASSENGERS OUTWARD.

Per French mail steamer *Tigre*, from Marseilles, Oct 13 (booked from London).—To Yokohama: Mr. Fraissinet, Mr. Jacobs. To Shanghai: Miss Turner, Rev. and Mrs. Taylor, Mr. W. F. Loy, Mr. R. E. Rennie, Mr. H. Broughman Miller, Mr. and Mrs. Medhurst and child. To Hong Kong: Mr. F. Bowden, Mr. and Mrs. Heard, Mr. J. Heard. To Batavia: Mr. C. A. Henry, Mrs. Lacey, Mr. and Mrs. G. Van and son, Mr. and Mrs. Engelbronner and family, Mr. van Hemert. To Singapore: Mr. Muller. To Galle: Mr. A. S. Daniell, Mrs. W. Daniell, Mrs. Geddes and child. To Saigon: Mr. Lory, Mr. G. Boller, Mr. Kresser.

Per French mail steamer *Amazone*, from Marseilles, Oct. 27 (booked from London)—To Shanghai: Mr. and Mrs. Lemaire. To Hong Kong: Mr. E. Moore, Mr. Speechly. To Singapore: Mr. and Mrs. Labhart Lutz. To Batavia: Mr. Van Berkil Bik.

Per French mail steamer *Ava*, from Marseilles, Nov. 10 (booked from London).—To Hong Kong: Mrs. Lammer and child. To Singapore: Mr. and Mrs. W. Ullemeister. To Batavia: Mr. and Mrs. Nogel, Miss Kilns, Mr. A. Matkins, Miss Clona, Miss Mees, Mrs. Praterms. To Galle: Mr. G. Phear.

Per French mail steamer *Cambodge*, from Marseilles, Nov. 24 (booked from London).—To Batavia: Mr. and Mrs. Hora Siccoina, Mr. and Mrs. Kleberg.

Per P. and O. steamer *Mirzapore*, from Southampton, Oct. 3.—To Ceylon: Mr W. Owen.

Per P. and O. steamer *Simla*, from Southampton, Oct. 10.—To Yokohama: Mr. F. C. Hayes. To Shanghai: Mr. A. B. Steel, Mrs. T. B. Hooper, Mr. Brewer. To Hong Kong: Miss L. Robertson, Miss Simpson, Mr. E. Moore. To Singapore: Mrs. Trotter, Mrs. Dunlop and child Mr. Nai Sootchai Surawongse. To Penang: Mrs. Speedy. To Ceylon: St. Surg. W. B. Dalby, R.N., Mr. G. C. Rosmalecocq.

Per P. and O. steamer *Pera*, from Venice, Oct. 18.—To Penang: Mr. Speedy, Mr., Mrs., and Miss Vermont. To Singapore: Mr. J. M. Matson. To Ceylon: The Mackintosh of Mackintosh, Mr. S. Holmes.

Per P. and O. steamer *Pera*, from Brindisi, Oct. 21.—To Yokohama: Mrs. Marshall. To Shanghai (*via* Bombay): Mr. J. E. W. Stewart. To Hong Kong: Mrs. C. A. Sinclair. To Singapore: Capt. and Mrs. Caldbeck. To Ceylon: Mr. R. Morris.

Per P. and O. steamer *Poonah*, from Southampton, Oct. 24.—To Yokohama: Mr. E. Grosser, Mr. H. Bramstedt. To Hong Kong: Mr. H. H. Thornton, Mr. J. Alexander. To Singapore: Miss Rickards.

Per P. and O. steamer *Pekin*, from Southampton, Nov. 7.—To Shanghai: Mr. Wulff. To Ceylon: Mrs. Bayley and child. To Hong Kong (*via* Bombay): Mr. W. H. Fittock.

Per P. and O. steamer *Malta*, from Brindisi, Nov. 18.—To Shanghai: Mr. and Mrs. H. Robinson

Per P. and O. steamer *Indus*, from Southampton. Nov. 21.—To Hong Kong: Mr. C. V. Creagh.

Summary of News from the Far East.

JAPAN.

Our advices by the present P. and O. mail are no later than those received *via* San Francisco on the 2nd inst., and published in our last issue.

CHINA.

SHANGHAI.

We have advices from this port to the 18th August. The P. and O. mail from London July 12 arrived out on the 23rd August. The following summary of news is from the *North China Herald*:—

We have to acknowledge receipt of the *Customs Gazette* for the quarter ending March. The number is devoted to the publication of medical reports from the various Customs' medical officers, for the half-year from October 1871 to March 1872.

There was a parade of the Volunteer corps on the 19th Aug., which was a great success. All arms were well represented, about 180 men being out, made up of 130 Riflemen and 50 equally divided between Rangers and Artillery. The route chosen was the Yangtsepoo-road, as far as Mr. Meller's new residence, known as Dow's godowns, which formed the rendezvous after the fight. No. 2 company, with one gun, starting in advance of the main body, sustained their attack below the Kinwinsing godowns, retreating gradually before the strong combination of Miholoon gs, Artillery, Rangers, and Nos. 1 and 3 Rifle companies, till the rendezvous was reached.

We observe, by an announcement posted in the shipping office of H.B.M. Consulate, that the Board of Trade have, in response to representations made, we believe, from that office, extended the seamen's money order system to the open ports of China and Japan. As most of our readers are aware, seamen receive their wages at the Consulate, and the object of the system is to induce them, before they can leave the office and encounter temptations which may lead to their squandering accumulations of pay, to send home a portion for the use of their families or their own ultimate benefit. Money orders are granted on most of the principal places in the United Kingdom, at a charge of 3d. per £1. We notice that the list of ports in China includes Taku, but omits Pagoda Anchorage and Whampoa, where the amount of shipping renders the extension of the privilege equally desirable.

Our Chefoo correspondent, writing on the 17th August, says:—A Corean junk, containing six sailors, was picked up by a vessel and brought here. The Coreans were on arrival sent to the British Consul, who sent them on to the Taoutai; he latter immediately forwarded them to Fo-san-hsien, to put them out of reach of foreign curiosity, and they have since gone on to Peking. It is much to be regretted that the French Catholic missionaries

Digitized by Google

from Corea, who are now here waiting for an occasion to again enter that country, had no opportunity afforded them of communicating with the shipwrecked Coreans, as by their knowledge of the language they might have got some information as to what is now doing there. One of the missionaries did go to the yamen to try and see the poor Coreans, but he was told they had left. Our Taoutai is probably desirous of avoiding a *casus belli* with Corea, lest he should place his Imperial master in the same position as the Mikado of Japan.

A little excitement was caused on the Bund some nights since by the appearance of a runaway carriage and pair. The frightened ponies tore along the Bund by the river side at a furious rate, there being no one in the carriage to check or guide them. From the Canton road to Augustine Heard's they kept a very straight course, then swerving, they passed between the trees, and upset the carriage on the foreshore, when they were secured. Fortunately, almost no damage was done; but the incident recalls the necessity for requiring that ponies being driven for training, as we understand these were, should not be brought into the settlement. They should be trained on outside roads, and, if possible, in the morning. Carriage accidents are getting unpleasantly frequent.

The following items are from the *Courier*:—

A charge of the theft of a bale of silk from the godown of Mr. Aug. H. Maertens has been disposed of at the Mixed Court, and resulted in the conviction of an individual who would ordinarily be considered above suspicion. The compradore, when questioned as to his whereabouts on the night of the theft, said that he returned to his quarters at the hong at the virtuous hour of ten, and went to bed for the night. The watchman, an old rustic, who, during a two days' absence of his son, who was the hong watchman, did duty for him, told a very different story. The compradore, he said, came to the hong about ten, but went out again about eleven, and in an hour or so returned with two men who went inside with him. Some time afterwards he again left the hong by the gate, accompanied by the two men who carried a white box. The compradore did not finally return till two or three in the morning. The Court held that the theft had been brought home with sufficient clearness to the compradore, and sentenced him to pay the value of the silk! Unless we are to suppose that the compradore's employer, from compassionate motives, or from a wish to retain without interruption the services of the man, entered a plea of *nolle prosequi* on his behalf, we are utterly at a loss to understand a sentence which reduces Mixed Court justice to a farce. Few forms of larceny could be more aggravated than that of which this responsible servant was convicted.

We learn that the catalogue of the books, maps, manuscripts, plans, drawings, rubbings, curios and specimens of natural science and of Eastern Art which combine to make up the Asiatic Society Library and Museum and the Wylie Library, is now in course of being printed, and may be expected to be completed before the Society commences active operations for the winter. The accomplishment of this object and the throwing open of a reading room where the rich accumulations of Oriental learning belonging to the Society may be examined by the members and the public, will do more to popularise and establish the Society than almost any other expedient; and both the Society and the public will owe the librarian a heavy debt of gratitude for his arduous labours. It is also gratifying to learn that the volume of the Society's Transactions for 1871 is in the press.

It is understood that another special meting of the ratepayers will be called in September, at which the two chief subjects of discussion will be a final proposal from the bridge proprietors and the reconsideration of the diseased meat bye-law, which is everywhere condemned. Meanwhile the contractors are energetically pushing on the construction of the free Ferry.

HONG KONG.

Our advices by this mail extend to 31st Aug.; the French mail from London 19th July arrived out on the 28th August. The following items of intelligence are taken from the *Overland China Mail*:—

Although the demands which M. Geoffroy is instructed to make on behalf of France are not generally known, it may be interesting to note the programme laid down by M. de Rochechouart in a letter addressed by him to Mr. Low and afterwards published in the last U.S. Blue-book. The late Minister says:—

"I place the solution of the question of audience with the Emperor first, and the arranging a treaty of etiquette regulating the detail of our official life in a manner honourable to our Governments and to ourselves.

"2nd. I demand that we shall have the right to place salaried Consuls wherever we judge proper, and that those cities where Consuls reside shall also be opened to foreign trade.

"3rd. I demand the right to navigate with steamers all water courses which will float a vessel drawing at least ten feet.

"4th. I demand that a mixed code shall be adopted by which commercial and civil cases, and even criminal, too, which may arise between the French and Chinese, shall be judged.

"5th. Lastly, I demand that some change shall be made in the application of the tonnage dues. It would be well if the management of these revenues were intrusted to a mixed commission, as is the case almost everywhere else in the East."

The foregoing agrees almost entirely with what we learn from trustworthy sources is the general tenour of what M. Geoffroy will endeavour to obtain, though, if rightly informed, we believe that the last has not yet been heard of the Tientsin affair.

We learn from Fatshan that the inhabitants are petitioning the Government to have the water approaches to that commercial mart dredged. The sands carried down by the floods is constantly filling up the river, so that in many places it is difficult even for light craft to move, and the petitioners urge that the last time the river was dredged was thirty years ago, and that they are prepared to subscribe among themselves to pay the expenses of the dredging. What they want is the permission from the Government. The last dredging was conducted in the same way, at which time the amount of subscription raised was upwards of 27,000 taels.

His Excellency the Governor visited the Chinese Exhibition on the 22nd. *The Press*, by the way, states that an affigy (should it not be *affigee*) of the Captain Superintendent of Police forms a prominent object among the articles exhibited. It does not state if joss stick is burned before it; but should that idea not have occurred to its owner, he might drive a profitable trade by taking the hint we hereby give him.

We learn that Mr. T. Fitzroy Rice, the present Assistant Superintendent of Police, has accepted an appointment as chief of a Japanese Police Force, to organise which he will shortly leave this colony. We wish Mr. Rice every success in his new sphere of action, and trust that his successor here will ere long find himself in a definite position in a well organised force—advantages which Mr. Rice could scarcely be said to enjoy on his first arrival at Hong Kong.

We understand that the committee of the Chinese Hospital have received the sanction of the Government to refuse admittance to all visitors, unless they have the permission of the Colonial Secretary, the Registrar General, or the Colonial Surgeon, or unless they are accompanied by one of the directors. It is said that visitors of late are in the habit of going into the patients' wards and interfering with the patients, who are too often disturbed by the visitors.

We learn that a meeting of brokers took place on the 24th. A committee of five was chosen, to draw up the rules of an association, to which it is intended, if possible, to obtain Government recognition.

The Spanish steamship *Vurac-bat* left Hong Kong for Macao; we hear she is intended to take on the coolies of the S.S. *Venus*, as the latter vessel put back (as previously reported) with her boilers in a leaky condition. The other Spanish steamer, *Amboto* (also fitting in this port for coolies from Macao), went over to the Kowloong Dock.

The first number of the *China Review* was published on 26th August, and judging from the comments which have reached us seems to be regarded as satisfactory. We shall probably receive a copy by the Southampton route, and a review will appear in our next. The first paper is (to quote the *Daily Press*) "an excellent review from the pen of Dr. Eitel of Dr. Legge's last volume of the Shu King." The "Adventures of a Chinese Giant," which forms the second paper, is pronounced by a most competent authority to be the only Chinese novel he ever thought worth reading in translation.

The result of the prosecution in connection with the duel between M. Leon Checa and M. Torre Bueno is that the defendants have been fined each in the sum of $200. The case came on on the 25th, when they pleaded guilty—the one to provoking, and the other to sending a challenge—and the Acting Chief Justice, after giving an appropriate exposition of the English law upon the subject, inflicted the fines above mentioned.

PHILIPPINES.

MANILA.

The *Comercio* contradicts the rumour to the effect that the Government intended, at the expiration of the present mail contract with the company carrying on steam service with Singapore, to return to the former plan of having mail communication with Hong Kong instead.

The same paper gives the following version of the affray between H.M.S. *Nassau* and Sulu pirates: The boats of the British war steamer *Nassau* have been attacked by pirates near Carang Carang, on the north-east portion of Salu. The fight lasted four days, at the end of which the crews of the boats were victorious, after having disembarked and destroyed the prahus and villages, &c., of the pirates. The boats bombarded the villages for two hours: the loss of the pirates was fearful. Lieutenant Gray, of the *Nassau*, and some of the crews of the boats were severely wounded. Mr. White was wounded in the neck by a spear. Whilst the boats were attacking by water, the natives harassed them by land. On the following day the officers of the *Nassau* were received by the Sultan of Salu, who thanked them for what they had done, and made them some presents.

H. M. Norodon the First, King of Cambodia, arrived at Manila, and was received with the honours due to his rank.

SARAWAK.

The *Sarawak Gazette* takes umbrage at the Consular report of ex-Governor Hennessy of Labuan, who was H M.'s Consul-General for Borneo, which it calls a parting broadside poured into Sarawak before he sheered off. Mr. Hennessy's unfriendliness to the Sarawak Government is well known out here, and the article, after commenting on this, says it is nevertheless possible a document like the report, bearing the *imprimatur* of a British Consul-General, may gain a fictitious importance among those at home who have no means of forming a correct opinion of Sarawak. The article goes on to deny the assertions made by Mr. Hennessy that "the Rajah of Sarawak is a vassal of the Sultan of Brunei," and that Sarawak itself is "little more than a trading outpost of the Borneo Company," and says that assertions like these are sufficient to show the amount of confidence to be placed in Mr. Hennessy's report.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Advices extend to the 8th September; the French mail from London Aug. 2 arrived out Aug. 30. The *Straits Times* supplies the following summary of news:—

The principal event of the fortnight has been the visit of his Imperial Highness the Grand Duke Alexis, of Russia, in the Russian frigate *Svetlana*, the flag ship of Admiral Possiet. The *Svetlana* arrived on the afternoon of the 28th August, and on the 29th the Prince landed in State and was taken to Government House. In the evening he attended a ball at the Town Hall, given by the naval officers to the community in return for the hospitality shown them, and on the evening of the 30th Lady Ord gave an "At Home" at Government House, at which numerous presentations were made to his Imperial Highness. On the 31st he went to Johore as the guest of H. H. the Maharajah, and breakfast was served to a company numbering about ninety, including the Prince, the Governor and officials, military and naval officers, the unofficial members of Council, foreign Consuls, and many of the principal residents. In the afternoon the party returned to Singapore, and the Prince returned to the *Svetlana*, where in the evening the Governor, military and naval officers, and the leading officials and members of Council, were entertained at dinner in return for the hospitality shown to him. The *Svetlana* left for Hong Kong, whence she will go to Nagasaki, where she is to meet and join the Russian Imperial Squadron.

Some time back the Hon. Mr. Shelford, in the discussion on the Steam Vessels Bill, was told by the Governor that it was "not to be supposed but that the Government would appoint the best men." This, of course, silenced the Hon. member's objections. We may be pardoned, however, for differing with his Excellency's opinion when we see beardless youths put into positions where they have no right to be, and whose appointment is by many regarded as an imposition upon the community. Within the past few days, Captain Ord, brother of the Governor, who has been acting police magistrate at Malacca, was confirmed as Acting Lieutenant Governor of Malacca, and a vacancy being thus opened in the police-magistracy thereby, it was given to a young cadet who has been for some time past holding appointment as a clerk in the Supreme Court here, whose fitness for the duties of magistrate may be seriously questioned, judging from his attempts in the Singapore Police-court. This is only one of several similar appointments made lately, which show to what lengths nepotism may be carried in a forbearing and quiet community. If the maladministration of the law by incompetent magistrates should lead to a serious riot, it would not be matter for surprise.

The "Ports and Harbour Bill" proposes to place the wharves and dock at New Harbour under the control of the master attendant, if the Governor chooses to do so, in rules which the Bill gives the Executive Council the power of framing. This was objected to by all the unofficial members, whose view was concurred in by the Colonial Secretary, but the Governor insisted so strongly on retaining the objectionable clause, that there was nothing for the Colonial Secretary to do but withdraw the motion he had made to strike it out, and vote with the Government side. The same motion was immediately made by an unofficial member, and in the vote on it the four were arrayed against the whole phalanx of the officials, one at least of whom was constrained to vote against his convictions, and that, too, on a matter in which the Governor had no right to, and, in fact, did not, order the votes of the officials; but it was evident that not even the highest of them dared to vote against his declared predilections—a fact which makes business men declare the Council as constituted a farce and a sham, seeing the Governor can at pleasure control it as easily as though he had to deal with the matters by himself.

His Excellency the Governor has left in the *Pluto* for Malacca, and the Chief Justice also goes there to-day to hold the criminal session, which opens on the 10th Sept. A recent circular issued from the Colonial Secretary's office censures the Government officials for want of respect to the Governor's office in not attending his Excellency when he leaves, or arrives at, any of the three Settlements, and ordering them to do so in future.

Salangore is still disturbed by civil war, and a person has been arrested here and is being prosecuted at the police-court on a charge of enlisting men and supplying arms to wage war against the Sultan of Salangore, and it is believed the conviction of this man will elicit facts rather startling to the Government. The town is quiet, though during the fortnight—it being the season for the *Sumbayang Hantu*, or sacrifices to the spirits—the Chinese section of the community have had one or two quarrels, which might have led to serious Kong-see fights had they not been nipped in the bud. The petty quarrels have, however, all been amicably settled, and there is no apprehension of any further disturbance.

At the meeting of shareholders of the Tanjong Pagar Dock Company (Lfmited), the report of the directors, to be found in another column, was duly passed, as was also the resolution for increasing the capital. Proposed by Jasper Young, Esq., seconded by J. L. Kirby, Esq.—"That this meeting, after the very satisfactory statement they have received of the affairs of the company, desire to record their sense of the valuable services of their late chairman the Hon. T. Scott, to whose unwearied exertions during upwards of five years their prosperity is in a great measure due, and in acknowledgment of these services they have great pleasure in voting that a testimonial be presented to him in the form of a piece of plate, bearing an appropriate inscription." Carried by acclamation. Proposed by S. Short, Esq., seconded by T. Sohst, Esq.—"That the thanks of the meeting be given to the chairman, directors, and manager, for having produced the very satisfactory results of the past half-year." Carried unanimously.

The material for the lighthouse on the North Sands is being shipped on board the barque *Norna*, to be taken down to Malacca, whence it can be taken as wanted to the North Sands.

Commercial Report.

—o—

(*For dates see first page.*)

IMPORTS.

—o—

SHANGHAI.—The market had been very flat for Cotton Goods, but there had been activity in Woollens. In Grey Shirtings the only business that been in 8¼lbs. Dewhursts' Eagle Chop, at Tls. 1.90. The inquiry for Mildews was increasing at reduced rates. White Shirtings no sales. T-Cloths: Not sufficient doing to test prices. The stock exceeded 1,250,000 pieces, against 458,000 pieces at same date last year. Drills: Business quiet; prices rather easier, viz., Tls. 2.97 to 3.02 for Dutch, and Tls. 3.08 to 3.15 for English. Jeans: Sales of Dutch at Tls. 2.30, and English at Tls. 2.17; market exceedingly quiet. Sheetings: No business. Fancy Cottons: More doing, but business confined to a few articles only. Velveteens 13 to 14 cand., Velvets 28½ cand. per yard Gentian Shirtings: 7 lbs., Tls. 2.33; 8 lbs., Tls. 2.55. Turkey Reds, Tls. 2.05. Dyed Spots, Tls. 2.75. White Brocades, Tls. 2.25. Chintzes, Tls. 1.48 to 1.65. Handkerchiefs, Tls. 0.57½ to 9 mace. Woollens:—Long Ells in strong demand at a further advance in value; prices, Tls. 5.70 to 6.10 for Assorted, and Tls. 6.50 to 6.65 per piece for Scarlet. Camlets also in better request at an improvement in price; sales at Tls. 15.50 to 15.75 for good to best assortments, and Tls. 16 to 18.25 for crack Scarlets. Figured Orleans: Fair inquiry at Tls. 3.95 to 4.20. Lastings—best cloth—black, and assortments with a good proportion of black, much wanted, but stock light, and buyers had experienced difficulty in securing desirable parcels. Crape Lustres higher, sold at Tls. 4.10 to 4.20. Spanish Stripes and Medium Cloths quiet but steady; former quotations fully maintained. Metals:—Iron Nail Rods: Transactions in German Iron at Tls. 3.84; English at Tls. 3.70 to 4.10 per picul; holders firm. Lead: A speculative demand existed, and the market closed firm at Tls. 4.75 for LB, and other brands in proportion.

HONG KONG.—The market for manufactures during the fortnight had been characterised by general quietness. Large quantities of mildewed goods continued to be placed upon the market at low rates. Woollens had continued to meet a fair inquiry at unchanged prices. Metals, with the exception of Lead, were improving. The quotations for Rice were—Singapore, 1.80 to 1.85; Saigon, 1.87 to 1.92; Siam, 1.78 to 2.45; Manila, 1.95 to 2.15; Bengal, 2.00 to 2.15. The market was dull and heavy, a reaction having set in after a period of excitement occasioned by speculative activity.

CANTON.—There had been a further decline of 5c. per picul in Lead: quotations were as follows:—LB, common quality, $6.40 to 6.45; WB quality, $6.75 to 6.85.

MANILA.—During the fortnight the market for Plain Staples had been dull and the business done very limited; there were but few alterations to note in quotations. Coloured goods of new styles were in small supply and in fair request, and for such rather better prices would be paid; large quantities, however, could not be taken up, as the consumption at this season is small. Old and unsuitable styles continued to meet with no attention. Yarns were in heavy stock, both in first and second hands, and progress was very difficult to make even at the unremunerative rates nominally quoted.

SINGAPORE.—Messrs. Boustead and Co. report as follows:—Business during the past fortnight had been on a small scale, and holders being less firm, prices of most descriptions of Piece Goods are slightly lower than last quoted. 39-inch Grey Shirtings: 8¼ lb. small transactions at $2.52½ to 2.55; 45-inch: 8 lb. very limited request at $2.50 to 2.55; 9 lb. no inquiry. 32-inch Grey T Cloths: Small business at weaker rates; 4 to 4½ lb. in moderate demand at $1.05 to 1.20; 5 lb. quiet at $1.35 to 1.37½; 6 lb. in less request at $1.62½ to 1.65: 7 lb. nominal at $1.80 to 1.85. 32-inch Grey Madapollams not much inquired for; as last quoted—2¼ lb., $18 to 18½; 2¾ lb., $10 to 19½; 3

Digitized by Google

lb., $19¾ to 20. 36-inch Grey Supers: Hardly any transactions. Grey Yarn 18-24's: Quiet at $107½, 30's at $115½, 40's at $133 to 134, very little inquiry. Coloured Yarn: Best Glasgow dye in fair demand, and sales to some extent reported at a light reduction. Woollens: Little inquiry. Metals:—Iron: Stocks reduced and holders firm at former rates; Nailrods, $4½; Hoop, $4½ to 5; Swedish flat bar, $4.15 to 4.20; Yellow Metal, $26 to 25¾; Zinc Sheathing, $9; Lead, quiet, LB $6; Swedish Steel, $4.10 to 4.15.

PENANG.—The market had been extremely inactive throughout the interval. There was no demand except for actual requirements, and sales were difficult to effect even at lower prices.

EXPORTS.

—o—

TEA.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s report is as follows:—The first musters of the third crop Teas were placed upon our market shortly after the departure of the last mail and since then arrivals have been almost entirely of this description. With very few exceptions the character of the leaf is poor and decidedly inferior to last year's. Very few settlements have been made here, but up to Tls. 20 per picul has been paid for the best parcels. Owing to there being so little demand the Teas have latterly been shipped direct to Shanghai without being offered here at all. With regard to prices, the high standard established on the arrival of the second crop leaf has been maintained steadily up to the present time, the opening prices for the third crop Tea ranging fully two taels over last year's. During the last few days we have had a lower range of tael price, but, quality considered, it can scarcely be called a reduction. We estimate total arrivals to date, exclusive of Ningchow Tea, 46,067,000 lbs., against last year 48,473,600 lbs. Customs Export to 15th Aug., was 43,258,180 lbs., against 44,971,239 lbs., or including Ningchows 48,253,840, against 48,324,763 lbs.

KIUKIANG.—Black: A good many chops had arrived, of which four had been settled at about previous rates. High prices in Shanghai are said to be causing a large picking of third crops in the country, so that last year's export may yet be equalled. No business had been done in Green, but supplies were being sent forward steadily to Shanghai.

SHANGHAI.—The following is also from Messrs. Drysdale, Ringer and Co.'s report:—*Black:* The business which has transpired since date of our last is the settlement of 15,700 chests and 30,750 half-chests; last year we reported the transaction for corresponding period at 27,700 chests and 35,500 half-chests. Buying has been going on steadily throughout the fortnight, and rates have as a rule been well maintained. Some chops have been settled at less than was previously offered, but we cannot quote any general decline. A considerable quantity of third crop Tea has come to hand; they are, as a rule, strong, but without point or character; 1s. 5½d. to 1s. 6d. has been readily paid for such as have any appearance; we hear that Tls. 27.5 has been paid for one with unusually good leaf. Shuntams and common Hohows have remained neglected till holders are anxious to quit at some concession in price; the former can be purchased at 11¾d. to 1s. 0½d., the latter at 1s. 1d. to 1s. 1¾d. per lb., say about Tls. 3.0.0 over last year's rates; they do not, however, attract attention. Export is 44,200,000, against 43,970,000 lbs., and stock 23,591 chests and 55,142 half-chests, equal to 51,162 chests, against 42,942 chests same time last year; the quantity on board ships in harbour is, however, less now; there are only three ships on the berth, against eight then, three being full and on the point of leaving. Natives estimate the supply to complete the season at 150,000 chests, say 15,000,000 lbs. Green Tea: There has been a further concession in prices; it is perhaps most apparent in Pingsuey, which have been taken to a considerable extent for the English market at Tls. 41.0.0 to 55.0.0 for chops of ordinary proportion, whilst Tls. 60.0.0 to 63.0.0 has been paid for fine lines only; country Teas have been coming down freely and have found buyers to a moderate extent at Tls. 35.0.0 to 47.0.0 proportion. Shanghai packed have been settled at Tls. 34.5.0 to 35.5.0. We quote a decline of two to three taels, making a reduction of six to seven taels per picul from the highest prices paid for Pingsueys, and three to four taels for country Teas.

FOOCHOW.—Congous had been steadily dealt in, the daily average of settlements being about 3,000 chests. Teamen had been ready sellers, and prices for broken and ordinary kinds had ruled somewhat easier. About 3,200 half-chests of Ooloongs had been bought, but the market was not yet considered as opened.

AMOY.—The Ooloong market was quiet, but prices had not noticeably declined. About 10,000 half-chests had been settled since the 12th Aug., making the total settlements to date 136,005 half-chests, and leaving a stock of 7,100 half-chests on offer. The steamship Cyphrenes sailed for New York on the 25th Aug., leaving the Aurora Australis and the Tamberlane on the berth. The American barque Pearl was expected to load for the same destination.

CANTON.—The market had been very quiet, and but small settlements had been made. No change had taken place in prices, but it was hoped that the present quietness would lead to a reasonable range of rates for the fourth crop Teas when they are placed on offer.

SILK.

SHANGHAI.—Messrs. C. J. Skeog's and Co.'s Circular says:—Our market has been fairly active throughout the fortnight, and prices for the French mail were a little easier, but most of the needy sellers having cleared off a large portion of their stocks, dealers again became firmer, and we are now much in the same position as when our last circular was published. One noticeable feature is the large quantity of common Tsatlee and Yellow Silk that has found buyers mostly at extreme quotations. Re-reels have been in fair demand for America and for some few choice parcels Tls. 620 to 640 has been paid.

CANTON.—The market was weak for all descriptions of Silks. For shipment to Europe there had been a fair business doing in Tsatlee Reels at reduced rates, but for America hardly any animation was shown, better Silks and lower prices being evidently expected upon arrival of the fourth crop in bulk. Purchasers were also anxious to hear the news concerning the opening of the New York market. About 300 bales of the fourth crop Silks had come on the market, chiefly Kowkong and Kotongou: they showed a slight improvement on previous crops, but later on were expected to be still better. Stock was estimated at 700 bales Tsatlee Reels, 100 bales Loongkong, and also a good many boxes of Rereels.

THE total of the shipments of Silk by the present mail steamer amounts to 2,860 bales.

ARRIVALS.

At SHANGHAI.—From London, Aug. 15, Belted Will, Paragon; from New York, 21, Golden State; from London, Oct. 9, Glengairn, Oriano. Previous to Oct. 12, Banledi, Hong Kong (str.).

At HONG KONG and CANTON.—From London, Aug. 26, Glenroy; from Liverpool, 22, Ajax; from Cardiff, 28, Empress; 29, Laura and Gertrude; from Shields, 29, Louisa; from Hamburg, Dorothea; from Callao, 23, Isabel; from London, Oct. 7, Gordon Castle, Carricks; from Liverpool, 8, Hector (str.). Previous to Oct. 12, Patroclus.

At MANILA—None.

At SINGAPORE.—From London, Sept. 2, Hope; from Liverpool, 5, Petersburg (str.); from Shields, Aug. 25, Sibeira; from Sunderland, 26, Cutwater; from Cardiff, 28, Queen of the Seas.

At PENANG.—From Liverpool, Aug. 26, Priam (str.).

At BATAVIA.—From London, Aug. 22, Annie Maria; from Sunderland, 17, Albert Edward; from Liverpool, Cornelis, Smit; from Newcastle, 22, Jeddo.

DEPARTURES.

From SHANGHAI.—For London, Aug. 21, Leicester; for Odessa, via Foochow, Russia (str.); for New York, 11, Cyphrenese (str.); 17, Kaisow.

From FOOCHOW.—For New York, Aug. 18, Cyphrenese (str.).

From HONG KONG and CANTON.—For London, Aug. 29, Veronica; for New York, 27, St. Paul, cleared; for London, 30, Burdwan, William Ritson; previous to Oct. 12 Odessa.

From MANILA.—For Liverpool, Aug. 17, Pepita; for Channel, 19, Adolfo; 6, Gem; for New York, 13, Springfield; 22, Golden Fleece; for Boston, 9, Pegasus.

From SINGAPORE.—For London, Aug. 26, Star of the South, Sirius (str.); 28, Deucalion; for Havre, 26, Penseur; for Boston, Chieftain; for New York, Sept. 3, Cpyhrenese (str.).

From PENANG.—For London, Aug. 30, Deucalion (str.).

FREIGHTS AND CHARTERS.

At YOKOHAMA.—None.

At SHANGHAI.—To London, steamers, £3 10s.; sailing ships, £3; to New York, £4 10s. and £3.

At FOOCHOW.—To London, per steamer, £3 10s. to £4 per ton of 40 feet; sailing vessels, £3 to £3 10s. per 50 feet.

At HONG KONG and CANTON.—To London, £3 per ton of 50 cubic feet.

At MANILA.—The only charter on the spot is the North East, for New York, at $9½ gold sugar, and $10½ hemp.

At SINGAPORE.—To London' £2 dead weight, £3 10s. light freight, per steamer, £4 10s. measurement; to New York, £3 to £3 5s. dead weight, £3 15s. light cargo.

At SINGAPORE.—None.

VESSELS LOADING.

At YOKOHAMA.—For London, Yeddo, Audax.

At SHANGHAI.—For London, Thyatira, Ajax (str.), Hopewell, Langstone.

At FOOCHOW.—For London, Duna (str.), Zenobia, Essex, Everest; for New York, Guinevere, Endymion.

At HONG KONG and CANTON.—For London, Norman Court (full), Sir Harry Parkes, Orchis (str.).

At AMOY.—For New York, Aurora Australis, Tamerlane.

At MANILA.—For London, Victoria, Itasca; for Liverpool, T. G. Lemon, Burmah; for Channel, Sedmi Dubrovaki, Fairy, Leanatin, Giovan, Sumatra, Jupiter, Ellen Browse, Mary Edy, Hermon; for

SHIPPING POSTSCRIPT.

—o—

Arrivals not in the Tables.—Oct. 10, at Dartmouth, from Bassein, Suomi; at London, from Bassein, Ravenscraig; from Foochow, Duke of Abercorn; 11, off Deal, from China, Thermopylæ; 12, at London, from Colombo, &c., Maxima; 14, from Foochow (via S.C.), Glendarroch (str.); from Rangoon (via S.C.), Berwick (str.); off Deal, from China (via S.C.), Deucalion (str.).

Departures.—Sept. 1, from Buenos Ayres, for Batavia, Thomas Fletcher; from Cardiff, for Singapore, Marelina; 5, from Penarth, for Galle, Mariquita; 10, from Greenock, for Galle, Isabella Kerr; 8, from Hamburg, for Cheefoo, Penguin; 10, from Shiels, for Singapore, Malenny.

Steamers Passed the Suez Canal.—Lord of the Isles, from London, for Singapore, China, &c.

Laid On.—At London, for Colombo, &c. (via S.C.), Xantho (str.); at Glasgow, for Penang, Singapore, Hong Kong, and Shanghai (via S.C.), Glenlyon (str.).

Casualty.—According to intelligence received at Rotterdam Oct. 8, from the master (Trappen) of the Java Packet, from Batavia to Amsterdam, dated St. Helena, Sept. 8, the vessel experienced severe gales, 11th to 14th August, off the Cape of Good Hope, during which she was thrown on her side and shipped much water, and some sugar was pumped up from the cargo; she had, however, received no damage, and proceeded for her destination Sept. 9.; The John Lidgett, Polson, which arrived at New York Sept. 29, from Manila, reports having experienced a hurricane from S.E. to N.W., on the 15th, during which she lost lower maintopsail.

BIRTHS, MARRIAGES, AND DEATHS.

—o—

BIRTHS.

Adamson—On the 10th Oct., at Rushton-park, Mountfield, Sussex, the wife of W. R. Adamson, of a daughter.

Addyman—On the 19th Aug., at Hong Kong, the wife of Mr. R. F. Addyman, of a son, prematurely.

Duffus—On the 18th Aug., at Swatow, the wife of the Rev. William Duffus, English Presbyterian Mission, of a son.

Elles—On the 8th Oct., at Wimbledon, the wife of Jamieson Elles, of a daughter.

Hyem—On the 25th Aug., at Hong Kong, the wife of S. Hyem, of a son.

Robertson—On the 30th Aug., at Singapore, Mrs. Robertson, of a son, stillborn.

MARRIAGES.

Evans—Velge.—On the 6th Aug., at Malacca, by the Rev. G. F. Hose, M.A., George E. Evans, Superintendent of Police, Province Wellesley, to Louisa, eldest daughter of G. L. Velge.

Gunn—Anthony.—On the 20th Aug., at Penang, by the Rev. Julian Moreton, Alexander James Gunn, Manager Chartered Mercantile Bank, to Mary, daughter of A. A. Anthony, Clove Hall.

Newitt—Rickomartz.—On the 21st Aug., at Hong Kong, by the Rev. J. Piper, William Thomas Newitt, of the China Submarine Telegraph Company, to Louisa Jane Rickomartz, of the Diocesan Home.

DEATHS.

Addyman—On the 30th Aug., at Hong Kong, the wife of R. F. Addyman, aged 36.

Pechil—On the 17th Aug., at Deli, Sumatra, Elizabeth Jane, wife of Mr. Jul. Pechill, aged 36 years.

Upton—On the 5th Oct., at Dover, very suddenly, Robert Brotherson Upton, of Messrs. Upton, Johnson, and Co., Austinfriars.

Von Stockhausen—On the 18th Aug., at Hong Kong, the infant son of Mr. and Mrs. Von Stockhausen.

Young—On the 11th Oct., at Gloucester-terrace, Palace-gate, Annie Webb, the beloved wife of Vans Christie Young, and daughter of the late George Woodhouse, Esq., C.E.

BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month of September again present extraordinary totals. The total declared value of our exportations has been £23,148,026, showing an advance of nearly 17 per cent. over the corresponding month of 1871, and of more than 35 per cent. over that of 1870. The article of which the shipments show the greatest money augmentation is coal, the declared value of the quantity exported having been nearly 60 per cent. in excess of that exported in September last year, although the total weight shipped was 4 per cent. less, the amount having been 1,208,405 tons, against 1,253,912 tons in September, 1871. As regards cotton goods, yarn figures for an increase of 15 per cent. in value and 20 per cent. in quantity, while in manufactured articles the increase has been 6 per cent. in value and ¼ per cent. in quantity. The other principal instances of increase are iron and steel, 50 per cent. in value; linen goods, 17 per cent.; hardware, 16 per cent.; earthenware, 14 per cent.; haberdashery, 9 per cent.; woollen goods, 9 per cent.; and miscellaneous, 30 per cent. The total value of our shipments for the nine months ended the 30th of September has been £190,314,662, showing an increase of 15 per cent. over the corresponding period of 1871, and of 28 per cent. over the corresponding period of 1870. As regards the importations of the month, it appears that they comprised 4,237,694 cwts. of wheat, valued at £2,687,213, against 3,842,084 cwts., valued at £2,211,071, in the corresponding month of last year, while the value of the other grain taken was £1,618,087, against £1,521,311. Of cotton the arrivals were 485,458 cwts, valued at £1,742,765, against 489,476 cwts., valued at £1,829,590, in the corresponding month of last year.

The following is an extract from these returns of the figures which refer to our Export trade with China and the Far East:—

Oriental Bank Corporation, Threadneedle-street, C. J. F. Stuart, chief manager.

*** *Companies omitted in the above list will be included if the particulars are forwarded.*

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

An extraordinary general meeting of this bank was held on the 9th inst., at the London Tavern; Mr. Andrew Cassels in the chair, to confirm the election of Mr. F. W. Heilgers as a director, in the place of Mr. James Fraser (deceased), and for the election of Mr. William Paterson as director. The notice convening the meeting was read by Mr. Mullins, the secretary.

The Chairman said the directors were glad of this opportunity to render an account of their stewardship, and to state the exact position of the bank. Very exaggerated rumours had lately been in circulation to the bank's disadvantage, as shown by the fall in the market value of the shares on the announcement of the failure of the Messrs. Gledstanes. During a period of some eight or ten days their £20 shares were quoted 13½ to 14½; this fall represented a depreciation in the value of their joint property of about £120,000, whereas the probable claim of the bank on Messrs. Gledstanes was about £28,000. The directors therefore took the earliest means of making the shareholders aware of the true position of the bank. The result of the bank's operations during the six months ended June 30 last he trusted would be satisfactory, as they represented a return of about 11 per cent. per annum on the capital of the bank. The directors were indulging in the hope that they would be justified in paying a small interim dividend when the news of the Messrs. Gledstanes' failure was suddenly announced, which compelled them to give up that pleasure. He thought that very rarely had a commercial failure of equal magnitude taken the world more by surprise; their acceptances were taken freely in the discount market up to the very eve of their suspension, and no whispers to their disadvantage were in circulation. It was only fair to the bank's agents abroad to state that when the bills the bank holds were taken it was known that the drawers of those bills were making shipments of produce to Messrs. Gledstanes; therefore these bills could not be called "kites," or accommodation paper. He drew attention to this circumstance that the shareholders might not think the directors were asleep at their posts. That failure had caused the directors a great deal of mortification, but the circular which had been sent out showed to what extent the bank was likely to suffer.

He took this opportunity of saying that the failure of the Messrs. Gledstanes was one of the most disgraceful that had ever occurred—the firm appeared to have been insolvent for a few years back—two of the partners occupied seats at the boards of two of the greatest banks in the world up to the very eve of their suspension. They were unfaithful to the trust placed in them by their correspondents in the East, and also to their friends at home. He did not like to hit a man when he was down, but he must say, in the interests of trade, that those insolvents deserved little consideration or leniency. He also said (and said it with shame) that such discreditable failures occurred rarely on the Continent; he did not mean to infer that the tone of commercial morality was worse here than abroad, but it was due to our mercantile legislation, and he should be only too glad to see the *Code Napoleon* in force in this country in all matters pertaining to trade. It seemed to him that the law here protected the debtor, and cared nought for the creditor. He hoped he had said enough to show that the fall in the shares was quite unwarranted. (Cheers). To expect an Indian Bank, having several agencies, and doing an extensive business in the East, to conduct their business without loss was to expect an impossibility, for neither the directors at home nor the agents abroad could procure information that could be implicitly relied upon, nor was it possible by any amount of watchfulness to guard against political disturbances. The shareholders had, however, a right to expect the directors to pay such attention to the bank's affairs and business as to prevent the failure of any one single firm proving a serious loss to the bank; and it was because the directors had faithfully executed their task that they met the shareholders face to face, and asked for their cordial co-operation. One of their ablest officers was now inspecting the different branches in the East, and guided by the valuable information provided by that officer, the directors were endeavouring to strengthen each branch in turn, and were doing all they could to place the business on a sound basis. (Cheers). The opening of the Suez Canal had so altered the course of trade that the long credit which had hitherto been given by means of six months' bills appeared to the directors to be no longer necessary or safe as regards canal shipments; and some time ago the directors instructed their several agents to restrict as much as possible their purchases of document bills against canal shipments to paper drawn at three months' sight. He should be very glad if their neighbours would adopt the same practice. He then formally moved the confirmation of the election of Mr. F. W. Heilgers as director, in the place of Mr. James Fraser, deceased.

The resolution was seconded by Mr. William Macnaughtan, and carried unanimously.

On the motion of the Chairman, seconded by Mr. John Jones, Mr. W. Paterson was declared a director.

On the motion of Mr. Bett, seconded by Mr. Mann, a vote of thanks was then passed to the chairman, directors, manager, and officers, and the meeting broke up.

LITERATURE.

The Foreigner in Far Cathay. By W. H. Medhurst, H.M.'s Consul, Shanghai. London: Ed. Stanford, Charing Cross.

Some months since we had the pleasure of reporting a lecture delivered by Mr. Medhurst on the position of the foreigner in China and the habits and customs of the Chinese. Mr. Medhurst has now put into a book form, under the above title, what he then said, with such additions as suffice to make up a very neat octavo volume. A map is appended, drawn specially to show at a glance the eighteen provinces of China and the coast line.

The author has a felicitous style of telling his experiences and his inner thoughts. It is at once bold and convincing, and at the same time easy and affable. With the aid of the nice clear type the reader can travel over the pages and take in the ideas in a manner that is interesting and pleasant. It is not a dry book, as most books on China are almost necessarily. There is not an intelligent reader in Europe who will not be edified and amused by a perusal of this little book. We do trust that it will be largely read, and China, with its peculiar mixture of foreign communities, will then be better understood. The general ignorance which the author found to prevail here was no doubt the incentive to write it. The first chapter truly describes the mistakes we have made in our various warlike engagements with the Government of China. Our representatives have all failed to secure the necessary guarantees against the recurrence of such. And not only so, but failing to obtain, or even demand, the vital points indispensable to our amicable relations, to wit, after all our wars, we are now entangled with the "Audience Question," which should have been obtained in the Treaty of Tientsin. Our first minister to Peking should have been installed there with the right of presentation to the Emperor.

Ocean Highways. Edited by Clements Markham, C.B., Secretary of the Royal Geographical Society. London: Philip and Son, 32, Fleet-street.—The October number of this magazine contains a very interesting account regarding Java and the Netherlands India Steam Company, the Mahomedan Rebellion in China, and Papers of Geographical Research, written by competent persons. The magazine bids fair to be one of the most useful mediums for geography and travel, forming a monthly record of all matters of interest in that field.

NAVAL AND MILITARY.

THE CHINA STATION.

By the last advices the Salamis, 2, despatch vessel, Lieutenant S. S. Smith, was conveying Her Majesty's *Chargé d'Affaires* from Hakodadé to Nigata, after which she was to join the Admiral at Nagasaki. The Ringdove, 3, gun-vessel, Commander T. M. Maquay, was under orders to leave Shanghai on the 27th for Hong Kong to pay off and re-commission with a new crew now on passage in the Thalia. The Elk, 4, gun-vessel, Commander N. Osborn, had been ordered to Swatow and Amoy. The Dwarf, 4, gun-vessel, Commander C. F. Walker, was at Foochow expecting orders for Shanghai. The Thistle, 4, gun-vessel, Commander H. V. Leet, was at Hankow. The Curlew, 3, gun-vessel, Commander D. Boyle, arrived at Shanghai on the 14th of August, to protect British interests. The Leven, 3, gun-vessel Lieutenant A. H. Whish, was at Chinkiang. The Midge, 4, Commander C. S. Rising, at Tientsin, under orders for Hong Kong. The Zebra, 7, sloop, and the Hornet, 4, gun-vessel, Commander N. Osborn, were in the Straits of Malacca. The Nassau, 4, surveying vessel, Commander William Chimmo, was, by last accounts, in the Sulu Sea; and the Sylvia, 5, surveying vessel, Commander A. C. St. John, at Japan, the latter under orders for Hong Kong and England.

A change is to be made shortly in the garrisons of the Straits Settlements and Hong Kong. The battalion of the 80th Foot, now serving at Singapore, will be moved to Hong Kong, and the 1st battalion of the 10th Foot, now stationed at Hong Kong, will take the place of the 80th at Singapore. Pending these changes both regiments are to be raised to their proper strength, with which object tenders have been invited for the conveyance from Queenstown to Singapore of drafts from the head-quarters of both regiments, comprising in all seven officers, 397 non-commissioned officers and men, nineteen women, and

Digitized by Google

thirty children, together with a few men of the Royal Artillery, who will proceed before the close of the present month.

The following naval officers appointed to vessels on the China station have proceeded in the Thalia. Appointed to the Midge: Comdr. J. T. G. Grant; Lieut. Alex. Cochran; Sub-Lieut. Abraham H. Lindesay. Appointed to the Ringdove: Commander T. M. Maquay (reappointed); Lieutenant Wentworth V. Bayly; Sub Lieutenants Robert B. Maconochie and H. C. Kenyon-Slaney. Appointed to the Iron Duke, for disposal on arrival at the station: Lieutenants Frederick A. Blackett, Frederick H. Johnstone, Charles J. Norcock, and Reginald O. C. Brenton; Sub-Lieutenants Philip E. Cresswell, James S. Muggeridge, Charles S. Nicholson, and John C. P. Walcot; Midshipmen Leicester F. G. Tipping, Herbert B. Dillon, J. G. Duberley, and Percy C. Raitt.

General Sir Patrick Montgomerie, K.C.B., died last week at his residence at Kensington, at the age of seventy-nine. He was the son of a banker at Irvine, in Ayrshire, where he was born in the year 1793, was educated at the Ayr Academy, and afterwards at Woolwich, and entered the Madras Artillery in 1810. He served as lieutenant in the Mahratta War of 1817 and 1818, was present at the battle of Nagpoor and the siege and storming of Chandap, and also as captain in the Burmese War of 1824-25. In the China War of 1840-41 he was in command of the artillery throughout the expedition of 1840-42, including the first capture of Chusan; operations in the Canton river in 1851; repulse of the night attack on Ningpo; capture of Tsekee, Segoan, Chapoo, Woosung, and Shanghai (when he commanded a column of attack); assault and capture of Chin Kiang Foo; a demonstration before Nanking in 1842; and was wounded in the sortie from Ningpo by a matchlock ball on the 10th of March the same year. He was rewarded for his services in China by being nominated an aide-de-camp to the Queen.

Notice is given that the distribution of the amount awarded for salvage services rendered to the schooner Kim Ho Him by Her Majesty's ship Ocean on the 26th of Dec., 1871, will commence on the 15th inst., in the prize branch of the department of the Accountant-General of the Navy, Admiralty, Somerset House. The following are the shares due to an individual in the several classes:—Captain, £10 2s. 5d.; commander, £5 1s. 3d.; second class, £1 2s. 9d.; third class, 19s. 6d.; fourth class, 13s. 1d.; fifth class, 7s. 10d.; sixth class, 6s. 8d.; seventh class, 4s. 7d.; eighth class, 2s. 7d.; ninth class, 1s. 3d.; tenth class, 7d.

It has been stated in the daily newspapers that a detachment of Royal Engineers have been ordered to China. This statement is an error; only two men of the corps will be despatched to the station.

At the fortnightly meeting of the Junior Naval Professional Association, in Portsmouth Dockyard, on Friday last, a paper on "Deep Sea Sounding" was read by Commander Anson, R.N., one of the honorary members. In the course of his paper he stated that bottom had, by the officers of H.M.S. Serpent, been brought up from a depth of 2,700 fathoms. He did not believe there was a greater depth than 3,500 fathoms, and that when line of a greater length had been paid out without success, it had been in consequence of defective soundings. In describing the various contrivances for sounding, he incidentally remarked that lines supplied to surveying vessels for deep sea sounding were generally tested, marked, stretched, and reeled up by the dockyard authorities. But if this should have to be done in yards abroad, great care should be taken, when large quantities of line were on the stretch, that it was preserved from damp or wet. Any neglect in this important particular would probably pull the house or shed down, if the stanchions to which the line was attached did not break, by the mechanical force produced by the shrinkage. This actually very nearly occurred at Hong Kong, the massive pillars supporting a shed being drawn out nearly a foot at their lower ends. At the close of the paper, a discussion ensued, in which Commanders Maclear (of the Challenger), Roche, and Jones took part.

The plan of purchasing the horses for the transport of the Army at the Autumn Manœuvres has not only been attended with increased efficiency, but will result in a considerable saving of money as compared with the contract system. Last year the Government paid £2 10s. a day for the hire of a man, pair of horses, and a van, which must have resulted in a considerable profit to the contractors, but very little advantage to the troops. This year more than 2,000 horses were purchased by the Control Department at the regulation price of £38 a head, and although the animals suffered considerably from the wear and tear of the campaign, the front batch was re-sold by public auction on Monday at an average price of £35, the highest sum realised for any horse being £55 15s. The best were selected to replace others of inferior quality in the Army Service Corps, and a few have been taken at £40 by the Metropolitan Police. The circumstances that the horses should have realised such a high value so soon after the hard work of the manœuvres, and that they should have cost the country little more than their keep while they were employed, is a subject of satisfaction in the Control Department, and great credit is accorded to the judgment of Colonel Sherwinton, by whom they were all purchased.

A circular has been issued from the War-office, stating that a non-commissioned officer granted a commission (except as riding master or quartermaster of a regiment of cavalry) will be allowed £100 in aid of his outfit, and if subsequently appointed lieutenant of a horse brigade of the Royal Artillery, or of a regiment of cavalry, will be allowed a further sum of £50. A non-commissioned officer granted a commission as riding master or quartermaster of a cavalry regiment will be allowed £150 in aid of his outfit. A schoolmaster promoted to be sub-inspector of army schools will be allowed £100 in aid of his outfit. These allowances may be issued without previous reference to the War office, and charged in the accounts in which the first charge for the officer's pay appears, vouched by proof of payment and a certificate that the officer has provided himself with the necessary outfit and paid for the same. The certificate in the case of regimental officers will be signed by the officer commanding the regiment or corps, and in the case of sub-inspectors of army schools by the Director-General of Military Education.

The Frolic, double-screw composite gun-vessel of four guns, 592 (462) tons, 600 (100) horse power, recently built at Chatham dockyard, having had a most successful trial of her engines at the measured mile off Maplin Sands, has returned to Chatham. Several runs were made at the trial, and the average speed was 10-67 knots per hour—or rather more than a knot per hour beyond the speed attained by the Kestrel, sister-ship to the Frolic. The engines for both vessels were made by Messrs. Penn and Son, of Greenwich. The Kestrel and the Frolic are now having their fittings completed preparatory to their being commissioned.

The King of Denmark has conferred the Order and Decoration of Knight of the Dannebrog upon Captain Harvey, R.N., the inventor of the torpedo bearing his name, as a mark of his Majesty's appreciation of the invention.

THE "TIJERBAN KOTIE" FOR SINGAPORE.—CHARGE AGAINST THE CAPTAIN.

At the Waterford Police-court charges of a very serious nature have been preferred against Capt. Dunn, master of the steamship *Tijerban Kotie*, who was summoned by ten of the crew under the following circumstances:—They shipped on board the *Tijerban Kotie* at Glasgow for a voyage to Singapore; after going on board and proceeding to sea they had no sleeping accommodation, and, the deck not being properly caulked, the sea they shipped came down on them and drenched their hammocks to such an extent that they were unable to lie in them. The cook alleged that for three days and three nights he had to lie in the galley. The crew murmured against this treatment, and the result was that the vessel put into Passage. The statement of the ten men was that the captain gave the cook orders on the 1st inst. not to give the crew any more meat, and from that time until they put in an appearance in court on the 3rd they had not tasted food. The magistrates held that the crew had been subjected to dreadful treatment, and, in order to test the accuracy of the statement of the crew as to the leakage of the vessel, they ordered a survey. They also ordered the master to instantly take the crew to an eating-house and provide breakfast for them. Mr. Charles James Davies, mate of the same vessel, preferred a separate charge against Captain Dunn. He shipped as first mate for the voyage, but on going to sea Captain Dunn said that the owner was on board and would act as master, that he (Captain Dunn) was going to act as mate, and that Davis would have to act as boatswain. He was prevented from messing in the cabin, his apartments were taken from him, and he was obliged to make his bed on the coals in the hold. The magistrates held that such treatment was outrageous to the second officer of a ship, and at Davis's request cancelled his articles of agreement, and gave him a decree for £5 10s., which was one month's salary.

Something like a Wife.—The following advertisement appears in the *Standard*. When the female suffrage is established what can we then expect? An enormous increase in consumption at least. "A lady whose husband is in the China trade will send ¼ lb. samples of finest Congous at 1s. 6d. and 1s. per lb.; free for twelve stamps.—Mrs. J. D., Clifton-house, Linslade, Bucks."

The *Duke of Abercorn*, from Foochow 17th June, arrived and docked on 10th. The *Thermopylæ*, from Shanghai 18th June, docked on the 11th inst. The *Cutty Sark* is not yet reported.

The *Investigator*, cable repairing ship, left Singapore on the 7th for Sandalwood Island, and we may hear any day of the repair of the Java and Australian cable.

Foreign Intelligence.

—o—

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Oct. 9.

In my last letter I gave you the outlines of some important documents which have been laid before the members of Parliament with reference to the East India Budget, and by which the total of the expenditure will be increased. Of course these proposals have caused a storm of indignation among the Conservative newspapers; to spend the money, the produce of the much-praised squeezing system on behalf of the people from whom it is obtained is something so exorbitant, so characteristic of a Liberal Cabinet, that they write columns and columns in order to demonstrate that both Holland and Java must be ruined if the Conservatives do not soon take office. I need not add that they will do all they can to oppose the Ministerial propositions—but they have but a poor chance of success. The members are still very busy in the sections, but to-day the debate upon the East India Budget will be opened. Last Monday the Chamber carried, after a very short discussion, the Bill granting a dotation to the daughters of the late Mr. Thorbecke, in remembrance of "the excellent services rendered to the State during a number of years." Several Conservatives opposed the measure; to acknowledge that Mr. Thorbecke was an eminent man was something too much for them. But only four members, Messrs. Wintgens, Kien, Taels van Amerongen, and Nierstrasz, had the courage to vote against the Bill, many other Conservatives leaving the Chamber before the debate was concluded, and a still larger number voting with the Ayes. The Bill was carried by a majority of 52. In the same sitting another important resolution was carried. You will remember all that happened with regard to Mr. van Angelbeek, the East India functionary who fought so long for his rights. A Parliamentary commission has now proposed that the well-known decree of the 28th May, 1863, shall be altered, and that the affairs of this gentleman shall be arranged by the Government. Mr. Gratama endeavoured to induce the Chamber to reject this proposal, but in vain, his motion being rejected by 31 against 24 votes. The debate upon the Tariff will probably last several days, it being a matter about which every member has something to say. The members of the Society for Promoting the Welfare of the

Digitized by Google

Javanese have forwarded to the Chamber an address in which they protest against the maintenance of the export duties, request that the import duties should be reduced to 6 per cent., and that differential duties should be abolished. These requests are already partly fulfilled. The Minister had altered the original Bill, so that several articles, amongst them woollen, linen, and cotton manufactures, will be only charged with an import duty of 6, instead of 10 per cent. The Minister further proposes to omit the stipulations referring to the import of spirits, which appear in the Bill, because a duty on spirits will be levied in Java in a few months; and that the tariff shall come into force on the 1st of Jan., 1874.

I sincerely regret that the subscription for the shares of the Dutch East India Dry Dock Company has not been satisfactory, the public having only applied for 244 shares and 252 "Obligations." A meeting is to be held at Amsterdam to induce shipowners, traders and capitalists to support this undertaking, which will not only do enormous good for Java, but which offers excellent security for the capital subscribed. It is strange, but nevertheless true, that money can always be found for possible and impossible American railway schemes, while national undertakings are looked upon with absolute indifference. Rumours are in circulation that the mismanagement of the Steam-ship Company Nederland, by which a good deal of money has been lost, has exercised an unfavourable influence upon this undertaking. Others say that the time of its introduction was inopportune, because money has of late become scarcer and dearer. On the Bourse less activity prevails than existed some days ago, but values cannot be said to exhibit any symptoms of depression, and the slight advance recently established in quotations is in almost all cases sustained.

Mr. Heemskerk, as I have already mentioned, has been appointed member of the Council of State, so that a seat has become vacant in Second Chamber. Several candidates are already named, and amongst them are Mr. Myer (the ex Governor-General of Java), Messrs. Bordes, Van Heukelom, Jolles, and others.

In a former letter I stated that the rumour that Prins i would visit the East deserves but little credit. There is now a ew paper report that Prince Henry will take a trip in one of the steamers of the Nederland Company, but that he will only proceed as far as the Suez Canal, and return overland.

I hear that our eminent *peintre* artist, Mr. Alma Tadema, is seeking letters of naturalisation as an Englishman, having resolved to reside for the future in that country.

During the last three months fifty-two vessels arrived in Holland from Java, and twenty-four sailed for that country. The statistical returns of our trade and shipping for 1871 have been published, and in my next letter I will send you a summary of the figures, which would be more useful if they were published earlier.

PRODUCE MARKETS.

A firm tone has characterised the market for most of the leading articles of colonial and foreign produce, and transactions in some of them, especially in Sugar, would have been of greater importance but for the reservedness of holders, who keep backward in anticipation of a further advance, in consequence of the deficient yield of the beet-root crop all over Europe. A better feeling has again prevailed for Coffee, and prices are tending upward. Cotton has further improved, and Tin has partly recovered from the decline established at the late autumn sale of the Trading Company, the result of which is recorded under the head of the article. The sales by secret tender of Java Tobacco which took place last week attracted such a competition of buyers that most extravagant prices have been realised for some of the parcels put up.

Coffee has been in better demand, and prices have advanced ½c. Good ordinary Java, of the Trading Company's imports, is not to be met with under 45½c. Sales have been closed by private treaty as follows:—2,070 bags Java, ex Argo; 400 bales do., ex Cornelis Wernard Eduard, at 46½c.; 620 bales do., ex Robertus Hedrikus, at 46½c.: 113 bales do., ex Stad Dockhum, at 43⅜c.; 400 bales do., ex Padang Packet, at 47c. The Trading Company's October sale has not yet been advertised, from which it may be inferred that the same will not take place until the 23rd inst.

Sugar.—No alteration has occurred in the position of the article, which continues to exhibit a firm appearance. Nothing is being offered from first hands, but some transactions have taken place from second hands at about the parity of the late July sale.

Tea.—Public sales are announced to take place on the 25th inst. of the following quantities of China and Java, viz., 266/12 chests China Congou, 231/4 chests Souchong, and 117/4 chests Pekoe, crop 1872-73, direct importation from Foo-chow-Foo, per steamer Cheops; 273/4 chests and 128/12 chests China Congou, and 116/4 chests Pekoe, marked Allendale. In addition, there will be offered 4,523/4, 22/8, and 61/12 chests Java.

Spices.—There is no change in the feature of the different articles under this head since the late public sale of the Trading Company. 213 bags Black Pepper, ex Bali, were sold at secret prices, besides 7 boxes Java Cinnamon, at 85c.; 269 do., at 50c. to 58c.; and 93 bags do., at 31c. to 48c.

Tobacco (Java).—About 12,000 bales have been offered, and sold by secret tender, mostly at very high prices.

Rice.—Without any sales to report from first hands, but prices remain unaltered.

Rattans are firmer. A shipment of 159 piculs, ex 'sGravenhage, changed hands on secret terms. The Trading Company's autumn sale has been advertised, to be held at Amsterdam on the 30th inst., and to comprise 49,400 bundles, stored there and here, after which sale no further quantities of this article will be brought forward for sale for account of the Company until next spring.

Cocoa-nut Oil remains inactive, the demand being confined to the requirements for small consumptive demands.

Tin.—The whole of the 46,512 slabs Banca and 2,831 Billiton put up for sale by public auction for account of the Trading Company has found buyers, the Banca at f.92 to f.92½, the Billiton at f.89 to f.89½. Since the public sale f.92½ to f.93 has been paid for Banca on public sales prompt, and f.90½ for Billiton, whilst contracts for delivery, ex the spring sale of 1873, have been concluded of Banca at f.88 to f.88½.

Hides.—A public sale is held here to day of 1,023 Singapore Cows, 6,286 Calcutta Kips, 538 Java Cows, and 3,200 Calcutta Kips, in anticipation of which no business has been doing since my last.

Indigo. (Java). A couple of small parcels of old importation have been disposed of.

Preserved Ginger.—A parcel of brand Chyloong 129 chests is advertised for sale by public auction on the 10th inst.

Cotton.—An animated tone prevailed, and American afloat, which is offered but sparingly, is in particular sought after.

Arrack.—10 casks Batavia, ex Prins van Orange, were sold, besides 27 casks Alcohol, ex Hoek van Holland.

SHIPPING.

Arrivals.—Oct. 1, at Brouwershaven, from Rangoon, Peppino Mignano; 2, at Texel, from Rangoon, Deucalion; 8, at Texel, from Batavia, Prins Hendrik (str.).

Departures.—Oct. 4, from Brouwershaven for Sourabaya, Marie; from Hellevoet, for Batavia, Cornelis Wernard Eduard; 5, from Brouwershaven, for Padang, Julia; from Hellevoet, for Banda, Niphon; from Texel, Prins van Oranje (str.); for Akyab, California; from Texel, for Rangoon, Chiara; 6, from Texel, for Singapore, Rance; from Flushing, for Akyab, Michels Loos.

Passengers Inward.—From Java, per Kosmopoliet I.: Messrs. van Kervel and family, Kasten and family, Steenhuisen, Rutgers; per Kennemerland: Messrs. A. J. Immink, L. J. Godefroi and family, R. F. van Rhyn, H. van Krieken, J. J. Spiekermann van Weezelenburg and family, E. Engelbrecht; per steamer Prins Hendrik: Mrs. Admiraal and family, Messrs. Van Casteren, Van Cattenburgh, Mrs. Deltour and family, Mrs. Gorter, Mrs. v. Ganswyk, Mrs. Ruderman, Mr. Bouma and family, Mr. and Mrs. Van Ossenbrugge, Messrs. Hamakers, Helderman, Hogel and family, Knieper and family, Meyer and family, Catsonides, Mulder, Roskes and family, Winter (3), Oelrichs and family, Ten Voorden and family, Klein, and Loman.

Passengers Outward.—For Java, per steamer Prins van Oranje: Messrs W. H. van de Pol and family, P. Kok Ankersmit, J. A. Kruyt, D. G. E. Wolterbeek Muller, H. P. Konig, D. C. Visser, W. F. van Ryckevorsel and family, J. van Rykevorsel and family, H. F. van Lier, J. L. Kroeze, P. Bool, C. J. van Waesberge, W. Sheepmaker, J. A. Zimmer, H. E. Steinmetz C. Scheepmaker, A. Rappard, C. H. W. Beers, J. Menkes, J. Hamaker, H. J. Bonk, A. H. Hoedt, B. J. Mensing, J. Knebel, D. Meyer, K. Oosterweghel, J. M. Verstege, A. Stuur, H. von Holtschue, Mrs. Enthoven Polak, Miss A. von Boddien and Meunier, besides one hundred soldiers. Per Cornelius Wernard Eduard: Messrs. Neumann, Groen, Masthoff, de Bruin Prinsen and family, Luchtmans and family, H. A. de Groot and family, de Bruin, Mrs. Martens, Miss de Haan, Mrs. Schey and family, Miss van den Bosch, Miss Neys, Crone, and Tak.

PORTUGAL.

(FROM OUR OWN CORRESPONDENT.)

Lisbon, Oct. 5.

A decree has been published fixing the 18th inst. for the extraordinary convocation of the Upper House of the Cortes, in conformity with the Law of 1849, which determines the cases in which it can be assembled. This law enacts that the House may be constituted as a Court of Justice with judicial functions; and the present object is the trial of the Marquis of Anjega, for the share he is alleged to have taken in the late conspiracy against the Government. Much discussion is rife with regard to the legality of the decree. In the Council of State, which is always presided over by the King, there were seven members present, of whom four voted against the convocation of the Peers without the Lower House being previously assembled and deciding for or against. That the Lower House is the only power which may, in such a case, authorise the assembly of the higher House, is the principle laid down by the Duke de Loulé, a member of the Council and the President of the House of Peers, and which was adopted by other members of the Council and by the press. The Duke de Loulé is resolved not to retire from the position he has taken up, and will resign office rather than consent to the convocation.

The commander of the corvette *Dom Henrique* is to be tried before a Council of War, to answer a charge of demanding coal from and accepting the assistance of an English merchant steamer during a voyage from Lisbon to Loanda. There was a previous council held on board the corvette *Estephania*, to investigate the circumstances. The Government was involved in an expenditure of about £2,000 for coal and towage.

The strike fever has reached us. During the last fortnight many workmen of different trades have struck for an increase of wages and a diminution of the hours of labour. The proprietors of some factories have granted their demands, but others have opposed them and "locked-out" their hands. There are now about five hundred men without work who are receiving their wages from their association, which is called *Fraternidade Operaria*. Messrs. Collares and Co., proprietors of the foundry Perzeveranca, dismissed one hundred and fifty men for refusing to comply with the conditions required. The Government have taken the precaution of lending patrols of cavalry to the foundry, to guard against a threat which was made of setting fire to the establishment being carried out.

The works for the establishment of the submarine telegraph line between Portugal and Brazil are expected to commence in a short time. In the island of St. Vincent the building for the station is already commenced, and there are already some English clerks appointed.

By the close of the present year the new tramway established between Lisbon and Cintra will be completed. Two sites for the principal stations have already been appropriated, one in Lisbon, at the Salitre, and the other in Cintra, at Estephania's village. The English engineer who directs the works states that by the beginning of the new year this line will be opened to the public. The company which is constructing this line possesses two others in Cascaes and Torres Vedras. This last named has already been commenced.

JAMES WEST, PUBLISHER,
2, COWPER'S-COURT, CORNHILL, LONDON.

The London & China Telegraph.

LONDON: MONDAY, OCT. 14, 1872.

CHINA, JAPAN, AND THE KOREA.

IN commenting, some time since, on the provisions of the Treaty recently concluded between China and Japan, we pointed out the impracticable nature of Article II., by which it was agreed that, "China and Japan being friendly, either "shall, in case of experiencing injustice or wrong from an- "other State, be entitled to assistance or good offices from "the other." Since then a delay has arisen in exchanging the ratifications of the Treaty, and further negotiations have been found necessary, principally in consequence of one or both of the contracting parties being unwilling to incur the heavy responsibility implied by this article. Meanwhile, if the report recently brought from China be correct, the difficulty has been summarily disposed of by the Chinese Government, who have declared their intention of taking the field with the Koreans, should the quarrel now pending between the Japanese Government and that of Korea end in a declaration of war. This act reads like a piece of poetic justice on the Japanese for their desertion of their ancient ally in her struggle with her foreign foes. The now celebrated Korean despatch sets forth in the plainest language, as the head and front of the offence for which they hold the Japanese guilty, the fact that, although on the arrival of the French expedition on their coast they, in accordance with the terms of the ancient Treaty existing between the two countries, applied to the Japanese Government for help in their distress, neither was an answer returned nor was assistance sent. "From that day," they add, "our Treaty of friendship was at an end."

The motives which probably induced the Chinese Government to take this decided step are not far to seek. The proximity of a nation so nearly allied by tradition, but so diametrically opposed in modern practice, to themselves, cannot but be a source of annoyance and offence to the Conservative statesmen of Peking. The ready way in which the MIKADO'S advisers have thrown themselves in the arms of foreigners, have imitated their customs, and adopted their dress, must have excited their supreme contempt, and the odious comparisons which we may imagine are daily drawn by the Foreign Ministers at Peking between the obstructive bearing of the Chinese Government and the energetic encouragement of modern arts and sciences, which has marked the conduct of the rulers of Japan, must be as galling as they are telling. It is obvious also that the course of policy pursued by the MIKADO'S Government is surrounded with danger, and is one which, in the eyes of oriental statesmen, can only be justified by success. The veneer of European civilisation which has so rapidly overspead the land of the rising sun is, as yet, only of the thinnest description. In fair weather this may remain intact and even deepen, but were any sudden reverse to overtake the Government, it must infallibly collapse, unless supported from without. Such an end to the much boasted superiority of Japan would be a matter of rejoicing to her Chinese neighbours. An opportunity has now offered for bringing about this much-desired consummation, or at least, of checking the advances of the progressive party at Yedo. A comparison of the forces which the Chinese in alliance with the Koreans might bring into the field, and those which would follow the Japanese standard, leaves no room for doubt as to which side, in the event of a war, victory would ultimately incline. But the gates of the temple of JANUS have not as yet been thrown open, and it is quite possible that Japan may yet for years to come continue to vex the souls of Chinese officials by her restless energy and enterprise. The MIKADO and his advisers would do well, however, to remember that energy and enterprise may sometimes require curbing. The completeness and rapidity with which the former has discarded the lofty pretensions of his ancestors to more than human honours, and has adopted the free and easy habits of European sovereigns, must be shocking to the sensibilities of those of his subjects to whom the traditions of their country are dear. Thus to alienate the affections of a large and powerful class is no light thing, and might, were such a catastrophe as is indicated above to overtake the land, tend to intensify the misfortunes, and to complete the ruin of the now prosperous empire.

THE COOLIE SHIP *MARIA LUZ.*

THE Japanese Government have begun to justify the welcome with which their Ambassadors have been received in the United States and in Great Britain. They told us frankly that they came to study our institutions, and to adopt whatever they found valuable among them. Hitherto in their own country whatever improvements had been introduced from the English-speaking races were material, and contributed directly to their advantage. Our railways, our telegraphs, our steamers, and—last, but not least—our education, were all so much clear gain, so many helps to develop the resources of their Empire by hand and brain work. But in the case of their intervention in the affair of the slaver *Maria Luz*, we see the heart. It is impossible to over-estimate the advantage of having such a *Chargé d'Affaires* as Mr. WATSON on the spot at such a moment as that when the wretched victims of Portuguese duplicity and Peruvian cruelty, goaded to desperation by the villainy of their captors, and the tortures they had suffered, flung themselves into the waves to implore the protection of the British flag. Mr. WATSON was exactly the "right man in the right place;" and we are sure he will not think we are disposed to rob him of one scintilla of the honour which is so justly his due if we observe in passing that the opportunity was a propitious one.

The Japanese had long known England to be *par excellence* the "land of liberty." They knew that we neither permitted slavery ourselves nor tolerated it in other countries, and their Ambassadors had seen for themselves that respect for the liberty of the meanest subject in HER MAJESTY'S remotest dependencies had brought about a spirit of loyalty and peace unknown under harsher Governments in former times. On the other hand, their Ambassadors had lately seen in America a great nation recovering with super-human strides the position which nothing had ever placed in jeopardy except what CHARLES DICKENS called "that sum of "all human crime and suffering"—slavery. It is idle to palter about any difference between slavery as it *was* in the United States, and slavery as it *is* in the Portuguese euphuism. The Japanese are too clear-headed to be deceived by such sophistical but transparent falsehoods. They know perfectly well that the Macao coolie traffic and slavery are one and the same thing; and it is to their honour that, on the present occasion, they acted in accordance with the principles they had seen us practise, although their own interests were not in the slightest degree involved. Henceforth, warned by the example of the commander of the *Maria Luz*, masters of similar freights of human helplessness, on their way to Callao, will give the shores of Japan a wide berth. If it were true that Portugal were a fair specimen of European civilisation—which, thank Heaven! it is not—it might almost seem as if the world, ripening into age, were turning to the birthplace of society in the East, and, like our own wanderers, who have passed a life-time far away, yearns to make its grave beside its cradle. More progress will be made towards the extinction of the Coolie trade by this one judicial step in Japan than by all the despatches from our Foreign-office, which have been bandied about from Lisbon to Macao, and from Macao to Lisbon, as horror after horror has been revealed, and left to be repeated.

THE FRENCH TREATY WITH CHINA.

The French Minister of Agriculture and Commerce has just forwarded the following circular to the Presidents of the various Chambers of Commerce in France :—

By a circular of the 21st June, 1870, the Department of Agriculture and Commerce, in view of the approaching revision of the conventional tariff annexed to the Franco-Chinese Treaty of 1858, invited the Chambers of Commerce to communicate to him their opinions as to the changes that should be introduced, in the interest of the trade of their particular district. The events which occurred shortly afterwards led forcibly to the suspension of that inquiry, which had, besides, lost its character of urgency, as the British Government had, on its side, decided on waiting for the majority of the Emperor of China, which would occur at the end of 1872, for a revision of the tariff, as well as of the Treaty concluded in 1858 between China and England. Now that we are within a few months of the period for opening the negotiations relative to the revision of the Treaty an examination of the questions connected with that revision has become urgent, and I beg of you to lay this important subject before your Chamber, and to transmit to me the result.—Receive, &c.,

(Signed) E. Teisserenc de Bort.

The news from the Straits is the reverse of satisfactory. Sir Harry Ord seems determined to push the obnoxious policy of absorbing public rights into Government hands "to the bitter end." The Municipal Board is the last of his contemplated victims—indeed it is the only representative institution left; and, if that is permitted to go the way of all the rest, farewell to the independence of the Settlements! We trust that the residents will be true to themselves, and resist this monstrous encroachment to the last. As for the pretext put forward in defence of it—that the business of the Municipality would be better conducted—it is a mere sham. Freely translated, it means that the local burdens would be indefinitely raised, and that the money would be more "pleasantly" spent by a clique of irresponsible nominees than by a body of experienced men of business, who, while making their own fortunes, have watched and acquired an interest in the fortunes of the Settlement. Nothing can be more insulting than this barefaced system of "making places." Under the present Governor Singapore has been flooded with precocious youths, whose salaries are an ever-increasing drain on the public purse, and whose services may be calculated in inverse ratio to their own estimation of them. It is an axiom in political economy that money raised by taxation can only be satisfactorily laid out by the representatives of the taxpayers. To remove such a body as the Municipal Board, or to deprive it of its representative constitution, would be to bow meekly to the dictatorship of Sir Harry Ord, and hand over the public purse-strings to a clique—who will be very glad to get hold of them.

It is proposed to license brokers at Hong Kong—of course it is opposed. Hong Kong trade is no longer confined to a few dozen merchants and traders, but, like Calcutta, has its brokers of all kinds—ship, bill, opium, stock and share, cotton, rice—each have their brokers, both foreign and Chinese; and the institution is looked on as a sort of refuge for the destitute. It may easily be calculated that with no sort of check to "starting broker," irregularities have occurred, and that it is very necessary that those engaged in the business should be put under some sort of surveillance, in order to protect the honest broker as well as their principals who employ them. There is no other way of arriving at this but that of granting licences, with the power of withdrawing or suspending them on proof of any irregularity. Like all other interference with mercantile pursuits, it will be irksome at first, but the advantages to be gained by the community, generally, will soon be manifest, and with that the irritation at any restriction will speedily vanish.

The Japanese Embassy were last week *feted* at Manchester. They have visited the principal warehouses, mills, and engine-works, and, of course, the banquets have not been forgotten. A report of their proceedings will be found in another column. In his speech, proposing the health of the Ambassadors, Mr. Mason, the President of the Chamber of Commerce, cast an extraordinary aspersion on British merchants in Japan, which we are at a loss to understand, unless, indeed, he referred to the failure of Gledstanes and Co.

The War Office have decided on the despatch of reinforcements to Singapore. The detachments consist of about four hundred of the 10th and 80th Regiments. After landing these the troopship (not yet fixed) will effect an exchange of the troops hitherto garrisoned at Singapore and Hong Kong. We trust that Governor Ord has found his calculations correct, and that the dismissal of the Madras troops will effect a saving which the finances of the colony will see something of, not, however, for expenditure on fortifications, which appertains entirely to the Imperial Government.

R. W. McCoy, Esq., M.D., the newly-appointed Colonial Surgeon for Hong Kong, will, we understand, shortly proceed to his post, with his wife and family. Dr. McCoy has served in Australia and Sierra Leone, and will therefore be no stranger to the Governor of Hong Kong. Judge Smale, who proceeded by the last Pacific mail, will resume his post in December, or, possibly sooner, as the acting Judge continues to suffer from fits, and the work of the Court is often delayed in consequence.

The Liverpool Chamber of Commerce have been informed by the Foreign-office, in reply to their letters on the subject, that Her Majesty's Government are in communication with the Porte and other Powers on the subject of the recent increase in the dues levied by the Suez Canal Company.

The Prince Higashi left on the 10th for San Francisco and Japan. He expects to return to this country in about twelve months and complete his studies. During the present term he has been under the tutorship of Professor Druce, at Blackheath.

We understand that the steamer *Surprise* has been purchased by the Hamburg Company for their direct line to Singapore and China. The steamer for this month is the *Bellona*. She will complete her lading in London, and leave about the 30th inst.

We have been informed that the Japanese Legation has been removed from the South Kensington Hotel to No. 9, Upper Belgrave-street.

THE JAPANESE EMBASSY.

The Japanese Ambassadors arrived at Manchester from Liverpool on Friday, the 4th inst., and spent the following day in making an inspection of the chief cotton mills and other commercial establishments of the city.

BANQUET BY THE MUNICIPALITY.

On Monday, the 7th, a special meeting of the City Council was held, at which an address of welcome to the Ambassadors was drawn up. This address was subsequently presented, and replied to in the following terms :—"To his Worship the Mayor, the Honourable Aldermen, and Distinguished Citizens of the city of Manchester.—We, the Ambassadors Extraord nary, on behalf of our Sovereign and our people, beg to express our thanks for this cordial welcome, and the generous hospitality extended to us and to our suite by the city which you so worthily represent. There is much concerning the Empire of Japan which would doubtless be of interest to you, if we had time to speak of it. The revolution which brought us into new relations with the other nations of the world, the changes rapidly following that revolution, as well as the changes which are now slowly but surely working their way among the people—these are matt rs of which we should be as glad to speak as you to hear. But we have not come to tell you these things. We have come, in consequence of them, to learn from you. Our presence here to-day is evidence of that. Our visit to your city is part of that extended circuit we are making, in order carefully to study the institutions which seem to us to be the cause of your wealth and greatness. It is our intention to treasure up the knowledge we shall gain, so that we may follow the example of your energy and industry, which have made you so prominent among the nations of the world. The result of your many centuries' experience will be of great value to us. We desire to introduce every facility for improving the condition of our people. We shall send young men to your shores to be educated, as we have already done. We shall ask for your machinery, your engines, and such modern appliances as will help us to begin properly in this new stage of our national development. As some of you may know, we have already called on this city for help. We shall probably need your aid in a practical manner still further. We have investigated with great interest your factories, with their wonderful machinery, and have thus seen for ourselves that your nation's greatness is largely centered in her manufacturing and commercial interests. To become better acquainted with all this our Imperial Majesty has commissioned us; and we are glad to believe that at the same time we shall be able to cultivate more intimate, peaceful, commercial, and friendly relations between our respective nations."

The Council and their guests then adjourned to the Mayor's parlour, where they remained until dinner was announced. The Mayor, Mr. W.

Digitized by Google

Booth, presided, and after dinner proposed the loyal toasts. "The Army, Navy, and Auxiliary Forces," was acknowledged by General Alexander. The Mayor then proposed the toast of the evening, "The Health of the Ambassador Extraordinary from Japan." His Excellency replied as follows:—"Mr. Mayor and Gentlemen,—Permit me in a few words to acknowledge the cordial hospitality which has been extended so generously to us by this city. We accept it not only for ourselves but also for the empire we represent. We must take this opportunity of thanking you for your unwearied endeavours to make us acquainted with all that has been of so much interest to us. At the same time it is our sincere hope that some of you may some day be sojourners in Japan, that we may reciprocate this kindness, showing you that we have been neither inattentive learners nor forgetful guests."

The Mayor proposed the health of Sir Harry Parkes, Her Majesty's Minister at the Court of Japan. Sir H. Parkes said he was much touched by the compliment paid to him. He had not had the opportunity of seeing much of the men of Manchester; but in the course of a career now extending over no short period, he had always had the happiness of feeling that, as far as his opportunities permitted, he was promoting the interests of this community. Of recent years a very favourable field for those interests had been suddenly opened in the country from which their distinguished guests came. He did not doubt that that field would widen. A country anxious to have English manufactures must present a field for English enterprise and industry which we should be very glad to enter and develop. England had not heard much of Japan since the year 1868, when the revolution took place; but since then great improvements had been undertaken, and much of the progress that had since been made was due to the energies and resolution of their guests of that evening. In that period it had been shown that there were Liberals in Japan as well as elsewhere; that there were men there who believed that selfishness and seclusion were as injurious to national welfare as to individual interest. He felt certain that the men of Manchester would extend their sympathies to him and to all who represented England in Japan; while they, on their side, would do their best to extend the field for English manufactures. For himself, he felt that it was good to be here, to have an opportunity of witnessing those high qualities for which Manchester and the towns in its immediate neighbourhood were celebrated—the high qualities both of employers and employed; and it was also good to receive the welcome that had been given him, and to know that Manchester had a heart to sympathise with those who endeavoured to represent her interests in a distant quarter of the globe.

The Ambassador said: Gentlemen,—As a grateful guest of this illustrious city, allow me to express briefly the feelings that rise on this occasion. We come as ambassadors of our gracious master to investigate the results of your long study and patient industry; and greatly to our delight we find friends on every side willing to help us to attain the object for which we have been sent. Your gigantic manufactories, your machinery, as well as the system of your municipal administration have interested us very much, since they are the means by which you have reached so high a degree of wealth and greatness. Realising that all these wonderful institutions would never have existed if it had not been for the energy and industry represented by those assembled here this evening who hold responsible position in this emporium of manufactures, I am happy to propose the ever-increasing prosperity of this great city, and the health of its chief magistrate, the Mayor of Manchester.

The Mayor responded, and this concluded the proceedings.

BANQUET BY THE CHAMBER OF COMMERCE.

On Tuesday, the 8th, the members of the Embassy, accompanied by the Mayor and Mr. Hugh Mason, the President of the Chamber of Commerce, visited the Exchange. As the visit was made about the time of high 'change, the building was crowded. The Japanese were received by Mr. Simpson, the master of the Exchange, and conducted to the platform at the west end of the room amid repeated cheering. The Mayor, addressing the subscribers, said: Gentlemen of the Manchester Royal Exchange,—I have great pleasure in introducing to you this morning the Chief Ambassador from Japan, and he desires me to express to you the very great pleasure and satisfaction he experiences in seeing such a large number of gentlemen met for commercial purposes. He hopes very sincerely that the commercial transactions between this country and Japan may be largely increased. At the same time, he desires to express to you, as a body of Englishmen, the feeling of gratitude he has towards us in England for the kind reception which the Embassy have met with ever since they put their feet on English soil. The Ambassadors were afterwards shown through the building.

In the afternoon the Ambassadors were received at the Town Hall by the members of the Chamber of Commerce. The President after a brief speech, in which he welcomed the Ambassadors, presented the following address to Iwakura:—May it please your Excellency,—The Directors of the Manchester Chamber of Commerce, representing one of the most important branches of our national industry, desire to offer to your Excellency, and the other members comprised in your Embassy, a hearty welcome to this city. They have observed with the liveliest satisfaction the friendly advances which your Government has made towards bringing the population of Japan into closer relations with this country, and they regard the presence of your Embassy as a guarantee for the maintenance and extension of the intercourse between the two countries which cannot fail to confer mutual benefit. The enlightened policy of promoting commerce to the widest extent, and the free interchange of products between different nations, has at all times, as your Excellency may be aware, had the warmest advocacy and support of this Chamber. The directors highly estimate the improved conditions for international intercourse which your Government has inaugurated, and, as representatives of commercial interests, the directors confidently look forward to a large increase of imports into Europe of the rich natural productions of Japan; whilst the skill and ingenuity which in so marked a degree are the characteristics of your countrymen will quickly lead them to a full appreciation of what is excellent in our manufactures. The directors feel assured that the Government and people of this country will at all times be anxious to reciprocate with your nation offices of friendship, and they rely with confidence on the good effects which will flow from the establishment of the Embassy as a direct means of giving effect to the friendly relations which at present exist, and which they fervently hope will be maintained, between the Japanese and British Empires.

The Chief Ambassador read his reply in his own language from a manuscript roll. The interpreter subsequently read the following translation:—We, the Ambassadors Extraordinary of His Majesty the Emperor of Japan, in the name of our Sovereign and people beg to express our warmest thanks for this cordial reception extended to us and our suite by the Manchester Chamber of Commerce. Permit us to indulge in a brief word telling you how cordially we reciprocate all you have wished concerning the promotion of commerce, and the increase of friendly relations between our respective countries. We have had demonstrations of good feeling in public and in private, and with the knowledge thus gained of English hospitality we shall carry from this city some words that shall make you better known among our people. Certainly we shall all henceforth feel a more direct and personal interest in this sister island, and shall strive for those ends that bind us more closely as friendly nations. If, at the same time, we shall succeed in making our distant land more familiar to you, we shall be twice repaid for our long absence from home. Permit me again, on the eve of our departure, to assure you of our hearty desire for the good results that may be obtained through the interests represented here; and at the same time to thank you and the citizens of Manchester for all the evidences you have given of that good feeling which we hope may never be broken between England and Japan.

In the evening, the President of the Chamber, Mr. Mason, entertained the Ambassadors and their suite to dinner at the Queen's Hotel. Mr. Mason occupied the chair; and, after the health of the Queen had been drunk, said he felt it somewhat difficult to do justice to the second toast. They were honoured with the company of noble and distinguished strangers from a far distant land, whose progress, since they left their own shores, had been marked by one continued ovation. He was tempted to trespass upon courtesy, and to speak of his guests as his heart prompted; but they had already had the language of panegyric to satiety. When distinguished men came among us, characterised by that unaffectedness, that gratefulness of simplicity of behaviour, and that manly naturalness which were so pleasing to Englishmen, language inconsistent with such qualities would be anything but pleasing to his distinguished guests. Speaking in the presence of eminent British merchants and manufacturers, he might venture to say in their behalf, and in the ears of their Excellencies, what grief they felt when they heard a short time ago that the honourable name of British merchant had been disgraced in the Empire of Japan. Behaviour such as he alluded to was felt in Manchester to be a stain upon the commercial character of a community who held that righteousness and probity, honour and fair dealing, were the highest characteristics of British merchants in every part of the globe. He hoped that such impressions as the conduct he had referred to had created would be forgotten, and that their guests would leave Manchester with the feeling that they had been in the presence of upright and honourable commercial men. Though the empire of Japan had been revealed to us with a strangeness and suddenness like the awaking from a dream, yet the people of this country had been deeply interested in hearing during the last few years of the great transactions which had taken place in Japan. Even Japanese literature had found its way into Manchester, for he held in his hand a book of Japanese lyrics, translated by a Manchester man, Mr. F. V. Dickens. He would read one ode, which seemed to him to be full of beauty and pathos:—

"The pleasing spring hath passed away,
Now summer follows close, I ween,
And Ama's secret summit may
In all its grandeur now be seen;
Of yore the dying ground
Whiten'd with angels' robes spread far around."

He had been told by his Excellency that those lyrics were composed eight centuries ago, at a period in the history of that country when poetry, as an art, was comparatively unknown. We had much to learn from the Japanese; and he was always glad when he found that with all our boasted civilisation, with all the knowledge which sometimes made our countrymen appear conceited, there was something that we might learn from the visitors who came to us from distant lands. He proposed "Our distinguished guests, their Excellencies the Ambassadors of his Majesty the Emperor of Japan, and success to their mission."

The Chief Ambassador replied: Mr. President and Gentlemen,—In response to the flattering address and complimentary toast which have just been proposed, we have to express our thanks for the hospitable reception we have experienced in this city. The flourishing state of your commerce and manufacturers, which we have seen, confirms us in our idea that the prosperity and wealth of a nation are greatly dependent upon the extent of its commerce. Therefore it will be our endeavour to use every influence with our people on our return to Japan to encourage commerce; and by that means we hope to bring Japan to stand in the rank along with the greatest nation in the world. Then you may justly be proud that you have assisted to bring into that rank a nation until recently one of the most secluded of the Far East.

The Chairman then proposed, "The Health of Sir Harry Parkes, K.C.B., our Minister at Japan. May his official relations with Japan as representative of British interests be productive of an extension of the intercourse between the two countries." Sir H. Parkes, in responding, said he first visited Manchester about seventeen years ago, when he had been sent home to announce the conclusion of a negotiation which opened a new country to our commerce, namely, Siam. In no part of England was that announcement received with greater acclamation and more cordially than in Manchester. He could not now report the opening of a new country; but our relations with Japan had recently acquired so much greater importance that it almost amounted to a new opening for commerce. In addition to the romantic interest attaching to Japan,

Digitized by Google

there was now this new one—that it was seeking a place among the commercial nations of the world. It would be difficult to find a better proof of the advantages likely to accrue from unfettered commercial intercourse than was afforded by the recent history of Japan. A few years after our intimacy with that country began, a part of Europe was struck with a disease calculated to produce a famine. The disease in the silkworm struck at the industry of Italy and France and materially affected some branches of industry in England. What happened? Japan was able to supply those silkworm ova of which the resources had failed in other parts of the world, and the peasants of Lombardy and France were enabled to continue their industry until, as was hoped, the disease came to an end. Shortly afterwards floods and storms destroyed the crops in Japan for two successive years, and immediately food was poured in from China and other countries, and many thousands of Japanese were saved from starvation through the agency of foreign commerce. But more important still; many of our manufactures, which at one time were regarded as superfluities, or even as curiosities, now promised to become necessities to the Japanese. He knew as a fact that Manchester yarns were an import of considerable importance, and which, in their laudable desire to improve their costume, they could no longer do without. On the other hand, Japan was well qualified to give us productions of great value, as silks, metals, and other things which we were quite prepared to receive. The liberal disposition of the present Government was shown by what had been done during the last few years. Since he left Japan, only a short time ago, the first line of railway had been opened. It was only a short line of about twenty miles, between Yokohama and Yedo; but it was as important to Japan as was the first line in England—between Manchester and Liverpool. Another undertaking was on foot which would link all the principal ports of Japan with Manchester and other towns in Great Britain by the electric wire. The Japanese were also supplying their country with a currency which in point of finish was equal to our own. Their coast, hitherto shrouded in fog and often beaten by storms that were a great terror to mariners, because they were certain as to the treatment they would receive if wrecked,—that coast was now lighted by a lighthouse system which welcomed the mariner and encouraged him to enter. Many of these works had been carried out by British industry, as the Japanese had entrusted their construction to British engineers. A still further proof of the interest taken by the Japanese in the advancement of commerce was the presence of the Ambassadors in England. They had been much struck by the liberality with which everything had been thrown open to them. Thus agencies were at work which might enable them, under good guidance, to accomplish much more in a short space of time than otherwise could be accomplished. The Ambassadors would learn more than struck the eye. They would learn how much of what they saw was attributable to the liberality in all administrative measures, especially to such action as our Government had upon commerce. They saw how in our eyes the best protection of our commerce was to leave it alone—(applause)—to let it find its own channels; and that all the Government had to do was to protect the person of the merchant, and see that he sustained no damage. In conclusion, he (Sir Harry) assured the Chamber of his resolve to give the utmost attention to the interests of commerce when he returned to Japan.

DEPARTURE FOR GLASGOW.

On Wednesday, the 9th, the Ambassadors and their suite left Manchester for Glasgow, and on the following day they were entertained by different public bodies. At a meeting of the Chamber of Commerce, attended by several members of Parliament and a large number of the most influential gentlemen in the West of Scotland, the members of the Embassy were presented with an address on behalf of the Chamber and the mercantile community of Glasgow. In the address sympathy was expressed with the object of the mission of the Embassy, and a hope that it might bring about closer relations between Great Britain and Japan. Gratification was also expressed at the improvements which had recently been made in the civil and social condition of Japan, and at the efforts to elevate and improve the condition of the people of that country, to develop its resources, and to cultivate intercourse with other nations. The address further expressed the hope that an acquaintance with the institution of England, her system of Government, and her political and civil arrangements, would be of benefit to the authorities of Japan in carrying out the course of action they had commenced. On behalf of the Embassy it was replied that they were anxious to see closer friendly and commercial relations existing between their country and Great Britain.

The scientific staff of the Embassy visited the Castle and the Museum of Science and Art at Edinburgh on the 8th inst. Accompanied by Mr. Henry Brunton and Professor Archer, the visitors remained in the Museum the greater part of the day, and studied the objects contained in it very closely. It may be explained that this branch of the Embassy is more particularly charged with the duty of inspecting and reporting upon the manufactures of this country. In pursuance of this object, they generally precede the chief Ambassador and suite. All the members are, however, expected to be together in Glasgow this day.

The Mayor of Liverpool has received a polite and courteous acknowledgment of the attention bestowed upon the Ambassadors during their visit last week. The Ambassadors also took the opportunity of mentioning their high opinion of the police arrangements, and of the efforts which were made by the gentlemen connected with the commerce of the port to make their visit pleasant and profitable.

THE BURMESE EMBASSY.—The Burmese Embassy, accompanied by Major M'Mahon and Mr. Edmund Jones, have returned to London. It is understood they will remain in the metropolis until the return of the Queen to Windsor, when, after taking leave of her Majesty, they will proceed through France, Italy, and Egypt to India, where they will pay their respects to the Governor-General, and, finally, arrive in their own country about the beginning of next year.

Monetary and Commercial.

—o—

At an extraordinary meeting of the Chartered Bank of India Australia, and China, held on the 9th inst., it was stated that the amount of claim against the firm of Gledstanes and Co. was £28,000, and that had it not been for that failure an interim dividend would have been declared. Messrs. F. W. Heilgers and W. Paterson were elected to seats at the board. A full report of the proceedings will be found in another column. The chairman called attention to the usance of six months' bills on London against produce from India and China. Now that the voyage is reduced to less than two months by the Suez Canal, there can be no sort of excuse for buying bills drawn at a longer sight than Sixty or Ninety days. Six months' bills assist to a great extent in keeping afloat such firms as Gledstanes and Co. long after they are insolvent, and the sooner Bankers refuse them the better.

The directors of the Chartered Mercantile Bank of India, London, and China have issued their report, declaring an interim dividend at the rate of 8 per cent. per annum. The report was published in full in our issue of the 17th ult. The meeting of this Bank will be held to-morrow, and that of the Oriental Bank on Thursday next.

The subject of the amended bill of lading by steamers *via* the Suez Canal has been already too long under discussion, and it will assuredly not be helped forward by the report of the Committee of the Bombay Chamber of Commerce just issued. To call it a one-sided document would be to employ a phrase not strong enough to describe its bias to the shipowning interest. It is a piece of special pleading of the most transparent kind. Starting with the apparent conviction that there is but one port in the East—Bombay—it quietly ignores every other port in Great Britain except Liverpool. Thus self-satisfied, it proceeds to recommend a new form, in which the two points demanded by shipowners and resisted by the London Committee of Merchants are conceded off hand. The freight is to be made payable *on* delivery, not *after* delivery, the practical effect of which, as is now well known, is that the freight is demanded and has to be paid before delivery has commenced, in point of fact before the consignee knows whether his goods are really on board as shipped or not. Again, "should the goods not be taken delivery of by the consignees as soon as the steamship is ready to discharge, they will be landed and warehoused at the port of destination at the risk and expense of the owner of the goods"—that is tantamount to giving power to the owner to bundle out the goods at pleasure, and to warehouse them wherever he may think fit, as he is under no obligation whatever to notify to the consignees or to the mercantile community the arrival of his steamer with their goods. Now, this is not as it should be; this is not what ought to be expected of the Chamber of a port like Bombay. But the cause of disappointment is not far to seek. It crops up in the first paragraph, and it flourishes in the last. The report starts with "the interest of Bombay," and it closes with "Liverpool." Not what is right, not what is fair between man and man, in the construction of a contract, is once hinted at. In every line we are reminded of the valuable ship-consignments, which the members of the Bombay Chamber owe to the shipowners of Liverpool. Nobody can serve two masters, and the Bombay Chamber are not unwilling to sacrifice the interests of shippers to those of shipowners. In this selfish calculation they may find that they have acted shortsightedly. We do not believe that the merchants of London, who have so thoroughly proved their good feeling, who have thought for the whole mercantile world, and not for one port, will consent to be thus arrogantly treated. As for our friends in the Far East—whose existence is superbly ignored by the commercial magnates of "Duckland"—we are quite sure that the Bombay "platform" will not go down in China, Japan, or the Straits.

The directors of the Anglo-Indian Tea Company have issued their first annual report. They state that the operations of the year have been satisfactory. Out of the profits they have written £500 off the preliminary expenses and £500 off the goodwill expenses account, and they recommend a dividend for the year ending the 23rd August, 1872, at the rate of 10 per cent., leaving £982 4s. 9d. to be carried forward for future dividends or contingencies. With the object of extending the business, it has

Digitized by Google

been deemed desirable to increase the company's resources by the issue of 2,000 additional shares of £10 each. These are offered at par to existing shareholders.

At a meeting of the Board of the Anglo-American Telegraph Company it was resolved to pay the usual interim dividend of 2 per cent., on the 1st of November next, for the quarter ending the 30th of September. A similar resolution was also passed by the directors of the French Atlantic Telegraph Company.

Mr. Augustus Sillem, of the firm of Messrs. Antony Gibbs and Sons, has been elected a director of the National Discount Company, in the room of Mr. Alexander Mackenzie, who has resigned.

The Great Northern Telegraph Company notify that the traffic receipts on their European lines, in September, amounted to f.131,972, against f.98,820 in 1871, and on the China and Japan line to f.98,490, against f.41,750.

Bar Silver has again declined, and may be quoted 60½d. per oz. standard. A few small parcels of Mexican dollars have come to hand from New York, and, arriving just in time for shipment to China, have been placed at the old prices, viz., 62¼d. for the old, and 60d. for the new coinages.

The amount of bullion by the P. and O. Company's steamer *Simla*, which left Southampton on the 10th inst., was in gold —to Alexandria, £30,000; to Galle, £1,630; to Madras, £5,000; in silver—to Penang, £2,190; to Singapore, £42,500; to Hong Kong, £13,700; to Shanghai, £4,520; total, in gold, £36,630; in silver, £62,910.

ARTICLES OF IMPORT.

—o—

TEA.

The market still shows no signs of activity, but there is a quiet business doing, without material change in prices, except that Green Teas and Canton Scented Teas have again sold rather lower under the hammer without reserve. Buyers are generally purchasing sparingly, waiting for the arrival of the clippers, which are now daily expected. The public sales have been small, comprising 2,690 packages of Scented Teas, 2,738 packages of Green Tea, and 5,416 packages of various kinds, nearly the whole of which have been offered and sold without reserve. The deliveries for the week amount to 3,363,878 lbs., against 4,320,592 lbs. last year.

Black.—Red-leaf kinds: Siftings and broken-leaf kinds show no change, the demand being limited. Fair to good common, free from dust, remain very scarce, from 1s. 0½d. to 1s. 1½d. per lb. Fair to good Kaisow kinds have been difficult of sale at former prices. In fine to finest the small sales made have been at previous rates. Pak Lin kinds remain dull of sale, without change in prices. Black-leaf kinds: Low qualities show no improvement; fair common has been rather more in request. Good common has also been rather firmer at 1s. per lb. Fair to good medium has been steady, with sales to a moderate extent. Fine to finest remain firm, but with a limited demand, buyers waiting for the Clippers. New-make Canton kinds: Common to fair have been sold from 11d. to 1s. 1d. per lb., showing no change; good have been wanted Oolongs show no material change. Souchongs have been dull of sale at about previous prices. Flowery Pekoes are only saleable in small quantity. Scented Teas:—Canton Capers: Common to fair have sold rather lower at public sale; good to fine have realised high prices, in some instances showing 1d. to 2d. per lb. advance; some small parcels extra choice sold at extreme prices. Foochow Capers remain difficult of sale. Canton Orange Pekoes, all but the finest, have moved off very slowly, and prices must be considered in favour of buyers. Foochow kinds show no alteration, the demand being slack. Uncoloured Japans have been steady at previous prices. *Green.*—The market is somewhat over-supplied, and the continued pressure to sell without reserve at public auction has again resulted in lower prices, both for Moyune and Ping Suey kinds. Canton kinds show no change.

SILK.

There is no alteration to report; the market is still quiet, and the upward movements of the bank rate (now 6 per cent.) naturally checks business, although it cannot be said that prices are affected by the advanced rate. During the week there have been many buyers disposed to operate at 6d. decline, and some business has been doing; a large line of chop 3rd Tsatlees at 28s. 6d., and Red Peacocks at 24s. 6d., but importers generally hold for full quotations. In Cantons there is some little daily business doing at former rates, but here again asking prices keep buyers away. Japans are quiet and unchanged in value. Deliveries are good, being from 1st to 9th instant—China, 898; Canton, 231; Japan, 263; Bengal, 150; total, 1,542 bales.

Coffee.—Only small supplies have been placed on offer at the public sales, but these have met with an active demand, and full rates have been obtained. By private contract a steady inquiry has prevailed and business has been done at firm prices. At public sale Plantation Ceylon has realised—triage, 67s. to 72s. 6d.; small, 74s. 6d. to 77s.; low middling, 77s. 6d. to 79s. 6d.; middling coloury, 80s. to 82s. 6d.; bold, 83s. 6d. to 86s.; peaberry, 97s. to 99s. Privately Native Ceylon on the spot has been sold at 71s. to 72s., and Plantation at 79s. up to 87s. 6d. for fine bold; an offer of 389 bags Singapore, ordinary mixed and brown, was quitted at 67s. 6d. to 70s. 6d.

Cocoa-nut Oil maintains previous rates, Cochin £36 to £39, Ceylon £35 10s. per ton.

Cutch continues very dull, and there have been no transactions during the week; 156 boxes middling at auction were bought in at 21s. per cwt.

Galls.—An offer of 10 cases good quality China was quitted at £2 17s. 6d. per cwt.

Gambier.—The market continues firm at 24s. 6d. to 24s. 9d. for bales, and 28s. to 28s. 6d. for pale free cubes.

Hemp.—The demand for all descriptions continues limited, and sales are effected slowly at about previous quotations. Privately 150 bales fair roping Manila have been sold at £48, and 485 bales were bought in at £48 per ton.

Pepper.—*Black:* Privately sales have been effected at a slight reduction, Penang at 6¼d., and Singapore at 6¾d. At auction supplies have gone off flatly and nearly all bought in, Singapore at 6⅝d. to 6¾d., Trang at 6⅜d., Penang at 6⅜d., except West Coast sold at 6¼d., Saigon bought in at 6¼d., excepting sea-damaged, which sold at 6⅜d. for first class. *White* is dull and lower sales being effected to small extent—fair at 1s. 2⅜d., one lot 1s. 2½d., sea-damaged first class 1s. 2⅛d. to 1s. 2¼d.; 200 bags have been sold for October delivery at 1s. 2d.

Rice.—The market on the spot is dull, but there is a better demand for floating cargoes for the continent, more particularly Necransie, and firm rates have been obtained, cargoes being sold as follows:—The Marie 730 tons Necransie, arrived off coast, at 9s. 5¼d. for the continent, damages at valuations; the Prince Llewellyn 415 tons Necransie, May sailing, at 9s. 6⅜d. do.; the P. C. Merryman 1,230 tons Necransie, for a near continental port, at 9s. 5¼d; also a cargo of 1,200 tons Rangoon, distant shipment, at 10s. 3d. ex ship London, or 10s. 9d. Liverpool terms.

Rattans.—At auction 1,534 bundles Penang sold at 4s. to 5s. 11d., including damaged.

Sugar.—The market has been characterised by a weak tone, the public sales have gone off slowly for good and fine qualities as well as brown, and easier rates have been occasionally accepted. By private contract only small sales have taken place at previous quotations. *Manila*: No sales. *Penang*: At public sale of 5,655 bags, consisting chiefly of fine to superior coloury and grocery qualities, 4,700 bags sold at about the valuations, middling to good yellow (duty 5s. 3d.) at 30s. 6d. to 31s. 6d., fine to superior soft coloury and grocery (duty 5s. 3d), at 33s. to 34s. 6d., fine soft Benares kind (duty 5s. 3d.), at 35s. to 35s. 6d., being extreme rates, fine white grocery and grainy (duty 5s. 8d.), at 35s., fine bright crystallised at 37s. 6d., brown and low soft yellow were bought in at 26s. 6d. to 30s. 6d. Offers of 1,705 bags date sort (duty 4s.), were bought in at 22s. to 22s. 6d., but have since all sold at 22s. *Siam:* In auction 1,899 mats were bought in, heavy brown syrups at 24s. 6d., fine soft brown 27s., except 310 bags, which sold, low soft yellow (duty 4s.), at 27s. 6d., washed 25s. 6d. to 26s. The portion bought in has since been quitted privately at 23s. 6d. per cwt.

Shells.—The periodical sales were held on the 8th inst. with the following results:—*Mother o'Pearl:* The quantity offered was moderate, and with a good demand the bulk found buyers; no supplies of Manila were included in the sale. *Tortoise:* An active demand prevailed, and the whole of the quantity offered was disposed of at full to occasionally dearer rates; 5 cases (667 lbs.) East India sold at 16s. 6d. to 18s. 6d.

Sago.—In public sale 963 bags small pearl were all disposed of at easy rates, fine 17s. to 17s. 6d., fair 16s. 6d.; 278 bags medium were bought in at 20s. *Flour:* For arrival 100 tons Singapore have been sold at 15s. 9d. ex ship.

Spices.—*Cassia Lignea:* Supplies exceed the demand, and prices are again lower; at auction 350 boxes unworked were bought in at 88s. to 90s., except one lot which sold at 86s. *Cloves*: 26 cases Penang sold at dearer rates, good to fine bold at 1s. 5½d. to 1s. 6½d. *Nutmegs*: Supplies of good extent (253 packages) offered by auction included some second-hand parcels; small sizes met less demand at cheaper rates, but good bold sold at firmer prices. Of 137 cases 60 boxes Penang offered 80 cases 10 boxes sold, average 65 and 64 nuts to the lb. at 4s. to 4s. 1d., 68's slight mouldy at 3s. 9d. to 3s. 10d., 72 to 75's at 3s. 7d., 70's of old import also 3s. 7d., 82 to 79's at 3s. 4d. to 3s. 5d., 117 to 107's at 2s. 10d. to 2s. 11d., limed and defective 156 to 140's at 1s. 8d. to 2s.; of 23 cases 13 casks Java 5 cases 11 casks sold, 68's at 3s. 9d., low wormy broken at 10d. to 1s. 1d. *Mace* has met less demand, and 77 packages offered were only partly sold at lower rates; of 26 cases 33 boxes Penang and Singapore 12 cases 13 boxes sold, partly mouldy red 3s. 11d. to 4s., low middling 4s. to 4s. 1d., middling palish 4s. 4d.; 4 cases 3 casks broken Java sold at 3s. 8d.

Tobacco.—At public sale 30 bales Manila leaf partly sold—3s Cagayan 1869 at 16½d., and part of 2,624 bales 4a Cagayan 1870 at 11d. to 12d., and 476 bales damaged at 7½d. to 8¾d., one lot 7d.; also 15 bales Sumatra 11¾d., 2 ditto China 8½d., 21 ditto ditto damaged 2½d. to 3½d., 9 ditto Japan 5½d., 6 ditto ditto damaged 4½d. to 4¾d., and part of 10 ditto Java at 6½d. to 7¾d.

Tin.—Prices of Straits have continued to decline during the week; the present range of quotations is as follows; Straits on the spot and afloat, £140; Banca, £156 10s.; Billiton, £150 per ton.

ARTICLES OF EXPORT.

—o—

WOOLLEN AND WORSTED GOODS.

The current quotations in the Leeds market for Woollens and Worsteds are lower, and rule as follows:—

Spanish Stripes, 62 in., 19 yards, Elephant Chop, 3s. 6½d. per yard for scarlet; Long Ells, 30/31 in., 24 yards, Lion Chop, 33s. per piece for scarlet; Camlets, best SS, 30/31 in., 58 yards, Elephant Chop, 78s. per piece for scarlet; Lastings, 31 in., 30/31 yards, Lion Chop, 66s. per piece for gentian; Brocades, 31 in., 29 yards, Half Moon Chop, 24s. 6d. per piece for scarlet.

At Glasgow.—For Singapore: Maggie Leslie. For Singapore, Batavia, Samarang, and Sourabaya: Earl Canning.

SPOKEN.

Undine (ship), Shanghai to London, Aug. 30, off Cape Agulhas.
H. G. V. W., Cardiff to Shanghai, Aug. 25, 1 S., 22 W., 27 days out.
Thermopylæ, Shanghai to London, Aug. 22, 32 S., 13 E.
Duke of Abercorn, Foochow to London, Aug. 23, 34 S., 15 E.
Cashmere (ship), Shields to Singapore, Aug. 16, 9 N., 25 W.
Sunda (ship), Cardiff to Hong Kong, Aug. 4, 30 S., 33 W.
Cornelis Smit, Liverpool to Batavia, Aug. 31, 31 S., 89 E.
Meander, Singapore to New York, Aug. 16, 35 S., 20 E.
Kosmopoliet II., to Batavia, Aug. 29, 13 N., 26 W.
Anna Johanna, Batavia to Amsterdam, Aug. 17, 34 S., 17 E.
H.V.N.F. (Havilah barq.), Tyne to Singapore, Aug. 13, 3 N., 21 W.
N.Q.D.J. (Lady Ann, of London), Newport to Galle, Aug. 29, 10 N., 24 W.
Gysbertus Hermanus, Cardiff to Sourabaya, Aug. 28, 14 N., 26 W.
Nourmahal, from Japan, July 30, in Pitt's Passage, 30 days out.

FREIGHTS AND CHARTERS.

Rates of freight to the Eastern ports are steady at the current quotations, and there is still a good supply of steamers on the berth. Coal freights are quiet, but the turns for loading are better.

Current Rates of Freight for Vessels on the Berth.

Per Steamers via Suez Canal.—To Yokohama: 70s. meast. To Hiogo: 70s. meast. To Nagasaki: 90s. meast. To Shanghai: 40s. meast. To Hong Kong: 45s. meast. To Manila: 80s. meast. To Singapore and Penang: 40s. meast. To Sourabaya and Samarang: 70s. meast. To Batavia: 65s. meast. To Padang: 80s. meast. To Saigon: 100s. meast. To Galle: 40s. meast.

Per Sailing Vessels.—To Yokohama: 40s. meast. To Shanghai — weight, — meast. To Hong Kong: 25s. meast. To Singapore 20s. weight, 25s. meast. To Penang: 35s. weight or meast. To Ceylon: 30s. weight, 25s. meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—To Yokohama: £40. To Shanghai: £42 10s. To Hong Kong: £36. To Singapore: £25 to £26. To Penang: £25. To Galle: £21.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama or Nagasaki: 40s. to 42s. 6d. To Shanghai: 45s. To Hong Kong: 33s. to 34s. To Manila: 27s. 6d. to 30s. To Singapore: 23s. 6d. to 25s. To Galle: 20s.

From Birkenhead, per ton.—To Shanghai: 35s. To Hong Kong: 27s. 6d. To Manila: 30s. To Galle: 21s.

Insurances.

By steamers via S.C., or sailing vessels, f.p.a.:—To Yokohama steamer 35s., ship 40s.; to Shanghai, steamer 30s., ship 40s.; to Hong Kong, steamer 25s., ship 35s.; to Singapore, steamer 20s., ship 25s. to 27s. 6d.

The Admiralty have invited tenders for the conveyance of 167 tons of stores to Hong Kong.

CASUALTIES.

The Dexterous, Robinson, from Colombo to New York, put into St. Helena Aug. 31, and reported that during a very severe gale 14, in lat. 36 S., lon. 18 E., she lost sails, boats, &c., and had her bulwarks carried away.

The Sophia Koningen der Nederlanden, Klein, from Batavia, &c., to London, put into St. Helena Sept. 7, and reported having experienced heavy weather Aug. 18, off the Cape of Good Hope, during which she lost bulwarks and split sails, &c.

The Europa, Supcke, from Singapore and Batavia, to London, put into St. Helena, Sept. 7, having met with heavy weather, Aug. 22, in lat. 35 S., lon. 22 E., during which she sprung her rudder head.

The Cutty Sark (ship), Moodie, from Shanghai to London, passed St. Helena, Sept. 9, and reported by signal that she had lost her rudder off Algoa Bay.

The Robert Kerr, McClure, which arrived at Liverpool, Sept. 29, from Singapore, reports having experienced head winds in the China Sea, being 20 days to the Straits of Sunda, and that when clearing Java head the ship was caught in a terrific squall, which stripped her of all her canvas.

Advices from Amsterdam, Oct. 3, state that the Kennemerland, de Jong, had arrived at Nieuwe Diep from Batavia, and reported having encountered a hurricane, Aug. 21, off the Cape de Verde, which carried away several sails and swept everything movable from off her deck.

The Queen of India, from Manila to Liverpool, put into Algoa Bay, Sept. 2, with loss of bulwarks, &c.

The Sarpedon (str.), Ferguson, which arrived at New York Sept. —, from Shanghai (via S.C.), reports having encountered a hurricane, 23, in lat. 36 N., long. 56 W., lasting eight hours, during which she was hove on her beam ends, and had four feet of water in her engine-room.

A telegram from Aden, Oct. 9, announces that H.M.S. Briton would proceed to the wreck of the Parnassus (str.), at Guardafui; part of the cargo, tin, of the latter vessel will be saved.

MISCELLANEOUS.

At St. Helena.—Aug. 28, Osaka, Leslie, from Ilo Ilo, and sailed 29 for Falmouth; 30, Caroline Coventry, Ellery, from Manila; 31, Wilhelmina, Willenbrink, from Manila, and both sailed 31 for New York; Sept. 1, St. Brycedale, Pearce, from Formosa, and sailed same day for London; Banda, Evans, from Batavia, and sailed same day for Falmouth; 2, Seadrift, Pybus, from Colombo, and sailed same day for London; 4, Canton, Goedt, from Singapore, and sailed 5 for Stettin; Evening Star, La Bœuf, from Singapore; Concord, Park, from Colombo, and both sailed 5 for New York; 6, Veritas, Stahre, from Manila, and sailed 7 for Belle Isle; 8, Java Packet, Trappen, from Batavia, and sailed 9 for Amsterdam.

Off St. Helena.—Sept. 4, Craigie Lee (barq.), from Singapore, for Boston; 9, Aleppo (barq.), from the Phillipines, for London; an English ship, with blue streaks and white ports, from Java, for Queenstown, fifty days out.

The master, De Breuck, of the Andriana Petronella, which vessel arrived at Falmouth Oct. 3, from Batavia, had died at sea.

The Glendarroch (str.), from China, &c. (via S.C.), to London, put into Lisbon Oct. 5, short of coals.

Pacific and Java Mail Steamers.—Messrs. John Elder and Co. have launched from their shipbuilding yard at Fairfield, Govan, a magnificent iron screw steamer of 4,200 tons gross measurement, and 600-horse power nominal, for the Pacific Steam Navigation Company of Liverpool. The vessel is called the Sorata, and has been constructed for that company's weekly service between Liverpool and Valparaiso, and is of the following dimensions:—Length over all, 428 feet; breadth (moulded), 42 feet; depth (moulded), 35 feet 9 inches. Her state rooms and saloon have accommodation for 140 first, 50 second, and 800 third-class passengers. This is the fifth steamer the firm have launched this year for the Pacific Company, and they have other six large steamers in hand for them—viz., the Illimani, Cotopoxi, Potosi, Valparaiso, all screws of about 4,200 tons gross; and two paddle steamers of 1,600 tons—the Islay and Oroya. The firm are also building a screw-steamer of 3,050 tons for the Stoomvaart, Maatschappy, Nederland.

THE TANJONG PAGAR DOCK COMPANY

(LIMITED).

REPORT OF THE DIRECTORS.

The Balance Sheet for the past half-year, which your Directors have now the pleasure to lay before you, affords sufficient evidence of the steadily increasing prosperity of the Company.

The Net Profits for the above period are $33,060.91, subject, however to the payment of $6,061.50, interest from 1st January to 30th of June at 9 per cent. per annum on Preference Shares, and to the payment of a sum estimated at $2,600 due to contributing Shareholders under Clause 72 of the Articles of Association, leaving about $24,399.41 available for dividend.

Your Directors have therefore much pleasure in proposing that a dividend at the rate of 12 per cent. per annum be declared, disposing of $18,000, and that the balance be carried to the reserve fund, which will then amount to upwards of $20,000.

The doubts expressed by your Directors at the last half-yearly meeting respecting the legality of the issue of Preference Shares, having been confirmed by one of the highest authorities in England (Sir Roundell Palmer), your Directors have come to an amicable arrangement with the Preference Shareholders, whereby they have the option of exchanging the said shares for original stock at par, or debentures for 6 years bearing interest at 9 per cent. per annum, or the repayment of the sums so invested with interest at abovenamed rate on 31st August.

This arrangement is entirely to the advantage of the Company, inasmuch as it relieves it of the restriction limiting the declaration of dividends on original shares to five per cent. per annum.

For the purpose of extending the works of the Company in order to meet the increasing demand for Wharf and Godown accommodation, and also to provide for the payment of Debentures as they fall due, your Directors confidently recommend the immediate increase of the Capital of the Company, either by the issue of a limited number of fully paid-up shares, or of a greater number of shares on which calls could be made as required.

Since our last report considerable progress has been made in the construction of a brick store for the Company's Stock. The granite foundation for a brick godown, No. 4, at the west end of the wharf, has been completed—and a wooden godown on piles with tiled roof, similar to those already on the Wharf, is in a forward state. It is expected that these three buildings will be completed within the next six months.

Two hundred feet of wharf at the east side of the Dock has been built, including the foundation for the steam boilers shears—which, with the requisite machinery, will be erected in about two months.

During the half-year there have been berthed at the Wharf—

185 Steamers of Register Tons ... 164,756.
63 Sailing Vessels „ ... 40,534.

The Graving Dock has accommodated—

16 Steamers of ... ... 9,999 Tons.
12 Sailing Vessels of ... ... 7,502 „

Of general Cargo there has been landed and shipped over the Wharf ... ... 70,031 „

And of Coals ... ... 68,627 Tons.
Of Ballast there has been shipped and landed 7,559 „
The quantity of Coals in store on account of constituents was on 30th June ... ... 18,802 „

The staff and plant during the half-year has been maintained in its usual state of efficiency.

Singapore, 5th August, 1872.

JASPER YOUNG, Chairman.

BALANCE-SHEET, 29TH JUNE, 1872.

SUCCESS IN INDIA, AND HOW TO ATTAIN IT.

EFFINGHAM WILSON, Royal Exchange.

The writer is evidently well acquainted with the East, and the information afforded by him is both useful and interesting.—*Daily News.*

The honest yet hopeful way in which practical information is communicated in these pages concerning actual life in India will awaken the dormant enterprise of young men of education and ability, whose prospects may be somewhat indifferent at home.—*Globe.*

A valuable little pamphlet.—*Morning Post.*

The author of this very sensible work appears quite at home in his subject.—*Financier.*

We leave the little book with much the same impression as would be derived from the conversation of an intelligent and observant man of the world.—*Bullionist*

A real and practical knowledge has been brought to bear upon the subject.—*Money Market Review.*

The author of the above-named pamphlet formerly editor of the *Indian Examiner*, and since on the staff of daily and weekly journals in London, seeks a re-engagement as editor in China, Japan, or Ceylon. The advertiser has a thorough knowledge of the practical working of a newspaper, and could undertake the business department also.

Address, J. D. B., care of the Editor of the *London and China Telegraph*, 2, Cowper's-court, Cornhill, to whom references are kindly permitted.

HOLLOWAY'S PILLS

The changes of temperature and weather prevalent in autumn frequently upset persons who are most cautious of their health, and most particular in their diet. These corrective purifying, and gently aperient Pills are the best remedies for all defective action of the digestive organs; they augment the appetite, strengthen the stomach, correct billousness, and carry off all that is noxious from the system. Holloway's Pills are composed of rare "balsamic matter," and on that account are particularly well adapted for the young, delicate, and aged. The field of beneficial work done by Holloway's well-known and widely appreciated Pills is too large to attempt to catalogue all the diseases and distempers remediable by their means.

Excellent accommodation for first-class passengers.

For Freight or Passage apply to NORRIS and JOYNER, 126, Bishopsgate-street Within, E.C. (corner of Cornhill).

JAPAN AND CHINA.

Great Mail Route via New York and San Francisco.

THE PACIFIC MAIL STEAMSHIP COMPANY, under their new arrangement with the United States Government, despatch the following magnificent STEAMERS, of 3,000 tons burden and upwards, with Mails and Passengers, from San Francisco, on the 1st and 16th of every month, for Yokohama, Hiogo, Nagasaki, Shanghai, and Hong Kong, connecting at Hong Kong with the Peninsular and Oriental Line, for Ports in India:—

America	Japan	China
Great Republic	Alaska	Costa Rica
Colorado	Constitution	New York
Golden Age	Oregonian	Ariel

Returning from Hong Kong on the 12th and 27th of every month.

The Pacific Mail Steamship Company's steamers also leave New York on the 10th, 20th, and 30th of every month for San Francisco, via Panama, calling en route at Kingston, Jamaica, and ports along the North Pacific coast.

For rates of fare from England, which include railway transit across the American continent, and other information, apply to H. STARR and Co., Agents, 22, Moorgate-street, London.

UNION PACIFIC RAILWAY.—

THROUGH LINE from NEW YORK to SAN FRANCISCO.

San Francisco,	18 days from England.	
Japan ...	in 38	,, ,,
China ...	in 44	,, ,,
New Zealand	in 42	,, ,,
Australia ...	in 47	,, ,,

Passengers for California and intermediate points on this road are now booked rough from England at the established rates of fare; and from San Francisco to Japan, China, Australia, &c., by the magnificent steamers of the Pacific Mail Steamship Company and United States, New Zealand, and Australian Mail Steamship Company.

For Rates, Tickets, &c., apply to H. STARR and Co., Agents, 22, Moorgate-street, London.

AROUND the WORLD in NINETY DAYS,

by Steam and Rail, by Land and Sea, via North America, Japan China, Sandwich Islands, New Zealand, Australia, Ceylon, India, Egypt, and Continent of Europe.—By authority of the various mail steamship and railway lines comprising the above routes, FIRST-CLASS PASSAGE COUPON TICKETS are now issued for the ROUND JOURNEY, either by way of Japan and China or New Zealand and Australia, at one reduced and inclusive fare.

The route will be over the Great Union and Central Pacific Railway to San Francisco, passing through some of the grandest and most interesting scenery in the world. From San Francisco the tourist will be taken to Japan and China by the Pacific Mail Steamship Company, or to New Zealand and Australia, by the United States, New Zealand, and Australia Mail Steamship Line, and thence by the Peninsular and Oriental Company, via Galle, Madras, Calcutta, and Bombay (over the Great Indian Railway) to Southampton, or London, via Brindisi.

The journey may be broken at any point, and resumed at pleasure

Fare, via China, £221 via New Zealand and Australia, £197.

For further particulars apply to H. STARR and Co., 22, Moorgate-street, London. Agents Union and Central Pacific Railway, &c.

CASTLE LINE OF STEAM PACKETS for PENANG, SINGAPORE, HONG KONG, SHANGHAI, JAVA, and JAPAN.—The following high-classed and full-powered STEAMSHIPS will be despatched as under:—

Steamer.	Class.	Tons.	Dock.	To sail.
Glenroy ...	100 A1	2,100	SWID	Early in Nov.
Glenlyon ...	100 A1	2,200	SWID	To follow
Gordon Castle ...	100 A1	2,000	SWID	To follow
Glengyle ...	100 A1	1,700	SWID	To follow
Drummond Castle.	100 A1	2,000	SWID	To follow
Braemar Castle ...	100 A1	2,200	SWID	To follow
Cawdor Castle...	100 A1	2,200	SWID	To follow

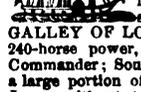
For Freight or Passage, apply to THOMAS SKINNER and Co., 5, East India-avenue, London, E.C.

Steam via the Suez Canal To sail on the 16th Oct.



FOR SINGAPORE, YOKOHAMA, and HIOGO, with liberty to call at Hong Kong, the splendid full-powered screw-steamer GALLEY OF LORNE, 100 A 1.; 1,390 tons register, 240-horse power, nominal; RICHARD ROBINSON, Commander; South West India Docks. This ship has a large portion of her cargo engaged, deliverable at Japan without transhipment. Has elegant accommodation for first-class passengers, including cabin, fittings, bedding, and linen.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

Steam via the Suez Canal. To sail on the 25th Oct.

FOR PENANG, SINGAPORE, HONG KONG, and SHANGHAI (taking goods at through rates for JAVA and JAPAN), the splendid full-powered screw steamer CHEOPS, 100 A1, 984 tons register, 150 horse-power, nominal; JOSEPH DOWDY, Commander; South West India Docks. Has elegant accommodation for first-class passengers, including cabin fittings, bedding, and linen.

For Freight or Passage apply to SHAW, MAXTON, and Co., 2, Royal Exchange Buildings, London, E.C.

Last shipping day, 30th Oct. Steam via the Suez Canal to Saigon, Manila, China, Java, Japan, &c.

FOR PENANG, SINGAPORE, HONG KONG, and SHANGHAI (taking cargo for transhipment to SAIGON, MANILA, JAVA, JAPAN, &c., at through rates at shippers' risk) the magnificent new full-powered ocean steam ship BELLONA, *90 A1 at Lloyd's and *3-3rds L11 in Veritas; one of the steamers of the Deutsche Dampfschiffs-Rhederei zu Hamburg; 1,098 tons register, 600-h.p. effective, 120-h.p. nominal; H. SCHULTZ, Commander; South West India Docks. This steamer has been built for the China trade under special survey, and is confidently recommended to shippers.

For Freight apply to ROBERTSON and Co., 5, Newman's-court, Cornhill, London, E.C.; 10, Orange-court, Liverpool; York Chamb[illegible]ng-str et, Manchester.

HONG KONG DIRECT, now loading in the W[illegible]st India Docks, the well-known clipper ship CŒUR DE LION, now named NUEVA PROVIDENCIA, A1 13 years, 848 tons register, Captain V. de VIDAURRAZAGA. This ship noted for quick passages, has the greater part of her cargo engaged, and will have immediate despatch.

Apply to Messrs. W. and J. LOCKETT, 12, King-street, Liverpool; or the brokers, KNEVITT and Co., 3, Sun-court, Cornhill, London.

With quick despatch.

FOR YOKOHAMA (JAPAN) DIRECT, the well-known clipper ship EASTERN STAR, A1 11 years, 340 tons register; J. SIMPSON, Commander; East India Docks.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

With quick despatch.

FOR SHANGHAI DIRECT, the splendid clipper ship SIR LANCELOT, A1, 16 years (built by Messrs. Robert Steele and Co., Greenock), 886 tons register; R. EDMONDS, Commander; East India Docks. Has good accommodation for passengers.

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

FOR Tanjong Pagar, SINGAPORE.—The following VESSELS are now on the berth in LONDON.

	Tons	Brokers.	To Sail
Kromatah, s.s. ...	805	Smith, Son, & Cole	Nov. —
Havelock ...	455	Wright Bros. & Co	Oct. 19
Galley of Lorne, s.s.	1,390	Shaw, Maxton, & Co.	Oct. 16
Cheops, s.s....	984	,, ,,	Oct. 25
Auriga ...	518	Wright Bros & Co.	Nov. 3
Glenroy, s.s. ...	2,000	Thos. Skinner & Co.	Nov. 10

THE MAILS, &c.

The French mail, bringing advices as above, was delivered, *via* Marseilles, on the 18th inst., three days in advance of its due date. The next inward (P. and O.) mail, with dates Yokohama 4th, Shanghai 8th, Hong Kong 14th, Singapore 22nd Sept., is due, *via* Brindisi, on Monday next, the 28th inst.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, five to six hours in transmission.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Ava*, arrived Oct. 16.—From Yokohama: M. M. G. Protti. From Shanghai: Messrs. Hardris, Harvie, Neil, Stewart, Wiedmann, Larinaga. Barraud, Pierre, Mr. and Mrs. Lango, M. Le Comte de Rochechouart. From Hong Kong: None. From Saigon: M. Salandroz de la Morny. From Batavia: Messrs. Naltherius, Van der Wattering, D'Aulnis, Madame Van Putten. From Singapore: Messrs. Lawrin, Smale, Maxras.

PASSENGERS OUTWARD.

Per P. and O. steamer *Simla*, from Southampton, Oct. 10.—To Yokohama: Mr. F. C. Hayes, and two second-class passengers. To Shanghai: Mr. A. B. Steel, Mrs. T. B. Hooper and two children, Mr. W. R. Burton, Mr. Brewer. To Hong Kong: Miss L. Robertson, Miss Simpson, Mr. E. Moore, and two second-class passengers. To Singapore: Mrs. Trotter and three children, Mrs. Dunlop and child, Mr. Nai Sootchai Bhannwongse, and five second-class passengers. To Penang: Mrs. Speedy. To Ceylon: St. Surg. W. B. Dalby, R.N., Mr. G. C. Rosmalecocq, Miss Morrison.

Per P. and O. steamer *Mooltan*, from Venice, Oct. 18.—To Penang: Mr. Speedy, Mr., Mrs., and Miss Vermont. To Singapore: Mr. J. M. Matson, Capt. and Mrs. Caldbeck. To Ceylon: The Mackintosh of Mackintosh, Mr. S. Holmes.

Per P. and O. steamer *Mooltan*, from Brindisi, Oct. 21.—To Shanghai (*via* Bombay): Mr. J. E. W. Stewart. To Hong Kong: Mrs. C. A. Sinclair. To Ceylon: Mr. R. Morris, Mr. and Mrs. Bosanquet.

Per P. and O. steamer *Poonah*, from Southampton, Oct. 24.—To Hong Kong: Mr. H. H. Thornton, Mr. J. Alexander. To Singapore: Miss Rickards.

Per P. and O. steamer *Pera*, from Brindisi, Nov. 4.—To Yokohama: Mr. E. Grosser, Mr. H. Bramstedt.

Per P. and O. steamer *Pekin*, from Southampton, Nov. 7.—To Shanghai: Mr. Wulff. To Ceylon: Mrs. Bayley and child. To Hong Kong (*via* Bombay): Mr. W. H. Flitcock.

Per P. and O. steamer *Malta*, from Venice, Nov. 15.—To Yokohama: Mr. and Mrs. A. Ewers. To Ceylon: Mr. Quilty.

Per P. and O. steamer *Malta*, from Brindisi, Nov. 18.—To Shanghai: Mr. and Mrs. H. Robinson.

Per P. and O. steamer *Indus*, from Southampton. Nov. 21.—To Hong Kong: Mr. C. V. Creagh.

Per P. and O. steamer *Simla*, from Venice, Nov. 29.—To Singapore: Mr. and Mrs. J. R. Mac Arthur.

Per French mail steamer *Amazone*, from Marseilles, Oct. 27 (booked from London).—To Yokohama: Mr. Chastil de Bouirille. To Shanghai: Mr. and Mrs. Lemaire. To Hong Kong: Mr. E. Moore, Mr. Speechly. To Singapore: Mr. and Mrs. Labhart Lutz. To Batavia: Mr. Van Berkil Bik, Mr. Van der Zwain, Mr. Van Hemert. To Galle: Mr. Daniell.

Per French mail steamer *Ava*, from Marseilles, Nov. 10 (booked from London).—To Hong Kong: Mr. and Mrs. Lammer and four children, Mr. E. Beart. To Singapore: Mr. and Mrs. W. Ullemeister. To Batavia: Mr. and Mrs. Nogel, Miss Kline, Mr. A. Matkins, Miss Clona, Miss Mees, Mrs. Praterms, Miss Guiem. To Galle: Mr. G. Phear.

Per French mail steamer *Donnai*, from Marseilles, Nov. 24 (booked from London).—To Hong Kong: Mr. M. Beart. To Batavia: Mr. and Mrs. Hora Siccoina, Mr and Mrs. Kleberg, Mr. John S. Dick.

Per steamer *Galley of Lorne*, from London, Oct. 17.—To Yokohama: Mr. W. Barrie, Mr. W. Goetz, Miss Belshaw. To Hong Kong: Mr. J. Gilmoeden, Mr J. Peterson, Mr. G. Ohlrich. To Singapore: Mr. W. Pearson, Mr. R. W. Bernard, Mrs. Dunman, Miss A. Dunman, Miss E. Dunman, Miss H. Armstrong. To Port Said: Mr. Andrew Finlayson.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

BURNING OF THE PACIFIC MAIL STEAMER "AMERICA."

On Tuesday last we published an "Extra," containing some details of the destruction by fire of the Pacific Mail Steamship Company's steamer *America*, which we had received from our correspondent at New York. The present mail brings more complete accounts of the disaster, and the following narrative is taken from the *Japan Mail* of the 26th and 27th August:—

Never since the year 1861, when the steamer *Golden Gate* was burnt off Manzanilla and over 300 lives lost, has the Pacific Mail Steamship Company suffered so severe a loss as that caused by the burning of the *America*. The loss of life by the latter catastrophe is, it is true, a mere bagatelle compared with the drowning or burning of over 300 persons; but the *America* was the finest wooden ship in the world. Built only in 1869 at a cost of about $1,600,000, with a registered tonnage 4,554 tons, she has since been the pride of the company, and it may well be that her loss will cause many a pang of sorrow, even among those whose interests were in no way connected with her fortunes. The vessel left San Francisco on the 1st August with about 150 Chinamen, thirty first-class passengers, a large miscellaneous freight, and about a million and a half dollars in treasure. After a pleasant voyage she arrived at Yokohama on Saturday morning, Aug. 24, and during the day large quantities of freight, both for Yokohama and Shanghai, were landed or transhipped, and all the treasure, with the exception of $400,000, was removed. At the same time a large quantity of coal was taken on board. In the evening, as usual, the coolies stopped work, and most of them went to sleep on the fore deck. The watchman went his rounds and reported all safe, and no one dreamed of the danger which was so shortly to befall them. At 10.15 all was quiet; the officers for the most part had turned in, or were about to do so, and there was probably no one but the stewardess and a quartermaster near the saloon. A little before 11 the stewardess said she smelt something burning, and on a quartermaster going to look he discovered dense volumes of smoke just rising from the freight deck below the ladies' saloon. At once the fire alarm was sounded, and every man was at his post in a moment, ready to attend to the orders of Captain Doane, who, as good fortune would have it, was, with nearly every officer of the ship, on board, although asleep. Captain Doane was the first in the saloon with the hose, and, despite the smoke, so dense that nothing could be seen of the seat of the fire, he worked against the advancing destruction with all the energy of desperation. At this time it began to be evident that the fire was one which could not be extinguished in a few minutes, and when Captain Doane was driven back, unable to stand the smoke, the thought was rather to save life than to do aught else. But still all fought on; inch by inch, foot by foot, they retired as the smoke forced them back, and then, with a sudden and furious roar, burst forth the flames, filling the saloon and in fact practically deciding the fate of the gallant ship. To flood the magazine was Captain Doane's next desire; but so far as could be learnt

Digitized by Google

from the officers, this was not done, it being impossible to reach the magazine owing to the smoke, which, by this time, had advanced even to the bows; the wind, however, leaving a few feet clear in the very eyes of the vessel. Captain Doane, still intent upon his duty, tried to go forward to see what could be done, and he contrived to reach this one safe spot. Soon, however, the flames rolling onward compelled him to jump overboard. Either from the effects of the high leap or the inhaling of the smoke, Capt. Doane, as he struck the water, found his legs paralysed and himself unable to swim. Twice he sank and none were near to help him, but on rising for the last time, the friendly hand of Capt. Williams, of the *Costa Rica*, grasped him by the collar and he was saved. He was at once taken on board the *Costa Rica* and restoratives applied, by the aid of which he gradually revived, and is now comparatively restored to health, though suffering much from the effects of the smoke.

The officers seeing that all that could be done to save the ship would prove ineffectual, turned their thoughts to rescuing the passengers, and the Chinamen, a few of whom with their baggage were soon sent down the gangway into the boats which had been lowered. But so great was the crush, and so many Chinamen crowded on the ladder, that it gave way, and about fifty were precipitated into the water. Of these many were picked up; but all those who were still on the ship had to jump overboard, and as many could not swim, there were doubtless some lost. Only five or six bodies have, however, been found, and it may be that this covers the number of those who lost their lives. The passengers safe, the officers themselves jumped overboard and, so far as we can learn, all were saved without difficulty; some doubts however being expressed with regard to two men. It was some time after this that Captain Doane left the ship. By this time the flames had enveloped the vessel from end to end, and crowds of persons put off in boats to witness the sad scene, and if possible to save the lives of any unfortunate beings struggling in the water. To do anything to save the ship was impossible. She was inevitably doomed to burn to the water's edge, unless indeed it should be found possible to scuttle her. This was indeed attempted; several launches put off from the men-of-war with howitzers, but the effect of the shot on the sides of the ship, three feet thick at the water line, was like that of a pistol bullet against a stone wall. The shots fell back into the water, scarcely doing more than denting the sides of the vessel.

Time went on; the flames roared with incessant fury; the hurricane deck was consumed; the main deck followed; but still she towered above the surrounding vessels. The flames had hold of every nook and crevice. They had penetrated into every part of the hold, and the coals burning with inconceivable fury rolled up vast columns of smoke out of the smoke-stack, which, like the masts, still stood erect and defiant. Bye-and-by, as the fire crept down, and rushing out of the port-holes licked the sides of the ship, the mizzenmast, burnt through, fell; some time after the foremast followed, and then, about two A.M., the mainmast. Now nothing rose above what was once the main deck but the rudder-post, the fore binnacle, and the machinery and funnel. Soon the binnacle went, and the bell, burnt from its fastening, tolled a dying knell and fell with a sound heard above the roaring of the flames, while ever and anon the cartridges on board exploded with the rattle of a mitrailleuse. Then the fastenings of an anchor at the bow were burnt through, and it dropped with a splash into the water, followed by the chain, red hot, and almost melted out of shape. About this time much fear of an explosion was entertained, it being thought that the magazine was still dry and that the boilers would explode. But although the steam from the donkey engine rushed out at the fore port, with a fury heard above the roar of the flames, no explosion took place. The sight as viewed from the *Costa Rica* at 3 A.M. was a sad one indeed. That fine ship, the largest wooden vessel in the world, destroyed, as it were, in a moment, and no matter how willing, none could help her. At 3.30 the fore guard fell with a crash, carrying with it an iron boat which rested on it, and with a roar fell into the sea; the after guard followed with another boat, which, actually white hot, sent up a cloud of steam as it fell into the water and sank. Then the flames attacked the wheels, and the paddle-boxes of wood were soon lost, leaving the iron wheels exposed to the flames, which, however, could not destroy them. Not so the walking beam, which becoming unloosed at one end slewed round and turned the wheels one last half turn, the last they will ever make. And still she burned on. The fire gradually crept down, the ship rose from the water as she burned, till as daylight came she was one body of flame. Then the glare of the bright flames paled, and those who had spent the night on the *Costa Rica* returned on shore. Just as they arrived the fire reached the powder magazine; but its contents being flooded burnt gradually and harmlessly. And so all day she burned, till a storm of rain and wind somewhat quenched the blaze. And then it was decided to let her drift over to Kanagawa, and, loosed from her moorings, she was towed off, but unfortunately on her way she fouled three ships, each of which was somewhat damaged. And now she lies at Kanagawa, with only her funnel to mark her resting-place, a sad remembrance of what fire may in a few hours do to one of the finest works of man. What is lost in her we cannot estimate. The treasure may or may not be saved; and this alone amounts to $400,000. The officers of the ship lost all they had, while the saloon passengers, only two of whom were on board, lost everything except the clothes they wore. What freight was on board few, if any can tell; but it is certain that its value was very considerable. The origin of the fire is entirely unknown. It broke out as we have said in the after hold, but its cause is a mystery to all, though it is not improbable that it was caused by a coolie or some native smoking, and accidentally emptying the ashes of his pipe within reach of some inflammable freight. The cargo or fire smouldered till the smell of smoke induced a search, when a draught was at once created and the flames burst out and spread. We would say, however, this is only a supposition.

A report has been spread to the effect that most of the officers were on shore; that a gross want of discipline was evinced on the outbreak of the fire, and that great carelessness was shown in not towing the ship away when she caught fire. These reports are as false in suggestion as in fact. All the officers but the doctor were on board, and within a few seconds of the alarm being given all were at their respective staions. It was impossible to approach the ship within a few minutes after the outbreak of the fire, and no effort to tow her off would have been successful, and even if so it would have been dangerous in the extreme to tow a burning ship in a crowded harbour. When it was found that the ship must be lost the first thought was to avoid any damage to the other vessels, and the wisest course was undoubtedly adopted. When the ship was towed over to Kanagawa, no one, even then, could board her, and the anchor which fell overboard during the fire dragged on the ground, thus rendering her unmanageable, and despite the greatest care being exercised the collisions which took place were inevitable. In fact, from beginning to end, everything was done which the circumstances allowed, and so far from any blame being attached to the officers of the ship, they, one and all, behaved unselfishly and nobly, and deserve every credit for their conduct. Captain Lane and Captain Doane were untiring in their efforts, while every officer worked as if imbued with that same spirit of gallantry which animated their chiefs.

With respect to the loss of life we regret to find that two Europeans are missing, Barker, the second cook, and the steerage watchman; and we fear they are drowned or burnt. It is known that five Chinamen were lost; but as all were scattered after the fire, no opportunity has as yet been afforded for the number of the missing to be ascertained. There is a rumour that thirty Chinamen were lost, but this we think is largely in excess of the actual fact. The officers and crew have all been quartered in the various hotels, and the Chinese passengers have also been afforded excellent accommodation.

NAGASAKI.

We have advices from this port to the 18th August. The following items of news are from the *Nagasaki Express*:—

Another stage in the Municipal question has been reached by the appearance of a letter, circulated on the 10th Aug. by the Consular representatives for the general information of the land renters, intimating that it is the intention of the former to deliver up the charge of the affairs of this settlement to the latter.

H.B.M.S. *Sylvia* arrived in this harbour on the 13th Aug., for the purpose of making a further survey of the locality where the P.M. steamer *Oregonian* struck. This vessel will shortly return to England, as she has now been about seven years in commission in these parts.

Among the passengers by the P.M. steamer *Costa Rica*, which left on the 14th Aug., were some thirty-four Chinese youths who are proceeding to the United States, in order to receive a collegiate education in that country.

News recently received here by natives speak of the welcome given to the Mikado during his visit to Kagosima. Amongst the entertainments got up on the occasion was a wild boar hunt, which his Majesty enjoyed. The visit to that place has dispelled the prevalent feeling amongst the lower orders that hostility would be shown there by the people.

The arrival of thirteen merchant sailing vessels during the week has to be noted as an event which has not occurred at this port for a considerable time past. The destination of the majority we hear is Shanghai, to which port they will convey coals.

R. G. Watson, Esq., H.M.'s Chargé d'Affaires, is expected here very shortly, on a visit.

CHINA.

—o—

PEKING AND TIENTSIN.

The *Peking Gazette* contains an interesting memorial from a Yunnan expectant prefect, recommending the re-opening of the copper mines in that province. The local advantages of the step are pointed out very clearly, and though the "raising of an efficient army" is the object immediately contemplated from the resulting profit, the memorialist does not fail to enumerate other contingencies more pertinent to the prosperity of the country. The miners, driven by want to join the rebels, would return to their work, the resuscitation of the copper trade would give such an impulse to business generally that merchants and settlers would be induced to emigrate from other parts, and the debased and insufficient copper coinage would be corrected. The Board of Revenue, which has been ordered to consider the project, might well extend the economic application of Hsü Chenghsuns's suggestion to every province in China, and to all her mineral resources.

The Tientsin road steamer has been got under steam. Mr. Wells, the engineer, with some coolie assistance, put the machinery together, and the engine has received a preliminary and private trial. When the omnibus is also set up, a public trial is intended. Meanwhile, the greatest interest is manifested in the project, both by natives and foreigners, and it is gratifying to find that in this interest on the part of the Chinese nothing of an unfavourable nature has yet appeared. A letter from the Customs Taoutai admits the machinery duty free, and accepts the innovation in as friendly, if at the same time cautious, a spirit as could be desired.

Count de Rochechouart arrived at Tientsin on the 22nd Aug., and it was expected that M. Geoffroy would arrive on the 24th, *en route* to Chefoo. There is no news yet of diplomatic movements as to the Audience Question, but it will be very strange now if the demand were not to be made, and if M. Thiers's despatch to the Emperor should after all be sent to Prince Kung to forward.

Digitized by Google

The new Governor-General for Fuhkien and Chekiang, named Le Haou-neen, lately Governor of Honan, reached Tientsin on the 18th Aug., on his way to Foochow, but instead of going by sea, proceeded next day, *via* the Grand Canal, having, it is said, received the Emperor's command to take that route, in order to inspect on their state.

The Governor-General of Shense and Kansuh, Tso-tsang-tang, is now over seventy years of age, and it is rumoured that he has applied to retire, and that Li Hung-chang is to replace him in Shense. It is more probable, however, that if Li leaves Chihli, he will go to Nangking as Viceroy.

SHANGHAI.

We have advices from this port to the 1st September. There had been no mail arrival from London since that of July 12, which arrived out on the 23rd August. The following summary of news is from the *North China Herald* and *Shanghai Courier*:—

We regret to have to mention that on the 23rd August telegrams received here announced the suspension of the old established house of Messrs. Gledstanes and Co., of London, and that some of our China houses are likely to be compromised by the occurrence. The Chinese are said to have expected as a result of the news a forcing of the market for staple imports, and have consequently held back, but although business in imports has been dull and exchange has gone up in consequence, rates have suffered no diminution.

It is announced that, owing to unforeseen difficulties in London, the establishment of the Bank of China is postponed for the present.

We understand that the contract for the construction of the new free ferry across the Soochow Creek has been taken by Messrs. Farnham and Co., and that the works are to be proceeded with at once.

As Mr. Lang,the editor of the *Evening Courier*, was making his way home on foot from Shanghai to Hongkew about eight o'clock last night, and had reached a quiet and dark part of Nanzing road, about 100 yards above the Police-station, he observed a Chinaman coming straight towards him, who, without uttering a word, struck him a violent blow on the left temple and cheek with something hard which momentarily stunned him. The Chinaman stood back as if preparing to strike again, when Mr. Lang, recovering himself, called loudly for assistance, on which the Chinaman ran off towards the Bund. But the police at the station had heard the cries, and rushing out seized the Chinaman. A foreign hammer weighing about five pounds was found on the road, which on examination of Mr. Lang's wound proved to be the weapon used. As a gold watch guard was visible on the breast of Mr. Lang's coat, it is supposed that robbery was the motive of the assault. On being brought up at the Mixed Court, the prisoner, in the face of conclusive evidence that he was the only Chinaman in the street at the time, maintained that he knew nothing of the affair at all. His manner was so bold, and his language so loud and insolent, that Chen ordered him to be beaten there and then; and he accordingly received 200 blows. When his back was stripped it was observed that it was profusely marked with the weals peculiar to the foreign mode of flogging used at Hong Kong. Yet he persisted that he had never done anything wrong and had never been flogged in his life. The Superintendent of Police applied for a remand for a week, to give time to inquire more thoroughly into his antecedents.

A case was tried at the U. S. [Consulate-General on the 28th Aug. before O. B. Bradford, Esq., Vice Consul-General, and Messrs. S. D. Webb, and W. C. Eastlack, Assessors. Messrs. Boyd and Co., engineers, sued Mr. F. H. B. Jenkins for Tls. 589, for work done by his order on the engines of the steamer *Daimio* in March and April 1871. The work done was admitted; but it was pleaded in defence that defendant was known by plaintiffs to have been only acting as agent for the owner—a Chinaman named Ping—and further, that, in consideration of getting a subsequent and larger contract for work on the *Daimio*, plaintiffs had agreed to waive their claim for the work now claimed for. Evidence for plaintiffs to rebut the defence was given by Mr. P. V. Grant, partner of Messrs. Boyd and Co., and sundry documents were handed in. In support of the defence, evidence was given by Ping, the owner of the *Daimio*, by the defendant, and by Mr. C. P. Blethen. The learned Counsels then addressed the Court, which gave judgment for the defendant.

At the Italian Consulate-General Guiseppe Bolmida was brought up on a charge of uttering, knowing it to be forged, an endorsement on a deposit receipt or acquittance, with intent to obtain from the Chartered Mercantile Bank of India, London, and China the sum of Tls. 300, and thereby cheat and defraud the estate of the late Abram Pease. The receipt was stolen from among the papers of Mr. Pease, at the time of his death, in hospital, and came into Bolmida's hands. The prisoner was sentenced, under Art. 381 of the Italian Criminal Code, to four months' imprisonment in the English Consular jail, and to pay his own expenses.

A case which has excited a good deal of interest has been disposed of at the Danish Consular Court. The defendant, Mr. H. Curjel, has been annoyed by disturbances in a neighbouring house occupied by Chinese, and particularly by the screaming of a woman. Believing that the woman was being beaten by her husband, and anxious to have this and the annoyance to himself put an end to, he applied to the police, but as they could not interfere, he seized the Chinese complainant, and, taking him into a godown, tied his hands and gave him a flogging. It appeared subsequently that the woman's screaming was the result of pain from sickness. The Court animadverted strongly on the manner in which defendant, acting on a mistaken impulse, took the law into his own hands, and fined him $500, with costs not to exceed $100, ordering him also to enter into his own recognisances in $1,000 to keep the peace towards Chinese for twelve months.

In the police court a flagrant case of flogging on shipboard has been investigated. The complainant is a lad named Dennys, on board the ship *Belted Will*, and the defendant Captain Hollywell, of that vessel. The magistrate decided that three instances of unwarrantable flogging had been proved, and fined the defendant $75 and costs.

The Taoutai of Shanghai, in response to an application from the Consular Body on behalf of the Municipal Council, has granted to the latter such ample powers as to the inspection of butchers' shops, slaughter-houses, cattle-pens, &c., in and near the foreign settlements, that almost all conceivable cases of diseased cattle or meat can be dealt with summarily at the Mixed Court, without the need of an application to any foreign tribunal.

We understand that the Municipal Council have voted a sum of Tls. 300 towards providing the Mounted Rangers with carbines, but as the actual cost of supplying forty carbines will doubly exceed this sum, the members of the corps, at a general meeting held on Wednesday, agreed to subscribe Tls. 9 each, and so provide sufficient funds.

HONG KONG.

Our advices by this mail extend to 7th September; the P. and O. mail from London 26th July arrived out on the 30th Aug. The following items of intelligence are taken from the *China Mail* and the *Daily Press*:—

A meeting of the Legislative Council has been held, the Governor and all the members being present. Three Japanese gentlemen, who have been before mentioned as visiting the colony for the purpose of noting the forms of English administration, were seated in the room, and appeared to watch the proceedings with much attention. A despatch was read from Earl Kimberley recommending to the attention of the Colonial Government Prince Philip and the son-in-law of the Emperor of Brazil, who will shortly visit Hong Kong. The Acting Attorney-General read the report and draft ordnance of the committee appointed to inquire into the storage of explosive substances. The ordinance was ordered to be printed and placed in the hands of members. The Acting Attorney-General then read the report of the select committee upon the Brokers' Ordinance, which recommended the postponement of legislation on the subject. The Estimates for 1873 were then brought forward and explained by the Acting Colonial Secretary. The police force, which is to be strengthened, a new hospital, a new fresh water main, and some other items, formed the principal points touched on, and the full report will be found of much interest. After some votes for minor sums the Council was adjourned until the 17th Sept.

We note the arrival by the M.M. steamer *Ava*, from Shangai, of Count Rochechouart, late French Chargé d'Affaires at Peking. He proposed to go home *via* Siberia, but for some reason has changed his route.

The performance of the Yedo Troupe, at the Lusitano Theatre, went off very successfully, and appeared to give satisfaction to the audience. The acrobatic feats by little All Serene on the balanced ladder were more extraordinary than any that have yet been given, while Miss Kitchi's slack rope dancing and butterfly trick were both well appreciated. The last trick, in which a live bull should have been balanced in a sampan, did not go off satisfactorily, as the bull when got into the boat became restive, from being in a strange place. The proprietor apologised for the shortcoming, and to prove the strength of the acrobat, had half-a-dozen of the smaller members of the company placed in the boat, which thus loaded was balanced on his feet.

We are glad to hear that the Amateur Dramatic Corps are making good progress with their arrangements for the coming season. Another comedy is in hand, and it is hoped to give a performance the first week in October, to be followed by a regular series during the cool season.

The Spanish steamer *Bueno Ventura*, a sister to, and belonging to the same owner as the steamship *Ynarac Bat*—which vessel fitted up here and left a few days back for Macao, for a cargo of coolies—has arrived here to fit up for the same purpose.

The North-German barque *Marie*, reported ashore, empties and fills with water as the tide ebbs and flows, a rock having forced itself right through her bottom. The tug *Sir Jamsetjee Jeejeebhoy* returned again to the wreck with more lighters, having towed in ten cargo boat loads of her cargo. The steamtug *Flume* laid by her an hour or so, and left H.I.C.M. steamer *Chen-jui* in attendance. Captain Cairns, Marine Surveyor, returned from the wreck in the Canton steamer.

If a municipality were granted to us, we would in a very short time find our streets properly paved, the lighting extended with

Digitized by Google

prudence, while in the water supply the inhabitants would be considered as a general body entitled, not from the accident of birth, but from the fact of being householders and ratepayers, to a sufficient supply of that necessary element. The much talked of question of a proper and efficient fire brigade would be taken off the shoulders of those officials who, from the position they occupy with credit to themselves and service to the State, ought not to be saddled with the duties attendant upon a superintendent of a fire brigade.

Bazaars would be properly inspected, while street hawkers and chair-coolies would be under a supervision greatly missed at present. The conservancy of the different alleys and streets would be a further responsibility in a primary sense on the Municipal Commission, while that body would serve to secure more attention from the police force, which, as at present constituted, we all know is far from what it should.

Let Government grant us what we advocate as a trial even, and if at the end of a given time, say three or five years, the change has not resulted in improvement, then the authorities to have power to revert to the system now in force—a system which we condemn as entirely unfitted to the circumstances and requirements of this colony, as eminently calculated to retard improvement, and as possessed of many points which will, sooner or later, combine to render Hong Kong unhealthy and unsafe.

The alterations in the City Hall theatre have already been commenced, and promise to make the stage, what it might easily be, one of the most convenient and well adapted to its purpose to be found in any theatre of the size. Other improvements are also in progress. Steps are being taken to guard the centre north windows against typhoons, and the outside of the building will shortly be renovated.

We regret to learn that Dr. Young, so long the well-known and efficient medical superintendent of the Civil Hospital, has resigned his appointment, on account, as we are informed, of some difference of opinion between H. E. the Governor and himself. Knowing nothing of the merits of the case we cannot, of course, offer any comment, and therefore confine ourselves to a simple announcement of the fact.

The German barque *Martha* has been sold, and has hoisted the American flag; she is commanded by the master of the late American ship *Congress*.

SIAM.

—o—

BANGKOK.

The *Siam Advertiser* has the following:—

On the 16th Aug. the examinations of the Petch'aburce Industrial School were held. The young ladies were examined in reading, arithmetic, and geography, and original composition. They took their turns at the black board, and read their original pieces, without evincing any particular embarrassment, although the schoolroom was crowded, and at the head of the audience were seated the mother and wife of the Governor, and the Lieut.-Governor and his wife. This is the more remarkable, too, because but a few months ago these young women were not able to read a word even of their own language.

After the examinations the Rev. N. A. McDonald delivered a short extempore address to the members of the school. In the afternoon a bazaar was held, of the products of the Industrial School, consisting of clothing for the natives and fancy work of various kinds. The bazaar was liberally patronised by those high in rank who were present and also by the other natives. On the 18th the new Mission Chapel was dedicated to the worship of Almighty God. The dedication sermon was preached by the Rev. C. B. Bradley from 1st Kings 8, 27—"But will God indeed dwell on the earth"? The house was crowded, and numbers were seated outside, but Mr. Bradley's superior knowledge of the native language and his excellent sermon commanded profound attention. The dedication prayer was made by Rev. N. A. McDonald. On the afternoon of the same day the Rev. S. G. McFarland baptised two native converts, after which he administered the sacrament of the Lord's Supper.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Advices extend to the 16th September; the P. and O. mail from London Aug. 9 arrived out Sept. 8. The *Singapore Daily Times* supplies the following summary of news:—

The last *Government Gazette* contains an order of the Governor in Council with regard to the Steam Vessels Bill, directing that applications for the survey of steamers shall be made to the Colonial Secretary at Singapore and the Lieut. Governor at Penang. These officers are to keep in their offices a list of ship surveyors and a list of engineers appointed by the Governor, and when a survey is to be held one surveyor must be taken from each list in the order of their names. Lieut.-Colonel Smith, having succeeded to the command of the troops in the Straits, was on the 2nd Sept. sworn in as a member of the Executive Council. The appointments are notified of Mr. H. F. Plow to be a Justice of the Peace, of Mr. D. F. A. Hervey as Acting Police Magistrate at Malacca, Mr. C. E. Velge as Acting Senior Sworn Clerk at Singapore, *vice* Mr. Hervey, and Mr. R. W. Maxwell to be Acting Sheriff of Singapore, *vice* Mr. Velge.

Before the Ports and Harbours Bill comes before the Legislative Council for final reading, we would join the unofficial members in opposing the principle involved of giving the Master Attendant power to interfere in the working and management of the private wharves and docks, and of the shore within the harbour limits to within fifty feet of high water mark. It is true this power is to be exercised only under rules to be made by the Governor in Council, and we are told it would be wrong to expect that the Governor would make rules by which its officers would be entitled to exercise undue interference with private rights.

The official reports from Deli come down to the 9th August, and are to the following effect:—On the 21st July, the troops, without suffering any loss, took and burnt two campongs; on the 24th, 200 men, with one howitzer and three mortars, marched to Ujong Barat, found it abandoned, and burnt it. During the upward march, the Battas attacked the advance guard, but were repulsed with the loss of thirty killed. After these losses, the Battas seemed to have withdrawn into the mountains, and they seem to be disinclined to aid the rebellious Datus, who begin to suffer from want of money, arms, and ammunition. These things make the state of affairs in the inland portions of the country much more tranquillising.

The feud between the Ghee Hoks and Say Lims has broken out afresh, and both parties made several raids into the streets, but the police managed to prevent anything serious. Five men only were arrested, one having a flag mounted on a pole in his possession. One man was sent to hospital, but he had only a badly bruised eye, owing, it is supposed, to a heavy fall while endeavouring to escape over the roofs of the houses. The police are still patrolling the streets in the disturbed quarter of the town, and it is probable that nothing serious will occur.

The *Sarawak Gazette* says:—A large ship, chartered by a China company, is loading bilian at the mouth of the Rejang. The visits of timber ships to this river are now becoming periodical, and a large gang of coolies is regularly employed on shore cutting down the trees and squaring the blocks for shipment. The timber, which is felled at some distance up the river, is brought down the stream, and put on board at the mouth. There is a great abundance both of bilian and other fine woods for building purposes in the old jungle on this river, and the present traders are said to make large profits on the sale of the timber in China. In countries infested by white ants iron-wood posts are a great necessity if any permanence is expected in houses, and every facility is offered here to those who are willing to work it either for home use or exportation.

Commercial Report.

—o—

(*For dates see first page.*)

IMPORTS.

Shanghai.—Manufactured Goods.—The market had continued extremely dull for all descriptions of cloth, prices generally showing a further slight decline as compared with the figures of last mail. At Tientsin and Hankow the trade was still reported to be unsatisfactory, and, in view of heavy stocks of the leading articles, dealers were only buying for immediate requirements, expecting that a lower range of value would be established. Of Grey and White Shirtings and T-Cloths the additional settlements had been very limited, and easier rates had, in most instances, been accepted. English and Dutch Drills had been in less demand, but were firmly held. In Fancy Cottons there was no change to report, and the market for Woollens continued strong, with fair demand.

Hong Kong.—Nos. 16/24 Yarns were lower, but Nos. 28/32 steadily commanded former currencies. Grey Shirtings and T-Cloths were being quitted at reduced rates, but Drills were in demand and were dearer. Long Ells, Blankets and Camlets were in demand at steady prices. The market for Metals was very firm. Quicksilver was quoted $99 00 to 100.00. Rice was lower, as demand was slack.

Saigon.—In the market for Piece Goods there was scarcely any change to report. A dull tone prevailed, but at the following quotations sales could be effected:—Grey Shirtings, 8¼ lbs. $2.65 per piece; 7 lbs., $2.30 to 2 25. Irish Linen, No. 150, $1.75 per piece; No. 120, $1.70. T-Cloth, 6 lbs., $1.75 per piece; 5 lbs., $1.45; 4½ lbs., $1.32½; 4 lbs., $1.25.

Singapore.—There had been no alteration of any importance in the market.

EXPORTS.

—o—

TEA.

Hankow.—Advices to 27th Aug. reported a fair amount of business for the interval, settlements being 8,000 chests. Shipments to Shanghai on native account had amounted to 13,000 chests.

Shanghai. — Black: A good general business continued to be transacted without any noticeable change in values. Late receipts had consisted principally of the commoner grades, and the market was well supplied with this class, while desirable parcels were becoming rather scarce. The settlements reported during the week had been 20,252 chests, reshipments 2,087 chests, and the stock was estimated at 41,461

Digitized by Google

chests. Green: Buying has continued on the basis of the previous week, and purchases were about equally divided between English and American buyers. Settlements: Moyune, Teenkai, Fychow, 19,747 half-chests; Pingsuey, 4,710 half-chests; total, 24,457 half-chests; stock, 39,500 half-chests.

FOOCHOW.—For the period of the season an unusually large business, principally in Congou, had been done during the week. Congou: Settlements had been 31,114 chests at Tls. 6 to 27½, and Tls. 30 for boxes. The large business transacted had given a firmer tone to the market, and an advance of from 5 mace to a tael may be quoted on all Teas over Tls. 14. Arrivals, 16,150 chests. Souchongs: 1,323 chests had been taken at Tls. 15 to 28, and Tls. 37 for boxes, prices showing a hardening tendency towards the close. Arrivals, 1,500 chests. Oolongs: No business reported. Arrivals, 5,960 half-chests. Scented Teas: Settlements, 6,700 boxes at Tls. 13 to 23 for Caper, and Tls. 21 to 25 for Scented Orange Pekoe. Arrivals, 5,725 boxes. Flowery Pekoes: Settled, 100 chests at Tls. 29 to 30½. Arrivals, 100 chests.

AMOY.—But little business had been doing in Ooloongs, and with the ruling quietness, Teamen were inclined to accept lower rates. Arrivals of Ooloongs to date, 150,683 half-chests; settlements 137,119 half-chests; and stock, 13,571 half-chests.

CANTON.—The market had remained quiet and inactive since the departure of the English mail. Buyers showed no desire to purchase from the stock on offer at prices which meet the ideas of holders. A few musters of Scented Orange Pekoe from the fourth crop had been shown, but not in sufficient quantity to represent the quality of the crop. No musters of Scented Caper had been exhibited. The Teamen, as a rule, were firm, and prices must be quoted nominally the same as last mail.

SILK.

CANTON.—There had been a small demand for Tsatlees, and considerable settlements had resulted at a slight decline. Holders were less willing to sell at a further reduction, though at the close the market was quiet at $475 for market Tsatlee. Shipments by this mail would be 800 to 900 bales. For re-reels there was less inquiry, and no contracts are reported: prices for these still had a downward tendency.

SHANGHAI.—There had been much less activity during the week, buyers being apparently discouraged by rather unsatisfactory advices that had been received from London by telegraph. Values had consequently become decidedly weak, and Silkmen showed anxiety to sell at any figures approximate to the quotations ruling last mail, although owing to the firmness of markets in the interior no material decline had been submitted to. Additional settlements amounted to 800 bales, making the total to date 30,300 bales. The unsold stock was estimated at 9,000 bales, which, however, included a considerable quantity of Szechuen Silk. Among the settlements were Koo-fong-sing's chop No. 3, at Tls. 590; Red Peacocks at Tls. 510; and Blue Elephants at Tls. 527½ to 530.

The Messageries Maritimes Company's steamer Ava, with the present inward mail, arrived at Marseilles on the 16th inst., at 11 P.M. Her cargo for London—viz., 525 bales of silk, 4,066 packages of Tea, 203 packages of copper, 933 bales of tobacco, 333 packages of sundries—will be forwarded per Company's steamer Delta to London, where it may be expected on the 29th inst.

At SHANGHAI.—From Liverpool, Aug. 27, Ajax (str.); from Sunderland, 24, Zodiac; from London, previous to Oct. 12, Blenledi (str.), Hong Kong (str.), Black Prince, Gordon Castle (str.); from Liverpool, Hector (str.); from New York, Fiery Cross, Elizabeth Nicholson.

At HONG KONG and CANTON.—From Liverpool, Sept. 7, Priam (str.); from London, previous to Aug. 30, Hindostan (str.); from Cardiff, Golden Spur.

At SINGAPORE.—From Liverpool, Sept. 9, Westward Ho; 10, Huddersfield, Agamemnon (str.); from Glasgow, 10, Min; from Cardiff, 9, Windermere; 10, Fair Wind; 11, Senore; from Shields, 12, Ranavola; from Hamburg, Hammonia.

At SAIGON.—From Havre, Sept. 8, Taffarette.

At PENANG.—From London, Canton (str.).

DEPARTURES.

From SHANGHAI.—For London, Aug. 22, Annie Braginton.

From FOOCHOW.—For Odessa, Aug. 27, Russia (str.); for London, Aug. 30, Everest.

From HONG KONG and CANTON.—For Portland, Sept. 6, Channel Light.

From SINGAPORE.—For London, Sept. 12, Killarny; for Odessa, 9, Russia (str.).

From SAIGON.—For Havana, Aug. 16, America.

SHIPPING POSTSCRIPT.

—o—

Arrivals not in the Tables.—Oct. 17, at London, from Manila, Ornate, Stonehouse; 18, from Shanghai, Cutty Sark; Sept. 4, at Monte Video, from Java, Mary Killam; 10, from Batavia, Jacob Rothenburg; 14, Tilda Figlia.

Departures.—Oct. 15, from Greenock, for Galle, Barbadian; 17, from London, for Singapore, China, &c. (via S.C.), Galley of Lorne (str.); —, from Rotterdam, for Batavia, Kortenaer; 16, from Newcastle, for Singapore, Anton Gunther; from Sunderland, for Galle, Tortola; 18, from London, for Colombo, &c. (via S. C.), Calcutta (str.); 15, from Newport, for Galle, William Clowes; 17, from Swansea, for Galle, Hilarion; 18, from Liverpool, for Manila (via S. C.), Emiliano (str.); from Greenock, for Galle, Index; Aug. 29, from Monte Video, for Batavia, Marion; 31, Hazard; Oct. 18, from Liverpool, for Colombo, &c. (via S.C.), Ambassador (str.); for Singapore, China, &c, (via S. C.), Ulysses (str.).

Spoken.—Seadrift (barque), Colombo to London, Oct. 9, 44 N., 32 W.; Walsgrif, Manila to Falmouth, Sept. 14, 31 S., 12 E.; Catalina, Manila to London, Sept. 12, off Cape Agulhas; Blackadder, Shanghai to London, Aug. 21, 24 S., 58 E.; Forward Ho, Manila to New York, Sept. 5, 33 S., 15 E.; Kirkland, Batavia to Falmouth, Aug. 6, 36 S., 24 E.; Union, London to Batavia, Sept. 5, 11 N., 30 W.

Casualties.—Advices from St. Helena, Sept. 26, state that the Vier Gebroeders, Ruhaak, from Batavia to Rotterdam, put in there, 14, and reported having encountered heavy weather, Aug. 30 to 31, off Cape Agulhas, during which she lost bulwarks, rails, sails, and had several sheets of copper torn off forward; she proceeded for her destination on Sept. 19, after repairing. The Banda, Evans, which arrived at Plymouth, Oct. 16, from Batavia, reports having passed 1st point, Natal, Aug. 3, and that on the 7th she encountered a heavy gale from the westward, lasting nine days, during which she lost maintopsailyard, &c. Further advices from Port Elizabeth, Sept. 13, state that the Queen of India, Knight, from Manila to Liverpool, which put in there 2, had encountered heavy gales from 25 h to 30th Aug., between Cape Agulhas and Quoin Point; on the latter date she was struck by a sea which carried away bulwarks, ladders, &c.; as the water in the well increased to five feet she bore up for this port; she is discharging her cargo (hemp and sugar), a considerable portion of which is damaged.

Miscellaneous.—At St. Helena, Sept. 15, Edmund Gressier, Picard, from Ilo Ilo, and sailed 16, for London; 16, Stella Maris, Tillet, from Padang, and sailed same day for New York; 21, Bulgownie, Mill, from Colombo, and sailed same day for London; 22, Lodore, Fisher, from Ceylon, and sailed 23 for London; 23, Carmarthenshire, Watson, from Macao, and sailed same day for London; Mary E. Ray, Laker, from Manila, and sailed 25 for Liverpool; 24, Schiedam, Houthoper, from Formosa. Off St. Helena, Sept. 21, Douglas Castle, from Amoy, for New York, 76 days out; 25, Hollandstrow, from Java, for London. At Mauritius, Sept. 2, Deux Freres, Magneur, from Singapore; 6, Adeline, Thornton, from Singapore; Aug. 28, Mars, Homan; Sept. 9, Cosmopolite, Pannier, and both sailed for Galle.

Report of the Cutty Sark, from Shanghai to London, arrived on the 18th inst. Left pilot June 21st, passed Anjer July 19th, experienced moderate weather and light winds until August 12th, in lat. 32 deg. 48 sec., lon. 29. 19 E., when the sea came rolling up heavily from the westward, followed by unsettled weather and very severe gales until 31st, in 32. 33 S., 14. 19 E.; since then moderate winds and light weather. Passed the Cape, 1 A.M. 26th, got the S.E. trades 1st Sept., 30 S. 12 E. St. Helena, 10 A.M., 9th Sept., took pilot on board off Dungeness, 3.30 P.M. Oct. 17th. On the morning of Aug. 15, in lat. 34. 26 S., lon. 28 E., was struck by a heavy sea on the starboard quarter, which carried the rudder away, and it took until 5 P.M. on the 20th before a false stern post and temporary rudder were fixed, which broke adrift on 20th Sept. in 7. 27 N., reshipped at 4.15 P.M. next day; proceeded on voyage without further accident.

BIRTHS, MARRIAGES, AND DEATHS.

—o—

BIRTHS.

Eaton—On the 12th Oct., at 3, Cadogan-place, S.W., the wife of Charles Ormston Eaton, of a son.

Pitman—On the 1st Sept, at Hong Kong, Mrs. Geo. D. Pitman, of a son.

Swire—On the 16th Oct., at Richmond, Yorkshire, Mrs. William Swire, of a daughter.

MARRIAGES.

Ranger—Ledritter—On the 21st Aug., at Sarawak, by the Rev. J. Kemp, M.A., Alfred James Ranger, of the Borneo Company (Limited) to Eliza Ledbitter.

Obinson—Braddon.—On the 17th Oct., at the parish church, Tunbridge, by the Rev. J. H. Chowne, cousin of the bride, vicar of Christ Church, Bradford-on-Tyne, assisted by the Rev. George Ross, vicar of Tywardreath and Golart, Cornwall, Alfred Murray Robinson, Esq., of Shanghai, to Harriett Clode Braddon, eldest surviving child of the late Rev. Edward Nicholas Braddon, vicar of St. Mary and St. Clement, Sandwich, Kent.

DEATHS.

Delegal—On the 12th Oct, at Addison-road, Kensington, Sophia Delegal, widow of the late Charles Delegal, of Ceylon, in the 75th year of her age.

Leggatt—On the 15th Oct., at her residence, Bramford House, near Ipswich, Martha, widow of the late John Leggatt, Esq., in the 77th year of her age.

Mr. Samuel Mossman, of Edinburgh, who recently read a paper on the city of Yedo before the British Association, has placed in the reading-room of the Edinburgh Philosophical Institution the large map with which he illustrated his paper. The map is a very large one, forty square feet, on a scale of eight inches to the mile, showing the extent of the Japanese capital, the public buildings, gardens, temples, mansions, streets, canals, and the river Ogawa flowing into Yedo Bay. The map is of native construction in material and in drafting. The paper is manufactured chiefly from the bark of the mulberry tree, and is of strong texture.

THE JAPANESE AMBASSADORS IN EDINBURGH.

The Japanese Ambassadors left Glasgow on the 11th inst., and after paying a brief visit to Lord Blantyre, whose residence, Erskine-house, is in near proximity to Glasgow, they arrived in Edinburgh on the evening of the 12th, Saturday last. On arriving at the railway station the Ambassadors were driven to the Royal Hotel, where the Japanese flag was hoisted in honour of their visit. In the course of the evening they were waited upon by the Lord Provost of the city. Unlike the other cities they have visited, no formal invitation was given to them by the local authorities or public institutions. Hence there was no grand banquet prepared for them by the Lord Provost and Town Council, like those given by the wealthy Corporations of Glasgow, Manchester, Liverpool, and London. Nevertheless, they were shown a great deal of attention by individual citizens, and appear to have been much gratified with the natural beauties of Edinburgh and neighbourhood, and the art establishments for which the place is famous.

On Monday, the 14th, the members of the Embassy left the Hotel, accompanied by Professor Archer, who took them first to the Signet Library, next to the Advocates' Library, and afterwards to the Parliament House and Courts, where they were received by Mr. Matheson, of Her Majesty's Board of Works. The Museum of Science and Art was next visited, and afterwards the University. Here they were received by Sir Robert Christison, Bart., and, accompanied by the librarian, they went through the library. The inspection of the University over, the Ambassadors entered carriages and drove to Dunsappie Loch in Queen's Park. An ascent was then made to Arthur's Seat, from which the party obtained a view of the city and its suburbs. After having gone through Holyrood Palace the party proceeded to the engineering works of Messrs. Umpherston and Co. (late Messrs. Tenants'), to inspect Thomson's road steamer, which was shown in use, and excited great attention on the part of the Chief Ambassador, who rode upon it, and examined every part minutely. The Embassy afterwards visited the Leith Oil Mills, owned by Messrs. Tod and Thomson, the flour mills of Messrs. A. and R. Tod, the printing ink factory of Messrs. Fleming and Company, and the rope and sailcloth manufactory of the Edinburgh Ropery Company. In all of these establishments the visitors seemed very much interested, and took away with them samples of the various manufactures.

On Tuesday, the 15th, the Ambassadors again placed themselves under the guidance of Professor Archer, and visited several places of interest. In the morning they went to the North British Rubber Works, where they were received by several of the directors of the company. After a close inspection of these works, the Ambassadors proceeded to the Melville Drive, in order to get a view of the public recreation grounds in the south side of the city; and afterwards to Beeslack, near Penicuick, where they were received by Mr. John Cowan, and entertained to luncheon. Subsequently they drove to the Messrs. Cowan's paper works at Valleyfield, and after a visit to that establishment, they turned their steps towards Roslin, the chapel of which they minutely inspected. After a ramble through the glen at Hawthornden, the party returned to the Hotel.

Next day, the 16th, the Ambassadors left Granton on board the steamer *Pharos*, which exhibited the Japanese flag at the fore, and the Commissioners' flag at the main, besides her usual bunting. The flags belonging to the pier, Custom-house, as well as those of the vessels in the harbour, were also displayed. Visits were paid to the Isle of May, Bell Rock, and Abb's head lighthouses. Breakfast was served on board shortly after the arrival in the morning; subsequently luncheon was partaken of; and on the way home in the evening dinner was provided. After dinner, Sheriff Dingwall Fordyce (who presided) proposed the "Queen," and then the "Mikado, Emperor of Japan." Afterwards the Sheriff gave the "health of the Chief Ambassador," and on behalf of his colleagues and himself expressed the great pleasure they had in having the honour of accompanying the Ambassadors on such a journey as they had had that day. Iwakura responded. His Excellency made a delicate allusion to the assistance which the Japanese Government had received in Japan in the construction of lighthouses from the Northern Lights Commissioners. He also said that twenty lighthouses had been erected about Japan, but the Government there considered that these were only a beginning. Japan, like England, he continued, was an insular country, and the Government were resolved that it should be as well lighted as the coasts of this country. Sir Harry Parkes said he was much pleased in becoming thus acquainted with the Northern Lights Commissioners; for though he had not seen them personally before he had been acquainted with them for some years. They had shed their refulgent light on Japan to a much greater extent than perhaps they were aware of. Sir Harry alluded to the able manner in which the lighthouses in Japan had been constructed under the direction of Mr. Brunton, and concluded by proposing the "health of the chairman and of Mr. Cunningham." Sheriff Fordyce replied. Yesterday the Ambassadors and a few of the principal members of the staff, accompanied by Sir Harry Parkes, General Alexander, and Mr. Aston, proceeded for a short tour in the Highlands, from whence they will return to Edinburgh to-morrow, and on Monday, the 21st inst., the whole party will proceed to Newcastle.

The scientific staff of the Embassy has also been occupied in a tour of inspection in the vicinity of the Northern Capital. On

Digitized by Google

the 12th inst., these members of the Embassy paid a flying vist to Leven, and visited the extensive iron foundry of Messrs. Henry Balfour and Company, inspecting closely the operations of moulding, casting, &c. This firm were at the time engaged in constructing tanks and other apparatus for the copper mint of Japan. The company afterwards inspected the process of manufacturing artificial food for cattle, examining the various processes repeatedly, and eliciting from Mr. John Balfour information as to the prices of the raw material and of the manufactured stuffs, specimens of which they took away. This branch of the Embassy will join the main body at Newcastle. They have been accompanied during their visit to Scotland by Mr. Brunton, C.E.

THE PANTHAY MISSION.

(PALL MALL GAZETTE.)

The *London and China Telegraph* is not a paper to find many readers in England. It supplies a summary of prices current, commercial news, and other intelligence direct from the chief seats of Eastern trade in Japan, the China Seas, and the Archipelago, useful to merchants whose business connects them with those regions; but these are not matters of interest to the public outside of that limited circle. An article in the last issue, headed "The Panthays," which has just come under our notice, affords a good illustration of the perversely mischievous tendency of the views so constantly advocated. The immediate object of the leader appears to be to cast reproach on the Government of this country for not having taken more decided and active steps in recent years to open up a route through Burmah into Yunnan, as a means of communication and traffic with that province and the whole south-west of China. And the opportunity is taken, *apropos* to this much-debated question of the practicability of such a route and its value in the interests of commerce, to assail the policy of the Government in refusing official recognition of what the writer is pleased to designate "Prince Hassan's Mission." It may be remembered that during the past twenty years various schemes have been brought forward for effecting the first object; and different lines have been advocated by Captain Spry and others, as affording the necessary conditions of facility and security. A survey was still more recently attempted, under the auspices of the Indian Government, of the line of country between Rangoon and the Chinese border, but the difficulties were found too great—partly from the disturbed state of the border districts, but mainly, it is believed, from the covert intrigues and hostility of the Burmese authorities. Whether under more favourable conditions a renewed effort might be more successful, and whether the end is sufficiently practical and important to justify the Government in incurring the risk of collisions and the expense of further explorations in the present state of the three regions—the kingdom of Burmah, the insurgent province of Yunnan in China, and the intervening lands of the semi-independent and wholly uncivilised Hill tribes—it is not our object here to discuss. We are concerned with the peculiar doctrines of international law and British policy which the *London and China Telegraph* maintains.

We would only observe, by way of comment on this doctrine of the policy of recognising as an independent State one of the eighteen provinces of China in a chronic state of revolt, while we still maintain friendly relations with the Emperor of China and an Envoy at Pekin, that it is fortunate for Great Britain that no Government could be found willing to endorse an act which would violate one of the first principles of the rights of nations. The "English official notion of international relations" rightly presented to the Government the obligation of refusing official recognition of the Panthay delegates as representing an independent State. Whether the Mahommedan and other insurgents in the south and west of China may ultimately succeed in maintaining a separate existence, and establishing their independence in Yunnan or other portions of the Chinese territories, remains to be seen. And in the meantime, looking to the past history of China, and the often-recurring insurrections of different portions, we must conclude that such an issue of the present revolt is only remotely possible, and opposed to all the experience of past centuries. As to the feelings with which the Panthay visitors may have returned to their own province, it is probable they were not very well satisfied with the result of their mission. But it is obvious that their position was such as to give them no claims to put themselves on a level with the envoys of the King of Burmah—a monarch in undisputed possession of power, and the head of an independent State with which we have treaties and established relations. Nor, had it been otherwise, and circumstances had permitted the Government to send them away better pleased, is there any rational ground for believing that their leaders in Yunnan either could or would have contributed, by any action on the Hill tribes and the Burmese, the slightest assistance towards the realisation of the scheme which the *London and China Telegraph* desires to promote; and we may add, in conclusion, very little chance that they would have lent any material aid on their own side of the border, or certainly that they would not oppose it as introducing a new element of trouble.

PORT SAID AND THE SUEZ CANAL.

A report has been presented to the Government by Mr. Barker, Her Majesty's Vice-Consul at Port Said, relative to the commercial position and prospects of that port. Mr. Barker states that the consumption of coal, which at present forms the principal trade of Port Said, has greatly increased, and has become a most important branch of commerce, in consequence of the increase in the number of steamers arriving there. The depots are on the Egyptian side of the canal, and the Government of the country, considering the coal to be in transit, levy no dues upon it, and, for various reasons, Port Said appears destined to become an important centre for the various products of the Egyptian Delta, the regulations of the port being equally favourable for the storage and transhipment of merchandise. No revenue charges are levied by the Government of Egypt upon transit goods; nor are dues laid upon steamers discharging cargoes *en route* for another destination. The only rate imposed is one of two centimes per ton upon vessels remaining in the port more than twenty-four hours, and even this may be avoided, for the port being well sheltered, the shipment or unshipment of cargoes is rarely interrupted by bad weather. This fact, Mr. Barker hopes, will remove a false impression which exists among merchants in England. There are already established in the port a number of shipping agency offices, and the Imperial Ottoman Bank has opened a new branch. The French and English Governments, in view of the increasing importance of Port Said, have bought a quantity of land, for use as depots for goods, an example which has been followed by Russian, English, and Austrian steamship companies. Mr. Barker's report concludes by stating that there appears every reason to believe that the future of Port Said is full of promise. The complete navigability of the canal has been proved so conclusively that there is no doubt that steam traffic will be maintained, and the purchase of lands by wealthy and influential companies will necessarily increase the importance, population, and progress of the town, and render it an advantageous outlet for the products of the interior.

GERMANY.

—o—

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, OCT. 15.

I notice that one of your correspondents, writing from Hong Kong, under date of August 16 last, mentions as an important topic of political interest "the renouncement by Germany of her Treaty with China." Whether his information is correct or not, depends on his definition of the word "renouncement," which I understand to mean abandon or give up—Dr. Johnson says "to disown, to abnegate"—and if that is what your correspondent means, it is certainly not correct; nor would it be more correct to make use of the word "denounce," which has of late come into fashion in relation to the Treaty with France for want of a better word to express the notice given by one contracting party to the other of its intention to make use of its stipulated right that the Treaty shall cease and terminate within a stated period. This latter is certainly not the case, after Germany has taken such infinite pains to obtain a footing in China, first on sufferance and under rather humiliating circumstances, and then on equality, securing her rights by a State treaty with the most favoured nation clause; and the trade has become far too valuable for the Germans needlessly and wilfully to "renounce" the advantages and profit they derive from their intimate relations with China.

The fact is that the Treaty, which was negotiated and concluded by Count Eulenberg for ten years' expired in June last, when, according to the stipulations entered into, it shall be revised and renewed. In my letter of May 28—which you will find in the *London and China Express* of May 31 last—I mentioned the fact, and that Prince Bismark had invited the Chambers of Commerce to communicate to him their wishes as to the new clauses deemed advantageous for the German trade, with particulars of the answers they had given. I am aware that instructions have been sent out to the German Envoy at Peking to open negotiations, but of what nature they are is, of course, a secret between him and the Foreign Office at Berlin. But this I do know, on the best authority, that the Government at Berlin have no wish to go in for the revision single-handed; they are quite willing and anxious that all the treaty Powers should unite and agree in their demands on the Chinese Government.

The Berlin semi-official *Norddeutsche Allgemeine Zeitung* contains the following:—"It is well known that in Japan a considerable number of industrial objects are produced in a much more perfect manner than they can be manufactured in Europe; among these may be mentioned their lacquer ware and works in enamel, paper, and metals. They have a peculiar method of their own in working up these raw materials, the particulars of which, if not absolutely kept secret, have at least never been brought to this country. The Prussian Minister for Trade has now issued circulars to the Chambers of Commerce, expressing his readiness to have researches made into the subject on the spot, and to publish what he can learn about it for general information. The Chambers of Commerce are therefore invited to state to him if it is for the interests of the German manufacturers to obtain further insight into the Japanese mode of working up the raw materials, and what particular branches it would be most useful to learn, and if so, to recommend to him a suitable person of intelligence as well as theoretical and practical general knowledge of business and manufactures, who would be willing to go to Japan at the expense of the Government, and remain there a couple of years to study the system and make himself master of the details."

COMMERCIAL.

The dealings in Teas have been more numerous, and assumed greater dimensions since last report. Among the sales by importers were 4,094/4, 1,058/8, and 275/16 chests of Congou, as well as 380/8 chests Souchong; but there is no alteration in the values. For cleaned Rice a considerable demand has sprung up, chiefly for export; about 10,000 bags of rough have been taken by millers. Cassia Lignea commands an easy sale at 10 to 10¼ sch. bco. Singapore Pepper is firm at 7¼ paid, but Penang is a shade lower, being offered at 6¾, though the stock is nearly exhausted. 254 chests of partially damaged Star Anuis, ex Hong Kong, and 42 chests of sound, by same ship, have been sold by public auction. A decided improvement both in the demand and price of Spelter has to be recorded; above 10,000 centners have been sold, mostly special marks, at 15 mks. 6 sch. bco., and 15.3 for ordinary sorts.

SHIPPING.

ARRIVAL.—Caldew, from Cochin.

SAILED.—Heros, to Rangoon; Richard, to Singapore; Penguin, to Cheefoo.

LONDON: MONDAY, OCT. 21, 1872.

THE AUDIENCE QUESTION.

RIGHTLY to estimate the importance attaching to the recent arrival of M. GEOFFROY at Peking, it is necessary to recall the tenour of the diplomatic intercourse which has of late taken place between the Governments of France and China. It will not be forgotten that on the first arrival of CHUNG HOW at Versailles on his mission of apology for the massacre at Tientsin, he was treated with considerable coolness, and was refused the audience he sought with the PRESIDENT. A hasty retreat in the direction of China was the consequence of this rebuff. From some unexplained cause, however, M. THIERS thought proper to change his tactics, and a telegram which overtook the discomfited Ambassador at New York brought him back post haste to Versailles, where, on a distinct understanding that the same privilege would be accorded to the French Minister by the EMPEROR of CHINA, he was received in official audience by the PRESIDENT of the newly-constituted Republic. But more than this, M. THIERS was unwilling to grant his request to be allowed to carry to his Government the letter containing an acceptance of the apologies he had brought, and, further, he was given to understand that the future continuance of friendly relationships between the Courts of Paris and Peking would depend on the manner in which the EMPEROR received the newly-appointed French Minister, who was to be the bearer of that communication. The presence of M. GEOFFROY in Peking is, therefore, tantamount to the announcement that that diplomatic *crux*, the Audience Question, is about to be reopened, and, it is to be hoped, finally settled.

At the present moment there is dead calm in the political world at Peking. But we need not adduce the now famous remark of Mr. HAMMOND on welcoming Lord GRANVILLE at the Foreign-office to illustrate how often a political calm is but the prelude to fierce and deadly struggles. The marriage of the EMPEROR, and the absence of some of the Foreign ministers from Peking will leave the great question yet a little longer in abeyance, and the current of events will therefore for a time continue to run smoothly on. But the next few months are pregnant with events of the highest importance to China. Of the exact nature of the demands which M. GEOFFROY is instructed to make on the behalf of France we are, of course, ignorant. Yet it is possible to gain some clue to the main point at issue from a memorandum, of which we are most appositely reminded by the *China Mail*, addressed by M. ROCHECHOUART to Mr. LOW, the American minister, in which he says :—"I place the so-"lution of the question of audience with the EMPEROR first, "and the arranging a treaty of etiquette regulating the de-"tail of our official life in a manner honourable to our Go-"vernments and to ourselves." This, then, is the first question to be settled, and many weighty considerations attach to its discussion. It is the question on the satisfactory settlement of which depends our position in the eyes of the Chinese, and the continuance of our peaceful relations with them. The admittance of the Foreign Ministers to the presence of the EMPEROR will be our voucher of political equality with these arrogant Pekingites. We have already submitted far too patiently to be placed on a lower social scale than that to which we are entitled by treaty. That such a state of things should be allowed by a country governing India is incredible, and it now becomes the duty of the Foreign Ministers to give "a long pull, a strong pull, and a pull altogether" to establish once and for all a satisfactory basis for our future communications with the "Son of Heaven." No doubt opposition will be offered by the Emperor's advisers to this demand, or if they appear to make the concession, they will in all probability attempt to attach to it such conditions as will rob it of its principal value. Against such shifts the Foreign Ministers must be upon their guard. No compromise in the matter should be entertained for an instant; we have submitted to them too often. We demand that our Ministers should be received on exactly the same footing and in exactly the same manner as officials of similar rank are received by European Sovereigns, and nothing short of this can be accepted.

We are reminded also by a circular, which we published in our last issue, addressed by the French Minister of Agriculture to the Presidents of the various Chambers of Commerce in France, that the time fixed for the revision of the Treaties is fast approaching. That the French are fully alive to the importance of again taking a prominent part in affairs in China the appearance of this Circular is satisfactory evidence. Foreign interests in the Flowery Land have already suffered sufficiently from the disasters which have of late overtaken their unfortunate country, and we welcome this sign of returning power as a happy omen. The Germans also are moving, but not quite so precipitately as is reported in Hong Kong. Our German Correspondent's letter tells us that the Government of Berlin have simply given instructions to their representative at Peking to give notice of a demand for a revision of the Treaty; but it is not at all their wish to proceed otherwise than in concert with Great Britain and other Powers in making a new Treaty with China. They are strengthened in this view by the non-ratification of Sir RUTHERFORD ALCOCK'S convention by our Government. It is time, however, that our Foreign-office should move in the matter.

THE PANTHAYS AND THE *PALL MALL GAZETTE.*

THE *Pall Mall Gazette* is a journal which may possibly have its candid intervals, but candour is evidently a commodity so precious to the editorial mind, that it never vouchsafes the smallest modicum of it to us. Ever since it devolved upon us to expose the blunderings of our respected contemporary's views on the missionary question in China—and we are sure we did it with all the gentleness which it is a duty to exercise, when imbecility has to be put under restraint—the *Pall Mall* has misrepresented us, and quoted us unfairly. It has done so this week. We do not particularly object to this, if the Editor likes it, and can afford it; but it may be just as well to notice the progress of the complaint, as such symptoms afford the surest indication of the relapse of such patients. In a late issue we commented with pleasure on the announcement that Mr. COOPER, the well-known explorer, had accompanied the Panthay Envoys on their return to Yunnan, and we expressed our opinion that there was nothing in the civil war, still smouldering in China, which need prevent the accomplishment of the direct trade route through Burmah into Yunnan. We stated that "it by no means fol-"lows that, because the Panthays are in arms against the "Imperial forces, the trade between the two countries must "therefore be suspended. So far from this being the case, "there are, at the present time, recognised Custom-houses "established on the frontier between the kingdom of Tali "and China, and we have only to remember how little our "own trade with China was affected by the war of 1860-61 "to prove how entirely mercantile interests are looked upon "as separate and apart from political enmities by the prac-"tical-minded Chinaman." There is not one line in our article advocating the "policy of recognising as an independent State one of the eighteen provinces of China," with which the *Pall Mall* charges us. We simply stood out for the right of discovery, and the right of trade, and wished Mr. COOPER GOD speed in his arduous task. We keep the same ground still, and we say that it would have been more to the credit of the farsightedness of our Foreign-office if the hospitality extended—or, rather, doled out—to Prince HASSAN had not been so meagre as it was. If the Envoys had been regarded as mere rebels, their

Digitized by Google

welcome should have been *nil;* if as representatives of a hopeful and conciliatory State, it should have been given on a scale more worthy of our Government. As it is, the Panthays have gone home with the conviction that Lord Granville blows hot and cold. We are quite content to leave the sneering observation that we are "useful to merchants" to the appreciation of our readers. We hope we are so, we try to be so, and we certainly have no apprehension that, whatever unexpected qualities may develop themselves in the *Pall Mall*, "usefulness to merchants" will be among the number.

We are glad to say that there is no foundation for the statements put forth by the *Philadelphia Ledger* and reproduced in *The Times*, to the effect that there has been a sort of *coup d'etat* at Yedo, and that the old Daimio party have come again into the ascendant. There are no advices or telegrams in any way substantiating this. The Government of Japan remains in the same condition as when the Embassy of Iwakura left Yedo. With reference to the statement that the "Embassy is stranded in London without authority or funds," there is not an atom of truth in it. The necessary funds are still provided, and the Embassy is actively carrying out the objects of their mission, as evidenced by the daily reports in our papers. We cannot understand *The Times* putting in statements which carry their own contradiction. The following is the paragraph alluded to:—

"Advices from Japan say that the old Japanese party will probably obtain the ascendency over the Reformers; that Minister Mori will be succeeded by a representative of the non-progressives; and that the spread of Western civilisation in the Empire will be stopped for the present. Horace Capron, who went to Japan to organise a Department of Agriculture, and Peshine Smith, who went there to organise a Law Department, have been discharged. It is also stated that the Japanese Embassy to the Treaty Powers is 'stranded' in London, without authority or funds, and that work on the Japanese war-vessel at New York has been stopped for want of money, owing to these complications."

Since the above was in type *The Times* has printed the following disclaimer:—

The last papers from New York contain a denial of previous reports from Japan to the effect that a reactionary policy was likely to be witnessed in that country. It is now admitted that the latest accounts, which reach to the 7th ult., 'show the country to be quiet, and that Governmental affairs were progressing favourably.' The circulation of the adverse statements appears to have been connected with the proceedings of a certain Mr. Peshine Smith, an American, who seems to have made himself notorious in Yokohama, and of whom an account is given in the *Japan Weekly Mail* of the 10th August.

The son of the Foreign Minister of Siam, Sootchai Bhannwongse, who has been through a course of English education during the past five years, and lately a student at Balliol College at the University of Oxford, returns to Bangkok by the present mail. He embarked in the P. and O. Company's steamer *Simla* at Southampton, accompanied by Mr. D. K. Mason, the Consul for Siam in London, and other friends. There are still a number of Siamese studying in England, amongst whom is a son of the Prime Minister, who is in the Army. In connection with Siam we may notice that a Mint for Bangkok is in course of construction, under the superintendence of Mr. Mason.

A telegram from Paris states that the Minister for Japan, Sameshima, accompanied by the Minister of Finance, has gone to Frankfort, to contract for a further supply of Bank-notes, similar to those contracted for through the Baron von Siebold. We understand that the efforts to settle a loan in the United States are now quite abandoned, and that it is doubtful if it will be raised in London, the opinion being that the Treasury officers in Yedo can do better on the spot. His Excellency Terashima, the resident Envoy and Minister Plenipotentiary, has fixed the Legation at No. 9, Upper Belgrave-street.

The telegrams from Lisbon report that information had been received from Macao of an attack on the Settlement by Chinese. We have no confirmatory accounts in London, but we shall not be surprised to find that these attacks are owing to the atrocious Coolie trade, which the Government of Macao permits, notwithstanding the countless horrors it has created.

The steamer *Scotland*, of 2,000 tons and 500-horse power, owned by Messrs. Temperley and Co., and lately employed in the Montreal trade, has been engaged to convey the troops to Singapore, noticed in our last issue. The steamer will have to proceed from Singapore to Hong Kong.

STEAMERS, &c., FOR THE FAR EAST.

The screw steamer *Teluk Ayer* was launched on the 17th inst. from the yard of Messrs. Jackson and Blake, Northfleet. This steamer has been built to the order of Messrs. Paterson, Simons, and Co., of Singapore, and is intended for the local trade between the Straits, Saigon, Bangkok, &c. The builders have another steamer in hand for the same owners, to be named the *Celestial*, which will be about 100 tons larger.

Messrs. A. and L. Inglis have laid down another steamer for the Shanghai Steam Navigation Company, which is building under the superintendence of Captain Lewes, on behalf of the company. The same builders have also laid down one of the six steamers contracted for by Mr. Holt for the Yangtsze and other local China service.

Two steamers have also been laid down on the Clyde for the new Trans-Pacific line between San Francisco, China, and Japan, the formation of which we noticed some time since.

A small screw steamer, the *Seagull*, Captain Thatcher, has been despatched from Swansea for Messrs. Lane, Crawford, and Co., Hong Kong, intended for towing and other purposes. She proceeds under sail and steam to Hong Kong.

The *Laurel*, which sailed on the 3rd inst. for Yokohama, took out some boilers intended for a stone crushing machine.

The *Carnarvonshire* is taking out for Tientsin about 150 tons machinery, and two boilers for the Chinese arsenal at that port.

THE REPORT ON THE DIPLOMATIC AND CONSULAR SERVICES.

A supplementary Blue-book on the Diplomatic and Consular Services has just been published, in which are contained the minutes of evidence given before the Select Committee by Captain Crossman, Sir Rutherford Alcock, Mr. W. H. Medhurst, Sir Harry Parkes, and Mr. Henry Alabaster, as well as memoranda on the Consular Services in China and Japan by the three first-named gentlemen and Mr. Mongan. As we have on previous occasions commented on the evidence given before the committee on the subject of our consulates in the Far East, and as also the memoranda handed in by Captain Crossman, Sir R. Alcock, and Mr. Medhurst are merely recapitulations of their opinions as before stated by word of mouth, we shall now pass on to the consideration of Mr. Mongan's very ably written paper. Mr. Mongan is evidently thoroughly well up in the subject of which he treats. He has made a careful study of the varying fortunes which have attended the different consulates since the dates of their establishment, and has digested the information he has obtained in a concise and telling manner. It is too often the case that officials when called upon for information with regard to the services to which they belong supply only vague assertions, ill considered opinions, and little that is really tangible. Mr. Mongan has avoided this error, and has given expression to his views in a clear and powerfully convincing paper. He begins by stating the two-fold object of his memorandum, and says:—

"The object of this memorandum is first to call the attention of the Select Committee now sitting on the Consular Service to the variations that from time to time have taken place in the salaries of the Consular officers placed in charge of the fourteen ports of China now open to foreign commerce, with a view of deprecating the system that seems still to be in operation, of generally reducing salaries as vacancies occur; and, secondly, after adverting to the expenditure which the cost of living in China entails upon the Consuls, to make some suggestions for the amelioration of their conditions, the adoption of which would cost the public little, but would tend greatly to remove the feeling of discontent and uncertainty as to the future now undoubtedly existing and increasing among Her Majesty's Consular servants in China."

He then proceeds to make good his complaint of the variations in amount to which the salaries of Consuls in China have been subjected by a carefully prepared tabular statement, from which it appears that, since their establishment, seven out of the twelve Consulates and Vice Consulates now existing have been reduced in value by sums ranging from £200 to £600 per annum. In 1862, he adds, it was hoped "that the China Consular service had been placed upon a somewhat permanent basis as regarded salaries, but many changes have taken place within the decade which has since almost elapsed, and the tendency of these has been to dishearten most of the officers in the service, and, *pari passu*, I am convinced to impair their efficiency as public servants. Thus, one £900 a-year Consulate (that of Chinkeang) has been abolished; and, whilst in 1862 there were three £1,500 a-year Consulates, in 1872 there is only one. *Then* there were *five* Consulates, which might be looked upon as prizes, viz., Canton, at £1,600; Shanghai, at £1,500; and Newchwhang, Tangchow, and Hankow, at £1,300 a-year each. *Now* there are only *three*, viz., Canton, at £1,600; Shanghai, at £1,500; and Foochow, at £1,300; and of these it is morally certain that Canton will be reduced, on the occurrence of the next vacancy, to at least £1,300 a-year, if not to a lower rate. Having thus stated these facts and figures, I may now say that the chief grievance of which we have reason to complain in China is, I believe, this—that ever since the conclusion of the Treaty of Tientsin the rates of salary of the higher class of officers have, as a rule, been systematically reduced as vacancies occurred at the several ports. This system, illustrated in the 1872-73 estimates by the reduction of the sala-

Digitized by Google

ries of the lately appointed Chinese Secretary, and Consul at Chefoo, is tending apparently to the establishment of a dull uniformity in the rates of salary at all the ports, the result of which will most probably be the production before very long of an equally dull mediocrity in the mental and moral calibre of their incumbents. And if this system be not modified, and some prizes be not left as a healthy stimulus to exertion, it may also happen that the gradual lowering of the whole character of the service will ultimately endanger the maintenance of friendly relations with China, affected so much as these are in that country by the personal influence of our Consuls with both mandarins and people.

Mr. Mongan next refers to the cost of living entailed on Consuls in China, and shows that on many accounts the purchasing value of money has been so materially diminished of late years that unless those officials follow a somewhat similar course to that pursued by Capt. Burton's predecessor at Santos, who, according to that gentleman's evidence in the present volume, "lived over a spirit shop, and washed his own stockings," it is next to impossible for them, as married men with families, to make both ends meet. For these evils Mr. Mongan suggests three remedies; and we must here remark that he deals with the subject in hand rather too exclusively from a Consul's point of view. He makes little or no mention of his weaker brethren—the juniors. Perhaps he considers that, with Sir Harry Parkes as their champion, these need no further support. But however that may be, he sees in a plan he proposes a means of satisfying the wants which he considers most pressing, at a cost of only £300 per annum. He would have the Consulate at Shanghai raised to a Consul-Generalship, with a salary of £1,800; and as to the other Consulates, he would fix the salaries of three at £1,300, of four at £900, and of three at £800 a-year. He also suggests that officers should be allowed to retire on a pension at the end of twenty years, irrespective of the actual state of their health at the time. And he further urges that "facilities might be granted by Her Majesty's Government to its own officers in China for insuring their lives, and for the purchase of deferred annuities, at the rates ruling in Europe, instead of the higher rates of premium now charged for contracts of this nature to Europeans residing in the East by the life-insurance offices in England."

ORIENTAL BANK CORPORATION.

The half-yearly meeting of this Bank was held on the 17th inst. at the Bank; James Blyth, Esq., in the chair.

The Chairman said this meeting was an interim one for the declaration of a dividend. He was glad to congratulate the shareholders on the success of the operations for the six months. So satisfactory had they been that they were enabled to at once provide for the loss sustained by the failure of Gledstanes and Co.

Mr. C. J. F. Stuart, the chief manager, then read a statement showing the profits for the half-year to amount to £101,000, which, with £5,000 carried forward from last account, made £106,000. Of this sum the dividend now proposed would absorb £90,000, leaving £16,000 to carry forward.

Dr. Thom said the profits made by the Bank were highly satisfactory, but the loss by Gledstanes and Co. was very unsatisfactory, and he trusted the directors would take a warning by it. He would like to know the amount of the Bank's loss, and after passing some strictures on the affair said he would reserve a fuller statement for the next meeting.

The Chairman, in reply, said that the loss would be as follows: gross amount, £67,000, of which they expected to recover £24,000, leaving a loss of £43,000, to provide for which they had set aside £50,000.

No further comments being offered the Chairman declared the dividend of 30s. per share, being at the rate of 12 per cent. per annum.

The following is the statement and balance-sheet for the half-year ending June 30, 1872, read to the meeting:—

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The half-yearly meeting of the shareholders of the Chartered Mercantile Bank of India, London, and China was held at the Bank on the 15th inst.; George G. Nicol, Esq., in the chair.

The Chairman, in moving the adoption of the report (to be found in another column), said this occasion was a very pleasant and agreeable one, and much more so than any similar one for many years past, inasmuch as he had to submit what might be considered a very satisfactory statement. The profit had been so large as to excite remark. The profit for the six months had amounted to £117,000, and, contrasting this with the past profits, he could understand the shareholders asking how it had been done, to which he would reply, by legitimate banking business and exchanges with India. He laid the more stress upon this because a shareholder had asked if they had not been gambling; but he assured them it had been earned in the same manner as the profits for some years past, but this had been a very exceptional year as far as the exchanges had been concerned. The shareholders must not, therefore, take this as an average year, but as one which was exceptionally good, but of which he could not hold out the hope of a continuance. The prospects for the current year, so far as he could see, would be a fair average year. Although losses must occasionally occur, he did not think they had any reason in the present half-year to expect them, nor had they made any during the past half-year, with the exception of that caused by the failure of Messrs. Gledstanes. With the firm of Pigou and Wilks they had formerly had large transactions, and had been their bankers; but they had entirely escaped loss, as some time ago they had been rather startled by the way in which that firm conducted its business, and they accordingly closed their account. Their only loss was by Messrs. Gledstanes, and it was a very considerable one. They were greatly astonished by the failure, as they had always relied upon the firm from their being represented at the Bank of England, and they could not suppose that any firm so represented could be otherwise than solvent. He considered that the position of the directors of the Bank of England was a serious and responsible one, but this fact shook confidence in the bank, and in that respect was likely to be very unfortunate. They had had the subject of Messrs. Gledstanes frequently before the board, as rumours had occurred from time to time, but their continuing to be represented at the Bank of England had always turned the balance in their favour. But he hoped that great good would arise from it by the business of India and China being carried on with greater safety and reliance. The cause of the failure had been the abuse of credit in Lancashire. When he commenced his mercantile career, forty-five years ago, Manchester goods were purchased for cash or short credit; but now houses were financing on goods for which not one shilling would ever be paid. Gledstanes and Co. had something like half a million of acceptances out, and the game was kept up by the India and China firms buying and selling bills.

He hoped the whole of the Indian banks would assist in putting down the six months' usance in the India and China trade. They would recollect that some time ago this bank, in connection with other Indian banks, tried to reduce the usance to four months, but the attempt ended in a failure, owing to the opposition of the leading houses. He hoped these firms would now open their eyes and agree to a shorter usance, as, now that the Suez Canal was opened, three months was a long time, especially compared with Australia, whose trade was carried on by sixty days' bills, and every bill was fortified by documents hypothecated with it, even by houses quite equal to our best India and China firms. The amount for which they ranked on Messrs. Gledstanes' estate was £54,000, and although he could not say what the loss would be with any certainty, yet he believed it would amount to about £35,000, but they would thus still have left a large sum to be carried forward; and if no other loss should occur he hoped at the end of the year to carry a very handsome sum to the reserve fund. He moved the adoption of the report.

Mr. Richardson said a profit and loss account which showed a profit of 15½ per cent. could not but be satisfactory; and he trusted the loss of Gledstanes and Co. would induce the Bank directors to act more on the plan of the Australian banks, and stop the so-called "Credits."

Another Shareholder said he would very emphatically urge on the directors to adopt the documentary security, and avoid credits.

Dr. Thom said he was certainly startled at the large profits, but was satisfied with the chairman's statement. He passed some severe comments on the fact of the partners of Gledstanes and Co. holding seats at the boards of the Bank of England and the London and Westminster Bank up to the day of their failure, while they had been insolvent for years past, and only kept the firm afloat by drawing and re-drawing. He hoped the directors would ignore these credits or "kites," and have

Digitized by Google

something substantial in the way of documents. Gledstanes' affairs should, at any sacrifice, have been wound up in the Bankruptcy Court.

The Chairman, in replying to the remarks of shareholders, said they would certainly in future look more to shipping documents and accept only the credits of bankers. With regard to the firm of Gledstanes and Co. he could sympathise with the indignation expressed, and he could assure them that the directors made every effort to get the firm's affairs wound up in the Court of Bankruptcy, but they were outvoted. If justice were done the partners would be arraigned at the Old Bailey for their misdeeds. Many persons less guilty of obtaining money under false pretences had to go through that ordeal.

A vote of thanks to the chairman concluded the proceedings.

Monetary and Commercial.

The half-yearly meeting of the Chartered Mercantile Bank of India was held on the 15th inst., and a report of the proceedings will be found in another column. The chairman, it will be seen, alluded to the six months' sight bills current in the India and China trade, and expressed a hope that they would now become unsaleable, and that sixty days' and ninety days' sight, as in the Australian trade, would be substituted. He also made some severe strictures on the failure of Messrs. Gledstanes and Co. The following is the Report and Balance-sheet submitted to the meeting:—

The directors now submit to the shareholders the half-yearly statement of accounts to 30th June last, showing a net profit of £117,265 19s. 7d., to which has to be added £883 19s., brought forward from the previous year, making a total of £118,149 18s. 7d. A dividend at the rate of 8 per cent. per annum (free of income-tax) is now declared, leaving a balance of £88,149 18s. 7d. carried forward to next account. It will thus be seen that the result of the past half-year's operations has been highly satisfactory. Unfortunately, since these accounts were closed, the failure of a firm of high standing, with which the Bank has had large transactions for many years past, has taken place. This will involve the Bank in a loss, the extent of which, depending on the realisation of the assets of various firms connected with them, cannot yet be correctly estimated; but at the worst it will leave a large balance available to supplement the profits of the current half-year, and apart from this, the business of the Bank at all points continues satisfactory.

At the meeting of the Oriental Bank Corporation on the 17th, a dividend was declared for the half-year ended June 30 last of 30s. per share, being at the rate of 12 per cent. per annum. The bank's claim upon the estate of Messrs. Gledstanes and Co. amounts to £67,000, but the ultimate loss is not expected to exceed £43,000. A report of the proceedings will be found in another column.

A meeting of the shareholders of the Imperial Bank of China (Limited) will be held on the 22nd inst., to consider what steps should be taken to recover the calls paid to the liquidators of the Bank of Hindustan, China, and Japan (Limited), the amalgamation having been declared invalid.

The following is the report of the Singapore Gas Company, to be presented at the meeting on the 22nd inst.:—

The directors have the satisfaction of reporting continued progress in the lighting of Singapore, for particulars of which they refer to the report annexed, from their engineer and manager, Mr. E. J. Wells, dated Aug. 31, 1872. The balance sheet to June 30, 1872, and appended to this report, shows the financial position of the Company. The directors have written off for depreciation of works and plant, and off the expenses of first establishment, as per balance sheet, at the rate of one per cent. per annum. The profit for the half-year, after writing off these sums, amounts to £1,805 6s. 7d., which, together with £19 5s. 2d. the unappropriated profit of the preceding half-year, makes the available balance £1,824 11s. 9d.; out of this sum the directors recommend the declaration of a dividend at the rate of 7½ per cent. per annum, less income-tax on the amounts paid up on the preference and original capital; the balance of £14 16s. 4d. to be carried forward to the profit of the succeeding half-year.

Mr. H. B. Muir, of the firm of Messrs. James Finlay and Co., of London, Glasgow, and Liverpool, has been elected a director of the Alliance Bank (Limited).

An application, made on the 16th inst. to the Bankruptcy Court, to register a resolution come to by the creditors of Messrs. Leggatt and Co., by which it was resolved to wind up the estate under the arrangement clauses of the Act, and not in bankruptcy, was granted.

Numerous complaints are current as to the losses incurred by vessels discharging at the Hongkew wharf at Shanghai. The cargo discharged there invariably turns out "short," and claims are made on the shipowner, which, with a freight of perhaps 20s. per ton, becomes very vexatious. The managers will no doubt investigate the matter promptly, and stave off orders to Captains "not to discharge at Hongkew wharf."

Seventy-five guineas premium have been paid to effect reinsurances on the ship *Kentville*, which sailed from the Mersey for Hong Kong on the 20th of March last. The *Osaka*, from Ilo Ilo, on which forty, fifty, and sixty guineas premium has been paid, arrived at Falmouth on the 16th inst.

EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's Tables for the present month, containing details of the quantities of Cotton Manufactures and Yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon, during the month and twelve months ended 16th Oct., 1872, compared with the corresponding periods of the two preceding years:—

HONG KONG AND WHAMPOA.

Plain Cottons.—Export for the month ended 16th Oct., 1872, 6,137,065 yards; for the twelve months, 84,304,227 yards; for the twelve months, 1871, 112,177,460 yards; for the twelve months 1870, 63,756,262 yards. Decrease for 1872 against 1871, 27,873,233 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1872, 218,239 yards; for the twelve months, 1,824,074 yards; for the twelve months, 1871, 12,049,923 yards; for the twelve months, 1870, 6,437,342 yards. Decrease for 1872 against 1871, 10,225,849 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1872, 125,386 yards; for the twelve months, 2,389,217 yards; for the twelve months 1871, 2,586,008 yards; for the twelve months, 1870, 2,118,769 yards. Decrease for 1872 against 1871, 196,791 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1872, 578,400 lbs.; for the twelve months, 7,452,920 lbs.; for the twelve months 1871, 10,413,064 lbs.; for the twelve months 1870, 10,220,425 lbs. Decrease for 1872 against 1871, 2,960,140 lbs.

SHANGHAI.

Plain Cottons.—Export for the month ended 16th Oct., 1872, 18,897,465 yards; for the twelve months, 311,706,165 yards; for the twelve months 1870, 396,286,608 yards; for the twelve months 1869, 255,195,407 yards. Decrease for 1871 against 1870, 84,580,443 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1872, 945,862 yards; for the twelve months, 8,891,301 yards; for the twelve months 1871, 9,290,209 yards; for the twelve months 1870, 13,203,154 yards. Decrease for 1872 against 1871, 398,908 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1872, 513,578 yards; for the twelve months, 7,231,920 yards; for the twelve months 1871, 5,407,282 yards; for the twelve months 1870, 5,767,688 yards. Increase for 1872 against 1871, 1,824,638 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1872, 174,390 lbs.; for the twelve months, 1,211,900 lbs.; for the twelve months 1871, 542,892 lbs.; for the twelve months 1870, 665,140 lbs. Increase for 1872 against 1871, 669,008 lbs.

JAPAN.

Plain Cottons.—Export for the month ended 16th Oct., 1872, 4,512,060 yards; for the twelve months, 28,791,594 yards; for the twelve months 1871, 44,506,944 yards; for the twelve months 1870, 24,221,023 yards. Decrease for 1872 against 1871, 15,715,350 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1872, 438,247 yards; for the twelve months, 2,744,060 yards; for the twelve months 1871, 2,429,600 yards; for the twelve months 1870, 2,800,060 yards. Increase for 1872 against 1871, 314,460 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1872, 156,349 yards; for the twelve months, 1,569,238 yards; for the twelve months 1871, 1,098,363 yards; for the twelve months 1870, 1,049,094 yards. Increase for 1872 against 1871, 475,875 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1872, 1,163,490 lbs.; for the twelve months, 15,583,564 lbs.; for the twelve months 1871, 10,810,739 lbs.; for the twelve months 1870, 1,163,490 lbs. Increase for 1872 against 1871, 4,772,825 lbs.

SINGAPORE AND PENANG.

Plain Cottons.—Export for the month ended 16th October, 1872, 6,927,662 yards; for the twelve months, 69,341,431 yards; for the twelve months 1871, 67,420,009 yards; for the twelve months 1870, 75,919,454 yards. Increase for 1872 against 1871, 1,921,422 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1872, 651,480 yards; for the twelve months, 5,232,440 yards; for the twelve months 1871, 7,121,341 yards; for the twelve months 1870, 9,686,157 yards. Decrease for 1872 against 1871, 1,888,901 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1872, 560,261 yards; for the twelve months, 3,941,298 yards; for the twelve months 1871, 5,111,265 yards; for the twelve months 1870, 6,233,788 yards. Decrease for 1872 against 1871, 1,169,967 yards.

Digitized by Google

Cotton Yarn.—Export for the month ended 16th Oct., 1872, 251,665; for the twelve months, 1,811,324 lbs.; for the twelve months 1871, 3,242,237 lbs.; for the twelve months 1870, 3,175,921 lbs. Decrease for 1872 against 1871, 1,430,913 lbs.

BATAVIA.

Plain Cottons.—Export for the month ended 16th Oct., 1872, 2,511,419 yards; for the twelve months, 20,778,965 yards; for the twelve months 1871, 19,732,819 yards; for the twelve months 1870, 14,474,260 yards. Increase for 1872 against 1871, 1,046,146 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1872, 1,441,656 yards; for the twelve months, 9,869,772 yards; for the twelve months 1871, 11,837,085 yards; for the twelve months 1870, 10,235,535 yards. Decrease for 1872 against 1871, 1,967,313 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1872, 2,468,434 yards; for the twelve months, 12,220,728 yards; for the twelve months 1871, 11,759,478 yards; for the twelve months 1870, 9,602,992 yards. Increase for 1872 against 1871, 461,250 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1872, 60,505 lbs.; for the twelve months, 454,494 lbs.; for the twelve months 1871, 782,288 lbs.; for the twelve months 1870, 353,980 lbs. Decrease for 1872 against 1871, 327,794 lbs.

MANILA.

Plain Cottons.—Export for the month ended 16th Oct., 1872, 1,132,900 yards; for the twelve months, 12,484,205 yards; for the twelve months 1871, 9,939,969 yards; for the twelve months 1870, 20,544,967 yards. Increase for 1872 against 1871, 2,544,236 yards.

Coloured Cottons.—Export for the month ended 16th Oct., 1872, 868,977 yards; for the twelve months, 8,031,376 yards; for the twelve months 1871, 8,241,147 yards; for the twelve months 1870, 9,662,177 yards. Decrease for 1872 against 1871, 209,771 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1872, 36,500 yards; for the twelve months, 354,113 yards; for the twelve months 1871, 529,581 yards; for the twelve months 1870, 1,530,260 yards. Decrease for 1872 against 1871, 175,468 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1872, 32,000 lbs.; for the twelve months, 493,001 lbs.; for the twelve months 1871, 497,506 lbs.; for the twelve months 1870, 362,585 lbs. Decrease for 1872 against 1871, 4,505 lbs.

CEYLON.

Plain Cottons.—Export for the month ended 16th Oct, 1872, 2,961,725 yards; for the twelve months, 30,216,679 yards; for the twelve months 1871, 26,057,378 yards; for the twelve months 1870, 24,107,827 yards. Increase for 1872 against 1871, 4,159,301 yards.

Coloured Cottons.—Export for the month ended 16th Oct, 1872, 112,799 yards; for the twelve months, 1,899,640 yards; for the twelve months 1871, 2,731,339 yards; for the twelve months 1870, 2,544,399 yards. Decrease for 1872 against 1871, 831,699 yards.

Printed Cottons.—Export for the month ended 16th Oct., 1872, 515,039 yards; for the twelve months, 4,355,816 yards; for the twelve months 1871, 2,251,189 yards; for the twelve months 1870, 2,113,919 yards. Increase for 1872 against 1871, 2,084,627 yards.

Cotton Yarn.—Export for the month ended 16th Oct., 1872, 30,500 lbs.; for the twelve months, 202,702 lbs.; for the twelve months 1871, 302,235 lbs.; for the twelve months 1870, 330,075 lbs. Decrease for 1872 against 1871, 99,533 lbs.

ARTICLES OF IMPORT.

TEA.

The tone of the market is much as last advised, merchants giving strong support to prices for good useful to finest grades of Congou, while dealers pursue a cautious waiting policy; however, with a better general assortment the past few days—the Thermopylæ and Duke of Abercorn, the first of the sailing ships, having helped to swell and improve the choice—a larger business has resulted, at fairly steady prices for Black Teas, but at easier rates for Greens. Business for export is on a reduced scale.

Black.—Red leafs under 1s. have been in more request, as also the better grades of old season's up to 1s. 2d. per lb. New Teas have sold to a moderate amount; good common to fair at 1s. 0½d. to 1s. 2d., Sayune, fair to medium 1s. 1½d. to 1s. 5d., medium to fine Kaisow 1s. 5d. to 1s. 10d., and finest 2s. to 2s. 7d., the latter price being refused for chop Cheong Kee. Black leafs: Old season's unaltered; common Teas difficult of sale; limited dealings in new Shantam kind at 11½d. to 1s. 1½d. per lb., and in common down to 9d. Second crop Oonam and Oonfa Teas increasing in stock, holders' views being in advance of market; the most recent sales at 1s. 3d. to 1s. 4½d. per lb. establish a decline of ½d. to 1d. per lb.; good medium descriptions at 1s. 6d. to 1s. 7d., also the turn cheaper, but fine Pekoe-flavoured Teas from 1s. 9d. upwards are firmly held, and the tendency is towards improvement. New makes: Several thousand boxes of fair quality, recent import, sold at 1s. Oolongs and Souchongs, unless of very superior quality, are tending lower. Scented Tea: Canton Orange Pekoe, good medium to fine at 1s. 4d. to 1s. 6d. is fairly marketable; finest in limited supply and relatively dear. Capers: Large business done in Teas, ex Tweed, at satisfactory prices, 11d. to 1s. 2d. for good common to fair, 1s. 4d. to 1s. 6d. for medium, and up to 2s. 1d. for curio fine. Foochow Orange Pekoe: Some thousands of boxes medium to good medium, strong scented Teas, ex Sirius, sold from 1s. 5d. to 1s. 6d. per lb., small parcels choice making 2s. to 2s. 4d. per lb., but it is difficult to sell in quantity over 1s. 6d. per lb. Green: Continued free supplies, which have been pressed for sale, have caused a further decline of 2d. in Ping Suey, and 1d. per lb. in Moyune Imperial and Gunpowder, but fine Young Hysons and Hysons support previous rates; 6,342 packages Ping Suey, ex Deucalion, are printed for unreserved sale this day.

SILK.

The market has been inactive, and the little business doing is confined to the supply of the daily wants of the home trade, there being no demand whatever either for export or speculation. The bulk of the recent arrivals of China is of undesirable quality and very foul; some sales have been made principally from second hands of medium Tsatlees at 24s. 9d. for Red Peacocks, 26s. for Blue Elephants and Ku Kee Chin Jan, and 23s. 9d. for Green Elephants; inferior Silk is for the moment neglected, while chop Silk is scarce and fairly saleable at 28s. 6d. for best No. 3. In Japan Silk some parcels of Koshue and Aechezan have been sold at low prices; good medium Mibash is in fair demand from 25s. to 25s. 6d., principally for home consumption, other sorts are comparatively neglected. In Canton Silk there is very little business doing, and the tendency of prices is still downward. Deliveries 1st to 16th inclusive:—China, 1,539 bales; Canton, 393 bales; Japan, 393 bales; total, 2,325 bales.

Camphor.—The market has continued steady at previously ruling rates, about 450 cases *China* having been quitted at £3 16s. to £3 17s. per cwt. re-weights.

Cardamoms continue dull. No sales of Ceylon are reported.

Cocoa Nut Oil.—The market has continued steady but quiet; the current rates are £35 10s. for Ceylon, £38 to £38 10s. for Cochin. In public sale of 491 casks China offered 98 casks sold—good £37 15s., grey to good fair £36 10s. to £37 10s., common £35 10s., inferior £34, the remainder being bought in yellow to good £36 15s. to £38. Of 363 casks Ceylon offered 18 pipes yellowish to good sold at £35 10s., and 60 hogsheads fair to fine at £35 10s. to £35 15s., one lot dregged £35, the remainder being bought in, common to good at £34 15s. to £35 10s., or withdrawn, but a fair quantity has been since sold at £35 10s. per ton.

Cubebs.—The market is very dull, and we have no transactions to report.

Cutch has met somewhat more inquiry at the late decline, and by private contract fine Pegu has been sold at 22s. to 22s. 6d. per cwt., but the market closes dull. At auction part of 2,577 boxes Pegu sold—fine 22s. 6d. to 22s. 9d., very ordinary mixed 15s. 3d. per cwt.

Dragon's-blood.—Without change; in auction 11 cases reed retired, and part of 19 cases lump sold, fair £6 5s.; mixed £4 12s. 6d. to £5 17s. 6d. per cwt.

Ebony.—High prices continue to be maintained for Ceylon of good quality, and 8 tons have been quitted at £24 10s. to £25 per ton.

Essential Oils.—*Aniseed* dull; of 26 cases at auction, part only sold at 10s. to 10s. 11d., and there are sellers to arrive cheaper. *Cassia* firmly held, and business done up to 7s. *Nutmeg* firm, 10 cases retired at 9d. *Cinnamon*: fine, scarce and wanted. *Citronelle* quiet; of 146 cases offered one-third sold at 2¼d. *Lemon Grass* steady; 19 cases retired at 5d. to 5¼d.

Galangal Root is in good demand, but there is no supply, and consequently no business has been done.

Galls.—*China* are firm, and about 400 cases have been taken off during the interval at the previous quotation of £2 17s. 6d. per cwt.; 1,000 cases now landing will be placed on offer during the next few days. *Japan*: No transactions.

Gambier.—The demand has become more active, and block has been sold privately on the spot at 24s. 6d. to 25s., closing at 25s. per cwt.; 50 tons arrived have also been sold at 23s. 9d., ex ship, and for arrival August shipment at 23s. per cwt. At auction, block has sold at 24s. 6d., and free Cubes were bought in at 28s. to 28s. 6d. per cwt.

Gums.—*Benjamin*: Siam quiet, part of 19 cases sold; fine clean siftings in block £12 5s.; dull brown £8 to £8 2s. 6d. Sumatra quiet; one-third of 135 cases sold, fine seconds £9, fair and dull brownish £7 to £7 15s. *Copal*: Prices are lower; a very large quantity of Manila, amounting to 1,865 cases, was offered by auction Thursday, but there was little demand, and sales could only be made at lower rates, and the whole was therefore bought in or withdrawn, fair to good bold hard chiefly scraped at 32s. to 35s., middling partly soft 30s. to 31s.; 83 bags low coated Sarawak repacked sold at 10s. *Damar* quiet, large arrivals; of 560 cases only a few sold at 55s. for fair. *Gamboge* quiet; 23 cases sold firmly, fine £15 to £15 5s.; middling £12 to £13 10s.; inferior and small £10 17s. 6d. to £11 2s. 6d. per cwt.

Gutta-percha.—At the lower rates recently established a large business has been done, and privately some 100 tons, mostly of white, have been sold at 11d. to 1s. 3d. per lb. In auction 146 baskets sold very cheaply, fair and fine, 2s. to 2s. 1½d.; middling, 1s. 9d. to 1s. 10d.; good and fine white, 1s. 0½d. to 1s. 3d. per lb.

Hemp.—There is very little doing in Manila, but previous rates are maintained, fair roping being still quoted at £48 per ton.

Hides.—There was only a limited attendance of home buyers at the auctions held Thursday, but the export trade was well represented, and about three-fourths of a large supply offered were disposed of.

Horns.—*Siam Buffalo* were firm at the late auctions, when 65 tons were offered, and about half sold at 36s. 6d. to 39s. 6d. per cwt. for 3 lb. to 4 lb. horns. *Ceylon Deer*: 6 tons have been sold; horns about 1½ lbs. at 72s. 6d., 3½ lbs. at 46s. 6d. per cwt.

Isinglass.—In public sale 50 packages have sold firmly—good and fine pale leaf 3s. 9d. to 4s. 5d.; middling tongue rather mixed 3s. 2d. to 3s. 4d.; good cake 2s. 3d. to 2s. 5d. per lb.

India-rubber.—The market is firmer; 30 tons Borneo have realised 1s. 7½d. to 1s. 7¾d., but previously 80 baskets common in public sale were disposed of at 1s. 6d. to 1s. 6¼d. per lb.

Japan Wax is in fair demand at higher prices a few days since; of 400 cases at auction, a portion sold at 92s. per cwt. for fine saucers; 88s. for middling, and yesterday, of 47 cases offered, 32 cases fair saucer sold at 90s. 6d., the remainder being bought in at 93s. to 95s. per cwt.

Musk.—Market steady; 14 caddies Tonquin at auction sold; fine selected well-shaped pods 39s. 6d. to 40s.; rough and bally fair 21s. 6d. to 22s. 6d.; pickings wet 23s.; 8 tins Grain common to fine brought 40s. to 57s. per oz.

Digitized by Google

Pepper.—*Black* continues very depressed, and prices are lower; Singapore rules at 6 9-16d., and Penang at 6d. to 6¼d., but afloat lower rates would be accepted. *White* is also lower, and the market is flat. In public sale as low as 1s. 1¾d. to 1s. 1¾d. per lb. has been paid for fair quality, but many holders are not sellers under 1s. 3d.

Plumbago has sold on cheaper terms, and of 1,194 barrels in auction only a small portion was disposed of—fair to fine bold bright lump 25s. to 36s., chips 19s. to 23s. 6d., dust 10s. to 14s. per cwt.

Rattans continue firm at the high rates mentioned in our last report.

Rhubarb.—The market for China continues steady, and the stock of new import is still firmly held; 44 cases at auction were mostly retired, but a few parcels middling pinky high dried sold at 1s. 4d. per lb.

Rice.—The market is steady, but there is very little doing, the demand for floating cargoes existing last week having almost entirely ceased. On the spot Askoolie has realised 10s. to 10s. 7½d., ordinary Ballam 8s. 10½d. to 9s., and old Necransie 9s. Afloat the cargo per Excelsior, 730 tons Necransie, has been sold at 9s. 6d. for the Continent, plain E 2 contract, and the cargo per Svea, 710 tons Rangoon, arrived off coast, at 10s. 1½d. ex ship for London.

Sago.—Market steady, 1,828 bags offered at auction and half sold—fine, 17s. to 17s. 6d.; fair small, 16s. 6d. *Flour* is very firmly held, 753 bags being retired at 16s. 6d. per cwt.

Sapanwood.—*Manila* and *Siam*: Quiet; 16 tons Manila quitted at £8 to £9. *Ceylon*: Firm and scarce; no transactions.

Shells.—No business has been done since the public sales of the 8th inst., reported on in our last issue. Manila Mother-o'-Pearl shells are in short supply and much wanted, and the same remarks apply to Singapore Tortoiseshell.

Star Aniseeds.—Market firm, holders declining to sell under £5 15s. per cwt., at which business is not at present practicable.

Sticklac.—The market is firm, and there has been a considerable business in Siam, both in public sale and privately; fine quality has realised £4 8s. to £4 8s. 6d., blocky, £4 2s. 6d. to £4 3s. 6d. per cwt.

Spices.—*Cassia Lignea:* Prices lower and market dull; 450 cases middling unworked offered and part sold at 86s. *Buds*: Quiet. *Cloves*: Penang quiet; of 32 cases offered a few sold at 1s. 5½d.; very fine, 1s. 6¼d. *Cinnamon*: Market steady, but trade small. At auction 55 bales retired; 523 bags chips sold cheaply, medium, 5¼d. to 5½d.; good ordinary, 4d. to 4¾d.; thin bark, 3¼d. to 3¾d. *Mace* offers freely, but there is a fair export trade; part of 129 packages sold, good pale, 4s. 4d.; fair, 3s. 10d. to 4s.; Java, 3s. 6d. to 3s. 8d. *Nutmegs*: About 1d. lower, and flat; 66's to 64's to the lb. sold at 4s. to 4s. 1d.; 75's, 3s. 7d.; 80's, 3s. 5d.; 117's to 107's, 2s. 10d. to 2s. 11d.; Limed, 150's, 2s.; 200's, 1s. 6d.

Soy.—*China* is in heavy supply and is very flat; 156 casks offered in auction were bought in at 1s. 9d. per gallon.

Turmeric.—China scarce; Java unsaleable.

Tapioca.—Market quiet; of 2,350 bags offered half sold at 2d. to 2¼d. *Flour* steady.

Tin.—The demand for consumption has improved during the week, and prices are about £2 per ton higher than those last quoted. Holders are, however, disinclined to quit their stocks at current rates, and are looking forward to a further advance. Quotations are:—Straits, on the spot and afloat, £142; Banca, £156 10s.; Billiton, £147 per ton.

Vermilion.—Without change; China, 3s. 9½d. per lb.; arrivals expected.

VESSELS PASSED THE SUEZ CANAL.

Previous to Oct. 14.

Steamer.	From.	For.
Lord of the Isles	... London	... Singp., China, &c.
Drummond Castle	... Do.	... Do.

LOADING.

At London.—Steamers via Suez Canal.—For Hong Kong and Shanghai: H. C. Orsted. For Singapore, Yokohama, and Hiogo: Galley of Lorne. For Singapore, Hong Kong, and Shanghai: Scotland. For Penang, Singapore, Hong Kong, and Shanghai: Cheops. For Colombo, &c.: Calcutta, Scindia, Xantho.

Sailing Vessels.—For Yokohama: Eastern Star. For Hong Kong: Nueva Providencia. For Chefoo and Tientsin: Carnarvonshire. For Penang: Vanguard. For Singapore: Auriga, Havelock. For Colombo: Palestine. For Colombo, &c.: Spirit of the North, Elizabeth Ann.

At Liverpool.—For Manila (via S.C.): Emiliano (str.). For Penang, Singapore, Hong Kong, and Shanghai (via S.C.): Ulysses (str.), Nestor (str.), Glaucus (str.). For Singapore: Olive. For Colombo (via S.C.): Ambassador (str.).

At Glasgow.—For Penang, Singapore, Hong Kong, and Shanghai: Glenlyon (str.). For Singapore, Batavia, Samarang, and Sourabaya: Earl Canning.

At Greenock.—For Galle: Index, Barbadian.

SPOKEN.

Elsinore, Manila to New York, Sept. 3.
Slogi (French barque), Bordeaux to Batavia, July 17, 16 N., 26 W.
Berbice, Glasgow to Batavia, Aug. 22, 18 S., 35 W.
Mikado, London to Shanghai, Aug. 24, 10 N., 110 E.
Ocean Mail, Singapore to London, Sept. 2, off 3rd point, Banca Strs.
Willem Poolman, Liverpool to Batavia, Aug. 3, 31 N., 19 W.
Indian (Prussian), Liverpool to Batavia, 3 N., 28 W.

CASUALTIES.

The John Lidgett, Polson, which arrived at New York, Sept. 29, from Manila, reports having experienced a hurricane from S.E. to N.W., on 15, during which she lost lower maintopsail.

A telegram from Port Said, Oct. 12, announces that the last sale of goods thrown overboard by the Excelsior (str.) realised £650 gross.

Lloyd's agent at Foochow sends the following telegram:—"The Yeddo (str.), from Swatow for Shanghai, with sugar, is reported ashore at Lanyet Island, and will probably be a total loss. Her Majesty's ship Swarf (? Dwarf) has proceeded to her assistance."

FREIGHTS AND CHARTERS.

A good demand exists for suitable tonnage to load on the berth, which is but scantily supplied with sailing vessels. In coal freights from the outports there is no material alteration to note. Homeward chartering continues good.

Current Rates of Freight for Vessels on the Berth.

Per Steamers via Suez Canal.—To Yokohama: 85s. meast. To Hiogo: 85s. meast. To Nagasaki: 85s. meast. To Shanghai: 45s. meast. To Hong Kong: 45s. meast. To Manila: — meast. NOTICE TO MARINERS.

Japan—Isumi Strait.—Fixed Light on Tomangai Sima.—The Japanese Government has given notice, that a light is now exhibited from a lighthouse recently erected on the island of Tomangai, in the centre of Isumi Strait. The light is a fixed white light, visible from N. ½ W. round by east and south to S.W. by W.; it is elevated 208 feet above the sea, and in clear weather should be seen from a distance of 19 miles. The illuminating apparatus is of the third order. The tower, 21 feet high, is of granite. It is situated at the western extreme of the island. Position, lat. 34 deg. 16 min. 40 sec. N., long. 135 deg. 0 min. 30 sec. E. Hydrographic Office, Admiralty, October 1872.

New Steamer for the British India Steam Navigation Company.—On the 14th inst. Messrs. William Denny and Brothers launched from their building yard at Dumbarton a fine screw steamship of 1,850 tons gross measurement for the British India Steam Navigation Company (Limited). Her dimensions are 297 by 33 by 26.6 feet, and she will be fitted with a pair of compound direct-acting surface-condensing engines of 200-horse power nominal by Messrs. Denny and Co. On leaving the ways the vessel was named the Agra.

HOLLOWAY'S OINTMENT

AND PILLS have through long and anxious years proved themselves to be the champions of the weak, the defenders of the delicate, and the redressers of all bodily wrongs. The scrofulous and consumptive will find in these noble remedies the means of casting out the bad humours which originate and prolong their sufferings. The Ointment should be well rubbed twice a day over the skin, as near as possible to the part affected. It will penetrate and act most wholesomely and energetically on the diseased structure. It manifests a wonderful power in removing all taints from the blood, and consequently, in curing a multitude of chronic ailments which seemed to be almost uncontrollable and altogether irremediable.

SUCCESS IN INDIA,

AND HOW TO ATTAIN IT.

EFFINGHAM WILSON, Royal Exchange.

The writer is evidently well acquainted with the East, and the information afforded by him is both useful and interesting.—*Daily News*

The honest yet hopeful way in which practical information is communicated in these pages concerning actual life in India will awaken the dormant enterprise of young men of education and ability, whose prospects may be somewhat indifferent at home.—*Globe.*

A valuable little pamphlet.—*Morning Post.*

The author of this very sensible work appears quite at home in his subject.—*Financier.*

We leave the little book with much the same impression as would be derived from the conversation of an intelligent and observant man of the world.—*Bullionist*

A real and practical knowledge has been brought to bear upon the subject.—*Money Market Review.*

The author of the above-named pamphlet formerly editor of the *Indian Examiner*, and since on the staff of daily and weekly Journals in London, seeks a re-engagement as editor in China, Japan, or Ceylon. The advertiser has a thorough knowledge of the practical working of a newspaper, and could undertake the business department also.

Address, J. D. B., care of the Editor of the *London and China Telegraph*, 2, Cowper's-court, Cornhill, to whom references are kindly permitted.

NOTICE.—ALL JAPANESE residing at present in Great Britain and Ireland are hereby requested to report their ADDRESS to Mr. S. TODA, at No. 446, Strand, London, before the 10th of October.

By Pacific mail *via* San Francisco.

THE MAILS, &c.

The P. and O. mail, bringing advices as above from China and the Straits, was delivered, *via* Brindisi, this morning, its due date. The Japan advices by the Pacific mail reached us on the 22nd inst *via* San Francisco. The next inward (French) mail, with dates Yokohama 11th, Shanghai 15th, Hong Kong 21st, Singapore 30th Sept., is due, *viâ* Marseilles, on Monday next, the 4th proximo, but will probably be delivered on Friday, the 1st.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, five to six hours in transmission.

List of Passengers.

PASSENGERS INWARD.

Per steamer *China*, arrived at San Francisco, Oct. 3, from Yokohama.—For San Francisco: E. Suermondt and wife, Henry Thomas, Edouard Seve, Henry Sylva, J. P. Wilson, U.S. Navy, the officers and crew of the late steamer *America*; eleven European steerage passengers, eighty-four Chinese. For New York: Ysidore Ge Ybanes, Wm. Patow, J. H. Watson. For Europe: Lieut. C. F. Benicke, R.N., C. J. Melhuish, E. Doloz, French Consul for Hiogo, F. P. Vander Hœven, Dutch Minister to Japan.

By this mail to Brindisi, per P. and O. steamer *Pera*, Oct. 25.—From Singapore: Mrs. Tyndall de Vere, Mr. J. W. Phillips. To Venice, from Yokohama: Mr. O. Voight. From Shanghai: Mr Townend. From Hong Kong: Mr. H. Marshall. From Penang: Mr and Mrs. Oldham, child, and servant.

To Southampton, per P. and O. steamer *Massilia*, expected to arrive Nov. 4.—From Shanghai: Mr. and Mrs. Cooper and child. From Hong Kong: Capt and Mrs. Carrol and child, Lieut. Bently, R.N. To Suez, from Singapore: Mr. and Mrs. Jager and child, Mr. Heyning. To Malta, from Shanghai: Mr. and Mrs. Leonard.

PASSENGERS OUTWARD.

Per French mail steamer *Amazone*, from Marseilles, Oct. 27 (booked from London).—To Yokohama: Mr. Chastil de Bouirille. To Shanghai: Mr. and Mrs. Lemaire. To Hong Kong: Mr. E. Moore, Mr. Speechly. To Singapore: Mr. and Mrs. Labhart Lutz, Mrs. Olt, Mr. Springly. To Batavia: Mr. Van Berkil Bik, Mr Van der Zwain, Mr. Van Hemert. To Galle: Mr. Daniell, Mr Schultze, Mr. Bouzique.

Per French mail steamer *Ava*, from Marseilles, Nov. 10 (booked from London).—To Shanghai: Mr. and Mrs. Johnstone. To Hong Kong: Mr. and Mrs. Lammer and four children, Mr. E. Beart, Mr. and Mrs. Peterson. To Singapore: Mr. and Mrs. W. Ullemeister, Mr. Mead. To Batavia: Mr. and Mrs. Nogel, Miss Klins, Mr. A. Matkins, Miss Clona, Miss Mees, Mrs. Praterms, Miss Gulem. To Galle: Mr. G. Phear.

Per French mail steamer *Donnai*, from Marseilles, Nov. 24 (booked from London).—To Hong Kong: Mr. M. Beart. To Batavia: Mr. and Mrs. Hora Siccoina, Mr and Mrs. Kleberg, Mr. John S. Dick.

Per P. and O. steamer *Poonah*, from Southampton, Oct. 24.—To Yokohama: Mr. V. Vanden Brock. To Hong Kong: Mr. H. H. Thornton, Mr. J. Alexander. To Singapore: Mr. T. S. Chapman. To Ceylon: Sub Lieut. Wood.

Per P. and O. steamer *Pera*, from Venice, Nov. 1.—To Hong Kong: Mr. J. R. Hughes.

Per P. and O. steamer *Pera*, from Brindisi, Nov. 4.—To Yokohama: Mr. E. Grosser, Mr. H. Braunstedt. To Singapore: Miss Young. To Ceylon: Mr. Hardwick.

Per P. and O. steamer *Pekin*, from Southampton, Nov. 7.—To Shanghai: Mr. Wulff. To Hong Kong: Mr. K. Mac Iver. To Ceylon: Mrs. Bayley and child, Mr. Rudd, Mrs. Robertson and child, Earl Grosvenor, Marquis of Stafford, Viscount Lewi-ham, Dr Gould, Miss Burrington. To Hong Kong (*via* Bombay): Mr. W. H. Fittock.

Per P. and O. steamer *Malta*, from Venice, Nov. 15.—To Yokohama: Mr. and Mrs. A. Ewers. To Shanghai: Mr. G. Lethbridge. To Ceylon: Mr. Quilty.

Per P. and O. steamer *Malta*, from Brindisi, Nov. 18.—To Shanghai: Mr. and Mrs. H. Robinson.

Per P. and O. steamer *Simla*, from Venice, Nov. 29.—To Singapore: Mr. and Mrs. J. R. Mac Arthur.

Per P. and O. steamer *Simla*, from Brindisi, Dec. 2.—To Hong Kong: Mr. C. V. Creagh.

Per steamer *Ulysses* (Holt's line), from Liverpool, Oct. 20.—For Singapore: Messrs. Gray, Brereton, Myrtle, Mrs. Vaughan and child. For Hong Kong: Rev. Mr. and Mrs. Wolfe and child, Mr. and Mrs. Reynvaan, Mrs. Whereat and infant. For Shanghai: Mr. Walter Mackenzie.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates by the present mail should be to the 4th Sept., but the P. and O. steamer *Ottawa* broke down, and did not reach Hong Kong in time. On the 22nd inst. we received, *via* San Francisco dates from Yokohama to the 7th Sept. The London mail of 12th July arrived out on the 27th August.

The local papers teem with details of the destruction by fire of the steamer *America*, which we have already given in our last issue. The Court of Inquiry as to the burning of the *America* summed up as follows:—In conclusion, we most regretfully state that from all the evidence we are convinced that the fire was the result of intention and not of accident. Only the most remote and improbable chance for it to have occurred from any accident exists; whereas a person so disposed could, in our opinion, without difficulty, and with but the slightest chance of detection, have communicated this fire. The inducement to do this may have arisen from antipathy on the part of some person towards the Pacific Mail Steamship Company or some of its officers, or from the fact that the Chinese passengers, although so few in number, were so generally supplied with large sums of money. This may have become known on shore and induced some wretch to fire the ship for the sake of an opportunity of robbing these people during the conflagration.

The following items are from the *Japan Herald*:—

The charge against Capt. Hereiro, of the Peruvian barque *Maria Luz*, which put in here in distress, for cruelty towards the coolies he was carrying to Peru, has at length been decided. The judgment says that according to Japanese law the captain has rendered himself liable to one hundred days' confinement in his own house, or one hundred lashes, or the Court may, in its mercy, pardon the offender. The Court, taking into consideration, however, the great inconvenience the captain has been subjected to, and the length of time that he has been delayed, recommended that the offence be pardoned, and the captain permitted to leave with his ship. This judgment, prior to being rendered, was submitted to the foreign Consuls for their opinion, one only of whom, and that being the British, coincided with it, the American Consul arguing that the Governments of Portugal, Japan, and Peru were alone concerned. The French and Dutch Consuls alleged that the Court had been wrongly constituted, whilst the Consuls for Germany, Portugal, Italy, and Denmark sent in a protest against

Digitized by Google

the decision. The judgment has met with disapprobation, principally on the ground that Capt. Hereiro was never formally put upon his trial.

Apropos of this subject, the position of Mr. Acting Assistant Judge Hannen throughout the case has been the topic for some remark. Although not a member of the Court, he occupied a seat on the bench, and was allowed to question several of the witnesses.

The protest of M. Colleau against the judgment of the Court in the same matter has called forth a statement from Count Turenne, the French *Charge d'Affaires*, in which he says that, the protest having been written without his knowledge, he, as the representative of France, rejects its conclusions. The case, however, is by no means disposed of. The captain of the *Maria Luz* has demanded, without success, of the Government the return of his passengers, who are all on shore, fed and lodged by the authorities. He has commenced an action against the coolies for specific performance of their contract, which will be heard in a few days. The captain has threatened to abandon his ship, and it is thought extremely probable that the Peruvian Government will demand explanations and satisfaction at the hands of the Government for their action in this case. There is some feeling here against the coolie trade, but at the same time it is felt that international law and the ordinary methods of judicial procedure must be observed.

An inquest has been held on the body of James Noble, a British subject, who met his death in a Japanese jail at Osaka whilst undergoing a term of imprisonment on the warrant of H.B.M.'s Acting Consul, Mr. Wilkinson. The jury returned a verdict of death by apoplexy. Some severe and by no means undeserved remarks have been passed on Mr. Wilkinson's procedure for his having sentenced a British subject to undergo imprisonment in such a nauseous cell and without any proper medical supervision.

The date of the autumn race meeting has been fixed for the 30th and 31st October, and the 1st November.

C. O. Shepard, United States Consul, has been elected a member of the race committee in the place of Mr. Melhuish, who goes home on a visit.

Mr. Lowder, of the Consular Service, has been requested to fill an important position in the Japanese Customs. Under his direction, the management from the commencement of the present month has been such as to remove some causes of irritation. Many long-delayed but necessary reforms in this department may be looked for at Mr. Lowder's hands. The appointment has given much satisfaction to all engaged in trade here.

Mr. Uyeno, formerly Commissioner of Customs, subsequently holding an appointment in the Finance Office, and who has been employed abroad on occasional missions, in which he has acquitted himself with some ability, has been appointed Minister Resident at Washington, vice Mr. Mori, resigned.

The Shosha Company some time ago obtained permission from the Government to issue bank notes, which arrived from London a short time since, and are now being issued in Yokohama by the company. They are very similar in appearance to the notes of the foreign banks. Some are printed on good tough paper. Each one is numbered, and has its value stated both in English and Japanese. They also have a picture of Fusiyama, the sea, and surrounding country. On the back are a number of dragons and some fancy ornamentation.

M. Raymond, a Frenchman, who resided on the Bluff, next the Spring Valley Brewery, committed suicide by blowing his brains out with a revolver.

Among the late improvements in Tsukidji is the new Union Church, which was dedicated on Tuesday, Sept. 2. The building is a plain substantial structure, having an audience room 36 by 28 feet, with two small rooms in the rear and porch in front. A neat railing and gate fronts the edifice. A small but graceful white spire, surmounted by a Saxon cross, is a new and striking feature in Yedo architecture. Stained glass and pointed arched windows add to the ecclesiastical appearance of the church. It will be open every Sunday at ten A.M. for divine service. It is situated directly next to the new hotel. It is intended for the use and benefit of the English speaking people of Yedo, and has been built by their voluntary offerings. The dedicatory services were held on Tuesday afternoon last.

Many of our readers doubtless know that a road is being constructed in Yezo, but few are aware of the details concerning it. The road starts from Hakodate, and going almost due north, crosses a high range of mountains to Sawara. Thence a steamer will run across Volcano Bay to the small village of Moororan, comprising in all only about fifty houses, and situated at the entrance to Endermo Harbour. Thence the road runs in a north-easterly direction through a flat country to Yobutzi. From this a northerly direction is taken to Sapparo, the new capital of Yezo, situated on the river Ishikari. The construction of the road has been entrusted to Major Warfield, on General Capron's staff. It will be well finished, with gutters on each side, and will be macadamised throughout. At present not much more than twenty-five miles have been completed, the loss of the *Tokei Maru*, having on board tents, tools, and a variety of implements, having thrown them back considerably. Altogether, the length of the road may be roughly estimated at about one hundred miles, the gradients being easy throughout. We hear it reported that two paddle-wheel steamers are building in America for use in the north, one to run across Volcano Bay, the other to run from Hakodate to Awomori.

The *Mail* says:—

The following extraordinary account we take from the *Japan Herald*; the next mail will bring further accounts of the arraignment and trial of Mr. Cousens, when we shall be able to form some judgment on the subject:—

We hear of a singular and apparently uncalled for piece of official interference at Kobe. It appears that Mr. Cousens, who was about leaving that port for Yokohama, on Sunday last by the *New York*, pushed off from the shore in a native boat. Just as he reached the steamer's ladder, another boat, which contained, as Mr. Cousens was afterwards informed, Mr. R. G. Watson, H.B.M.'s *Charge d'Affaires*, Mr. Gower, and Mr. Wilkinson, H.B.M.'s Consul at Osaka, pulled up. One of the sendos of this boat pushed that of Mr. Cousens out of the way; this he resented by striking the coolie with a mat. Mr. Wilkinson then got up in his boat, and said to Mr. Cousens, "Do you know who I am, Sir?" Mr. Cousens replied by saying "he did not know, and what was more, he did not care;" and as the sendo again pushed his boat out of the way, Mr. Cousens struck the coolie a second time with the mat. At this Mr. Wilkinson got very excited, and said, "You shall hear further from me, Sir." On board nothing was thought of this little squabble, but just as the ship was commencing to steam away, who should pull alongside but Mr. Wilkinson and a constable armed with a warrant from the American Consulate to stop the ship. Mr. Wilkinson, whilst climbing up the ladder, exclaimed, in a very excited manner, "Arrest that man, arrest that man," and going on board, still very excited, and pointing out Mr. Cousens, said, "I call upon every British subject, in the Queen's name, to assist me in arresting that man." Mr. Cousens made no resistance, but simply protested. As the ship was just leaving some of the passengers offered to be bail for Mr. Cousens, and to be answerable for any fine that might be inflicted. This was refused, and an application was made to Mr. Watson to allow the matter to be settled in Yokohama. He declined to interfere. Mr. Cousens was consequently carried on shore, a victim to the caprice of Mr. Wilkinson, who said "he had a painful duty to perform, but as a British Consul he must do it."

Mr. Daloz, Vice-Consul de France, has left Hiogo for Europe. Although the regrets felt for this gentleman's absence are very general, there is satisfaction in the fact that he intends to make his return trip very shortly. Until that time the business of the French Consulate will be conducted by H.B.M.'s Consul.

NAGASAKI.

(FROM OUR OWN CORRESPONDENT.)

NAGASAKI, AUG. 28 (VIA SAN FRANCISCO).

Since my last letter, despatched on the 14th instant *via* San Francisco, the following mails have been received here: the French of the 5th July, on the 21st instant, 47 days out from London, and the English mail of the 12th July, by H.B.M.S. *Cadmus* on the 26th, 45 days. Our harbour looks very lively just now, owing to the numerous arrivals of war vessels. At the present time no less than three admirals are in port with their flagships. British: Admiral Shadwell, in the *Iron Duke*. American: Admiral Jenkins, in the *Colorado*. Russian: Admiral Fedorovski, in the *Vitiaz*. The man-of-war fleet comprises the following: *Iron Duke*, *Cadmus*, *Thistle*, *Juno*, *Teazer*, and *Salamis*, British; American, *Colorado*; Russian, *Vitiaz*, and two others, *Alreck* and *Monge*, which arrived yesterday. The French corvette *Cosmas* arrived this morning. The destination of the majority is reported to be Chefoo.

H.M.S. *Sylvia* left this morning for Hong Kong in order to catch the French mail leaving there on the 6th of September. We are expecting the arrival of the Grand Duke Alexis of Russia, but at present no outward show is being made to greet him. As the necessary tackle to give him a similar one to what was given to the Mikado is in the hands of foreigners it is perhaps accounted for. The Japanese Prince, appointed by the Government to receive the Grand Duke Alexis, arrived here last week in the *Nissin-Kan* corvette. As this vessel has a smart well-drilled crew she will be quite able to do honour to the occasion in the way of saluting and manning yards.

The particularly cool weather, coupled with a recent rapid fall in the barometer, leads the weather-wise to predict a typhoon, or some other unpleasantry. Last night it commenced raining, and it is to be hoped that rain is the worst we may expect. Of storms we have had enough; we are only just righting the good craft "Municipal" from the effects of the severe treatment it has recently received. As I told you in my last letter, the Consuls had issued a circular ultimatum to the public. The effect of this letter was to irritate the land-renters into taking a firm stand, which they have done, and a resolution framed in the most Parliamentary language was passed at the public meeting on the 20th inst.

Turning to something of a more congenial nature and leaving the past to be buried, I come to the election of the new Municipal Council—the result of this is to place Messrs. Heilyer, Rasch, Howe, jun., Hay and Inglis, on the new board. Decima gets no representative, and is very wrath in consequence.

In business things are much the same as usual. Coals have

Digitized by Google

been recently sent away in considerable quantities. Large parcels of tobacco have been settled, and are in course of preparation for shipment to London, to which port the British barque *Agincourt* will take the berth after the return from Shanghai, whence she left last week, with a cargo of coal.

In exchange on London the rate rules nominally at 4s. 9d.; the new year, 98¾ per $100. Nebus the same. Exchange on Shanghai, Tls. 78.5 to, 79 per $100. There are no arrivals from the home side to report, but the *Zohrab* may be expected any day now as she is 130 days out from home for this port *via* Hiogo.

CHINA.

—o—

TIENTSIN.

We have advices from this port to the 1st September:—

The water in the river, off the British settlement here, is higher than it ever was at the highest last year; and there is intelligence from several quarters of the rivers running in this direction having burst their banks and flooded the surrounding country. Most distressing accounts have been received of the state of the country in the direction of Paouting-foo; of the people having been driven to live on the tops of their houses, and in some places, while they were there, the houses being swept away—whole villages and towns destroyed, and great loss of life having occurred. The inhabitants of Paouting-foo even have been obliged to close up their city gates with earth and mud to keep out the rising waters. The waters in the plains east and west from the settlement are daily rising. On the night of the 27th Aug. there was a violent thunderstorm, which ended in a hailstorm with stones of a very large size. To add to the misery caused by the floods, where the country is not inundated, the crops are being devoured by locusts. We may conclude, therefore, that the coming winter will be a very sad one for the mass of the population of the province. Food of all kinds has already risen considerably in price, and will no doubt continue to do so till the spring. The steamers are now finding it tedious and difficult work getting up. The *Shangtung* was eleven hours hard steaming from Taku. Should the river continue to rise, the Taku road will be under water. News has been received that the road to Pekin is underwater for about fifty miles; so that the only communication is by boat to Tung-chow,—a passage now occupying seven days, owing to the force of the currents. There will be great need of a good fleet of gunboats during the winter.

We learn from the *Peking Gazette* that the Emperor, having ascertained that the Yung-ting river had burst its banks and inundated a large tract of surrounding country, and that great flights of locusts were daily devouring the crops on the ground not inundated, commanded Li Hung chang to make a true and faithful report to the Throne regarding all these disasters, and to inform his Majesty correctly how it arises that the banks of the river had again burst, after he had only reported a short time before that they had been put into thorough repair. His Majesty further commands Li Hung-chang to report to the Throne the names of the officers who had allowed the river banks to burst, so that they shall be punished for their remissness in the performance of their duties. His Majesty, in addition, orders Li Hung-chang to use every exertion to get the banks of the Yung-ting put in thorough order, and as speedily as possible.

Mr. James Mongan, Consul for Tientsin, returned to his post from leave of absence to Europe on the 25th Aug.; and has since issued a notification, informing British subjects that he will take charge of the Consulate on the 1st Sept.

The new Roman Catholic church at this place was opened for public worship on the morning of the 25th Aug. His Excellency M. Geoffroy, the French Minister, was present on the occasion. M. Geoffroy left for Chefoo on the 28th Aug.

The Customs Taoutai has issued a proclamation informing the Chinese population of the intended Austrian Exhibition at Vienna next year, and asking them to send in articles for it.

A meeting of the Race Committee has been held, when it was decided to have races on the 17th, 18th, and 19th Oct.

SHANGHAI.

We have advices from this port to the 8th September. The French mail from London July 19, arrived out on the 3rd, and the following P. and O. Mail of July 26 on the 5th Sept. The following summary of news is from the *North China Herald*:—

A meeting of Treaty Consuls was held on the 2nd Sept., when a memorial signed by twenty-four land-renters was considered, representing the illegality, under Art. 6 of the Land Regulations, of the encroachment on the Bund by the removal outwards of Messrs. Fogg and Co.'s boundary wall. The meeting agreed to address a letter to the Municipal Council requesting them to issue instructions to stop the work for the present, but offering, should the Council desire it, to call a special meeting of land-renters to consider the matter. Correspondence relative to the arrest of Mr. Cowie's clerk was submitted and approved. The Council, by their chairman, complain of the illegal arrest, upon the report of their superintendent of police; and Mr. Alabaster, in reply, states that he has already had an acknowledgment from the Taoutai of the irregularity of the arrest, in the prompt release of its victim, and trusts that the summary punishment of the actual offenders will afford sufficient guarantee against similar occurrences in future. Rules of procedure for the Court of Consuls were provisionally adopted; and some correspondence relative to a proposed alteration of pilotage rules presented and approved.

The new Chihsien has given full vent to the mandarin propensity for issuing proclamations. Though he has only been here three weeks, the city gates are literally covered with fulminations against the many evils which are supposed to afflict "this populous but immoral place." These effusions may be classified thus:—

1. Self-laudation. He is intimately acquainted with Shanghai affairs, and is determined to root out abuses. His whole energies will be directed towards the public good.

2. Against rowdies in general and gamblers in particular. If such characters do not speedily repent and turn from their evil ways, he will visit them with punishment. Two scamps called Wang Pao-chun and Chen Ah-lung have already been caught, and those who have suffered at their hands are invited to appear against them.

3. Against abuses connected with idol processions. Women must not, as heretofore, appear in procession in open chairs. Such a practice is subversive of public morality. The young and giddy are utterly ruined thereby. Neither must any processions continue after nightfall.

4. Notices of reforms. (a.) Hitherto the residences of new magistrates have been furnished by levying contributions of furniture, &c., from shopkeepers; the yamen runners not forgetting to levy a few contributions on their own account. The present magistrate will not allow this; not an article must be got which is not properly paid for. Shopkeepers are warned against imposture. (b.) The mutton-broth dealers have piously resolved not to put any mutton in the broth on the 1st and 15th of each moon, in order to show greater regard for animal life.

At the Mixed Court judgment has been given in the case of Mr. Cowie's linguist, who was recently illegally arrested. On the 5th Sept. last this man, named Chang Fu-chuan, appeared before the Mixed Court as defendant, the complainant being one Sun A-chu, who was the instigator of his arrest. The special charge arose out of Chang's interfering on behalf of a man named Hsu, who had been beaten by Sun, to extort restitution of the value of a pawn ticket, said to have been stolen by Hsu's daughter, the inmate of a brothel. At Chang's instance Sun was locked up in the brothel for two days, and being subsequently threatened, he applied to the magistrate for redress. No steps, however, being taken, he, with the assistance of a number of people, forcibly carried Chang to the city. Chang's offence seems to have been usurping authority, and a number of charges of this kind have been preferred against him. In consequence, his case was handed over to the Taoutai for investigation, and sentence was passed on him by Chen of six months' imprisonment. The men engaged in his illegal arrest were then brought before the Court, the police prosecuting. Sun A-chu was sentenced to six months' imprisonment, while of eight of those who assisted him four were sentenced to five days' cangue each, and the others dismissed with a caution.

On the afternoon of the 3rd Sept. the British ship *Annie Gray* collided with the British barque *Hopewell*. The latter vessel was in tow of the *Fuh-le*, and was bound to London with a cargo of tea, while the *Annie Gray* was just coming in from Foochow, in tow of the *Rocket*, with a full cargo of poles. The collision took place in the neighbourhood of Woosung bar, and it is said arose from some misunderstanding between the vessels, as to which was the proper side to pass one another under the circumstances. Both vessels carried pilots at the time. The *Annie Gray* has sustained considerable damage to her head-gear. Her jibboom took the port main rigging of the *Hopewell*, and her bowsprit and cutwater were literally rent away, causing considerable damage to the bulwarks and hull of the *Hopewell*. Both vessels are now at their moorings, and exhibit very evident marks of the collision. The cargo of the *Hopewell* will probably have to be removed to admit of the necessary repairs, and the vessel has entered an action in Admiralty against the *Annie Gray* for damages, the nominal amount sought being $25,000. A counter action is also brought.

We notice the publication of "The 100-Years Anglo Chinese Calendar, from 1st January, 1776, to 25th January, 1876." The volume has been compiled, or it might be more correct to say calculated, by Mr. P. Loureiro, and should prove a chronological Ready Reckoner of much value to all whose studies or pursuits involve frequent reference to and comparison of dates within the periods comprehended by it. The year 1776 is chosen as including a quarter of the last century, about which time Lord Macartney's embassy visited China. In addition to the carefully elaborated 100-Years Calendar, the volume includes an appendix in which are included:—A Table of the Sexagenary Cycle from the beginning of the present dynasty to A.D. 1900; A Note on Chinese Divisions of Time; The Contemporary Rulers of China, England and America, since 1644; Tables of the New Years' Days from 1644 to 1776; Table of the Chinese New Years' Days from 1876 to 2,000 A.D.; and a Perpetual Calendar for the 2,000 years of our Christian era.

The weekly meeting of friends and adherents to the cause of temperance, in the Chinese Chapel, Shantung-road, has been more numerously attended than any yet held, and shows that the society is fulfilling its objects with a large measure of success. In a few special remarks, the chairman, Mr. C. Schmidt, stated that the society was formed to meet and combat the growing ten-

Digitized by Google

dency to the excessive use of alcoholic liquors, and this it endeavoured to accomplish by holding weekly meetings to advocate the cause of temperance, by extensively circulating temperance tracts and papers, and by having a social *soiree* once a month. To withdraw sailors from evil influences and provide them with an attractive and beneficial entertainment was also included, and it was hoped ultimately that a reading-room and place of rational amusement might be established—in fact, that much-wanted and very desirable institution, a sailors' temperance club. To raise funds for the work of the society, an entrance fee of 50c. from members and a monthly subscription of the same amount was proposed.

Naturalists note that the swallow is migrating southwards rather earlier than usual, and the inference is that, instead of the sweltering September of 1871, we may have a comparatively cool period, before the actual setting in of winter.

Piling in connection with the Free Ferry works on the Soochow Creek is going on steadily, and we hear that some of the pontoons have already been constructed.

The Volunteers turned out for company drill on the 3rd Sept. to the number of thirty, and the following afternoon the Miholoongs had special drill, when thirty-five men were out.

M. Godeau has arrived, to replace M. le Comte Mejan as Consul-General for France at Shanghai.

The following items of news are from the *Courier*:—

We learn on what we take to be good authority that specifications have been made out and tenders made by an enterprising firm in Shanghai for the construction of dredgers, similar in principle to those of the Suez Canal, and suitable for the dredging of the Woosung Bar, and of other shoal parts of the river and harbour. This would afford matter for unmixed congratulation, did it not seem to indicate that the semi-official statement of Mr. Consul-General Seward, by which those interested in the dredging of our harbour and its approaches have been bluffed off for a year—the statement namely that the Inspector-General of Customs had sent home as early as August, 1871, for a powerful steam dredge for the Woosung Bar—was without foundation in fact; or, at most, that Mr. Hart had merely sent home for estimates of the expense, and, having got them, is still engaged in calculating whether the requisite dredging apparatus can be more advantageously imported or constructed here. How many more months or years is this most urgent desideratum to remain in the stage of discussion and calculation, before it assumes the practical form of a dredging machine actually at work in reclaiming and improving the port of Shanghai?

The Cantonese, Chang-che-wah, who last week murderously assaulted Mr. H. Lang with a hammer, was on the 4th Sept. brought up at the Mixed Court before Chen, the magistrate, and C. Alabaster, Esq., H.B.M. officiating Consul. Nothing further had been elicited as to his antecedents. The Court after consultation decided that as it had not the requisite powers to inflict on the prisoner a punishment adequate to his crime, he should be sent into the city to be dealt with by the Taoutai.

A few days since a foreigner driving past the Grand Stand saw a Chinaman struggling in a ditch by the road side. He alighted and drew him out, and found he was almost *in articulo mortis*. Getting assistance, he had the poor wretch conveyed to the Chinese Hospital, where he shortly afterwards recovered sufficiently to say that he was a cook in foreign employ, and had been beaten at Hongkew by a band of his own countrymen, who, after rendering him helpless, carried him to where he was found, and threw him into the ditch. His chance of recovery is said to be small. It seems a strange story; the affair is being investigated.

The 4th Sept. being the second anniversary of the French Republic, there was a considerable display of bunting and evergreens on the part of the French portion of the residents in the French Concession.

THE CUSTOMS RETURNS.

The *Customs Gazette*, containing the quarterly returns from April to June, has been issued. While embracing the various details for each of the Treaty ports contained in former issues of the same series, it presents a new feature, viz., Part VI., extending to eleven folios, and devoted to the important subject of lights, buoys, and beacons, corrected to 12th August, 1872, being Chief Engineer Henderson's contribution. It will be a useful manual for shipmasters and pilots.

That the general course of the trade supervised by the Foreign branch of the Chinese Maritime Customs is steadily in the direction of increase, is evidenced by the fact that the dues and duties levied for the quarter aggregate Tls. 3,189,439, as against Tls. 2,792,713 for the corresponding quarter of 1871. On the other hand the fluctuations to which the trade is liable may be inferred from the fact that at Tientsin the revenue has fallen from Tls. 157,673, for the quarter in 1871, to Tls. 92,572; at Chefoo the decrease has been from Tls 74,016 last year to Tls. 51 843 for this year; Hankow has drooped slightly from Tls. 634,372 to Tls. 604,022, and Amoy has subsided from Tls. 94,349 to Tls. 73,170 this year. The falling off at Tientsin can be only too easily accounted for by the floods and the consequent wide-spread poverty. At Chefoo the decrease seems equally divided between imports and exports, but the commissioner vouchsafes no explanation. A decreased export of tea direct for home accounts for the deficit at Hankow; and the lessened export of sugar has told on the Amoy revenue. But all this is much more than balanced by the increase at the other ports. Thus, while Swatow shows a difference of only Tls. 90 as comparing the quarter of 1871 with that of 1872, Kiukiang has grown from Tls. 199,739 to Tls. 234,894, Shanghai has advanced from Tls. 795,465 to Tls. 882,462, Canton has increased from Tls. 213,118 to Tls. 258,757, Foochow has almost doubled, the figures being Tls. 258,498 in 1871, and Tls. 459,665 for 1872. But the most extraordinary advance is that of Chinkiang. Here the revenue, which in April to June, 1871, was Tls. 26,250, has for the same period in 1872 advanced to Tls. 110,430, or more than fourfold last year. The increase at Kiukiang, Foochow, and Canton seems chiefly due to the early opening of the tea market; that at Shanghai to general development of trade. In explanation of the increase at Chinkiang, Acting Commissioner Huber says:—

The Customs revenue for the quarter just ended more than quadruples that of the corresponding quarter of last year. As may be seen by the revenue table, every item shows a fair increase; but the most conspicuous is that of the export trade, Tls. 77,557, against Tls. 2,053 last year. This increase is chiefly owing to the very large export of rice and other grain. But for this remarkable increase attention would not be called to the revenue, which is no test of the imports coming under exemption certificate from Shanghai.

With regard to the elaborate and valuable report of Chief Lights Engineer Henderson, we learn that between Canton and Newchwang there are forty-four lights, including those of the Yangtsze, of which we have here given the name, place, latitude and longitude, number and style of light, intervals between flashes, miles of illuminated radius, colour, height, year when lighted, character and order of apparatus, and general remarks—the whole facts of the subject in tabular form. Along the same extent of coast there are twenty-six buoys and thirty-seven beacons, of which similar particulars are given as in regard to the lights.

HONG KONG.

Dates are to the 14th Sept. The outward London Mail of 2nd August (French) arrived on 9th Sept. The *China Mail* gives the following items:—

His Royal Highness the Grand Duke Alexis landed on the 12th Sept. at Government Wharf, being accompanied by Admiral Possiett, with his flag-captain, private secretary, and flag-lieutenant. A guard of honour, with the band of H.M. 110th Regiment, was drawn up to receive the Grand Duke, who was met by the Lieut.-Governor and several of the officials. The whole party proceeded in conveyances to Government House, and after chatting a while with his Excellency and Lady Kennedy returned to the ship. The Grand Duke bears a striking resemblance to his father, and, in our opinion, a strong likeness also in some features to his uncle, the late Emperor Nicholas. Both his Royal Highness and the officers who accompanied him speak English well. After revisiting the *Svetlana*, where, we believe, His Excellency Sir Arthur Kennedy returned the Grand Duke's visit during the afternoon, his Royal Highness and suite again landed and drove out with the Governor, returning with him to Government House, where he will dine and sleep. The Grand Duke leaves shortly for Canton, where, we learn, Sir Brooke Robertson has made arrangements for his visit.

We note that Captain Carroll, so long the popular commander of the *White Cloud*, and so well known to residents here and at Macao, leaves for home by to-day's mail. We doubt not that a very large circle of friends will join us in wishing him a pleasant passage and—if it suits him—a speedy return.

The steam-launch, towed by the *An Lan* to Kowloong, belongs to the Mandarin of Kowloong, and was this afternoon anchored off Government Wharf, flying the Dragon flag.

The S.S. *Buenaventura* arrived on the 4th; she was built in Sunderland, and loaded with a general cargo in Singapore for Manila. She has come on here to fit up for coolies from Macao. She is a sister ship to, and belongs to the same owners as the S.S. *Yruracbat*, which vessel fitted and left here recently for Macao.

A telegram has been received by the superintendent of the P. and O. Company stating that the steamer *Ottawa*, with the Japan mails for Hong Kong and Europe, has become disabled in consequence of an accident to her machinery, and has had to put into Oosima, where it is understood the *Shuey-leen* was to go to her assistance. The superintendent has telegraphed for further particulars, but we understand that no change will be made in the time of the *Cathay's* departure.

The alterations in the City Hall theatre have already been commenced, and promise to make the stage, what it might easily be, one of the most convenient and well-adapted to its purpose to be found in any theatre of the size. Other improvements are also in progress. Steps are being taken to guard the centre north windows against typhoons, and the outside of the building will shortly be renovated.

H.E. the Governor has issued orders that more stringent rules than those hitherto adopted shall be put in force in the jail. The prisoners in future will not be allowed outside for the first three months of their sentence; and those sentenced to hard labour will be placed to crank and shot drill, while Europeans will have a diet of bread and water for the first ten days in each month, and Chinese rice and water for the same period.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Dates extend to the 22nd Sept. The outward mail from London of 16th Aug. (French) arrived 18th Sept. The news of the week is not important.

H.E. the Governor has been absent on a visit to Malacca and Penang, and only returned on the 18th Sept. The only meeting of the Legislative Council for business was held on the 19th, when progress was made with the Bills in hand. Notable among these is the Preservation of the Peace Bill, which was so strenuously opposed by the late Chief Justice and others, and which is now brought up for the purpose of making it a permanent statute Although this Bill places extraordinary powers in the Governor's hands, it has so far met with little or no opposition, though this may be attributable to the hopelessness of the unofficials effecting anything against a solid and foregone Government majority. The mail of the 9th August brought the satisfactory announcement that the Secretary of State for the Colonies had given positive instructions against the construction of the New Harbour Railway by Government. This, however, is all that is publicly known here on the subject, the Government having maintained silence on the matter, at least so far as the public are concerned.

During the Governor's visit to Malacca and Penang. defalcations to the extent, it is said. of over $9,000 were discovered in the Treasury Department at Malacca. A warrant was issued for the arrest of the Assistant Colonial Treasurer at that settlement, who has been lodged in jail, and the *Pluto* was sent to Singapore for the Auditor General. in order that the accounts might be thoroughly examined. We understand Mr. F. E. Isemonger, the Assistant Colonial Treasurer at Singapore, will go to Malacca to take charge of the Treasury Department. This defalcation, following so closely upon the one in the Penang Land-office, and which must have been going on for some time, leads to the inference that the system of auditing the Government accounts must be defective, its fault lying very probably in its complexity.

Business is still very dull and there have been several failures of late among the Chinese traders, some of them for pretty heavy amounts, and the European firms have lost largely by them. The heaviest losers, however, were the Chitties, or native brokers, who by calling in all their loans and refusing to give credit to Chinese traders, were, it is believed, the main cause of the greater part of the failures. This action of the Chitties was partly induced by the refusal of the Banks to discount their bills and promissory notes, but was, we believe, mainly owing to distrust of the bazaar traders after the failure of two leading Chinese firms—this sudden stoppage of supplies at a time when they were most needed having hastened the very catastrophe they dreaded.

The slackness of mercantile business affords ample time to devote to preparing for the Autumn Races, which are to begin in nine days more, and will extend over a week. There are a good number of horses in training, and there is every prospect of a lively meeting. The race week will be rather a gay one too, in dinner parties and other pleasant reunions, prominent among these being an "At Home" by the Tanglin Club, and as these affairs are always everything that could be desired. it is probable this will be the leading attraction of the week. The only drawback to the training are the heavy rains for which the fortnight has been chiefly remarkable, the most provoking part of the matter being that it generally rains hardest just at the usual time for exercising the horses, making the course for the time a perfect quagmire. It is to be hoped that the weather will take a favourable turn before the end of the month, so that there may be nothing to mar the enjoyment of one of our most attractive amusements.

The arrivals *via* the Suez Canal have been the *Olympia* on the 13th from Hamburg *via* London, *Ben Ledi* on the 18th from London, *Antenor* on the 19th from Liverpool, and the *Sunda* on the 20th from London. The departures have been the *Russia* on the 9th for Odessa, the *Duna* on the 18th and *Ajax* on the 20th for London.

COCHIN CHINA.

—o—

SAIGON.

A correspondent writes:—

It being the "saison morte," business is very dull, but the condition of the rice crop is very favourable, and the same being likewise the case in China and Japan, there is a prospect of prices being sufficiently low next season to admit of shipments being made to Europe. Tonnage is scarce, but there is no demand, and steamers have taken rice and fish to Hong Kong at 22c. and 50c. respectively. The Government House is approaching completion, and will probably be in readiness for Admiral Dupré, who is expected back in November. The King of Cambodia has returned, after having visited Hong Kong, Macao, Canton and Manila. His Majesty is said to have been much pleased with his trip.

SIAM.

—o—

BANGKOK.

The *Siam Advertiser* contains a long story in reference to the visit of the United States corvette *Iroquois* to demand satisfaction for the seizure of the American brig *Dolphin*, Captain Andrews. The court of enquiry decided that the charge was not proved, and ordered the Government to pay $100 for damages and the costs.

Commercial Report.

—o—

(*For dates see first page.*)

IMPORTS.

YOKOHAMA.—The interval had witnessed no improvement in the market, and although there had been rather more inquiry for Grey Shirtings and Cotton Yarn, the prices offered had not been satisfactory to holders, and but little business had resulted. Mousselines had been in good demand, and sales had been made to a considerable extent. In other descriptions of Fancy Goods and Woollens there had been little done. Quotations:—GE Grey Shirtings, 7 lbs., $2 25 to 2.30 per piece; ditto, 8¼ lbs. to 8½ lbs. $2.50 to 2.55; ditto, 9 lbs., $2.87½ to 2.92½; GE White Shirtings, 56 to 60 reed, $2.40 to 2.55; ditto, 64 to 72 reed, $2.70 to 2.85; T-Cloths, 6 to 7 lbs., $1.70 to 2 15. Cotton Yarn: Nos. 16 to 24, $42.00 to 42.75 per picul; ditto, 28 to 32, $48.00 to 48.75; ditto, 38 to 42, $46.00 to 48.00. Camlets, SS (Scarlet), $19.50 to 20.00; ditto, SS (Black), $15.00 to 16.00. Cloth, Medium and Broad, $1.10 to 1.85 per yard; Lastings, $14.00 to 15.00 per piece; Long Ells, Assorted, $6.00 to 6.50.

TIENTSIN.—The news received was of a very unsatisfactory character. The water was still rising, and business was almost at a standstill. 8¼-lb. Shirtings had declined 3c. per piece, and 64-reed W. Shirtings 5c. per piece. Drills only were saleable.

HANKOW.—Grey Cottons had been in better request during the fortnight, but nothing approaching a good demand had set in. In Woollens there had been less doing, but quotations continued firm. Grey Shirtings: Chief business done had been in 8¼ lbs., quotations for which were slightly higher; Dewhurst's Eagles, Tls. 1.90; 7 lbs., inquiry improving. White Shirtings: Neglected. T-Cloths: Small business. Drills: Weaker. Jeans: Best qualities unaltered, common a candareen lower, with a dull market. Fancy Cottons: Few sales reported, chiefly Dyed Brocades; Spots and Chintzes quite neglected. Woollens and Worsteds: Long Ells demand less active, and previous purchases cleared very slowly. Quotations for Scarlet showed a slight advance, Assortments without change. Camlets: Stocks in small compass and good Assortments commanded Tls. 15.80 to 15.90; Spanish Stripes, dull at former values; better inquiry for Medium Cloths, but importers were asking higher rates than dealers were prepared to give. Figured Orleans: In fair request at former quotations. Metals: Lead without change, scarcely any demand. Quicksilver: No sales, stocks being small holders were asking Tls. 80 per picul.

CHINKIANG.—Business in Piece Goods was quiet, and Opium was not in much demand. Quotations for all articles of import were on a par with those current in Shanghai.

SHANGHAI.—Grey Shirtings: 8¼ lb. Mildews, of which there had been large resales at low rates, had commanded the almost undivided attention of buyers. Dewhurst's Eagle chop nominally unchanged, but in little or no inquiry; best sold at Tls. 1.93; fair "Lie Eagle" quality, Tls. 1.84 to 1.85; 7-lbs. in short supply, and fairly steady at Tls. 1.68 to 1.72. A small parcel of 9¼ lbs. placed at Tls. 2.28. White Shirtings: Business insufficient to establish rates, which were nominally lower. T-Cloths: Extreme lifelessness still characterised the market. Drills had commanded the most prominent place in the week's trade, having been in steady request throughout the week. English, Tls. 3.05 to 3.15 for 14 lbs. to 15 lbs.; Dutch, Tls. 3.00 to 3.05. Jeans: Sales of Dutch at Tls. 2.27½ to 2.30, English at Tls. 2.15 to 2.20 recorded. Sheetings: English Tls. 2.85 to 2.96 per piece for 14 to 15-lb. cloth. Fancy Cottons: Trade requirements trifling; but for two articles—Brocades and Turkey Reds—buyers had had to pay a slight advance. Dyed Brocades, superior Tls. 3.00, ordinary Tls. 2.80 to 2.95. White Brocades, Tls. 2.30. Turkey Red Shirtings, Tls. 2.07½ to 2.10 on the spot; and Gentian Damasks, Tls. 4.90; assorted Chintzes, Tls. 1.58. Woollens: Long Ells excepted, Woollen Goods had received a fair share of attention, but no great business had been done in any one article, and the market closed without much activity. Camlets: Tls. 12.60 for black, and Tls. 16 for very good assortment. Lustres: Crape, Tls. 4.40; Plain, Tls. 4.50 to 4.58; Figured, Tls. 4 to 4.10 for ordinary, and Tls. 4.67 to 4.72 for special patterns. Long Ells: K.K.K. Scarlet, Tls. 6.45; C.P.H., Tls. 6.54. Lastings, Tls. 11.70. Crape Lastings, Tls. 9¼. Spanish Stripes, Tls. 0.63½ per yard. Medium Cloths, Tls. 0.84 to 1.32. Metals:—Iron: Market strong, native speculators upholding the market; Tls. 4.07 paid for very ordinary Nail Rod. Lead: Quiet and easier. LB is offering at Tls. 4.80 to 4.85 for forward delivery; Tls. 4.70 for early clearance. Coals: Advanced rates in England, advised by telegram, had induced holders to increase their demands. Sales of Cardiff at Tls. 11; English at Tls. 9.60.

FOOCHOW.—Sales had been 200 pieces 8¼ lbs. T-Cloths at $3.10 per piece; 100 pieces 8 lbs. T-Cloths at $2.62½; 150 pieces 7 lbs. T-Cloths at $2.25; 500 pieces 8¼ lbs. Grey Shirtings at $7.77½. Quotation for Lead unchanged.

HONG KONG.—There had been no improvement in the market generally, either as regards demand or price. The inquiry had been of a very retail character, owing to difficulty experienced by the native dealers in disposing of previous purchases. Stocks in consumers' hands were not large, but the fear of lower prices in Manchester and the slack demand from the interior was leading them to the exercise of great caution. Cotton Yarn had sold to a very small extent at the reduction of about $1 upon former rates; best chops quite neglected, not being wanted. Grey Shirtings: Prices showed a downward tendency. Transactions on a small scale, and confined chiefly to spotted cargo; Dewhurst's 8.4 lb. sold at $2.45. T-Cloths and White Shirtings: Quotations lower, but nominal; to effect clearances, lower values would have to be accepted. Grey Drills: 14 lbs. English asked for, and sales to a fair extent

Digitized by Google

had transpired; 15 lbs. not so readily saleable, the dealers not offering over $4.5 for Dragon chop; American and Dutch makes not in stock; Jeans quiet; Sheetings could not be sold. Fancy Goods: White Spots and White Brocades declined about 5 cents; Dyed Spots and Dyed Brocades in slight request; Dyed Damasks unsaleable; Velvets and Velvetcens declined, owing to arrivals from Shanghai. Woollens and Worsteds: Difficult to move, except Crape Lastings, which were wanted for Shanghai at an advance of 50c. Metals: Nail Rods very quiet, dealers fairly supplied, and high prices interfered with consumption; Lead in slight speculative demand. Rice: The market had been very quiet, with only a trifling business doing for local consumption, and prices were again 5c. to 10c. lower.

CANTON.—A large business had been done in Lead. Common qualities showed an advance to the extent of 15 cents., and WB from 5 to 10 cents. per picul. Quotations:—L.B., $6.55 to 6.50; WB quality, $6.85 to 6.90.

MANILA.—The market had been very quiet during the interval. The demand for most articles of import had been very dull and prices were irregular, but in most instances lower.

BATAVIA.—Messrs. Houghton and Co.'s Circular says:—Our import market, we regret to say, has during the past month continued without any improvement; and although holders are quite willing to meet the views of buyers in regard to prices, yet, the demand for the interior being so small, dealers cannot be persuaded to buy upon almost any terms. We trust such a state of things will not long continue; but, although we do look for a better demand, yet we can scarcely expect higher prices, as holders are anxious, in consequence of the advices from Europe, to realise the stocks they hold.

SINGAPORE.—Messrs. Bowstead and Co. report as follows:—39-inch Grey Shirtings: Demand for 8¼ lbs. improved, sales at $2.52½, low qualities at $2.50; 7lbs. in some request, but 6 lbs. unsaleable. 32-inch T-Cloths: 6 lbs., $1.62½ to $1.65; 7 lbs. in no demand. Grey Madapollams quiet. Grey Supers: Trifling enquiry for best makes at former rates, and for inferior, at a slight reduction; sales small. 36-inch White Shirtings: Fine descriptions in fair enquiry, and considerable sales have been effected; medium and low not in demand. White Spots and Brocades neglected. Woollens: Nothing doing in Camlets and Long Ells; Black Lastings asked for at lower rates; quotations for Brocade Lustres nominal; Scarlet Bombazets in few hands and wanted at $3. Grey Yarn: 16-24s dull at $107.50 for best; 30s scarce and wanted; 40s, no enquiry, and offering at $131 to 131½: T. Red in rather better request; Dark Green, of approved shade wanted, and firm. Iron: Nailrods in fair request, but holders ask $4½, at which price there are no buyers; Hoop saleable at $4¾ to 5. Lead dull at $5.90 to 6 for L B; no sales.

PENANG.—There had been no improvement in the market. The demand was still limited to immediate requirements, and former quotations were barely maintained.

EXPORTS.

TEA.

YOKOHAMA.—There had been little or no change in the market since our last report; settlements to the extent of about 6,500 piculs of most grades except the common ones had been made at prices much the same as last quoted; supplies had only just met the demand, so that stocks were unchanged. The market closed firm at quotations. The Pacific Mail Steam Ship Co.'s steamer Great Republic took 174,979 lbs. for New York, 73,923 lbs. for San Francisco, 52,310 lbs. for Boston, and 5,680 lbs. for Chicago. The Jessie Isabel had sailed for New York via Kobe, taking 395,182 lbs. from this port; the William Melhuish, for San Francisco, took 3,633 lbs. Quotations:—Common, nominal; good common, $26 to 29 per picul; medium, $30 to 33; good medium, $34 to 37; fine, $39 to 42; finest, $44 to 47.

KIUKIANG.—Fair quantities of Ningchow Congous continued to arrive, and were being steadily shipped to Shanghai on native account. Shipments of Green Tea from this port were expected to increase, on account of the additional local taxes which were being levied in Hangchow.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s Report says:—We have had a fairly lively market for Tea, prices being well maintained at the high range then noticed. Settlements amount to 7,194 chests 9,338 half-chests, particulars being:—6,182 chests 2,911 half-chests at 1s. 2d. to 1s. 5½d. per lb.; 1,012 chests 1,151 half-chests at 11½d. to 1s. 1½d. With such high rates ruling both here and in Shanghai it is difficult to form any estimate of the quantity likely to come forward. Of good Tea the quantity up country is now very limited, some of the better districts being already closed. Very little Shuntam packed has come down lately; should this class find an outlet elsewhere, as is asserted by the natives, there will be a considerable decrease in the export from this. We estimate total arrivals to date, exclusive of Ningchow Tea, at 48,621,400 lbs., against last year 52,032,200 lbs. Customs export to 30th August was 47,521,456 lbs., against 49,512,854 lbs., or including Ningchows 52,634,163 lbs., against 52,866,378 lbs.

SHANGHAI.—Messrs. Drysdale, Ringer and Co. report as follows:—Black: Settlements 27,000 chests and 33,000 half-chests, a larger business than was transacted during the corresponding period of 1871. During the first few days of the fortnight there was not much doing, and prices gradually gave way till a decided decline was apparent, when buyers, entering the market more freely, caused some recovery in price. Shuntans taken to a moderate extent at 11d. to 1s. 0d., and common to fair Hohows at 1s. 1d. to 1s. 2¼d., a lower tael quotation showing a decline of say half a tael per picul. Fair to on medium Oontas and Oopacks freely settled at 1s. 2¼d. to 1s. 4d.; it is in these grades that the decline has been most marked, at lowest point they were Tl. 1.0.0 to 1.5.0 lower, but have now recovered somewhat in value. Medium grades of Ningchow and Oopack do not show much, if any, reduction; chops with a little quality and "point" have been readily saleable. In our last issue, when reporting on the third crop, we mentioned that as a rule the teas were without "point" or character, a few chops since offered have however some of that brisk "point" and character which distinguished many of the second crop of Teas of last season; they are also well made and the leaf is bright after infusion; there are not many of these, we therefore confirm our previous remarks; taking the crop as a whole, we consider it inferior to last year. Export of Black Tea is 47,807,714lbs., against 49,379,823lbs., and stock 11,940 chests and 35,785 half chests, equal to 29,900 chests, against 55,371 chests in 1871 together showing a deficit equal to 3¾ million pounds without deducting cargo of steamer *Parnassus*. Green: Considerable business doing, although buyers have not been by any means eager to operate, and Teamen have only been able to make sales by concession in price, a fair proportion of the settlements are intended for England. We quote a reduction of 1 to 2 taels for medium to fine country teas, and 2 to 3 taels for fine to finest Moyune and Teenkais; Pingsueys showa similar fall. Prices have ranged from Tls. 34.0.0 to 60.0.0 proportion for Pingsueys, and from Tls. 30.0.0 to 52.0.0 for country teas.

FOOCHOW.—Congou: The market had been comparatively quiet; prices were supported by the activity at first displayed, and in some instances sellers succeeded in realising slightly higher figures, but the falling-off in the demand had caused holders to evince more anxiety to realise, and the market presented a weakish tendency at the close, without any quotable change from last mail's prices. Souchongs had met with a moderate inquiry at previous rates. The opening of the Oolong market took place on the 2nd Sept. by the settlement of the fine strings Tong Lee and Tong Mow at Tls. 36.8 o.b., taken with a third string at Tls. 32.8 o.b., or Tls. 35.8 o.b. proportion for the three strings. In addition to these the same buyer booked a fine string of 5,000 half-chests at Tls. 33.8 o.b., making a total of 15,000 half-chests. These purchases were soon followed by the settlement of other fine strings at from Tls. 30.3 to 31.8 o.b., some of which showed a decline of one to two taels from the opening rates, which latter were considered about one tael over last season's. The market closed rather quiet, as the ruling prices were above the views of the majority of buyers, while the teamen, who complained of losses, refused to give way at the moment. Scented Teas had been moderately dealt in at slightly easier figures. Settlements had been—Congou, 35,291 chests at Tls. 6.8 to 8.8 o.b. for dust and siftings; Tls. 10.8 to 12.8 o.b. for broken leaf; Tls. 14.8 to 18.3 o.b. for ordinary to good common; Tls. 19.8 to 24.8 o.b. for flavoury to medium, to Tls. 30.3 o.b. for good medium to fine. Souchong, 2,134 chests at Tls. 17.8 to 22.8 o.b. for low common to common; Tls. 26.8 to 27.8 o.b. for medium; Tls. 35.8 o.b. for fine, and Tls. 42.8 o.b. for a fancy parcel in boxes. Oolong, 34,444 half-chests common to fair cargo at Tls. 18.8 to 21.8 o.b.; good cargo Tls. 22.8 to 27.8 o.b.; superior Tls. 27.8 to 31.8 o.b.; fine to finest Tls. 32.8 to 47.8 o.b.; Choice to choicest Tls. 52.8 to 67.8 o.b. Scented Tea, 4,240 boxes Caper at Tls. 21.3 to 24.8 o.b. for common to low medium. Scented Orange Pekoe, at 23.3 to 27.8 o.b. for common to medium. Flowery Pekoe, 150 chests at Tls. 23.3 to 27.8 o.b. Congous: Arrivals to date, 505,671 chests, against 471,497 chests. Ooloong: Arrivals to date, 141,582 half-chests, against 148,359 half-chests.

AMOY.—Oolong: The only settlement to note had been of 1,460 packages cargo grades, during the early part of the fortnight, at about last quotations; latterly purchases had quite ceased, and buyers seemed indisposed to go on except at a material decline. Congous: The remainder of those on offer had been taken at $14 to 15, and no further supplies were expected. Formosa Oolongs: Late arrivals showed no material change in value, fine to finest costing $42 to $53; superior $36.

CANTON.—Inactivity had prevailed in the market, since the departure of last mail. In the country prices for leaf were maintained, and moderate supplies only coming forward, Teamen had not shown any disposition to force sales. From the long continued drought, the leaf coming to hand was very large and coarse, and not up to the standard of quality usually current at the season of the year. Scented Teas: With the exception of a few parcels of good medium Caper, purchases had been chiefly confined to one operator. Orange Pekoes were firmly held, and Capers were unchanged in value: the assortment of the latter was very unsatisfactory, and few parcels with strength and good scent could be selected. Canton Greens: A few settlements had been made in Gunpowder and Imperial, for America and the Continent. Settlements for the fortnight:—Scented Orange Pekoe, 1,500 boxes at Tls. 16½ to 26; Scented Caper, 3,500 boxes at Tls. 18½ to 24; Canton Greens—Gunpowder, 1,500 packages, at Tls. 20 to 23; Imperial, 500 packages, at Tls. 17½ to 22. Stocks are estimated at:—2,000 boxes Canton District Congous, 10,000 boxes Scented Orange Pekoe, 25,000 boxes Scented Caper, 10,000 boxes Gunpowder, 2,000 Imperial, and 2,000 boxes Young Hyson.

SILK.

YOKOHAMA.—During the fortnight the market had continued much the same as last reported, a large business had been done, and settlements had amounted to 1,400 bales. Prices for Hanks had been very firm at annexed quotations, but Hamatskis being somewhat neglected had declined about $10 per picul. Silk Worms' Eggs: The total arrivals had amounted to about 100,000 cards, of which a few small lots had been purchased, although insufficient to establish prices. Quotations for Silk:—Hanks, Mybash and Sinchu, extra 31s. 9d., best 29s. 10d. to 31s, medium 27s. 7d. to 29s. 1d., inferior 24s. 7d. to 26s. 6d.; Oshu, extra 32s. 7d., best 29s. 10d. to 31s.; Hamatski, medium, 27s. 3d. to 28s. 4d.; Coshu, medium, 26s. 1d. to 27s. 3d.

SHANGHAI.—Messrs. Skeggs and Co.'s Circular says:—Since the publication of our last, we have had a very quiet market, the news from home not being of a character to stimulate purchasers; the overcrowding of all the European markets with Silk at such high cost so early in the season is now beginning to make itself felt, and although the inferiority of the Silk was at first overlooked at home, it is, now that the excitement is over, beginning to be recognised as a fact, and claims are being made in consequence. This with the large stock should under ordinary circumstances have its effect here, but up to the present dealers pertinaciously refuse to give way more than Tls 5 per picul for any Silk with character or containing a well-known chop paper, while for the commoner sorts a concession of Tls. 10 would be made; the high cost of dollars and the difficulty of collecting good Silk

Digitized by Google

is the reason assigned for this firmness; but although the Silk was bad at the commencement of the season, most of that now on offer shows a large falling off even on it; some of the ordinary No. 4 Tsatlees with a paper in them, differ as much as one number, and for this reason many of the recent purchases have had to be rejected; Yellow Silk continues to be in favour, fully one-third of this week's settlements consisting of that description; a large quantity of the Silk going forward is on native account or in joint account with natives. Before the departure of last mail, some of the Chinese dealers (no doubt with a view to support prices) began speculating on their own account, believing at the time that Exchange was likely to decline; this has proved a delusion, and many of them now stand to lose considerably on their purchases. Buyers for America continue to pay extreme rates for all good and fine Silk:—Blue Flag, 28s. 4d.; Chin Jan, 28s.; Blue Elephant, 27s. 9d.; Kinling Cat and Bee chop, 28s. 10d. to 29s. 1d.; Hangchow Tsatlee, 24s. 11d. to 25s. 5d.; "Chang-vong" Taiho Kaiping, 28s. 7d. to 29s. 1d.; Re-reeled Hainin, 29s. 7d, to 33s. 3d.; Re-reeled Tsatlee, 28s. 7d. to 31s. 8d.; Yellow Silk, 12s. 9d. to 20s. 8d.; Foosic Taysaam, 20s. 5d.; Fookong Taysaam, 24s. 11d. to 25s. 5d.

CANTON.—The market had been very unsettled during the fortnight; a large business having been done for the French Mail, amounting to about 1,100 bales, but since then the advanced rate of Exchange, which materially affected the laying down cost in London, had assisted to materially check operations. In Re-reels prices had given way considerably, but it was difficult to make contracts at the ruling rates. At 4/7¼ Exchange, the following were the laying down costs in London, per Overland route:—Tsatlee-reel, No. 1, 21s. 11d. to 22s. 4d. per lb.; No. 2, 20s. 7d. to 21s.; No. 3, 19s. 8d. to 19s. 10d.; No. 4, 18s. 11d. to 19s. 3d.; No. 5, &c., 18s. 6d. Loongkong, No. 1, 23s. 3d. per lb.; No. 2, 21s. 11d.; No. 3, 20s. 10d.; No. 4, &c., 19s. 8d.

STRAITS PRODUCE.

SINGAPORE.—The Produce Market had been firm, there had been an active demand for many of the principal staples, and a fair amount of business had been done. Gambier continued in demand, and had been very firm throughout the fortnight, about 1,100 tons contracted for chiefly at $4.30 per picul. Rhio Gambier advanced; there was some demand for Java quality. Black Pepper was weaker, sale reported at $12.80; supplies are small, the crop being nearly finished. West Coast bought at $12.40 per picul. White Pepper higher, with eager competitio for small lots coming forward; several sales of Rhio at $23½ to 24, Singapore at $24 to 25 per picul. Rattans: Business quiet, quotations unchanged. Pearl Sago was bought early in the fortnight at $3.2½ to 3.5, but the price had since risen, $3.20 being paid for medium grain. Sago Flour advanced rapidly, sales of Singapore at $2.47½ to 2.72; Borneo at $2.60 to 2.82½; a large business done and market closed steady. Tin had risen in value, a moderate business done at $37½ to 38 15 per picul.

PENANG.—Supplies had been scarce during the fortnight, and prices had been firmly maintained at the previously ruling range, especially for Tin and Pepper. Quotations:—Black, $12.35; White, $24. Tin. $37.12½.

BIRTHS, MARRIAGES, AND DEATHS.

—o—

BIRTHS.

Alt—On the 18th Oct., at Woburn Park, Weybridge, Mrs. William Alt, of a daughter.

Comrie—On the 12th Sept., at Clifton, Penang, the wife of David Comrie, of a daughter.

Crowe—On the 29th July last, at Patras, Greece, the wife of A. L. Crowe, Esq., of a daughter.

Dickinson—On the 22nd Oct., at Farleigh House, Kingston-on-Thames, the wife of Geo. F. Dickinson, of a daughter.

Ehlers—On the 6th Sept., at Hong Kong, Mrs. Paul Ehlers, of a daughter.

Grigor—On the 2nd Sept., at Yokohama, the wife of John Grigor, Esq., of a daughter.

How—On the 18th Oct., at Leigh-hill House, Cobham, Surrey, the wife of E. Henry How, prematurely, of a son, who only survived a few minutes.

Lay.—On the 23rd Oct., at Perry-rise, Lower Sydenham, the wife of H. N. Lay, C.B., of a son.

Overbeck—On the 8th Sept., at Woodlands, Hong Kong, Mrs. Gustav von Overbeck, of a son.

Pitman—On the 1st Sept., at Hong Kong, Mrs. Geo. D. Pitman, of a son.

Remedios—On the 7th Sept., at Hong Kong, the wife of J. H. dos Remedios, of a daughter, stillborn.

Swire—On the 16th Oct., at Richmond, Yorkshire, Mrs. William Swire, of a daughter.

MARRIAGES.

Macmillan—Pignatel.—On the 24th Oct., at St. George's, Campden-hill, by the Rev. Canon Kingsley, Alexander Macmillan, of The Elms, Streatham-lane, Upper Tooting, Surrey, to Emma Pignatel, second daughter of the late Eugène Pignatel, Esq., of Lyons.

DEATHS.

Baumgarten—On the 19th Sept., at Singapore, Anne Caroline, wife of Christian Baumgarten, Registrar Supreme Court, aged 57.

Cameron—On the 22nd Oct., at 22, Dover-street, William Cameron, of Shanghai, in his 44th year.

Doel—On the 28th Aug., at Osaka, of convulsions, Emily Mary Doel, youngest daughter of Mr. P. Doel, Japan Railway, aged 7 months.

Dudgeon—On the 23rd Aug., at the Hills, near Peking, Mary, third daughter of J. Dudgeon, M.D., aged 5 years.

Fanshawe—On the 1st Oct., suddenly, at the Colonial-office, Charles Harding Fanshawe, aged 23, eldest son of Col. Fanshawe Royal Engineers.

George—On the 24th Oct., John Alexander, the infant son of Edgar George, Esq., of Lonsdale Villa, Putney, and Yokohama, Japan, aged 6 months.

Gutierrez—On the 31st Aug., at Hong Kong, Eugenia Maria, second beloved daughter of L. J. Gutierrez, Esq., aged 16 years.

Krolczyk—On the 30th Aug., the Rev. A. Krolczyk, of the Rhenish Missionary Society, Hong Kong.

Matthews—On the 26th Aug., at the International Hospital, Kobe, Mrs. E. S. Matthews.

Neisen—On the 27th Aug., at the General Hospital, Yokohama, Richard Neisen, of his Imperial Austrian Majesty's corvette *Fasana*, aged 21 years.

Sibbald—On the 8th Sept., at Foochow, W. L. Sibbald, Esq., of the I.M. Customs.

Stearns—On the 30th Aug., at Yokohama, John O. P. Stearns, Esq., of Maine, U.S., aged 42 years.

Tapp—On the 24th Oct., after intense suffering, endured with much patience, and to the great grief of her sorrowing family, at her residence, 4, The Crescent, Kensington, A. H. S. Tapp, relict of the late W. G. Tapp, and within four months of his decease.

Telegrams from San Francisco announce the arrival of the *Colorado*, with £60,000 specie recovered from the steamer *America*, lately burnt at Yokohama. The specie is much defaced and melted, and is in custody of the Pacific Mail Company.

The amount of bullion by the P. and O. Company's steamer *Poonah*, which left Southampton on the 24th inst, was, in gold—to Alexandria, £62,000; to Galle, £11,780; to Madras, £15,203. In silver—to Gibraltar, £2,000; to Penang, £20,000; to Singapore, £233,300; to Hong Kong, £302,980; to Shanghai, £10,530. Total in gold, £88.983; in silver, £568,810.

The "Maria Luz" Coolie Ship.—According to the Yedo correspondent of the *New York Tribune*, the *Maria Luz* is a small barque of apparently about 350 tons burden. "We found them (the coolies) sitting or lying closely together in their numbered berths, reeking and sweltering in an atmosphere which would extinguish the life of an American or European in half a day. Though not confined, except in a few instances, they were not allowed to stir from their cramped quarters. An imaginary ventilation was afforded by a few small holes in the side of the ship, which from their position could only be opened in a quiet sea. To attempt to depict the agony of despair in which

Digitized by Google

the countenances of most of these unhappy creatures were fixed would be a hopeless task. . . . . When we were about to return to the deck, as if by a common impulse, they all sprung from their ranks, and, clustering about us as closely as they could, fell upon their knees, lifted their clasped hands, and with piteous cries implored our intercession." The lieutenant in command appeared to be a man of about twenty-five years of age. He protested against the inspection of the ship as destructive of "discipline," and said that, "although he did not apprehend a general mutiny, he knew perfectly well that he should be obliged to kill some of them after leaving Yokohama, in order to awe the others into submission." After a patient investigation of the matter the Japanese decided to set the coolies free, and send them back to their own country. The *Tribune's* correspondent accuses Dr. Delong, the American Minister, who arrived while the inquiry was going on, of having warmly taken up the case of the Peruvians, and improperly endeavoured to alter the decision of the Japanese Government.

Official returns show that during the year 1871 eleven vessels were totally lost on the coasts of China and three partially damaged from wrecks, while two were partially damaged from collisions, making a total of sixteen. The vessels totally lost were of 6,448 tons, and those partially damaged of 1,452 tons. Two lives only were lost, and 433 were saved. On the coast of Japan one vessel of 399 tons was wrecked and totally lost, four lives being lost and eight saved. On the coast of Java three vessels of 1,536 tons were wrecked and totally lost. No lives were lost, but forty-four saved. In the China Sea two vessels were wrecked and totally lost, and one partially damaged, eighteen lives being lost and forty-five saved. The following casualties are recorded:—On the 24th of December the *Clarendon*, barque, bound from Saigon to Hong Kong, with a cargo of rice and thirteen passengers, stranded in the China Sea, seven lives lost; on the 21st of October the *Humberstone*, barque, from Hong Kong to Foo-Chow-Foo, with ballast, stranded on a reef off Formosa Island, six lives lost.

Le Journal Officiel reports as follows on the progress made by French education in Cochin China:—In 1866, the journal writes, there were forty-nine schools, of which two were French, with 1,238 pupils; in 1867 the number of schools had increased to fifty-eight and the number of scholars to 1,368; in 1868 there were 116 schools, with four French among them, and 3,067 children at school; and in addition to this there were four infant asylums; in 1869 the number of schools amounted to 126 (for boys alone), and the pupils were estimated at 4,760. Since that time progress appears to have been slow.

Foreign Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Rotterdam, Oct. 24.

We have gained but a very poor victory, but still a victory. By 38 Ayes against 36 Noes the Java Tariff Bill was carried by the Second Chamber of the States General. Both the Protectionists and the Radicals appeared among the opponents of the measure, the first named because it goes too far, and the latter for the reason that it does not go far enough. The seven days' debate which preceded the decision may be summed up in a few lines, for our M.P.'s are very fond of wasting the National time by repeating each others' arguments *pro* and *con*. I have already told you that one of the principal bases of attack on the part of the Opposition was that the Minister altered his Bill at the eleventh hour. The discussions, however, find their echo in the several amendments which were proposed, which clearly show the points of difference between the parties. Mr. Bredius proposed the introduction of a so-called system of free ports, that is the total abolition of all duties, but his amendment was rejected by 66 against 6 votes. Mr. van der Linden, who represents the cotton districts, and, let me add, the cotton interests, was not more successful with his amendment, proposing to rescind the tariff so far as regards exports from Holland to Java. He advocated, and most ably, that Holland and Java were one country, and that it was a mistaken policy to establish a fiscal tariff specially for our East India possessions. His proposal was outvoted by sixty-five against six voices. Messrs. de Jong and Gratema proposed to introduce a measure of transition, viz., to maintain until the year 1877 a differential duty of 4 per cent. in favour of Dutch manufactures; in other words, that the cotton goods manufactured in Holland should pay an import duty of 6 per cent., whilst those imported from other countries should be liable to an impost of 10 per cent. This was rejected by fifty-one against twenty-one votes.

As regards the question of export duties there was no less difference of opinion. The Minister had proposed to tax only a few articles, viz., hides, indigo, coffee, sugar, tobacco, tea, tin, and birds' nests. The coffee, which is now charged with an export duty of 6 and 9 per cent. of the value, would pay f.3 per 100 kilogrammes, whilst, instead of a differential duty of 3 per cent. upon sugar exported to foreign countries (the export to Holland being free), it was proposed to levy a fiscal duty of f.0.30 per 100 kilogrammes. Mr. Bredius was not content with this proposal; he was of opinion that 30c. was too little, and proposed that the sum should be altered to 50c., but the Chamber rejected his proposition by 58 against 14 votes. Mr. D. Bruin Kops urged that no export duty upon tea should be charged; but after two divisions had been taken upon his amendment, the numbers being 36 against 36, it was regarded as outvoted. Last but not least came the amendment of Mr. Mirandolle, most eloquently defended, which was to abolish all export and transit duties. This was not opposed in principle, not even by the Ministry; Mr. Mirandolle *prechait aux convertisbut*, but the Dutch Treasury cannot afford to do without these taxes, and, by 46 against 24 votes, the Chamber resolved to maintain them. These are the outlines of the debate, which, perhaps, would have been still more extended, if the Minister of the Colonies, Mr. Fransen van de Putte, had been in good health. He defended the Bill quite ably, but in a very short speech. The question now is, what will be the fate of the Bill in the First Chamber—a majority of only two will afford quite sufficient grounds to induce our Lords to reject a measure, the future revision of which is to be delayed *ad calendas Græcas*, notwithstanding that it was proposed, but in vain, to stipulate that a revision should take place in the year 1880. To-day the Chamber will open a debate upon the restrictive measures proposed by a Bill to prevent the introduction of the cattle plague. And let me now take leave of Parliament, after having stated that the Minister had laid before the members a very voluminous annual report upon the condition of our colonies. It contains a mass of statements which are all well known in Java.

The Section report upon the East India Budget has been published. There is a general complaint that the Minister had not afforded sufficient information. The resolutions of the Government regarding the Agrarian Law are disapproved of, because the reporters are opposed to the law itself. Complaints are again made that after the Budget had been laid before the members most important alterations were made in it. Although several members suggest that the ten millions which the Minister proposed to appropriate towards the repayment to the Trading Company should be applied to the redemption fund, it was generally approved that the Government had given proof of an intention to decrease the payment of interest upon the National Debt. Several members—of course Conservatives—express opposition to any augmentation of the expenditure in Java, whilst others seek to demonstrate the greatest urgency of an increased outlay in this direction. Information is asked regarding the intentions of the Government with respect to the construction of railways in Java. The proposal to build three new war-steamers, to reinforce the navy in Java is generally approved of. The majority declare for a reorganisation of the Government of our Colonies. The reporters do not think it necessary to advise the maintenance of coffee culture, because there can be no question of its abolition as long as there is no equivalent. An ample report with reference to the financial results of the new sugar regulation is asked for, to be accompanied by information if the native population is sufficiently remunerated for their services. The granting of a subsidy for a steam line between Java and Australia is approved. Complaints are made of the defective education provided for the natives, and of the neglect of public works. It is unanimously acknowledged that the Batavia harbour should be improved, but some members require more information about the plans. It was also generally agreed that Samarang should be guaranteed against inundations, but new works in Batavia for such a purpose are deemed superfluous. Great objection is made to the proposed construction of a lunatic asylum at Batavia. Complaint is made that there is a deficiency in the means adopted for the preservation of public security in that Colony. It is hoped that our East Indian Colonies will be properly represented at the Exposition at Vienna; and it is urged that more coffee should be sold in Java, and in better assortments. These are the outlines of the report, made up by Messrs. Van Houten, 's Jacob, Van Rees, Mirandolle, and Mackay; let me add to it that the reporters request some information about the rumours which state that the Italian Government intends to establish a convict colony on the island of Borneo.

Another company has been established—the Rotterdam India Culture Company, the prospectus of which I gave you some weeks since. This company intends to purchase unproductive agricultural undertakings and waste lands in Java, and place them under productive cultivation. The capital of this company is only one million of guilders—a trifling sum in these times; and this is divided into two series of f.500,000, of which one is subscribed for. I think this amount of capital is very small; £40,000 will not go far in purchasing agricultural undertakings in Java. I hear it was the intention at first to fix the capital at five millions, but one of the promoters (the firm of W. Schoffer and Co.) reckoned on the German bankers, who, however, declined to furnish the capital. The managers of the company are Messrs. Besier and Jonkheym; the commissaries, Messrs. J. G. Thooft, F. Koch, Jos. Anthony, W. van Dam, and — Rose Jr. Mr. Besier will start by next mail to commence operations in Java.

I obtain the following items with reference to our trade with the Far East during the year 1871 from the official statistics, which have been published. From China there arrived two vessels with cargoes valued at f.2,165,487, and two vessels cleared out to China with a value of f.485,364. No vessels arrived direct from Japan, but two cleared with a value of f.176,386. From Java there arrived 260 vessels with cargoes valued at f.101,392,386, whilst 136 ships sailed for the Colony with cargoes worth f.40,813,301. Sixty-two vessels arrived from British India during the year with cargoes valued at f.11,270,659, and ten ships left Holland for this destination with cargoes worth f.871,566. To Australia we exported a value of f.2,879, against f.96,961 in 1870.

PORTUGAL.

(FROM OUR OWN CORRESPONDENT.)

Lisbon, Oct. 19.

Senor Fontes de Mello, President of the Council and Minister of Finance and War, has resigned his financial post, which is now occupied by Senor Serpa Pimental, formerly Minister of Public Works, and one of the most pronounced members of the party of the Government. Senor Serpa has been several times member of the Cortes, is connected with the press, and is a member of the *Tribunal de Contas*, to which all the officials who receive money from the State present their annual accounts. A year since Senor Serpa declined the functions of the office he now holds, and it has created great astonishment that in the present weak position of the Government he has acceded to the wishes of his colleagues. On the same day Senor Serpa took his office a council of Ministers was held to receive his financial propositions. I understand that he intends to reduce the deficit, not alone by the increase of taxation, but also by a better management of public revenues.

As I stated in my last letter, the day fixed for the convocation of the House of Peers, as a Tribunal of Justice for the trial of the Marquis d'Anjega, on a charge of being implicated in the late conspiracy, was the 18th inst. Accordingly, yesterday, at ten o'clock, the members assembled, and the new President, the Marquis d'Arilda and Balama, assumed his functions. The accused did not appear. The first speaker, Senor Ferrer Neto de Paixa, a lawyer of the highest repute, began by asking the President whether the House was constituted simply as a tribunal or as a Parliamentary Chamber, as, if it had been convoked as a tribunal, its convocation was illegal, as it could not take place simultaneously with the meeting of the Lower Chamber, which must pass judgment upon the accused peer. The President did not reply, and other speakers thereupon repeated the same question, whereupon much discussion ensued. The majority of the speakers were evidently opposed to the convocation, but I am of opinion, notwithstanding, that the Government will be placed in a majority on the question. Until now nothing has been actually resolved upon; but it is very likely that on Monday next the House will be constituted as a tribunal, and I am inclined to believe that the Marquis d'Anjega will be condemned to some months' imprisonment, for, the Government having made a great noise concerning the conspiracy, they wish to prove that they were right.

A new company, called *Protectora*, has been established, to provide to every young man who shall pay a small sum of money, either in annual instalments or in one payment, with a substitute for military service. The press have approved of this institution, and I have ascertained that all the directors are responsible men. Senor Serpa, the new Minister of Finance, who was one of the directors, has given place to Senor Mello e Gouveia.

The company of the White Star Line have inaugurated their service of steamers to the Pacific with the departure of the steamer *Republic*. She had on board 231 passengers; and she has space for 180 of the first class and 900 third.

The Marquis de Niza is moving the Municipality to obtain a concession to construct a line of railway between Alcantara and Pedrouços and San Sebastiao da Pedreira. He proposes to complete the two short lines in four months after obtaining the concession.

Senor Domingos Ribeiro dos Santo has been appointed Consul for Peru in the city of Oporto.

THE TEST OF CIVILISATION.

(NEW YORK TIMES)

If the famous New Zealander who is destined to eat his frugal lunch on the ruins of London Bridge were to exhibit a little enterprise, and, instead of postponing his European trip to the dim futurity when England shall have dropped from the roll of nations, were to spend the ensuing twelve months in visiting China and Europe, it is doubtful whether he would perceive the delicate distinction which separates the so-called semi-civilised Chinaman from the wholly civilised Caucasian. The latter has persistently refused to admit that China is a civilised country, and when confronted by facts which cannot be denied, and which seem to prove that the civilisation of China is not inferior in most important respects to that of Europe, he has insisted that the Chinaman's intellect was arrested some thousands of years ago, and that as he is hence incapable of making any progress in anything, but can only follow blindly the customs of centuries, he is only a semi-civilised being. Even were the premises true, this conclusion would not necessarily follow. That the Chinaman is not incapable of progress is, moreover, easily demonstrated. The long sought-for process by which the telegraph can be made to deliver a message in the handwriting of the operator has just been patented in Paris by three young Chinamen, and the Chinese Government is now building a formidable fleet of iron-clad steamers. These two facts alone exhibit the folly of the Caucasian's complaint that the Chinese mind is incapable of invention, and unable to depart from the precedents of its past history.

The real reason why the European has refused to admit the civilisation of the Chinaman is the fact that when engaged in war with Western nations the Chinese have proved scarcely more formidable than the timid natives of Australia or Polynesia. That a great Empire, with almost unlimited funds, and an enormous number of men capable of bearing arms, of whose individual bravery and contempt of death there is abundant proof, should prove so feeble in war, has convinced their enemies that the Chinese are little better than naked barbarians. Had the Chinese beaten French and English troops in the field, there would have been an end of the shallow talk of Chinese semi-civilisation.

Now the creation of a powerful Chinese fleet, propelled by steam, protected by armour, and provided with the best European arms, handled by crews drilled after the system of European navies, is not only a step that will go far toward convincing Europeans that the Chinese are civilised, but is a matter full of interest and importance to the civilised world. The weakness of China in war has been due solely to the want of fleets and armies equal in drill and equipments to those of her adversaries. Since she has shown that she appreciates the necessity of exchanging the junk for the iron clad, we may expect to see the archer and the matchlock-man of the Imperial Army superseded by infantry armed with breech-loaders, and artillery equipped with rifled cannon. The successes achieved in the Taeping rebellion by the small bodies of Chinese troops organised after the European model, and commanded by Ward, Burgevine and Gordon, afford abundant evidence of the efficiency of the Chinese soldiers when properly armed and led. The reorganisation of the army will undoubtedly follow the reorganisation of the fleet, and when this shall have been thoroughly accomplished, China will be the most powerful military Empire on the globe. With her countless population, she will be able to put ten men in the field for every one man that Germany or Prussia can raise, and can furnish these men with their simple rations of rice at probably a tenth of the outlay that each European soldier costs his Government.

The Chinese are so essentially an agricultural and trading people that no schemes of conquest need be expected from them. Were China, however, in a condition to maintain the integrity of her possessions, to enforce her nominal authority over the tribes of Tartary, and to check the tide of Russian conquest now flowing eastward through Bokhara—all of which she is fully capable of accomplishing, so soon as she possesses an army as well equipped as her new fleet promises to be—we should no longer hear of the semi-civilised Chinaman, and the arrested development of the Chinese intellect. We have contemptuously ignored the civilisation of the people who first founded a civil service upon competitive examinations, who invented gunpowder and the mariner's compass, who clothed Europe in silks, and provided her with porcelain ware from which to drink Chinese tea; but we shall instantly admit her claim to be called civilised the moment that she demonstrates her ability to kill men in a scientific manner. So true it is that the modern test of civilisation is the efficiency of a nation's breech-loaders.

MR. DREW, COMMISSIONER OF CUSTOMS AT KIUKIANG.

(BOSTON TIMES.)

Mr. Edward B. Drew, of Chelsea, a graduate of Harvard in the class of 1862, arrived home a few days since after an absence of seven years in China, where he has occupied the responsible position of Commissioner of Customs of the Chinese Government. Mr. Drew is one of three young men who were selected by the Presidents of as many American colleges for this important cosmopolitan service, in which English, French, and German students have been employed. The Inspector-General of Chinese Customs—Robert Hart—having representatives of the above nationalities in the service, and failing to find any respectable young Americans in China qualified for the duties, requested the late Mr. Burlingame to apply to the several colleges for competent men to fill the positions. Mr. Drew was accordingly honoured by the nomination by President Walker, of Harvard, T. E. Woodruff, of New York, was chosen from Yale, and E. C. Taintor, of New York, from Union College. Mr. Drew first took up his residence in Chefoo, where he remained a year and a half, acquiring meanwhile the rudiments of the Chinese language. He subsequently went to Peking to study, and having become proficient, was placed in charge of the port of Chinkiang, where he remained six months, going thence to Kiukiang, of which port he has been the Commissioner of Customs for the past three and a-half years. His residence in China has given Mr. Drew large opportunities for studying the character of the people, their political policy, their social institutions, and their commercial relations with the outside world. Although naturally reticent upon matters affecting his relations with the Chinese Government, Mr. Drew, knowing that considerable curiosity has been manifested to learn the results of the Burlingame mission, says that the principal benefits arising from the mission are manifested in the willingness on the part of the Chinese Government to establish diplomatic relations with friendly nations. They have, however, sent but a single representative to a foreign Court—that of France—and this in the settlement of the troubles growing out of the Tientsin Massacre. The mission of Mr. Burlingame had the greater and more immediate effect of establishing an understanding with the English Government, in restricting Consular officers in the exercise of arbitrary powers. They are now prohibited from calling gunboats to their aid and landing armed men in the settlement of local difficulties, the Treaty providing that all such questions, which cannot be settled by correspondence, shall be referred to the high authorities at Peking. Mr. Drew avers that it is a mistake to suppose that we, as a nation, stand higher than other nations in the estimation of the Chinese. Great Britain exercises the greatest influence by reason of her vast influences and greater power.

Americans have, however, obtained a strong foothold, and the monopoly of the carrying trade of the great river (Yangtse). The house of Russell and Co., one of the largest in China, having agencies at each of the principal ports and also at Hankow, controls at present the entire foreign bottom trade of this great feeder of Shanghai. This firm own a fleet of American built river steamers, which they run under the American flag, three up and three down the river every week. Tea forms the principal article of export, to which is added hemp, tobacco, oil, and paper. These steamers go down freighted with these goods, and carry back cotton and woollen piece goods, opium, and the products of other ports of the Empire. But notwithstanding repeated attempts have been made by foreigners to get a foothold upon the soil, the business of the ports on the Yangtse is almost exclusively in the hands of the Chinese. It was formerly expected that the port of Kiukiang would grow to be as large and important as Shanghai, but the trade slipped through the fingers of the Americans into Chinese hands, and the former now only retain the carrying trade. The monopoly which they have held of this has excited the jealousy and cupidity of the English, who have only one line under the British flag on the river, and that a single steamer plying weekly between Shanghai and the upper ports. It is believed that the house of Alfred Holt and Co., of Liverpool, whose steamers run with frequency between that port and Shanghai, are about to establish a powerful opposition to the line of Russell and Co.

There is no evidence at present of the intention of the Chinese to establish those adjuncts of civilisation, railroads and telegraph lines, in the Flowery Kingdom. The only telegraph which exists in the Empire is a cable between Shanghai and Hong Kong, which is greatly appreciated by the Chinese merchants. The Government, even, after the Tientsin Massacre, found the telegraph of great service in their negotiations with France, but they have not yet consented to have one laid even from the capital to Shanghai.

During his residence in China Mr. Drew accompanied Mr. Low, the United States Minister, on the Korean expedition, in the capacity of acting secretary of legation and interpreter. He speaks in the highest terms of George B. Glover, Esq., now senior commissioner of customs at Foochow. A residence of twenty years in China has given Mr. Glover unlimited opportunities of familiarising himself with the people and their institutions, and he is never more happy than when rendering assistance to his countrymen. Mr. Drew has a furlough of two years.

THE FOREIGNER IN FAR CATHAY.

The following are extracts from Mr. Medhurst's work bearing the above title:—

A writer in a late Hong Kong paper has very pertinently remarked that although the solution of the audience question in a direction favourable to foreign views implies a violent wrench to every tradition surrounding an ancient and illustrious throne, and that consequently every sympathy is due to those whose patriotic instincts will suffer thereby, yet it cannot be admitted that the mass of Chinese officials have any claim upon foreign consideration in the matter. The ill-government of many a cycle, which is mainly attributable to the difficulty hitherto existing in bringing matters to the immediate cognisance of the Emperors without the intervention of interested officials, would alone justify intervention in favour of a change; but apart from this consideration, foreign interests in the country have now reached that magnitude that they imperatively demand that the existing isolation of the Emperor should be done away with at the very earliest opportunity. Another essential measure necessary to progress, and which has not had that attention that it deserves, is the giving of official publicity to every act of concession to a foreign Power. The treaties have not been promulgated and made law throughout the Empire as they ought to have been, although in some of them publication to the people constitutes one of the provisions stipulated for, and the consequence is that the mandarins in the provinces constantly profess ignorance of the existence of trading privileges, and the inhabitants need not necessarily be aware of them. Even the concession of the non-audience claims will fail of effect unless the fact that the Emperor has admitted a foreign representative to his presence be proclaimed by an Imperial edict, and an injunction conveyed that all foreigners are to be treated accordingly. Officials and people alike will then see that their Government is in earnest in admitting foreigners to friendly relations on terms of entire equality, and will readily do their part in making friendly advances.

CHUNG HOW.

Chung How, the only really high class mandarin who has visited Europe, disappointed me keenly when I was conversing with him last August, by exhibiting the most listless indifference to my suggestions as to the vast collections of novel and interesting sights which it would be well for him to see whilst in this country. I happened to attend him at Shanghai when he embarked for the first time on board of one of the finest vessels of the French Messageries fleet, and took possession of his cabin for the voyage. The next time when I met him was in his handsome room at the Grosvenor Hotel, a day or two after his arrival. Yet, on both occasions, he took as little heed of his novel surroundings as he would have done when stepping on board of one of his own wretched Chinese junks, or walking into one of his still more primitive native hotels. To my mind there must be something more in this than an effected indifference arising out of simple conceit. It must be the result of an inborn incapacity in the untutored Chinese mind to entertain any subject save by the particular process of thought or connection with the particular association to which it has been schooled by custom and tradition.

THE INFLUENCE OF TRADE.

Let the commercial enterprise of the people be taken advantage of to introduce the thin end of the wedge of progress wherever and whenever the opportunity offers itself; let knowledge be sown broadcast throughout the land by means of suitable and instructive publications, in the native language; and let foreign Powers combine to treat China justly, and at the same time see to it, that she acts as justly by them, and not only will progress be possible, but no long time need elapse before a regeneration ensues which shall at once satisfy the longings of the diplomatist, the merchant, and the missionary.

NAVAL AND MILITARY.

The Mosquito, a new composite gun-boat of 408 tons burthen and 360 horse power, will be commissioned on the 30th inst. for service on the China station. The gun-boat will have a complement of fifty-seven officers and men, and will be commanded by Lieutenant William Henry Bond (1863) who until recently served on board the Glasgow, flag ship of the East India Station.

Lieutenant-Colonel J. H. Hudson, Grenadier Guards, will not return from Ceylon, he having been nominated by General Renny to succeed Colonel Stewart in the post of Assistant Military Secretary. Lieutenant E. E. Swaine, Ceylon Rifles, has been appointed Acting Aide-de-Camp to Major-General Renny, commanding in Ceylon, in place of Lieut.-Colonel Hudson.

Lieutenant John Hext, R.N., who formerly commanded the Firm on the China Station, has been appointed to the command of the gunboat Decoy, which is to be commissioned for service on the West Coast of Africa.

Dr. William Loney, R.N., has been nominated to the Royal Naval Hospital at Hong Kong, vice Dr. Pottinger, who has been compelled to invalid in consequence of failing health.

We learn by telegram that the Thalia arrived at Malta on the 23rd instant, and *en route* to China.

DEATH OF ADMIRAL COCHRANE.

Admiral of the Fleet Sir Thomas John Cochrane, G.C.B., died on the 19th inst., at his residence near Ryde, Isle of Wight. The late Sir Thomas Cochrane entered the navy at a very early age as first-class Volunteer, and served on board the *Thetis*, commanded by his father, Capt. Alexander Cochrane, on the North American Station. In 1800 he rejoined his father in the *Ajax*, 80, as midshipman, and served in the expeditions against Quiberon, Belleisle, Ferrol, and Egypt. From April, 1803, till June, 1805, he served under his father's flag in the *Northumberland*, 74, on the Irish station and off the north coast of Spain. On obtaining his lieutenancy he served in the West Indies, and afterwards removed from the *Melville* to the acting captaincy of the *Jason*, 32. When off the coast of Surinam, June 27, 1807, he took *La Favorite*, French national ship, and in December following he assisted at the reduction of the Danish West India Islands. While commanding the *Ethalion*, 38, he had a slight encounter with the French frigate *Amphitrite*, and served in the capture of *Martinique* in 1809. After two years on half-pay he obtained in August, 1812, the command of the *Surprise*, 38, which vessel he commanded three years, during which time he captured the *Decatur*, American privateer of 12 guns and eighty-two men, and was in the *Chesapeake* during the attacks on Washington and Baltimore, and in the operations on the coast of Georgia. In the spring of 1825 Captain Thomas Cochrane was appointed Governor-and Commander-in-Chief of the island of Newfoundland and its dependencies,—an office which he held for several years. In 1835 he was an unsuccessful candidate for the City of Westminster, but in 1837 was returned to Parliament for Ipswich in conjunction with the present Lord Chief Baron of the Exchequer, which borough he represented till the dissolution in 1841. Shortly after obtaining his flag rank in November, 1841, he was appointed second in command on the China station, and hoisted his flag in the *Agincourt*, 72. On the return home of the Commander-in-Chief, Admiral Sir William Parker, he held until 1847 the direction of naval affairs in Hong Kong and the China seas, and it was during this period that he severely punished the Borneo chiefs by the destruction of several piratical towns and forts in Borneo. He was appointed Commander in-Chief at Portsmouth in December, 1852, and held that appointment for the customary period, since which he had not been on active service. Sir Thomas was knighted in May, 1812. In April, 1839, he was nominated a companion of the Order of the Bath; a Knight Commander in November, 1847; and a Grand Cross of the Order in 1860. The deceased Admiral was the eldest son of Admiral the Hon. Sir Alexander Forrester Inglis Cochrane, fifth son of Thomas, eighth Earl of Dundonald, and was born February 5, 1789. He was twice married—first, on January 6, 1812, to Matilda Ross-Wishart, eldest daughter of the late Lieut.-Gen. Sir Charles Ross, who died in 1839, and secondly, on January 8, 1853, to Rosetta, daughter of the late Sir Jonah Denny Wheeler-Cuffe, who survives him. He leaves issue by both marriages, his eldest son, Mr. A. Baillie Cochrane, representing the Isle of Wight in the House of Commons.

The remains of the late Admiral were interred in a mausoleum belonging to the family in Kensal-green Cemetery. The coffin, which was of polished oak, with plain brass fittings, bore the following inscription on the plate:—"Admiral of the Fleet, Sir Thomas John Cochrane, G.C.B.; born the 5th of February, 1789; died the 19th of October, 1872, at Quarr Abbey-house, near Ryde, Isle of Wight." The following is the list of the mourners present on the occasion:—Chief mourner, Mr. A. Baillie-Cochrane, M.P., the eldest son of the deceased; Lord Buckhurst, Sir Charles Cuffe, Captain Otway W. Cuffe, Lord Napier, Sir John Hay, Mr. William Hubbard, Lord Cochrane, Colonel Ross, Colonel Farquharson, Mr. William Maconochie-Welwood, the Hon. Henry Bourke, the Marquis Townshend, the Rev. Mr. Walrond, the Hon. and Rev. George Bourke, and Dr. Brown. The bells of the churches in the vicinity of Belgrave-square were tolled as the funeral procession left the house, and several of the tradesmen of the locality closed their windows.

A return has been printed, by order of the House of Commons showing the services of all the colonels of regiments in the British Army, with the number of years passed by each in the performance of staff or regimental duty, and specifying whether such duty had been discharged at home or abroad. We subjoin the records relating to the regiments stationed in China and Ceylon. Lieut.-gen. Sir S. J. Cotton, K.C.B., of the 10th (China), commanded an expeditionary force on the north-western frontier of India in August, 1854, and served in the Indian Mutiny; regimental service, 33 years 3 months abroad, 3 years 10 months at home; staff service, 13 years 10 months abroad, 1 year 3 months at home. Gen. Sir R. H. T. Davie, of the 73rd (Ceylon), no field service recorded; regimental service, 25 years 5 months at home; staff service, none. Lieut.-gen. P. V. England, 2nd brigade of Royal Artillery (Ceylon), served in the expedition to the Weser in 1805-6, in the expedition to the Cape of Good Hope and South America in 1806-7, in the Peninsular campaign of 1813, including the battle of Vittoria and the siege of San Sebastian; he has a medal for the Peninsula, with two clasps. Gen. England served 57 years 4 months abroad, and 13 years 1 month at home.

The German flying squadron, consisting of the Friedrich Carl, ironclad, 20 guns, flying the broad pendant of Commodore Werner, Capt. the Graf von Hanke; the Elizabeth, corvette, 18 guns, Capt. Livonius; and the gun vessel Albatross, 4 guns, Capt. Steuzel, called at Plymouth on the 18th inst., *en voyage* from Wilhelmshaven, and exchanged the customary salutes with the Citadel and the Royal Adelaide, flagship of the Port Admiral and the Commander-in-Chief. The squadron will proceed to Madeira, thence to the West Indies, Central America, Rio de Janeiro, and Cape Horn, probably to San Francisco; returning *via* Japan, Australia, China, India, and the Cape of Good Hope. The squadron will be joined at Barbadoes by the corvette Vineta, 21 guns, Capt. Batsch, ordered home from the West Indies, and at Japan by the corvette Moselle, 21 guns, Capt. Arends, and these ships will be relieved on their respective stations by the Elizabeth and Albatross, which are to remain in their stead.

At the annual meeting of the Friends of the Royal Seamen's and Marines' Orphan Schools, at Portsmouth, on Monday last, the Commander-in-Chief (Sir Rodney Mundy) in the chair, it was announced that the only contribution to the endowment fund of the institution during the year, was from the Rev. Thos. F. Morton, Chaplain of the Princess Royal, at Hong Kong. The amount was £24 10s.

THE HONG KONG DUEL.

WE should be neglecting an important part of our duty if we were to allow the termination of this notorious duel-case, in which the consuls of Spain and France were concerned as principal and second, to pass without a few words of comment. We heartily rejoice that fines have been inflicted on the principal culprits; and we cannot but express our regret, both that their punishment should not have been more severe, and that foreigners of any nationality—to say nothing of their being the official representatives of friendly Powers—should have permitted themselves to be involved in a proceeding so revolting in itself, and so certain to degrade Europeans in the eyes of the natives by proving that some few of them — such as the actors in this contemptible melo-drama — are indeed the "barbarians" the Mandarins delight to call them. The subject of duelling has been so often discussed — the illogical character of its argument so thoroughly exposed—and its barbarism as a practice so denounced, that it would be altogether superfluous at this time of day to judge the present outrage on the true and higher grounds of religion and reason. A couple of Chocktaw Indians, escaped from a caravan, and scalping each other in Hyde-park, in the midst of a group of London "roughs," would not be a greater anachronism than the "sensational" encounter between Senor CHECA, and ——, the gentleman with the *un*questionable antecedents, whom he hit in the shoulder. We have no fear that this sorry example of the state to which Castilian "honour" has fallen will be followed by any of our countrymen. Since Her MAJESTY'S disapprobation of the practice of duelling was publicly and authoritatively declared in Parliament, twenty-seven years ago, and a passage was introduced into the Articles of War in conformity with that declaration, none but a brace or two of demented shop assistants have been found empty-headed enough to play a match for "the satisfaction of a *gentleman*," with the certainty of getting their hair cut at the Government's expense, and doing a little journey on the "endless staircase"—which two such fools are performing now—for their pains. If Senor CHECA'S opponent had hit the head which he aimed at; or if Senor CHECA had pointed his pistol at the head of his notorious opponent—we suppose he had no "heart" to aim at—the loss to the world in the matter of brains would have been infinitesimal, even if both shots had taken effect. At the very moment when M. GEOFFROY is proceeding with so much tact and resolution to the consideration of the revision of the Treaties—at the very moment when the French Minister stands most in need of the co-operation of his subordinates—he finds the representative of his country at a most important port arraigned and punished for an outrage on civilisation. "See these Christians," exclaimed the natives, "see these Christians, who profess to love GOD and forgive "injuries, these men who declare they are guided by com-"mandments of mercy and grace. See how they meet to "murder one another by arrangement. Who will say, after "such an exhibition, that Spanish and French are not bar-"barians?" But we believe that better specimens of their countrymen will be speedily appointed by their respective Governments.

THE LAST RATEPAYERS' MEETING AT SHANGHAI.

THE Shanghai community is certainly a very public spirited one, for even in the heat of August, and at the height of the busy Tea and Silk season, it can turn its attention to matters pertaining to its local administration. The business brought before the special meeting held on the 12th August. was the adoption of the Bund extension scheme, the substitution of a new arm for the Volunteers, the laying of a line of tramway, the bridging of the Soochow Creek, and appending to the land regulations, a bye law with the view of more clearly defining the Council's action with respect to the examination of market produce. After an exposition by Mr. JOHN DENT, Chairman of the Council, on Municipal finance, prospective and retrospective, the schemes prepared by request of the ratepayers for the extension of the Bund in front of the so-called English settlement, and in part of Hongkew, having been discussed, it was decided to adopt the "*half bunding and slope*" proposition, at a cost of Tls. 106,000, Tls. 57,000 being spent on the English side, and Tls. 49,000 on the Hongkew.

This work will considerably improve both settlements, but we have our doubts if it will be any improvement to the river. The conservation of the Hwangpu is out of the province of the Council; indeed, important as this subject is to Shanghai, it seems nobody's business to take it up. The Chamber of Commerce has certainly opened the question, but in such a negative manner as to do more harm than good. The only thing now to save the river from filling up is dredging. The present prosperity of Glasgow is in a great measure owing to the careful way its water approaches have been dredged. And we hope soon to see such an agitation raised as will cause this long-needed work to be taken up and carried out in an energetic manner. The question of bridging the Soochow Creek is practically in *statu quo*. The meeting passed a resolution to establish "free ferries over the Soochow Creek" at such points as may appear desirable. The tramway question was referred to the Council, presumably on the grounds that it was not put sufficiently clear before the meeting. One feature in the scheme to which exception may with fair reason be taken, the narrowness of the guage proposed. We are glad to see the unanimous manner in which the meeting acceded to the request of the Volunteers to change *their* arm from the Snider to the Henri Martini. This *must be* most encouraging to the corps. The Volunteers, *however*, will do well to remember that great caution is necessary to be taken in the use of their new arm. The additional bye-law to the regulations is simply detailing the course of action to be observed by the Council in the examination of market produce, and springs out of the Land Regulations, so comprehensively framed for the "peace, order, and good government" of the Settlements. As special meetings of ratepayers have no authority to raise funds the works lately approved will not be proceeded with this year.

THE FRENCH TREATY.

THE Havre Chamber of Commerce has lost no time in replying to the circular of the Minister of Commerce relative to the revision of the Treaty with China. A committee was formed to examine the various questions involved, and that body has since presented to the Chamber the following report, the conclusions of which were adopted, and which has been transmitted to the Minister:—"In accordance with "the mission confided to us we have made inquiries "of several shippers and merchants of our town, who, "from the nature of their business and their rela-"tions with China, seemed the best qualified to enlighten "us as to the articles of the tariff which might be "made the subject of a demand for a modification, "but they all appeared to us to be generally satisfied with "the present *regime*. We must, however, add that this "district furnishes little matter for direct commercial rela-"tions with China. A revision of the tariff would probably "not have the result of developing more important relations "on our market, which does not possess the same advantages "as certain others; for example, Lyons and Marseilles for the "importation of silk, Bordeaux for the exportation of wines and "other liquids, and Paris for that of its various manufactures. "The Franco-Chinese Treaty of 1858 contained in several "places a clause to the effect that, with regard to the tariff "as well as for all stipulations that should be introduced in

Digitized by Google

"the existing or future treaties, French merchants, and in "general all citizens in China, shall enjoy at all times and "places the treatment of the most favoured nation. It "therefore appears to us that the trade of Havre desires no-"thing more than a continuation of the *regime* inaugurated "by that Treaty."

MAJOR CROSSMAN ON THE CONSULAR SERVICE.

MAJOR CROSSMAN is undoubtedly a very clever and a very industrious officer, and it is a pity that his abilities were not exclusively devoted to the object for which he was sent to China and Japan. Had this been so, he might have been spared the ridicule which has been cast upon him, for the unsightly and unsuitable buildings he has caused to be erected in the ports of China and Japan. *Ne sutor ultra crepidam* is evidently a motto which is not regarded by him. His evidence given before the Committee of Inquiry on the Diplomatic and Consular Service attracted so much attention, and was so much esteemed by the members who studied only economy or the cutting down of salaries in the service, that we publish the report drawn up and handed in by the Major. Had the gallant major been contented to hand in his notes of a flying visit to each port he would not have erred so egregiously. The assumption and grandiloquence of his statements are truly military. He backs his opinions against men who have known China and its requirements for twenty years. His recommendation that the offices of Governor of Hong Kong, and Chief Superintendent of Trade or Minister at Peking, should be combined, and that the Southern Consulates could be worked by a Consul-General at Hong Kong is certainly unique, but hardly equals in absurdity his mode of computation of British residents at the Treaty ports, in which category he excludes missionaries and persons in the employ of the Chinese Government. On what principle, we would ask, does he denationalise persons who enter the Customs service? Are they not putting their powers to develop and increase trade, and are they any the less British subjects? We would remind Major CROSSMAN that a British Consul has other duties besides looking after and protecting the British residents; we may instance the attack on a man-of-war's crew at Swatow in 1868. The comparison of Hong Kong with Shanghai is preposterous. No sort of comparison can be instituted, the conditions of the two places being totally different. Such views are only excusable to any one who has not visited the ports and places described. It is not necessary to go fully into the extraordinary opinions of Major CROSSMAN, as our readers will be able to fully appreciate them. We may call attention to his horror of Newchwang. Oddly enough to-day's mail bring accounts of a large increase of trade there.

A DESPATCH from Suez mentions that between the 1st and 20th Oct. fifty-one vessels passed through the Canal, producing a sum of 972,000f. for tolls. The detailed return for the month of Sept. shows that the dues were paid on 116,060 tons of shipping, against 53,873 tons in the same month of 1870, and 35,226 tons in 1870. The tolls in the three months amounted to 1,260,039f., 612,360f., and 407,179f. respectively; and the total receipts from all sources to 1,672,011f. in Sept., 1872, 979,481f. in 1871, and 477,361f. in 1870. The 116,060 of gross tonnage last month represented only 76,272 of the net official tonnage, so that the company gained 39,788 tons, or a sum of 390,788f. in the month by the new scale of charges.

WE are glad to see by latest advices from Yokohama that Mr. LOWDER—whose resignation of the Consular Service we announced last month—has assumed his duties in the Japanese Customs Service, and has already effected improvements in the working, to the satisfaction of merchants and others. It is not, however, the intention of the Government to have a foreign inspectorate as in China, but simply to employ foreigners to assist in the administration.

THE following, received by last Bombay mail, is discredited. "The *Rangoon Times* has received the following telegram from Prome:—'Panthays severely defeated, if not crushed. Road to China open. Great rejoicings among Chinese at Bhamo and Mandalay.' The telegram is dated the 6th of September."

THE *Gazzetta di Spezia* states that the Italian Government is resolved to establish a penal settlement in Borneo. The transports *Cambria* and *Citta di Napoli* are being fitted out for that service, and the corvette *Magenta* will accompany them. In reference to this announcement we can state on the best authority that no place has yet been decided on by the Government. Islands in the West Indies, as well as the East, are under consideration.

THE P. and O. steamer *Pekin*, from Southampton Nov. 7, will convey to Ceylon, on a visit, Earl GROVESNOR, son of the Marquis of WESTMINSTER, the Marquis of STAFFORD, son of the Duke of SUTHERLAND, and Viscount LEWISHAM, son of the Earl of DARTMOUTH. These noblemen are all under age.

WE have much pleasure in calling the attention of old residents in Hong Kong to a subscription now being raised for the purpose of equipping the new choir of St. John's Cathedral with the necessary fittings. The circular will be found in our advertising columns.

THE steamer *George Reed*, reported lost on the Maldives, is one of the four steamers despatched from this for Saigon for the navigation of the rivers in Cochin China under a concession from the French Government granted to Mons. LARRIEU.

WE understand that Admiral DUPRE will resume the appointment of Governor and Commander-in-Chief of Saigon and its dependencies, and will probably proceed by the November mail from Marseilles.

THE Count de ROCHECHOUART, who, it will be remembered, was the French *Chargé d'Affaires* at Peking at the time of the Tientsin Massacre, and was at the time reported to be killed, has arrived in Paris.

A TELEGRAM from Paris announces that judgment has been given in favour of the Messageries Maritimes against the Suez Canal Company, and that notice of appeal has been given.

A DINNER was given at the Grand Hotel, Paris, on Thursday last by the Japanese residents in Paris in honour of the MIKADO'S birthday.

THE DIPLOMATIC AND CONSULAR SERVICE.

[Report by Major CROSSMAN.]

Though the trade between Great Britain and China is increasing steadily and rapidly, the gross amount of the exports and imports of England, India, and the Colonies, having been in 1868 nearly thirty-six millions sterling, while those of the rest of the world amounted only to a little over five-and-a-half millions, it is a question for consideration whether the Consular Establishments which cost the country so much annually, not only for salaries and office expenses, but also for buildings, might not (except at Shanghai), instead of being increased, rather be diminished, and without disadvantage to the public service.

The Foreign Office, acting upon the recommendation of Her Majesty's Minister at Peking, determines the number of Consular officials, and without venturing to give any opinion as to the amount of diplomatic work which devolves upon those gentlemen, I would beg to put forward a few remarks which have occurred to me during several visits to the various ports during the last three years as to the nature of the trade, and the number of British subjects under Consular jurisdiction at each of them. I do not take into consideration British subjects who may be officials in the Chinese Customs, as they are to all intents and purposes servants of the Chinese Government, nor do I include missionaries, for though many of them cause much trouble, I do not think that were missionaries to establish themselves at any place where there was no representative of the mercantile class, the British Government would be likely to establish a Consulate there for their protection. I have shown, however, in a tabular form at the end of this memorandum, the number of missionaries, and the approximate number of Englishmen in Chinese employ at each of the Treaty ports.

The import trade from the British Empire direct centres at *Hong Kong* and *Shanghai*; the exports into China proper from the former place are shown by the Customs returns to have amounted to a little more than three-eighths of the value of those imported from Great Britain; unfortunately no trade returns are published in the Colony, but as the consumption of foreign goods in the island cannot be large, probably nine-tenths of what is exported from England to Hong Kong finds its way to the mainland of China.

Digitized by Google

From Hong Kong and Shanghai foreign goods are forwarded to the other ports; *Hong Kong* supplies *Canton* and the coast ports of *Swatow*, *Amoy*, and *Foochow*; *Shanghai*, which imported last year (1868) foreign goods to the value of about fifteen millions sterling, and re-exported to other Chinese ports* nine and a half millions, supplies *Ningpo*, the ports of *Chinkeang*, *Kewkeang* and *Hankow*, on the Yangtsze, the northern ports of *Chefoo*, *Tientsin*, on the Peiho, the port for Peking (which next to Shanghai takes the largest quantity of foreign goods), and *Newchwang*, at the head of the gulf of Pecheli. Goods are carried from Hong Kong to Canton in British steamers of American build running daily (ten hours), and to the coast ports in steamers belonging to the Peninsular and Oriental Company, and other firms.

From Shanghai large American steamers run to Ningpo (twenty six to twenty-eight hours); steamers belonging to the same firm, of about 2,000 tons burden, go up to the Yangtsze three or four times a week, an English company running two smaller boats of similar build. There are two lines of steamers, one English and the other American, trading during the season between Shanghai, Chefoo, and Tientsin, occasionally going to Newchwang. At nearly every port the regularly trading steamers enter into a bond with the Customs, and in consequence are generally relieved, if English, from depositing their papers at the Consulate, so that except in the case of a disturbance on board, or a riot amongst drunken sailors on shore, the consul has little or nothing to do with them. The shipping business at Shanghai is managed (under the consul) by a temporary clerk, with an assistant, and that at Whampoa and Foochow by the Vice-Consuls, without any assistance.

A good deal of the coasting trade, principally in Chinese produce and on Chinese account, is carried on in sailing vessels, of which there are nearly as many North German as British; these are very often chartered by Chinamen without the intervention of any foreign broker. The number of British residents at all the outports would appear to be decreasing. The Chinese are fast taking the trade into their own hands, and it is not to be wondered at; they keep no large establishments, live cheaply, can travel from any port to Hong Kong or Shanghai and back for a few dollars, buy exactly the quality of goods their countrymen want, and in quantities to suit the demand of the market, so that they are able to undersell the foreigner.

At *Canton* the British community, exclusive of Consular officials, Custom-house officers, and missionaries, consists of thirteen individuals belonging to nine firms; there are also six Parsees or Moormen. The large houses at Hong Kong generally have one tea taster here, the remainder of the fifteen are public tea tasters or commission agents. In the Customs Returns, the direct foreign trade of Canton is put down at, in round numbers, £2,000,000 sterling, but it must be borne in mind that not only at Canton, but also at Swatow, Amoy, and Foochow, the direct foreign trade (on page 19 of the Customs Abstract of Trade for 1868) refers almost entirely to the importation of goods from Hong Kong and the Straits; Hong Kong being a British colony is treated as a British port; the result to England is the same, however much the position of British residents at the ports referred to is affected. Goods now are imported from Hong Kong principally by Chinamen themselves, and not by foreign merchants as formerly. I may mention that there is another statement in the Customs Reports, relative to Canton, likely to mislead those unacquainted with the place; it is said that a large number of ocean steamers are entered at the port during the year; by far the greatest number of those are vessels belonging to the various mail companies, which during the intervals between the arrival and departure of the mails are sent up to Whampoa to lie in fresh water; others go up to be repaired in the docks at that place, which I hear, however, are likely to be given up, owing to the construction of larger and more convenient ones at Kowloon. Canton is the residence of the Viceroy of the province of Kwangtung, with whom, at any time, the Governor of Hong Kong may come into collision, and as all questions of dispute must pass through the Consul, the Canton Consulate must always be an important one. He lives inside the city, and the house built for him some years ago in the foreign concession has never been occupied. The present staff consists of a Consul, assistant, and interpreter, with a Vice-Consul at *Whampoa*, where the shipping of any size anchor, and where nearly the whole of the shipping business of the office is done.

At *Swatow* the trade seems to have decreased considerably during the last year, and here, as at Canton, the Chinese have nearly the whole trade in foreign goods in their own hands. There are two English firms, a merchant's and a storekeeper's; the former has only become English during the last three years, formerly it was American; the mercantile men with a doctor makes up a community of six individuals. The Consular staff, at present, consists of an acting Consul and an assistant; an interpreter is authorised; but if the present staff is considered sufficient, or a Vice Consul at Swatow with an assistant at Chow-chow-foo, to see that the goods of the *one* British merchant there are not subject to the squeezes of the mandarins, a saving will be effected in buildings, as it will not then be necessary to renew the interpreter's house, at probably a cost of £3,000.

At *Amoy*, too, the trade has decreased; this is owing, I understand, principally to the heavy taxes levied upon foreign goods in the interior; when this has been rectified it will probably recover. There are nine British firms with a mercantile community of about thirty; to look after their interests there is allowed a staff of Consul, interpreter, and assistant. Twenty-one British vessels entered and cleared during the last quarter of 1868, nearly all with China produce from and to Chinese ports and Singapore.

Foochow must always be a place of importance, as it is the great shipping port for tea, though the importation of foreign goods is even smaller here than at Swatow. As it is the residence of the Viceroy of Fuh-kien, it is an important Consulate, and perhaps a larger staff may be maintained here than the amount of trade would appear to justify, for though the export of tea in British bottoms is large, the whole of the shipping business of the Consulate is now transacted at the *Pagoda Anchorage*, where a Vice-Consul is stationed. A Consul, interpreter, and assistant, constitutes the present staff. Here, as at Canton, the Consul has a house inside the city, and if it is retained now that a new house has been built for him in the foreign settlement it ought to be utilised as quarters for the interpreter or assistant; hitherto the Consul has retained in his occupation both the house inside the city and the interpreter's residence in the settlement, rendering it necessary to give lodging allowance to the interpreters. There are twenty-three British mercantile houses, banks, &c., and about sixty British subjects, exclusive of Custom-house officers and missionaries.

The British population of *Ningpo* (mercantile, medical, and storekeeping) consists of about fifteen persons, members of firms, the principal business of many of whom, as officially reported by a former Commissioner of Customs at the port, consists in selling their names to Chinamen to enable the latter to pass their goods in the interior without payment of those transit dues to which they would be subject if they were sent in their own name, and not in that of a foreigner. Steamers run to Shanghai every other day, and here, too, the Chinese are their own importers, to a very great extent, of foreign goods. The authorised Consular staff consists of a Consul, interpreter, and assistant; a house for the Consul is being proceeded with, and though, on account of the nature of the ground, it was deemed advisable to drive piles for the foundation of the house for the interpreter, nothing further will be done at present. It may be found in a year or two that so many Consular officers are not required.

Shanghai forms quite an exceptional case; the gross value of the trade at this port last year amounted to nearly thirty-three millions sterling (*see* Customs Report, page 21, for extent and nature of the trade), and the British community consists of about 1,000, besides a floating number of distressed seamen, deserters, and other loafers. Though judicial affairs, except as regards matters in the Chinese mixed court, have been transferred from the Consulate to the Supreme Court, the Consular staff appears to be fixed on a very economical scale. It seemingly forms a great contrast to the establishments at some of the outports. It consists of a Consul, Vice-Consul, one interpreter, and two assistants, with two temporary clerks in the shipping office.

Chinkeang, after being abolished altogether, was first made an assistant's charge; within the last month, however, a married interpreter has been ordered there; so, I suppose, a new house will be asked for, as the present one, though well enough suited for a bachelor, is not, in such a climate, fit for the accommodation of a family. Four changes have been made in this Consulate in a little over two years. There are two British firms, comprising three individuals; one of these having just left for England. The British community, besides the Consul and his constable, consists of two, one of whom is agent for the British steamers running to Hankow. The whole of the trade, or nearly all (for a small amount of goods is carried in lorchas), is done by means of the river steamers, which, on their way up and down the river, remain alongside a hulk anchored in the stream for about an hour to discharge and take in cargo. It is at present a subordinate port under Shanghai, from which it can be reached by steamers in from eighteen to twenty-four hours.

At *Kewkiang* affairs are much the same as at Chinkeang, little or no trade for foreign merchants, though tea is exported to some extent. The British residents, who in 1868 amounted to fifteen, have now dwindled down to five. If it goes down any more it might be worthy of consideration whether, since Hankow is only 150 miles distant, or about twelve hours' steaming, an assistant detached from the Consulate at that port, as the one at Chinkeang is from Shanghai, would not be sufficient to carry on all the Consular business required. I cannot refrain from pointing out the great expense incurred here by Her Majesty's Government in giving half the cost of building a church for the benefit, as it now turns out, of about seven people, for those in the Chinese service can bring no claim to the boon. At the time the money was given, there were only fifteen. Government still pays half the chaplain's salary, £200 a year, I think. It is done under Act of Parliament, 6 Geo. 4, c. 87; but I might venture to suggest that some revision of this Act might now be made; if we are to pay for the religious instruction of persons who come to China for the purposes of trade at all events, before any money is granted, there should be some certainty as to the number of the congregation; it is hard that a taxpayer in England should have to pay to the means required to secure the spiritual welfare of half-a-dozen teatasters on the banks of the Yangtsze.

* This only applies to goods forwarded by vessels coming under the cognisance of the Chinese Foreign Customs Establishment, and does not include the value of goods sent into the interior by purely native arrangements.

Hankow, being a large mart for the tea trade, and the present terminus of the steam navigation of the river being also in close vicinity to Wuchang, the residence of the Viceroy of Hukwang, is an important Consular port. The gross trade is, next to that of Shanghai, the largest in China, but the greater portion of the import, and, with the exception of tea, the export trade also, is in the hands of Chinamen; even tea they are beginning to send to Shanghai on their own account, and many shares in the Shanghai Steam Navigation Company are owned by them. The number of foreign residents is diminishing; some of the large houses in Shanghai merely send up a teataster during the season to make purchases, and close their establishments at Hankow during the remainder of the year. The British mercantile community consists of thirty persons and twenty-four firms. The Consular staff is composed of a Consul, interpreter, and assistant.

Chefoo is a place of rising importance, and should the Chinese ever allow mining operations to be carried on by foreigners, must increase considerably. A direct trade with Great Britain was commenced last year, and may eventually succeed, though the jealousy of the large houses in Shanghai, from which port nearly all foreign goods are exported to the northern ports, will throw every obstacle in the way. There are seven British houses employing about twenty individuals. The port has lately been made a Consulate, with a Consul and an interpreter; it has been hitherto under the charge of a Vice-Consul, with an assistant.

Tientsin, next to Shanghai, imports most foreign goods. Here the Chinese have nearly driven the foreigners out of the field; several houses have become bankrupt within the last two years; only four British firms are now left, doing business principally as commission agents. The whole of the British mercantile community consists of ten people. As at Chefoo, attempts have been made to establish a direct trade with England; but this, I fear, cannot succeed; ships of any considerable draught of water, such ships in fact as are employed in the ocean trade, have to lie five miles off the mouth of the Peiho in an open roadstead, and the port is closed by ice during the winter months, while Chefoo is open all the year round. Were there any chance of the Chinese introducing railroads, of which there seems little chance at present, one from Chefoo to Tientsin is, I think, one of the first most worthy of attention. The Consular staff consists of a consul, interpreter, and assistant, the latter lately added. A vice consul is also stationed at *Taku*, at the mouth of the Peiho. There are no foreign residents there except customs officials, most of whom are pilots.

At *Newchwang* there are two English firms and a storekeeper; the mercantile community (British) consists of five individuals, and there is little trade in anything but beancake, large quantities of which are sent to Swatow and other southern ports, to be used as manure for sugar, I think, principally. It has hitherto been a very highly paid consulate, but I presume that an opportunity will be taken, now that the late consul is dead, to reduce this very insignificant trading port to a Vice Consulate; an assistant should be sent to provide against any emergency, on account of its distance from any other port, the want of regular communication, and its inaccessibility during three or four months in the year.

In *Formosa* there are four ports; *Tamsui* and *Keelung*, in the north of the island, about thirty miles apart. *Taiwan* and *Takao*, in the south, at about the same distance from each other. There is one British firm in *Tamsui*, with a branch at *Keelung*, giving employment to six or seven persons. At these two places entered and cleared during the last quarter of 1868, probably one half of which were British. The trade is small, but will probably increase when the coal mines at Keelung are worked in a proper manner. The export of camphor is also increasing, and must continue to do so, now that the Chinese monopoly has been done away with. A Vice Consul with an assistant suffices for both ports. The trade at *Takao* and *Taiwan* is also small, but instead of increasing it is diminishing. As the post has been established, it is considered necessary to have a Vice Consul and assistant. The Vice Consul is at *Taiwan*, where the Governor of the island lives; he has to look after the interests of the branches of two firms at Amoy, represented by two individuals at Taiwan and two at Takao. Besides missionaries and Customs officials there are two other British subjects. The assistant is at Takao. During the last quarter of 1868 ten vessels entered at the two ports, five of which were British; and nine cleared, of which six were British. A small schooner makes periodical trips between Amoy and Takao, which would nearly, if not altogether, account for the British entries.

The accompanying Table shows the number of British subjects (exclusive of woman and children) engaged in trades or professions; the approximate number of Customs officials (by their names it is impossible to say who of those employed in that service are English and who are Americans); and the number of missionaries at each of the ports. I have only shown the total number of foreigners of all nationalities. It has been compiled from the *Hong Kong Chronicle and Directory for China, Japan, and the Philippine Islands*, for 1869, and, I think, may be depended upon as correct. There is in addition a certain number of people thrown from time to time into the various ports, such as distressed seamen, deserters from ships, and loafers from all parts of the world, who give the Consuls a great deal of trouble.

Unless the diplomatic work which the Consular officers have to do is very severe indeed, it would appear that the staff authorised at many of the ports is out of all proportion to the work required of them in connection with trade, looking at the small number of firms at the various ports whose disputes with Chinamen they may have to settle.

One thing to be deduced from this Table is, that there is—

One Consular officer at the ports (exclusive of Shanghai) to every three firms, counting branches of firms as separate establishments, and including banks, stores, hotels, &c.

One Consular officer to every six individuals of the trading class of British subjects; and including missionaries, but excluding Custom-house officials; one Consular officer to every seven individuals.

I have confined myself in this Memorandum to a statement of facts, and do not venture to make any recommendations as to how reduction can be best effected.

CONSULAR ESTABLISHMENT, CHINA, 1869.

Name of Port.	Number of houses of business, British.	Number of British subjects engaged in mercantile pursuits.	Present Consular staff.				Number of British missionaries.	Number of British subjects in Chinese employ (approximate).	Total number of foreigners of all nationalities permanent residents.
			Consul.	Vice Consul	Interpreter.	Assistant.			
Canton and Whampoa	9	20	1	1	1	1	9	20	124
Swatow	2	5	1	...	1	1	4	12	48
Amoy	9	30	1	...	1	1	7	11	116
Foochow and Pagoda	28	56	1	1	1	1	3	20	143
Ningpo	11	15	1	...	1	1	11	13	99
Chinkiang	2	2	...	...	1	...	...	8	23
Kewkiang	5	6	1	...	1	...	...	10	31
Hankow	24	29	1	...	1	1	8	15	90
Chefoo...	7	20	1	...	1	...	2	8	56
Tientsin and Taku ...	4	10	1	1	1	1	6	20	69
Newchang	2	4	1	..	1	..	...	14	42
Tamsin and Keelung...	1	7	...	1	...	1	...	5	22
Taiwan and Takao ...	3	5	...	1	...	1	2	5	27
	102	209	10	5	11	9	52	161	890
					35				

The above return does not include women and children, but only men following some definitive pursuit; there are, of course, in addition, many stray individuals at the ports, such as tramps, deserters, &c. The number of British in Chinese Customs' employ is approximate. Shanghai is omitted as being an exceptional case.

Approximately, we have one Consular officer to every six employed in trade; one Consular officer to every eight employed in trade, and including missionaries; and one Consular officer to every three houses of business, excluding every branch of the same house or different firm.

MEMORANDUM ON DIPLOMATIC AND CONSULAR ARRANGEMENTS IN CHINA BY MAJOR CROSSMAN.

Any material reduction in the cost of our Diplomatic and Consular Establishments in the East will be effected more by a reorganisation of the service than by the curtailment of salaries and incidental expenditure. England's interest in China is mainly commercial, and her public servants in that country, whether at Peking, Hong Kong, or the Treaty ports, should be looked upon as men sent expressly to advance the interests of trade rather than as diplomatic agents with great international duties to perform.

At present the Colonial Office rules Hong Kong, while the minister at Peking and the Consuls at the Treaty ports are under the Foreign Office. Hong Kong is in such close proximity to the mainland that constant questions must arise between the Governor of the Island and the Chinese authorities, which can only be settled through the medium of Her Majesty's Consul at Canton; so that not only are the communications between the Colonial and Chinese authorities not always of the most satisfactory nature, but there is a chance of a difference of opinion between the officers of two departments of the Crown, which might cause great delay in the progress of business. If the Colony and Legation were placed under one head, as they formerly were under the Superintendent of Trade, that difficulty would be obviated.

The policy established by the Home Government of dealing with the central power at Peking instead of with the local viceroys, *would render it necessary that the head quarters of the chief officer should be at Peking; but at the same time he might be Governor of Hong Kong, at which place he would remain for a certain time every year.* A Lieutenant-Governor might be appointed to take charge of all matters connected with the local administration of the island, reserving for his superior only similar questions to those now submitted by the Consuls at Treaty ports to the minister.

Another advantage in this arrangement would be that the minister, instead of being isolated at Peking, in which place he is frozen up during three months in the year, would have an opportunity of mixing more with his countrymen, and being en-

Digitized by Google

abled on that account to judge better for himself as to the requirements of trade. A ship of war might be placed at his disposal every year to carry him from port to port, the cost of which would be covered by the saving in the expense of the Government of Hong Kong. The more frequent visiting of the ports would have a good effect upon the minds of the native officials, who would know that the minister would then be able to speak from his own knowledge, and consequently with greater force, to the Government at Peking of any failure on their part to fulfil Treaty obligations. Under what department of the Crown this arrangement would be best carried out is for the consideration of the Government: but I would venture to suggest that as profits of so many nationalities are mixed together at the various ports, and international disputes must sometimes arise, the Foreign Office would appear to be the proper authority.

I may mention here that even allowing for the large number of Chinese who are resident in Hong Kong, the contrast between that Colony and Shanghai is striking. The number of Foreign residents (exclusive of troops) at each place is about the same. At the one there is a Governor with a long array of colonial officials; at the other, a judge, consul, and a municipal council. Anyone who knows the two places cannot but acknowledge that Shanghai is in no degree inferior to Hong Kong in all the results of good government. *Owing to the large number of Chinese in the island, it is necessary to keep some European troops there;* but it is submitted that a great saving might be effected by a revision of the present military establishment.

The protection of our trade in the East must rest with the Navy. In the event of a war with China, the few soldiers at Hong Kong and Yokohama would alone be of little use; troops would, as on previous occasions, have to be sent out from India and from Europe. The garrison at Hong Kong should probably consist of Marines, who might be borne on the books of the flagships; they are more at home on board ships of war, and, should occasion arise for any display of force, there would be no difficulty arising from divided command, which might be the case if troops of the line were embarked.

The substitution of Marines, including a proportion of Marine Artillery to man the batteries at Hong Kong, would render unnecessary the present staff; the control officers would not be required, as the provisioning of the men would be looked after by the officers of the Naval Yard. A battalion would probably be sufficient; a portion of them might be sent by reliefs to Yokohama, but only as a sanitary arrangement, as the safety of foreign residents there is amply secured by the presence of ships of war of all nations, always at anchor in that port. Consequent on the alteration in the mode of government at Hong Kong would arise a saving in the reduction of the Consular establishments at Canton and Swatow, which, with Whampoa, might be Vice Consulates of Hong Kong, the Lieutenant-Governor of which might have the rank of Consul-General.

In discussing Consular matters in China, it cannot be too strongly stated that the trade in the hands of foreign merchants is, as regard imports, concentrated at Shanghai and Hong Kong, for though Chefoo is becoming a port of direct entry, the trade there is as yet too small to affect the general statement; and as regards exports, the trade may be said to be confined to Shanghai, Foochow, and Hong Kong; the teas from the Yangtsze nearly all come through the first-named place. The Chinese are taking the coast trade into their own hands, though it is carried on in foreign bottoms; it is therefore for consideration whether such large Consular establishments are required now as in former years and whether those at the minor ports might not be reduced to Vice Consulates, and made subsidiary to the principal centres of trade.

As stated in a former Memorandum (besides the arrangement proposed above for grouping Hong Kong, Canton, Whampoa, and Swatow), Amoy, and the new port of Woochang, if opened, might be placed under Foochow; Ningpo, Chinkiang (and Wahu, if opened), under Shanghai; Kewsung and any upper river ports that may be opened, under Hankow. The ports of Cheefoo, Tientsin, and Newchwang remaining as at present, though, in the case of the latter, now that the rule so long held to of not giving up any place in China when once occupied, however unimportant the trade might be, has been broken through in the case of Formosa, it is to be hoped that the establishment there if not removed altogether will be considerably reduced.

It is submitted whether it would not be advisable—

1. To place the Government of Hong Kong under the Foreign-Office. The minister, or superintendent of trade, in China to be Governor, with a Lieutenant-Governor under him, who should also be Consul-General for the southern ports.

2. To reduce the establishments at the minor ports from Consulates, making them subsidiary to the principal centres of trade.

3. Though this matter is hardly relevant to the question of Consular establishments—to remove the present military establishment at Hong Kong, substituting for the present garrison a battalion of Marines, under the orders of the Admiral on the station.

As regards matters of detail connected with the present Consular establishments, I understand that considerable reductions have lately been made in the number of Chinese servants and attendants, and were the staff at each station definitely settled, and a certain allowance made for contingent expenses, a saving of money might, I think, be effected. The expenses for chaplains have been greatly reduced; expenses than which, as formerly paid, nothing could be more unfair to the British taxpayer.

The payment for medical attendance to Consular officers Government ought hardly to be expected to provide for specially; it is an item of personal expenditure, which should be considered in determining their pay. There are no ports in China, with the exception only, I think, of Newchwang, where the Government pays a doctor £200 a-year, where civil or missionary doctors are not established; their usual custom is to make an annual charge of from £15 to £50, according to the numbers in a household.

As regards furniture, though I expressed myself lately in favour of granting it to junior assistants when quarters are provided for them, on further consideration, I am of opinion that it would be more satisfactory, both to the Government and to the officers, if they provided themselves, the expense they are put to on that account being also considered in their salaries.

Salaries in China may appear large when compared with those of other Civil servants of the Crown, but they cannot be considered too high. The expense of living is great, and it must be remembered that a voyage home every five or six years is almost a matter of necessity, during which expenses are incurred which their pay, especially that of the junior ranks, hardly covers; under the present regulations, too, they are liable to be moved continually from one port to another, not only at considerable expense to the public, but at a great cost to themselves. Should the Government think fit to make an increase to their salaries, say of from £50 to £150 a-year, according to the status of the officers, putting an end to the special allowances at Shanghai and Hankow, it would, I think, compensate them for expenses incurred for medical attendance, and by removal and loss upon furniture. If the staff were reduced, no extra expense could be incurred by Government. I have not been able to ascertain how much would actually be saved by the above proposals, not knowing the cost of the present establishment at Hong Kong, and not having seen the Consular Estimates for the ensuing year.

HIOGO AND OSAKA, 1871.

[Report of Mr. Consul Gower.]

I have purposely refrained from comparing the Imports and Exports of 1871 with those of the previous year, for the reason that the information furnished by such a comparison would be misleading, owing to the worthlessness of the Japanese Returns. These, in Enclosures 2, 4, and 5, have been compared with those of the Chamber of Commerce, which latter, it is well known, do not entirely represent the actual amount of trade, and the great discrepancy between the two will serve to show how little reliance can be placed on the statistics of the Custom-houses.

In compliance with instructions, however, Enclosures 1 and 3 have been compiled from the application for Permit Forms received by the native officials. Although these are printed with the headings necessary for a full statement of the description and value of the merchandise, they often are not properly filled up; so that the labour spent in endeavouring to compile correct tables is little better than lost. Indeed, even when details are furnished I have reason to suspect that these are not always correct, from the fact that these documents show more "White Shirtings," "T-Cloths," Chintzes," and "Merinos" than actually were imported; and I must therefore conclude that under these denominations were allowed to pass "Turkey Reds," "Taffachelas," "Velvets," and "Thibets," for the purpose of evading the difference of duty on these more expensive goods.

Exports.—The tea from the neighbouring districts has already acquired such a repute for superiority, that American houses have specially sent for ours in preference to that produced near the other open ports. The demand has so much increased that, to meet it, some native dealers endeavoured to dispose of old leaf by mixing it with that of the new season; but of course that did not succeed, and they naturally had to sustain losses which are not likely to encourage a repetition of such a fraudulent speculation, which also might have seriously affected the good reputation of our principal export.

Silk.—Does not show favourable results during last year. The native merchant, who could not understand that the war in Europe would greatly diminish the demand for this produce and silkworm eggs, instead of reducing his prices, preferred as a last resource to forward in native steamers the greater quantity of these articles to Yokohama, where he had to incur heavier loss than if he had disposed of them here.

General Observations.

With reference to Hiogo, I shall limit these to a few words, because when I have mentioned that the port has been provided with a lighthouse, that the railway works are progressing slowly, and that some wide roads are being made on the Kobe side of the native town, all other naturally expected improvements have either been altogether checked or badly executed by the late Gon chiji, Mr. Nakayama, whose short-sighted policy appears to have been that of accumulating money by illegally interfering with trade, or spending it badly when compelled to do so.

Digitized by Google

To these misfortunes, which might have been avoided, I must also add that of our having been visited by a most frightful typhoon in July last, which caused much damage and greatly retarded the completion of our municipal works. The sea wall in front of the foreign settlement, which on this occasion was entirely washed away, was after a considerable delay replaced with a similar inadequate protection, which now extends all along the native town. This certainly improves the appearance of the place—but it has been built on such economic and faulty principles that it is sure to crumble down at the very first severe test.

At Osaka a lighthouse has also been placed near the mouth of the river, rendering it approachable by night. Exclusive of numerous native sailing crafts, the communication between the two ports is kept up by twenty-four small river steamers, some of which have been constructed at Hiogo; but never more than half the number are simultaneously running, in consequence of constant repairs being generally required by those which are entirely under Japanese control. This wonderfully increasing traffic with the commercial capital would also be greatly furthered by the completion of our railroad; but I suppose that before we can hope for any active steps towards this necessary end we shall patiently have to wait until the line between Yokohama and Tokei is entirely finished and in good working order.

The Mint, under the direction of Major Kinder, commenced to work on the 4th of last August, and has proved successful beyond all anticipation. The bullion sent in for coinage has hitherto far exceeded the powers of that establishment as originally constructed; and, indeed, the Mint authorities have been compelled to decline receiving any more silver until the completion of a large melting-house now in course of erection, which will also save much time in facilitating the valuation of larger quantities of that metal. Corresponding enlargements, wherever practicable, and strongholds which on Major Kinder's tasteful plans improve the front aspect of that edifice, are also being constructed—so that on the arrival of the expected new coining-presses from England the Mint will soon be able to meet any demand that may eventually arise.

The coins struck to the end of 1871 were as follows:—

SILVER.

1 Yen	pieces	2,168,406
50 Sen	,,	1,191,884
20 Sen	,,	840,910
10 Sen	,,	2,585,770
5 Sen	,,	1,438,080

Their total value being $3,263,011.

GOLD.

20 Yen	pieces	37,249
5 Yen	,,	156,639
2 Yen	,,	52,047
1 Yen	,,	63,191

Giving a value of Mexican $1,695,499.

Total gold and silver ... $4,958,510

THE JAPANESE EMBASSY.

The following address from the members of the Edinburgh Chamber of Commerce was presented to the Japanese Ambassadors on the 19th inst.:—

The Chamber of Commerce and Manufactures of Edinburgh gladly avail themselves of the opportunity of your Excellencies' visit to this city to present their hearty congratulations. In common with all their countrymen they have witnessed with the deepest interest the recent course of public events in Japan, by which not only have its harbours been opened to foreign shipping, and encouragement given to free intercourse with other countries, but the most praiseworthy resolution has been manifested to make use of that intercourse in order to acquire a knowledge of the advantages enjoyed by Western nations, and to promote their introduction into Japan. The presence of your Excellencies here is a striking proof of the energy with which this intelligent policy has been carried into effect, and is in keeping with the vigour and decision of action which was remarked in your countrymen by the earliest of European travellers many centuries ago. Such a course causes Japan to stand out in prominent contrast with other Eastern nations, which, it is hoped, may be stimulated to follow the example.

The Chamber of Commerce of Edinburgh was the first to avow the principle of freedom of trade, as distinguished from an exclusive commercial policy. Believing it to be the most effectual means for promoting mutual advantage and friendly intercourse of nations, they venture to urge on your Excellencies to use your powerful influence in behalf of this, the natural order of commercial relations. They cherish the hope that your Excellencies may carry away, from what you have witnessed in America and here, the conviction that every freedom compatible with good government may be given not only to the transactions of commerce, but to the researches of travellers, and to the benevolent efforts of those who seek your distant shores, not for the purpose of their own pecuniary profit, but to communicate even greater benefits than mere material wealth can confer. The Chamber conclude by expressing their earnest wish that your Excellencies may have a prosperous return to your native land, and that great and lasting benefits may be the result of so remarkable a mission.

On the 21st the leading members of the Embassy, accompanied by Sir Harry Parkes and General Alexander, left Edinburgh, and proceeded by rail for Galashiels, on their way to Newcastle. Before leaving the Ambassadors expressed their admiration at the hospitality, civility, and attention they had received from all with whom they had come in contact during their visit to Scotland. One circumstance pleased them greatly, viz., that they had been allowed to travel about and pursue their inquiries without being subjected to any inconvenience from the persevering curiosity of the public—a thing other distinguished visitors have sometimes had reason to complain of. At Galashiels the party was received by the chairman of the South of Scotland Chamber of Commerce, the Provost, and the magistrates. Carriages were in waiting, and the party drove direct to Mid Mill, the Scotch tweed factory of Messrs. J. and W. Cochrane, where the senior partner of the firm was waiting to conduct them through the works, which contain the latest improvements in machinery and processes belonging to the manufacture of Scotch tweeds. At the conclusion of the visit the Ambassadors were taken to the Public Hall to lunch with the Manufacturers' Corporation, the Local Committee of the South of Scotland Chamber of Commerce, and the Provost and magistrates of the burgh. The Deacon of the Corporation, Mr. W. Plumber Sanderson, presided.

After luncheon the Chairman said: The toast I have now the honour to propose is one never before offered to a public meeting in Galashiels—"The Mikado of Japan." From all we have heard I believe him to be a most intelligent prince, and every way worthy of the compliment we now pay him, and we could not have a better proof of this than in the presence of the illustrious strangers we have this day entertained.

Iwakura replied in Japanese, which was interpreted as follows:—On behalf of the country we represent here to-day, allow us to express our thanks for the honour you have done our Sovereign in drinking to the toast. We wish also to express our thanks and deep appreciation of your kind feeling and hospitality shown to us to-day. We have everywhere been received with much kindness, but nowhere with more than here, and we are deeply indebted to the Manufacturers' Corporation for the enjoyment and instruction we have received in Galashiels. We thank you all.

The Chairman then said: Though the time at our disposal is very limited, I cannot allow our illustrious guests to leave us without expressing to them our sense of the very great obligations for the honour they have conferred upon our Corporation and the town of Galashiels. I therefore call upon you to fill a bumper to our illustrious guests, the Embassy from Japan, who have honoured us by their presence to-day. I am sure it is a satisfaction to us all that those celebrated men of the East should have seen cause to direct their attention to the industries of the West, and knowing that our present illustrious guests are representative men of Japan, in all its aspects, it behoves us to encourage that spirit of inquiry which has prompted them to undertake such a long and arduous journey, and to give them a hearty welcome, feeling sure that the greater the interchange of thought—the more one nation knows of another—the sooner will that time arrive when all nations will live in peace.

Iwakura replied—Allow us to express our thanks for the kind manner in which we have been received, and for your kind proposal. We deeply appreciate your kind expressions to us, and hope that your wishes for prosperity and peace may be realised. We hope that the commercial business may be increased between this country and our country, and we hope that the prosperity you wish us may be enjoyed by both countries.

The Chairman, in the name of the Manufacturers' Corporation, thanked the Embassy for their kind wishes, and said it had given them very much pleasure to have received such distinguished guests. He hoped the interests of both countries would be benefited by the interchange of their respective products. Mr. Adam Cochrane proposed the European visitors connected with the Embassy. Sir Harry Parkes replied, thanking the company, and expressing faith that at no distant day even the products of Galashiels might be found in the Japanese market.

The Ambassadors arrived in Newcastle on the morning of Tuesday, the 22nd inst., and that day was spent in visiting Sir William Armstrong's works at Elswick and the Gosforth Colliery. They were conducted through the works by Sir William Armstrong. They were first shown one of the hydraulic cranes at work, and then passing into the erecting shop, the working of hydraulic machinery and a hydraulic engine was explained. The varied operations in the fitting shops, the turning and boring shop, the workmen in which were employed upon breech pieces for Armstrong guns, a twelve-ton hammer, a large number of fully-finished guns of various calibre next arrested the attention of the Ambassadors, and appeared to be objects of very great interest. The visitors then passed through a new forging shop, nearly completed, which contains a twenty-ton double acting hammer of 12ft. stroke, and two anvil blocks, one of 65 tons, and the other of 135 tons weight. The Gatling gun was then shown to the visitors, and they evinced no little surprise when a drum of 240 cartridges was placed above the breech, and in three minutes all fired off against a bank of earth some twenty yards distant. The blast furnaces, with the engines and machinery connected with them, next came under observation, and a passing inspection of the moulding shop, and a second view of the forges completed the visit. The Ambassadors then drove to the colliery, and having descended the shaft, went along the drift to the low main, 1,011 yards from the bottom of the shaft, where the miners are at work. From this point the party proceeded in various directions through the minor workings, and they remained in the pit upwards of two hours.

The Ambassadors proceeded to Bradford on Thursday. They were received at Leeds by the Mayor of Bradford (Mr. Thompson) and the President of the Chamber of Commerce (Alderman Law), and conducted to Bradford. During the afternoon addresses were presented to the Ambassadors on behalf of the Mayor and Town Council and the Council of the Chamber of Commerce. The

Digitized by Google

Ambassadors were afterwards entertained at dinner by the President and the Chamber, and in the evening they accompanied the Mayor and other gentlemen to a concert in St. George's Hall, which was crowded by a vast audience.

The scientific branch of the Embassy has been divided into several sections, and some of its members have been pursuing their investigations in Glasgow, Edinburgh, and the vicinity, while others have joined the chief Ambassadors.

INTERVIEW BETWEEN THE AMERICAN PRESIDENT AND THE JAPANESE ENVOY.

(NEW YORK TIMES.)

Mr. Mori made an informal call upon the President for the purpose of introducing a Daimio of Japan who has just reached this country by way of Europe. The President shook hands warmly with the Daimio, and said that he was always glad to see a representative of his nation, to which his visitor made an appropriate reply. After some further exchange of compliments the President referred to the late news from Japan as given in these despatches, and expressed his extreme sorrow at the threatening tendency of affairs. Mr. Mori hereupon alluded to the acknowledged private source of the information, and said that his own advices up to this time did not sustain it, and he hoped within a few weeks to be able to lay full intelligence before this Government. The report probably grew out of the fact that the Retrogressionists or Conservatives have lately renewed their efforts to restore the lost balance of power between themselves and the Progressionists, who had gained a monopoly of the Government. The President remarked that the Progressionists appeared to be far in advance of public sentiment, which Mr. Mori admitted, repeating his views of a day or two ago that the best policy was to admit the Retrogressionists to their shape of power and assimilate them to the Progressives by education.

Mr. Mori next spoke of the religious feeling in the Empire, and here it should be remarked that he himself is regarded at home as a free-thinker of the Ralph Waldo Emerson school. He favours public worship as a matter of policy, but is opposed to a State Church. His desire to return to Japan is understood to be inspired by a view of labouring for the religious emancipation of his country as a private citizen. In answer to an expression of surprise from the President at his anxiety to leave this country, Mr. Mori said that he believed in improvement, and had lived long enough to know, as the President had probably discovered years before him, that in order to advance and improve, the levers of advancement and improvement must be directly applied. Japan for ages had been backward among the nations of civilisation, but he now hoped and believed she was entering upon a new era, the results of which would in a measure compensate for what had been lost.

The President said that he sympathised heartily in these desires, and that Japan may be made a close friend of the United States, with great advantage to both from the commercial relations likely to be established between the two nations.

Mr. Mori, in continuation, said that he had sent his resignation to the Tenno last January, but it was not accepted, and he did not know whether he should be able to carry out his plans. He had, however, sent his commission back to Japan, with the request that his successor be appointed without avoidable delay; but he was unable to say what the result would be, having no reply as yet.

The President next asked Mr. Mori, with much interest, what his opinion was in regard to the reactionary movement, and received for reply that Mr. Mori had but one opinion, namely, that the progressive tendency is irresistible; that he had too much faith in the inherent force of modern civilisation to believe that the onward march could now be arrested; that he looked upon his country as the rising sun of the East, and that his government was wise enough to recognise the fact that the age is everywhere moving onward, and that, if the progress of Japan be now hindered, a hundred or a thousand years hence would witness her at a standstill, the same Japan she had been in the past.

The President hoped that his eloquent visitor would not be disappointed, and the latter repeated his disclaimer of any fear upon the subject. Mr. Mori was unable to confirm the reported discharge of the Americans employed in the Japanese service, his latest advices about them being, indeed, of an opposite character, and suggestive rather of additional honours than of disgrace for General Capron and his colleagues. The conversation next turned upon the mission of the Embassy lately in this country, and passed thence to the thirty million loan which a Japanese Treasury officer, assisted by General Geo. B. Williams, late of our own Treasury Department, is endeavouring to place somewhere.

Mr. Mori said he would not conceal his disappointment at the appearance of the loan commission in this country, and fully bore out in his remarks the statement of his position in these despatches of Tuesday. Indeed, the opposition of himself and Mr. Iwakura, the Chief Ambassador, then in Washington, was no secret at the time, and their best efforts were directed towards the embarrassment of the negotiations attempted in New York. Their own idea was to fund the floating debt which the loan was intended to cancel by the issue of interest-bearing bonds, on the plan of the United States Five Per Cent. Loan, and thus keep the whole business at home.

With regard to the two vessels building in New York Mr. Mori informed the President that he had great hopes of a naval marine for Japan which would render her capable of coping with her possible foes, and knowing that his sentiments are shared by the home Government and the Embassy lately here, he is satisfied that the present stoppage of money is but temporary, and probably due to such a cause as would be liable to occur in the transactions of a well-regulated commercial house at such a distance from the base of supply. He looks for immediate remittances to go on with the work.

Upon this the Japanese *Charge d'Affairs* with the Daimio, who had been almost a silent participant in the interview, and who had evidently served as a means of arranging the opportunity for the conversation with the President, retired from the Executive Mansion. The Legation is evidently alarmed at the wide publicity given to the late despatches from here upon the internal situation of the Empire, and there is little doubt that the official dissimulation, which is a staple resort of Asiatic diplomacy, is made a present agency in counteracting or postponing the effect of the disclosure.

Monetary and Commercial.

The India and China banks have now made all their reports and held their meetings, and the extent to which the several banks have suffered is now known. The Agra Bank is a creditor for £67,500, and though 8 per cent. per annum was earned in the half year, and 5 was intended to be divided, the company suspends dividends. The Chartered Bank of India, Australia, and China earned 11 per cent. per annum, and after repaying a deficiency in the last half-year, had a balance of £19,361, out of which a dividend was contemplated, but the bank holds £28,000 of Gledstanes' paper, and more than this balance is expected to be absorbed in the loss which will thereby be incurred. The Chartered Mercantile Bank of India, London and China held £54,000 bills of this firm, of which £35,000 is expected to be actual loss; but as, after paying 8 per cent. per annum, a balance of £88,149 remains, the whole amount is met without affecting the dividend. The Oriental Bank is in a similar position. After the usual dividend of £1 10s. per share, the balance at profit and loss was sufficient to deduct £50,000 with which to provide for the loss on bills, amounting to £67,000. The two or three other Indian Banks are too small to come within the reach of this subject; they appear to have escaped the attention of the Gledstanes. The foregoing list in no way embraces all the losses inflicted upon the banks and discount houses, as not till January next will the London and Westminster Bank and the National Discount Company, and others, have an opportunity of reporting to what extent they suffered. Considerable indignation appears to be felt by the Indian banks at the London and Westminster Bank and Manchester creditors voting for a private liquidation, by which all exposure is intended to be prevented. In this, however, there is a prospect of their being defeated, as the feeling which is excited threatens to enforce the greatest publicity and disclosure.

A meeting of shareholders in the Imperial Bank of China was held at the London Tavern on the 22nd inst., to consider what steps could be taken for obtaining from the Bank of Hindustan a return of the calls paid to them by virtue of the amalgamation of the Banks, which they state has been decided illegal. The question is a very complicated one, but it appears that these shareholders believe that they can drive the shareholders in the Hindustan to a compromise. So long as this is pending no return can be made to them by the liquidators.

In our report of the meeting of the Oriental Bank Corporation we omitted to state that the chairman alluded to the bank's charter as follows:—The shareholders would remember that, on the 18th of April, they authorised the directors to apply to Government for the extension of the bank's charters for twenty-one years, or such other period as Her Majesty's Government might decide. That matter was still incompleted; but, as soon as it was decided, the shareholders would be called together.

A general meeting of the Singapore Gas Company (Limited) was held on the 22nd, when the directors' report, together with the statement of accounts, was unanimously adopted, and a dividend at the rate of 7½ per cent. per annum was declared for the half-year. The chairman, in addressing the meeting, pointed out that the small increase which has taken place in the last half-year in the gas rental, amounting only to about $142, is to be attributed to the fact that during the past six months the Chinese have been prohibited from holding their wyangs, and which naturally has diminished the demand for gas, causing a falling off in the receipts under this head to the extent of $400. There has been great difficulty in keeping up a supply of Australian coal. The chief supply has been from Labuan, which yields no coke, and their product receipts have been very much decreased in consequence. The new gas holder had not been at work, owing to the want of

Digitized by Google

rain to fill the tank; when this was effected he anticipated larger receipts and a decrease in cost of production. A vote of thanks was voted to the directors, to Mr. Wells, Manager, and to Mr. King, Secretary.

A telegram from the ship *Investigator*, engaged in repairing the Australian cable, announces that the final splice has been made, and that the vessel, having now accomplished its task, will return at once to Java. This announcement will be duly appreciated by owners of cable property, as showing the comparative ease and certainty with which deep sea cables can be repaired. The fault in the Australian cable occurred at a depth of about 1,800 fathoms. It was immediately localised, and within a few days of the arrival of the repairing vessel at the spot indicated the fault has been successfully removed. As the Australian land lines have been for the last few weeks in working order, telegraphic communication with Australia is now finally established. The Mayor of Adelaide has now sent a congratulatory telegram to the Lord Mayor of London, in which he expresses the hope that the communication just opened may still further cement the feelings of loyalty and attachment to Her Majesty which "characterise the whole of the Australian Provinces of the British Empire." The tariff will be found in another page.

The Eastern Telegraph Company have determined, in consequence of the increasing business, to lay a duplicate cable from Falmouth to Lisbon, calling at some port in Gallicia, either Corunna or Vigo.

The *St. Brycedale*, of Hobart Town, has just arrived from the port of Taiwan, in Formosa, with 4,000 bags of sugar, consigned to Messrs. T. A. Gibbs and Co. We believe this is the first direct consignment from Formosa.

We understand that the underwriters on the *J. C. Stephenson*, have decided on presenting Capt. Beal (formerly in the China trade) with a present of £200 and a handsome chronometer watch, as a token of appreciation for his skill and exertion in saving that vessel, which caught fire on her passage from Calcutta.

The Manchester market has been firm in tone, but the business done has been chiefly confined to small lots for prompt delivery. Producers have not pressed sales, and at the close there is a steady, although generally inactive market.

The market for Bar Silver is quiet, with but little doing; the price is, as last quoted, 60d. per oz. standard. Of the large amount of Mexican Dollars (£400,000) per *Atlantic*, referred to in our last issue, the larger portion was sold at 59¾d. per oz., being the same price that was obtained for those brought per *Moselle*. The balance has realised 59½d. per oz. A considerable amount is expected by the West India steamer due on the 29th inst.

The rumours current in Paris of the resignation of Mons. Coullet, the Chief Director of the Comptoir d'Escompte, it appears are attributable to some stock-jobbers, who wished to drive down the shares. There is no truth in the report.

ARTICLES OF IMPORT.

TEA.

The Market has been very quiet during the week. Importers still hold very firmly for extreme prices, which limits business, the trade not being eager buyers, whilst the demand for export is also small. Prices on the whole show but little variation, with the exception of a slight decline in fair flavoury Congous, and a further fall in Ping Suey Greens, at public sale without reserve. Public sales have comprised 6,342 packages Green teas, and 4,292 packages of other kinds, all offered and sold without reserve. The deliveries for the week amount to 3,842,051 lbs., against 4,192,961 lbs. last year.

Black: Red leaf kinds; siftings of new Import have sold at ½d. to 1d. per lb. decline. Broken-leaf kinds show no material alteration; fair to common, free from dust, remain very firm at previous rates. Fair Kaisow kinds have sold rather easier; in good to fine business has been small, but prices remain firm; in finest there is no alteration. Pak Lin kinds show no improvement. Black-leaf kinds: The low qualities remain dull of sale; good common has been maintained in value; in fair to good medium a moderate business has been done at previous rates; in good to fine kinds some transactions have taken place at full prices. Finest remain steady, up to 2s. 8d. having been paid for superior quality. New-make Canton kinds have been sold at a shade under last week's prices. Oolongs: Fair to good have been dull of sale, fine in moderate request. Souchongs show no material change; the demand is still limited. Flowery Pekoes have been but little enquired for. Scented Teas: Capers, both in Canton and Foochow kinds, there is no new feature to notice. Orange Pekoes: In Canton kinds there has been but little done, and prices are unchanged. Foochow kinds are still difficult to move, except for those with strong scent. Uncoloured Japans show no material change. *Green:* The market has been over supplied, and the large sale referred to in our last passed off very heavily, establishing a further fall of fully 1d. per lb. on Gunpowders and medium Young Hysons, the quantity being more than the trade were disposed to buy at one time. Canton kinds remain without alteration.

The *New York Commercial and Shipping List* says the arrival of the British steamers *Glenartney*, *Sarpedin*, and *Craigforth*, from China (*via* the Suez Canal), has been an interesting subject of discussion among the Tea importers, who are contrasting the merits of the two short routes from China. These steamers made good passages, the longest but sixty-eight days, which includes five stoppages *en voyage* for coals, &c. Their cargoes have been delivered in splendid order, leaving nothing to be desired on this point; and, besides the cost of freight is less by from 2½c. to 3c. per lb. in gold than by the Pacific Mail Steamship Company and the Pacific Railroads. If the succeeding steamers, three in number, now *en route*, are as successful as those already arrived, it may be conceded that the route *via* Suez is a success, and will in future secure the greater part of the traffic, unless the rates of freight by the other route be materially reduced, and the vexatious delays to which shipments by rail are subjected done away with. In view of the profitable outward freights now ruling here for European voyages, which are likely to continue for some time, it is not improbable that succeeding charters for steamers from China to New York will be at lower prices than are now paid, and if the business can be made profitable at a uniform rate of about £4 there is not much doubt that the Suez route will command nine-tenths of the trade. There is only wanting a reduction in the Canal tolls to make it an almost absolute certainty. Since the above was written, advices have been received from China that the rate per steamer to New York, *via* Suez Canal, is £4 10s., a decline of 15s. This should serve as an admonition to the Pacific Mail and the Overland Railroad managers.

SILK.

Messrs. Kilburn, Kershaw and Co.'s Circular says:—There is no change whatever in the position of the market, which still continues extremely quiet, and for certain classes of Silk very dull. The public sales have been held this week, and although prices have been steadily maintained upon the basis of 24s. 9d. for Red Peacocks, 26s. to 26s. 6d. for good to best No. 4, and 28s. 6d. for chop 3rd Tsatlees, still very little has been doing either in the sale room or by private contract. We are inclined to think, however, that business is not far off, and that a stronger market may soon be looked for. Canton Silk is very quiet. Common market Tsatlees sell at 17s. 6d., but there are very few importers who will accept this price, and the bulk of arrivals are held for 18s. or more. In Japans common Mybash has been selling at lower rates, but good Silk remains firm. Bengals are still very dull, and but little is doing, notwithstanding prices appear so tempting; the difficulty of getting this Silk thrown is still as great as ever. Deliveries are satisfactory, being from 1st to 23rd instant:—China, 2,131 bales; Canton, 509 bales; Japan, 531 bales; Bengal, 344 bales; total, 3,515 bales.

The periodical public sales were held on the 23rd inst. The quantities offered were 1,300 bales Bengal Silk, 3,600 bales China, 1,200 bales Japan, and 1,500 bales Canton Silk. The whole was allowed to pass rapidly almost without biddings, even some small portions that were printed to be sold without reserve producing little animation.

Coffee.—The supply at auction has been both larger and more varied than for some time past, and the bulk of the offers has found buyers, with a steady but not brisk demand, the favourable result of the Dutch sale appearing to have little decided effect upon the market. Plantation Ceylon has brought previous rates, while Native is slightly dearer, and all ordinary kinds have sold readily. Plantation Ceylon has realised, triage and ordinary 67s. to 74s., small 75s. 6d. to 77s. 6d., fine fine ordinary grey and brown 77s., the bulk low middling at 77s. 6d. to 79s. 6d., a few lots middling and bold at 80s. to 84s., peaberry 94s. 6d. to 96s. 6d.; Native Ceylon has been sold to arrive at 72s. 6d. to 73s. 6d. An offer of 38 bags Singapore was sold at 74s. 6d.

Cocoa-nut Oil is steady at previous rates, viz., £36 to £38 10s. for Cochin according to quality, and £35 10s. for fine Ceylon. An offer of 61 casks Singapore has been quitted at £35.

Cutch.—Considerable sales have been made of Pegu, but at lower rates, viz., in bags at 20s., in boxes at 21s. 6d. per cwt.

Gambier.—Block has further advanced, 26s. and 26s. 8d. having been paid for small quantities. For arrival 50 tons July sailing have been sold at 24s. ex ship, and 100 tons per Europa now due at the same price.

Hemp.—Recent heavy arrivals of Manila keep the market in a very quiet state, and with only a limited demand sales have been small; at auction only 130 bales white Quilot have been sold at £55 to £55 10s. per ton.

Pepper.—*Black*: At the public sales, which have been less extensive than for several weeks past, Singapore has sold at a further decline of ⅛d. per lb., viz., at 6⅜d. to 6½d., Trang being bought in at 6⅜d.; by private contract sales of Penang have been made at 6½d. *White*: A large supply of fresh import Singapore has gone off flatly and at easier rates, fine 1s. 1¾d., fair to good 1s. 1⅝d. to 1s. 1½d., brown 1s. 1d., inferior 1s. 0¾d. to 1s. 1¼d. per lb.

Rice.—There has been little demand either on the spot or afloat, and business continues very scanty, but no alteration can be reported in prices. The floating cargo per Margareta, 610 tons Bassein, has been sold at 10s. ex ship London; the cargo per Gateshead, 725 tons Bassein, at 10s. ex quay for London; and the cargo per Victor, 830 tons Necransie, arrived off coast, at 9s. 6¾d. Continental terms.

Sugar.—There has been a fair demand for refining qualities and steady rates have been obtained, but soft brown kinds attract little attention except on lower terms. *China:* In auction 11,691 bags brown per Codova (duty 4s.) were offered, and 3,600 bags, common to good common, sold at 21s. 6d. to 22s., the remainder being bought in, low to common 21s. 6d. to 22s. 6d., good 24s. to 25s., but has since sold privately at 21s. 6d. to 24s. 6d., also 3,000 bags low pasty quality at 20s. *Singapore:* In auction of 1,321 bags offered, 300 bags sold, low yellow (duty 4s. 9d.) at 25s. to 25s. 6d., good heavy brown (duty 4s.), at 24s. 6d., the remainder being bought in, low brown at 23s. to 23s. 6d. fine soft brown 26s., but has since been sold privately at 22s. to 24s. *Java:* In auction 25,200 mats 511 bags syrups (duty 4s.) per Caprera were bought in at 21s., but 5,000 mats were afterwards quitted at 20s. *Manila*: No sales on the spot. The floating cargo, per Banda, about

Digitized by Google

700 tons Ilo Ilo arrived off coast has been sold for Liverpool at 19s. quay terms.

Spices.—*Cassia Vera:* Of 22 baskets coarse Singapore offered, 10 baskets sold at 28s. to 30s. *Buds*: 45 cases bought in at £6 5s. *Cinnamon*: 7 bales ordinary Ceylon sold at 2s. *Cinnamon Chips*: Of 465 bags 400 half-bags Ceylon offered 145 bags and the half-bags sold at steady rates, coarse 3d., ordinary 4d. to 4¼d., medium 5d., good 6¾d. *Nutmegs*: Of 17 cases Penang offered 6 cases sold, average 108 nuts to the lb. at 2s. 11d., the remainder being bought in, 78 to 80s at 3s. 6d. to 3s. 7d. Of 28 cases Java offered, 3 cases sold, 93s at 3s. 3d., the remainder being bought in at 3s. 4d. *Mace*: 20 boxes good Penang were bought in at 4s. 8d., also 2 cases red at 4s. 3d.; 2 casks broken Java sold at 3s. 9d.

Tin.—Straits has slightly declined since last mail, but Banca and Billiton are unaltered in price. Quotations are:—Straits, on the spot and afloat, £141; Banca, £156 10s.; Billiton, £147 per ton.

LOADING.

At London.—Steamers via Suez Canal.—For Hong Kong and Shanghai: H. C. Orsted. For Singapore, Hong Kong, and Shanghai: Scotland. For Penang, Singapore, Hong Kong, and Shanghai: Cheops. For Colombo, &c.: Scindia, Strathclyde.

Sailing Vessels.—For Yokohama and Hiogo: Glamorganshire. For Hong Kong: Nueva Providencia, Undine. For Chefoo and Tientsin: Carnarvonshire. For Batavia and Sourabaya: Capiolani. For Penang: Vanguard. For Singapore: Auriga, Havelock. For Colombo: Palestine. For Colombo, &c.: Spirit of the North, Elizabeth Ann.

At Liverpool.—For Penang, Singapore, Hong Kong, and Shanghai (via S C.): Nestor (str.), Glaucus (str.), Deucalion (str.). For Singapore: Olive.

At Glasgow.—For Penang, Singapore, Hong Kong, and Shanghai: Glenlyon (str.). For Singapore, Batavia, Samarang, and Sourabaya: Earl Canning.

SPOKEN.

Union, London to Batavia, Sept. 5, 11 N., 30 W.
Martin van Rossem, Amsterdam to Batavia, Oct. 19, 49 N., 8 W.
Fortuna, Cardiff to Singapore, Sept. 18, 13 N., 25 W.
Brend, Batavia to Falmouth, Oct. 7, 41 N., 27 W., 98 days out.
Lelia M. Long, New York to Shanghai, Aug. 13, 16 S., 34 W.
Rosedale, Singapore to Liverpool, Sept. 2, 34 S., 18 E.
4 D.P. 591, London to Shanghai, April 3, 11 S., 110 E.

FREIGHTS AND CHARTERS.

Outward berth freights are without alteration since our last issue, and there is still a good inquiry for suitable vessels homewards.

Current Rates of Freight for Vessels on the Berth.

Per Steamers via Suez Canal.—To Yokohama: 85s. meast. To Hiogo: 85s. meast. To Nagasaki: 85s. meast. To Shanghai: 45s. meast. To Hong Kong: 45s. meast. To Manila: — meast. To Singapore and Penang: 45s. meast. To Sourabaya and Samarang: 85s. meast. To Batavia: 75s. meast. To Padang: 90s. meast. To Saigon: 80s. meast. To Galle: — meast.

Per Sailing Vessels.—To Yokohama: 40s. meast. To Shanghai, — weight, — meast. To Hong Kong: 25s. meast. To Singapore: — weight, 25s. meast. To Penang: — weight or meast. To Ceylon: — weight, — meast.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—To Yokohama: —. To Shanghai: £42 10s. To Hong Kong: £36. To Batavia, Samarang, and Sourabaya: £24. To Singapore: £25. To Penang: —. To Galle: £21.

From Newport, Cardiff, or Swansea, per ton.—To Yokohama: 40s. to 42s. 6d. To Shanghai: 45s. To Hong Kong: 33s. to 34s. To Manila: 27s. 6d. to 30s. To Singapore: 23s. 6d. to 25s. To Galle: 20s.

From Birkenhead, per ton.—To Shanghai: 35s. To Hong Kong 27s. 6d. To Manila: — To Galle: 21s.

Insurances.

By steamers via S.C., or sailing vessels, f.p.a.:—To Yokohama steamer 35s., ship 40s.; to Shanghai, steamer 30s., ship 40s.; to Hong Kong, steamer 25s., ship 35s.; to Singapore, steamer 20s. ship 25s. to 27s. 6d.

CASUALTIES.

The Banda, Evans, which arrived at Plymouth, Oct. 16, from Batavia, reports having passed 1st point, Natal, Aug. 3, and that on the 7th she encountered a heavy gale from the westward, lasting nine days, during which she lost maintopsailyard, &c.

Further advices from Port Elizabeth, Sept. 13, state that the Queen of India, Knight, from Manila to Liverpool, which put in there 2, had encountered heavy gales from 25th to 30th Aug., between Cape Agulhas and Quoin Point; on the latter date she was struck by a sea which carried away bulwarks, ladders, &c.; as the water in the well increased to five feet she bore up for this port; she is discharging her cargo (hemp and sugar), a considerable portion of which is damaged.

A telegram from Galle, Oct. 19, announces that the George Reed (str.), London to Saigon, was totally wrecked at the Maldives, Sept. 25, and that her crew arrived there in a native buggalo.

Advices from New York, Oct. 11, state that the Yokohama (Amer. barque), thence to Hong Kong, had been cut down to the water's edge by collision, and abandoned; the master, Hamblyn, had arrived at St. Thomas.

The Lochnaw (British barque), from Manila to Valparaiso, put into Honolulu, Aug. 31, leaking badly, and would have to discharge for repairs.

A telegram from Sourabaya, Oct. 18, announces that the Anna Digna (Dutch), was totally lost, 4, near Cape Posang, Spermunde Archipelago, Macassar Straits, crew saved; the above vessel sailed from Shields, May 27, for Hong Kong.

MISCELLANEOUS.

At Suez, Oct. 21, Duna (str.), from Foochow, for London.

At Mauritius, Sept. 2, Deux Freres, Magneur, from Singapore; 6, Adeline, Thornton, from Singapore; Aug. 28, Mars, Homan; Sept. 9, Cosmopolite, Pannier, and both sailed for Galle.

Steamer for the China Trade.—There has been launched at Glasgow, by the London and Glasgow Shipbuilding Company, an iron screw-steamer, the third of Messrs. A. C. Gow and Co.'s line of steamers, for the China trade via the Suez Canal. The ship was named the Glenlyon. The principal dimensions of the Glenlyon are:—330 feet by 34 feet by 24 feet 10 inches, gross register about 2,300 tons, and she will be fitted by the builders with compound surface-condensing engines, combining all the most recent improvements, of about 250-horse power nominal.

Launch of a P. and O. Steamer.—Messrs. Caird and Co., of Greenock, have launched a steamship for the P. and O. Steam Navigation Company, named the Malwa. She is 360 feet in length, 39 feet in breadth, and 30 feet 3 inches in moulded depth. Her tonnage is 2,723; nominal horse-power 450; she will be rigged as a three-masted schooner.

New Steamer for the China Coast.—The screw steamer Namoa, built by Messrs. Hall, Russell and Co., Aberdeen, to the order of Messrs. John Morrison and Co., of London, for the coast line of Messrs. Douglas, Lapraik and Co., will leave Newcastle about the 1st prox., under the command of Capt. Gibson. The builders have another one in hand for the same account.

(Over the JERUSALEM.)

CHINA AND THE CHINESE.

Now ready, crown 8vo., cloth, 6s.,

THE FOREIGNER IN FAR CATHAY.

By W. H. MEDHURST, H.B.M.'s Consul, Shanghai.

WITH COLOURED MAP.

CONTENTS.—Introduction—Position of Foreigners—Character and Habits of Foreign Residents—Missionaries—Consuls and Customs' Authorities, &c.—Customs of the Chinese—Shop Signs—Advertising—Mandarin Yamens—Opium Smoking—Infanticide—Eating and Drinking—Social Institutions—Correspondence and the Press—Modes of Sepulture—Use of the Written Character for Decoration—Chinese Proper Names—Travelling and Porterage—Character of the Chinese—Concluding Remarks and an Appendix, containing a SPECIMEN OF CHINESE MUSIC, with Original Words and English Literal Translation.

This little book does not pretend to the importance of a work on China. Its aim is simply to enlighten the home public as to the actual circumstances in which residents in that remote region find themselves, and to supply a few scraps of information, part of it new, and part of it hitherto misapprehended, respecting the Chinese themselves.—*Extract from Preface.*

HOLLOWAY'S OINTMENT
AND PILLS.—COUNSEL AND HELP.—When diarrhœa, dysentery, or cholera prevails in any district it behoves every one to be watchful, and to have at hand the means of checking those symptoms of general uneasiness, nausea and vertigo which foretell the threatening malady. To be up and doing instantaneously in diseases like cholera is a matter of the utmost moment—delay is danger, and may be death. This well-known Ointment, rubbed diligently and repeatedly upon the pit of the stomach, and over the abdomen (both should be swathed in flannel), exercises the most salutary effect in arresting these morbid indications of the coming evils, and aided by appropriate doses of the Pills will secure safety.

COMPLETION FUND.

JUST before embarking from Hong Kong, on Tuesday, Nov. 16, 1869, H.R.H. the DUKE OF EDINBURGH was graciously pleased to lay the first stone of a choir for this, the mother Church of the Diocese of Victoria. The cost of the fabric has been shared by the Executive Government and the local community; and it is proposed, by a general subscription among former residents in and visitors to China, to provide the necessary furniture and fittings. Should sufficient funds be raised, it is proposed to erect a stone pulpit.

The Committee will gladly receive and forward any special gifts with which they may be entrusted. This scheme having received the cordial approval of the Colonial Chaplain and the Trustees, is circulated by the Executive Committee.

The Rev. W. R. BEACH, M.A., Chaplain to the Forces, Canon of St. John's Cathedral, Hong Kong, and late Colonial Chaplain.

THE MAILS, &c.

The French mail, bringing advices as above, was delivered, *via* Marseilles, on Thursday last, the 31st ult., four days in advance of its due date. The next inward P. and O. mail, with dates Yokohama Sept. 18th, Shanghai Sept. 22nd, Hong Kong Sept. 28th, Singapore Oct. 6th, is due, *via* Brindisi, on Monday next, the 11th inst.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, five to six hours in transmission.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Messageries Maritimes steamer *Cambodge*, arrived Oct. 30.—From Yokohama: Messrs. Winterburn, Graeffen, Levington, and Mrs. Levington. From Shanghai: The Rev. B. Vite, Messrs Gaiderich, H. Reid. From Hong Kong: None. From Batavia: Messrs. Kukler, Schumine. From Saigon: Mr. Nicolet. From Singapore: Messrs. Benoben, Mel'odo, Lopez y Felez, Villamozzo, Echevaria, Philippe, Delcamps, Bottela, Bas y Miro. From Galle: Messrs. Chapter, Simon, Abell.

PASSENGERS OUTWARD.

Per P. and O. steamer *Poonah*, from Southampton, Oct. 24.—To Yokohama: Mr. V. Vanden Brock and two second-class passengers. To Hong Kong: Mr. A. H. Thornton, Mr. and Mrs Alexander, and one second-class passenger. To Singapore: Mr. T. S. Chapman. To Penang: Mr. and Mrs. Ward. To Ceylon: Mr. C. Irvine, Sub Lieut. Wood.

Per P. and O. steamer *Pera*, from Venice, Nov. 1.—To Hong Kong: Mr. J. R Hughes.

Per P. and O. steamer *Pera*, from Brindisi Nov. 4.—To Yokohama: Mr. E. Grosser, Mr. H. Braunstedt. To Ceylon: Mrs. Stevenson and two children.

Per P. and O. steamer *Pekin*, from Southampton, Nov. 7.—To Yokohama: Mr. S. Ungawa, Mr. S. Ohuman. To Shanghai: Mr. Wulff, Mr. G. R. Johnston. To Hong Kong: Mr. K. Mac Iver, Mr. T. E. Ludlam. To Ceylon: Mrs. Bayley and child, Mr. Rudd, Mrs. Robertson and child. Earl Grosvenor, Marquis of Stafford, Viscount Lewi-harn, Dr. Gould, Miss Barrington. To Hong Kong (*via* Bombay): Mr. W. H. Fittock.

Per P. and O. steamer *Malta*, from Venice, Nov. 15.—To Yokohama: Mr. and Mrs. A. Ewers. To Shanghai: Mr. G. Lethbridge. To Ceylon: Mr. Quilty.

Per P. and O. steamer *Malta*, from Brindisi, Nov. 18.—To Shanghai: Mr. and Mrs. H. Robinson.

Per P. and O. steamer *Simla*, from Venice, Nov. 29.—To Singapore: Mr. and Mrs. J. R. Mac Arthur.

Per P. and O. steamer *Simla*, from Brindisi, Dec. 2.—To Hong Kong: Mr. C. V. Creagh.

Per French mail steamer *Ava*, from Marseilles, Nov. 10 (booked from London).—To Shanghai: Mr. and Mrs. Johnston. To Hong Kong: Mr. and Mrs. Lammer and four children, Mr. E. Beart, Mr. and Mrs. Peterson. To Singapore: Mr. and Mrs. W. Ullemeister, Mr. Mead. To Batavia: Mr. and Mrs. Nogel, Miss Klins, Mr. A. Matkins, Miss Clona, Miss Mees, Mrs. Praterms, Miss Guiem. To Galle: Mr. G. Phear.

Per French mail steamer *Donnai*, from Marseilles, Nov. 24 (booked from London).—To Hong Kong: Mr. M. Beart. To Batavia: Mr. and Mrs. Hora Siccoina, Mr. and Mrs. Kleberg, Mr. John S. Dick.

Per steamer *Scotland*, from London, Nov. 2.—For Hong Kong: Mr. Wm. Curtis, Mr. H. Curtis, Mr. Meyernk, seven officers and 454 men of the 80th Regiment.

Summary of News from the Far East.

JAPAN.

HIOGO.

In our last issue we gave the particulars of the arrest of Mr. Cousens. The day afterwards he was summoned to appear before the Court, Mr. Gower, Consul, presiding. After the hearing of the case Mr. Cousens was sentenced to forty-eight hours' imprisonment for the assault on the boatman. When the sentence was announced, in a crowded court, exclamations of "shame" came from the audience, and the Consul, in order to vindicate the dignity of the Court, had the doors immediately shut, took down the names of those present, and ordered that they should not be permitted to visit the Consulate again unless engaged in a case. As the sentence would have to be enforced in a Japanese prison, the constable of the Consulate resigned, rather than carry it out; the doctor sent for by the Consul certified that the prison was unfit for the reception of a foreigner; and the Municipal Council refusing to have Mr. Cousens in their lock-up, he was confined in some room in the Consulate. An indignation meeting, attended by forty people, has been held, at which a resolution was passed that the treatment Mr. Cousens received "was grossly and unjustly in excess of what the case demanded."

NAGASAKI.

We have advices from this port to the 7th September, and we take the following items of intelligence from the *Nagasaki Express*:—

The departure of several men-of-war for Chefoo has been regarded with no little curiosity and misgivings by the Chinese residents at this port. Their numerous enquiries respecting the object of the visit of the flagships and other vessels of the squadrons of Great Britain, France, and the United States of America to Chefoo, tend to show that fear is still lurking in the Celestial mind lest the Tientsin massacre has more to do with [illegible] foreigners are willing to admit. They seem unwilling [illegible] any reply stating that the object of the visit is to [illegible] tulations to the Emperor of China. Such an [illegible] dismissed with a significant shake of the he[illegible] given only for the purpose of concealing the tr[illegible]

Messrs. Boyd and Co. hav[illegible] steam launch, built by Mr. Stibol[illegible]ons:—Length, 26 feet 6 inc[illegible] will be 1½-horse po[illegible] of the best mate- [illegible] and sheathed with Muntz's [illegible] comfortable accommodation is pro- [illegible] sengers.

[illegible]ccent voyage of the *Iron Duke* from this port she took with her about thirty tons of Takasima coal for the purpose of testing its steaming qualities. It is gratifying to be able to

Digitized by Google

state that the report on it is very favourable when mixed with Welsh or north country coal, the preference appearing to be given to the latter. It was not tried alone.

The French corvette *Cosmao*, while on the voyage from Yokohama to Nagasaki, ran down a junk with a rice cargo, the total damage being $9,000. Of seventeen people on the junk, fifteen were saved by the corvette. The accident happened at night, and is attributed to the want of lights on the junk.

We hear that it is the intention of the residents of Desima to secede from the general Municipal management, and return to their old system of separate administration. A letter announcing this intention has been signed by them and addressed to the Consular representatives.

A sharp shock of earthquake was felt here on the 2nd Sept., but it was of short duration; probably about five seconds.

CHINA.

—o—

TIENTSIN.

A correspondent writing from this port says, in referring to the floods:—

If the sufferings of the poor in this country were great last year what must they be this year, during which they have been subsisting on charity? The crops must be all be spoiled again; and again must poverty and want stare them in the face. To the question, who is to blame for this state of things? the answer in general terms would be the authorities; but it is more difficult to fix the special portions of blame. If the Governor-Generals of provinces have almost absolute power during their term of office, as they are believed to have, then the Governor-General of this province is certainly very much to blame.

Judging from the Peking Gazettes, whom the Governor-General wished to be honoured and rewarded were honoured and rewarded by Government, and whom he wished to degrade were degraded. He was granted the liberty, on application, of keeping the best men he could find for their respective works, although his doing so was against custom. He seems, in fact, to have had absolute power in all but the name. When a man is given this power we have a right to ask, how has he used this power for the public benefit? He received for, and, it is said, there was expended some Tls. 90,000 on repairs of the Whei Ho at Yung-ting-ho, west of Peking, which burst its banks and did an immense amount of damage last year. It is now reported that this same river, in the same place where so much money was expended, and for which those who superintended the works were highly praised and promoted, has again broken its banks. The story now is that orders have come down to degrade those men who managed affairs so badly (this Li-hung-Chang feels deeply, it is said); the money so spent has not only been uselessly spent, but, far worse, the poor who trusted to its defence from the floods found themselves again subject to all its horrors. Again, with all the power he can command, with soldiers, said to be counted by tens of thousands in the province, the road, the military road, between Taku on the sea and Tientsin, the mercantile capital, is as yet only completed half way, the so-called completed half having a flat surface—where it has not a concave one—from Tientsin northwards towards Peking. I do not know how far it is completed; but having lately come over the southern road, I can safely say I never saw so bad a road, (not to say a military road, an Imperial highway), between the sea and the mercantile capital of the province and political capital of the Empire, in such a bad state; it was, in fact, no road; it was a complete quagmire over half the way, with soft splashy mud up to the axles of the cart on one side, and on a high bank at times on the other; in many places we crossed through water two feet deep.

Such has been the Governor-General's work, or want of work, at the city where he now resides. And if here such things are carried on, what must be the state of work in the country with no one to care for it? Is there an honest native in the country who can be trusted with money to perform work as it might be done, at prices which ought to be paid for such work? It is to be hoped there is; but I am sorry to say it is generally believed they are extremely few in numbers.

Will we this year again have a repetition of the sickening snake-worship in which all the officials, from Li-hung-Chang, the Governor General, indulged, or will the Governor-General—now that twice within two years the floods have devastated his province, slaying thousands of people, if not directly yet indirectly by famine and disease—the latter of which still rages about Tientsin, from the effect of last year's floods—will he, I ask, still prefer snake worship (which, to do him justice, he is said to have despised), or will he set to work for food with all the energy he is given credit for, and see with his own eyes that the work is being well and sufficiently done for the preservation of the province from the awful scourge of floods? The poor farmers have also had another scourge to contend with this year. Before the floods came the grasshoppers had been dealing destruction in some of the districts.

To keep the province of Chihli free of serious floods at all times will be a Herculean task, a task quite unfit for the shoulders of any native or body of natives of the present day. Nothing less than foreign machinery, under the hands of foreign scientific engineers of the first class, can at present hope to remedy the evil. I have seen the province of Chihli, where it borders on the highlands of Shansi on the west and Mongolia on the north, and the water-courses at many points between these places and the sea, and am convinced that unless the water-courses are all dredged out—and this can only be done efficiently by machinery—the province, in an extra rainy season will always be subject to these serious floods. I believe that the immense loss and damage done in one year to the crops alone is so large that a sum of money equivalent to the loss would be amply sufficient to put into thorough repair—in foreign hands—all the rivers and streams of the province. The question of repairs to the rivers, canals, and roads of this province should not be a provincial but a national one, as the waters which do the greatest part of the damage to Chihli come from the highlands of Shansi and Mongolia.

Many of the foreigners were last year generous in gifts for the starving native poor, and for this the recipients would in most instances seem to have been thankful, but many look upon it—as Easterns generally do—as a sign of weakness on our part. How far it will be wise to act again at present in the same spirit as last year seems doubtful. For some time past foreigners have noticed amongst the natives here a growing feeling of rudeness and incivility, and a calling of names not the most complimentary. Whether this is owing to the presence of more soldiers here than in former years, and of the import of Krupp's and other guns, rifles and torpedoes, it is difficult to say, but these things are generally believed to have a good deal to do with the feeling at present existing. The better-informed Chinese, who are acquainted with foreigners and their affairs, would gladly bring things to the notice of the Governor-General, but they have no means of access to him except through underlings, who require to be feed at every door. Foreigners, through their Consuls, without fee or reward, have access, but the native merchants have not this privilege of access to their rulers.

The Emperor coming of age, if rightly improved by Foreign Ministers, may be the means of doing much good to the country. Before the next Treaty revision takes place, a commission from all the principal European Courts should be here to see and judge of mercantile affairs, and how best to open the country—extremely rich in natural products—and yet the inhabitants sunk to the lowest ebb. Then foreign enterprise and machinery introduced, the face of the country would, in a short time, be completely altered for the better, and the wealth which is now hid in the bowels of the earth would circulate freely and cheaply to the benefit and comfort of many millions of the inhabitants.

Trade is at present at a standstill here. The steamers are coming up half empty, or even less. Goods cannot be sold at market prices, the prices being only nominal. Is not this state of things greatly owing to the great carelessness and negligence of the mandarins, who care for nothing but themselves? Cannot the foreign Governments, who have trade with China, do something for this trade—a trade which might be increased ten-fold under proper management? As Great Britain has the largest amount of this trade both in import and export, cannot she be pleased to take a part in the reorganising of this Empire in proportion to her trade?

SHANGHAI.

We have advices from this port to the 15th September. There had been no mail arrival from London since that of the P. and O Mail of July 26 on the 5th September, but the following French mail of 2nd August was due the day this mail left. The following summary of news is from the *North China Herald*:—

A correspondent writing on the 3rd September from Hangchow says:—Things go on so quietly here that we are sometimes tempted to think the authorities have almost forgotten that we are in the city. It is doubtful whether this state of things is to continue much longer however. Some weeks ago a placard was posted through the city cautioning natives against selling land to foreigners, and stating that the whole neighbourhood was injured by their presence. The paper further stated that any native so doing would be severely punished by the people. Within the last few days a much more serious step has been taken. The mandarins have issued a warrant for the apprehension of all natives who have ever sold land to foreigners in Hangchow. A copy of this warrant has been obtained; it contains the names of the natives who formerly owned Mr. Moule's land, Mr. Cryor's, Mr. Lyon's, Mr. Elwin's, Mr. Houston's, Dr. Galt's, and Mr. Dodd's, with the name of one middleman. Most of these men have already been arrested and are now in prison, and doubtless the others will be imprisoned as soon as caught. What will be the end of it, it is impossible to say. A copy of the warrant and a full statement of the case has been forwarded to both the English and American Consuls at Ningpo. The generally received explanation of the order is that the Taoutai lost several members of his family by sickness, and, going to the soothsayer, he was told it was because the *Fung-shui* had been interfered with by the foreign houses on a hill just over against his yamen. Hence the arrest.

We hear from Ningpo that the English and United States Consuls have left for Hangchow, in consequence of the representation made to them regarding the punishment of natives for selling land to foreigners. The Chinese seem to be bent on making some kind of disturbance. There is a report that the people

Digitized by Google

intend closing and filling up Dew's Canal, and that operations are to be commenced in about twenty days time. H.B.M. gunboat *Dove* is anchored below the settlement, and in a line with the canal, to be in readiness for any emergency. The free ferry seems now to be permanently established. Shipping trade is brisk seven steamers and eight sailing vessels being in harbour, the latter, however, all to the consignment of Chinese, from Singapore and Penang.

The *Hopewell* having now discharged 6,509 packages of tea, the damages she received in the recent collision are visible both inside and out. As it happened, the bowsprit of the *Annie Gray* struck the mainmast of the *Hopewell*, thereby considerably breaking the force of the collision between the hulls of the two vessels, but notwithstanding this, the waterways, stringers, beams, kneebolts, inside and outside planking of the *Hopewell* are broken on the port side, and the starboard side is bulged out in consequence.

As the ship *Araby Maid*, from Foochow with poles, was approaching Woosung Bar, she fouled a Ningpo junk, which with several others was at anchor a short distance below the bar. After striking the junk, the vessel, which was being towed by the *Samson*, carried it along with her till she reached the bar, when the junk sank close by the side of the channel, nearly at the point where the marks indicate that the bar should be crossed. The ship reports that the pilot observed four junks anchored right in the fairway, and that in order to clear them the helm was put hard a-port, but owing to a strong flood tide running at the time, the vessel did not pay off as quickly as she otherwise would have done. As some twenty minutes elapsed between the collision and the sinking of the junk, her crew were enabled to leave her, and to save their personal effects and any portable articles they thought of value. The harbour-master at Woosung having been apprised of the circumstance, a red light was put on the wreck the same evening, while a red flag by day denotes its position. The *Araby Maid* was in charge of a licensed Chinese pilot.

The inspector of markets has made a seizure of the carcase of a diseased bullock, and after reporting the matter at the Mixed Court, was empowered to have the meat destroyed, on Mr. Henderson certifying that it was diseased. The bullock was one of a lot being shipped by the *Oregonian* to Nagasaki, but, as it appeared to be sick, was sent ashore, and had been dressed, for Chinese consumption, but the choicest portions had been cut, to be sent to the foreign market. The persons implicated in the attempt to pass it into consumption have been brought before the Mixed Court, but judgment has not yet been given.

There cannot be a doubt that a virulent epidemic is prevalent among cattle in Shanghai and the surrounding country, and there is much reason to fear that by the shipping of stock to Japan the disease will soon extend its ravages to that country. We understand that steps were taken by Dr. Macgowan, in the capacity of medical agent of the Japanese Government, to avert, as far as possible, danger to that country from any infection of cattle plague which might be communicated by the animals shipped per *Oregonian* for Nagasaki. In consequence of information received by him, concerning the lot of cattle shipped, Dr. Macgowan has advised the Japanese authorities to prohibit the landing of the cattle at Nagasaki or elsewhere, and suggested that they should be reshipped to Shanghai.

At a meeting of the English members of the Shanghai Rowing Club, Mr. Batt in the chair, it was resolved to get up a crew to challenge the Scottish Eight. As there are men equal to about three crews to choose from in making up the eight, we may hope to see a good international contest at the next Regatta of the Club.

The Cricket Club announce their intention to open the autumn season on the 16th Sept. The match selected, doubtless with a view to test the talent of new arrivals, is the First Eleven v. the Next Eighteen, and from the lists of names given we may safely augur some good cricket and an exciting contest.

Messrs. Hogg Bros. the agents for the Soochow Bridge Company have addressed a letter to the Chairman of the Municipal Council offering to sell the whole property of the Bridge Company to the Council with all rights, for the sum of sixty thousand Tls. This proposal will be formally laid before the ratepayers at an extraordinary meeting which is to be convened on the 15th October.

The following items are from the *Courier*:—

The principal member of the confederation of Ningpo lawyers and rowdies who, some time ago, sought to extort a second squeeze of $1,000 from the brothels of the settlement, has at length been sentenced for his share in that transaction. When the evidence adduced in Court against him proved so strong that a conviction was, perforce, inevitable, it was seasonably represented to Chen that the culprit was a mandarin. On this the Mixed Court Magistrate declared that he had no power to punish him, and handed him over to the Taoutai. The illness of the latter has delayed the decision of the case. But the Taoutai, as soon as he was able to take cognisance of the facts, stripped him forthwith of his rank, and ordered him to be decorated instead with the collar of the cangue for one month.

While H.M.S. *Juno* was lying alongside the wharf of the naval store-yard, Mr. Cass, the chief carpenter, accidentally fell overboard. He must have been carried under the ship and got entangled, as he was never seen to rise. [illegible] found two days afterwards, and was buried in the New Cemetery with the usual naval honours.

We hear from Hangchow that one of the Chinese who sold land to the foreigners there has already received 1,000 blows of the bamboo! If this be so, the presence of Mr. Lord and Mr. Solbé may prove very seasonable.

We understand that Mr. McCartee, M.D., who has for some time performed the duties of Interpreter at the U.S. Consulate-General and Assessor at the Mixed Court, and who has previously held the position of U.S. Consul at Chefoo and elsewhere, will shortly leave China for Japan.

HONG KONG.

Our advices by this mail extend to the 21st September; the P. and O. mail from London 9th August arrived out on the 16th Sept. The following items of intelligence are taken from the *China Mail*:—

The Legislative Council met on the 15th, when the consideration of the Estimates (those exclusive of establishments) was proceeded with. A lively debate took place on the question of sheriff's remuneration, and a minute was recorded to the effect that the Council was of opinion that the sheriff should be a salaried officer, his fees being handed to Government. The Educational, Medical, Police and Gaol estimates were passed without much discussion. Considerable debate ensued on the subject of grants to the Roman Catholic establishments and schools, and his Excellency spoke very fully on the question of endowment. On a motion of Mr. Ryrie, seconded by Mr. Lowcock, a grant of $2,400, instead of $1,600, for the Roman Catholic benevolent establishments, was lost. Mr. May pointed out that the reformatory is not quite what is understood by that term at home. Messrs. Whittall, Greig, May, Hayllar and Smith voted against it, and Messrs. Lowcock, Ryrie and Ball voted in its favour. Mr. Whittall then proposed that $1,800 be granted to the Sisters of Charity and $600 to the reformatory for this year. This motion was seconded by Mr. Greig, and, after a very long debate, was carried. After discussing the new hospital and the water works the Estimates for 1873 were carried, and the Council was adjourned to the 25th.

We learn that the damages to the *Ottawa*, which was recently reported as having put into Oosima with disabled machinery, were somewhat serious. She left Yokohama on the 4th, with the downward mails, and at five A.M. next day broke her pinion shaft and piston rod and smashed the bottom out of one of her cylinders. She reached Oosima at noon of the 5th, and the Austrian corvette *Fusana* happening to put in that afternoon for shelter, Captain Hockin wrote to Yokohama for assistance. The Japanese steamer *Chili* was despatched to take her in tow for that port, but finding her hawsers insufficient, took off the mails and returned to Yokohama for additional cordage. The mails have arrived here. We believe that there is some intention of letting the next downward mail steamer tow the *Ottawa* to Hong Kong.

We have to congratulate the police on their success in breaking up a haunt from which supplies of spurious and deleterious beer have emanated and passed into the Hong Kong market. This bottled stuff, which is labelled and capsuled, bears all the appearance of the genuine article, and looks as if it had come fresh from the brewery of Bass and Co. It appears that in the prosecution of some inquiries connected with a case then under investigation before the magistrate, Inspector Grimes went into a shop in Gilman-street, and to his surprise found a foreign bottling machine. This led him to further search, and his exertions were rewarded by the discovery of a quantity of bran new capsules manufactured in this shop. The capsule is so well finished that it is impossible to detect any difference between it and the genuine one. Every letter is clearly shown, while the red triangle is perfect in every way. It seems that the impression is obtained from a die which is made of tin and fastened on to a wooden handle, and by means of a stamping machine (which bears the name of Mortimer and Co., London, as the manufacturers) the capsule is stamped. As to Bass' labels, a quantity of [illegible] ones were found, and from this it is evident that the brewers must have a forged stamp.

The Editor of the *Oriente*, Dr. Magalhaes, has been, we learn, arrested by order of H.E. the Governor Viscount de S. Januario, for alleged malicious libels published in the last number of that paper against the Governor. Dr. Magalhaes, being a military man, has been sent to Monte Forte, as customary.

We regret to learn that Lieut. Ellis, of the *Princess Charlotte*, has been found lying insensible from a severe wound, inflicted evidently for the purposes of robbery, at the entrance to St. Paul's College, in the lane leading up from the Wyndham-street tank. Though severe, the wound is pronounced not to be dangerous. Lieut. Ellis's watch and chain were gone when he was discovered, and there is as yet no clue to the robbers.

We may note that the Pier Company owns a somewhat singular-looking locomotive, which, despite its eminently business-like and non-ornamental appearance, deserves notice as the first practicable tractive engine ever run in this colony. The *Thales* discharged by its aid in twenty-two hours.

During the sitting of the magistrate (Mr. Mitchell) the Rus-

Digitized by Google

sian admiral, accompanied by his aide-de-camp, paid a visit to the Court, and occupied a seat on the Bench for a short time.

We hear it is stated in Chinese circles that since H.E. the Governor of Macao ordered the refractory leaders of the coolie strike to be flogged, he has been afraid to take his accustomed promenade, preferring to be driven out for his usual airing.

We note with pleasure an announcement concerning the proposed direct route by steamer to Melbourne and Sydney. The steamer *Parana* will leave this port on or about the 1st proximo, and the experiment so frequently thought of by many will then be made. Cargo, passengers, and correspondence may be taken hence, and delivered in Melbourne in say twenty-two days, while the mail *via* Galle takes nearly twice that time to perform the voyage (say forty-two days on an average); so that in speed the gain is very considerable. There are many other points of advantage which doubtless have been carefully considered by the promoters of the new route; but these we will speak of at another time. At present we may express a desire that the scheme thus inaugurated by a young but enterprising firm of this port may prove in every way a success.

THE LEVEE OF H.I.H. THE GRAND DUKE ALEXIS.

The following is the list of gentlemen presented to his Imperial Highness:—Sir Brooke Robertson, Mr. J. Whittall, Captain Waller, R.N., Lieutenant Lang, 10th Regiment, Lieutenant Blake, 10th Regiment, Lieutenant Meynek, 10th Regiment, Captain C. A. Denny, 10th Regiment, Lieutenant H. C. Huntley, 10th Regiment, Lieutenant G. B. Patan, 10th Regiment, Lieutenant F. R. Lowth, 10th Regiment, Lieutenant C. Talbot Peyton, 10th Regiment, D.C.D.G. Parkyn, Captain H. G. Carleton, 10th Regiment, Lieutenant R. G. Wharton, 10th Regiment, Mr. James B. Bahie, Staff Surgeon, D.C.G.A. Crocker, Mr. John Downs, Com.-General Perkis, Hon. H. J. Ball, Acting Chief Justice, W. R. Ashton, Control Staff, W. E. Wodehouse, J. A. P. Silveira, Lieutenant Robertson, 10th Regiment, Mr. J. Orton, surgeon, 10th Regiment, E. A. H. Ayers, A. C. Patyr, Colonel Phillips, R.A., Lieutenant T. M. Maurand, 10th Regiment, Mr. A. L. Agabeg, Mr. J. Oxley, Lieutenant W. W. Elliott, 10th Regiment. Lieutenant Taylor, 10th Regiment, Lieutenant R. Hyde, 10th Regiment, Mr. C. Apcar, Hon. P. Ryrie, Major Lucas, 10th Regiment. Captain Jones, R.E., Mr. A. W. Elliott, 10th Regt., Captain Dunlop, R.A., Dr. Belcher, R.A., Capt. Vaughton, 10th Regt., D. C. Paymaster G.N. Rippon, Assistant Controller Cleave, Lieut. Alexander, R.E., Mr. T. Newton, R.E., A. B. M. Hardy, D.W.E., Capt. Superintenden Deane, Lieut.-Col. Grein, L d'Almada e Castro, Captain Baird, R.N., Commander Magnay, R.N., Lieutenant-Comd. Antil, R.N., Mr. W. M. Tonnochy, Commodore Shortt, Mr. W. G. S. Cannon, Hon. C. C. Smith, Mr. D. Ruttonjee, Mr. G. F. Buxey, Mr. C. L. de la Forest, Mr. E. Chastell, Very Rev. T. Raimondi, Rev. G. Berghinoli, Mr. G. Overbeck, Mr. J. J. dos Remedios, Mr. A. G. Norman, Mr. A. Eimbcke, Mr. S. J. Gower, Mr. L. Beyer, Rev. R. Hayard Kidd, Captain Thomsett, R.N., Mr. F. W. Mitchell, Rev. Dr. Legge, Commodore H. H. A. Adams, U.S.N., Mr. W. K. van Refen, U.S.N., Mr. A. F. Magrueder, U.S.N., Mr. D. H. Bailey, Mr. R. Jensen, Mr. A. C. Dulcken, Mr. E. J. R. Wilcocks, Major-General Whitfeild, Lieutenant Burn, Captain O'Shaughnessey, Mr. J. F. Cordes, Mr. J. E. Manger, Mr. T. Pyke, Mr. H. Nicaise, Mr. J. Lanken, Mr. T. Magnussen, Mr. Kassamally Allyzuza, Mr. Alarikita Seevjee, Mr. H. Wicking, Mr. Lemann, Mr. S. A. Seth, Mr. Aratoon Seth, Mr. M. E. Sherazie, Mr. H. A. Sherazie, Mr. W. H. Forbes, Mr. P. M. Raderdina, Mr. N. M. H. A. Rahenen, Mr. Moosa Ahmed, Mr. R. Alexander.

SIAM.

—o—

BANGKOK.

The *Siam Advertiser* says:—

The great event of the week to the natives was the grand procession of an idol of Budh, the statues of the last four kings of the present dynasty, each of whom reigned in this city, after it was made the capital by the celebrated Siamo Chinese known as P'ya T'ak. According to European notation this occurred on the 17th Sept. This week, however, all classes of the community have in one way or another made some demonstration in honour of the day. The Christian part of the community have doubtless fervently prayed that God's richest blessings may follow the young king during a long and prosperous reign. Others, again, have commemorated the day with feastings, balls, parties and illuminations. These tokens of respect show that all classes and grades of the community are glad to honour him as best suits their inclinations.

The Rev. Mr. and Mrs. Carrington, the American Presbyterian missionaries located in that city, have succeeded in renting a lot and a bambu house, having a board floor, at a point on the West bank of the river called Hua Raw, in the vicinity of Wang Chan, where they are comfortably located for the present. The location, though too small to be ever regarded as an eligible spot for the permanent location of the mission, has its advantages for missionary work. The population in that vicinity is numerous, and there is a constant stream of people passing to and fro by the present mission house. A native gambling establishment is close by, and is necessarily the focus of much noise and confusion.

Dr. Vrooman, of the American Presbyterian Chiengmai mission, and Rev. Mr. Culbertson, of the American Presbyterian mission of Bangkok, reached Ayuthia on the 27th. These gentlemen are bound to Rahaang; Dr. Vrooman's ultimate destination is Chiengmai.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Advices extend to the 30th September; the P. and O. mail from London August 23 arrived out on the 22nd and the following French mail of August 30 on the 27th Sept. The *Singapore Daily Times* supplies the following summary of news:—

The reported seizure of the little steamer *Eastern Star*, late the *Maha Ranee*, by Tunku dia Oodin's steamer *Telegraph*, turns out to have been well founded, though we believe there is no foundation whatever for the rumour that men taken on board the *Eastern Star* had been blown from the guns. The *Eastern Star* had, we learn, been chartered by Rajah Moosah, and while employed in his service was endeavouring to run the blockade established on the Langat river by Tunku dia Oodin—coming down at night without lights, and unprovided with a proper pass. She was therefore seized. As it appears, however, that she had been taken there in direct opposition to the orders of her owner, who had recalled her to Singapore, it is probable she will be given up to him. The rumour of blowing men from the guns may be correct, but has probably no connection with the steamer. The atrocities said to have been committed by Mahdie's followers are almost too horrible for credence—some of Tunku dia Oodin's men who had fallen into their hands having been tortured and mutilated in a fearful manner. Several, we are told, had their scalps split clear across, and the skin stipped entirely off their foreheads and faces. A messenger sent by a rajah properly accredited, was fastened by a collar and two chains to posts, and, with his hands pinioned behind, was kept standing for seven days without a morsel of food, and then with food for three days longer in the same position. Fortunately, the house in which he was confined caught fire, and, reduced almost to a skeleton, he escaped with his chains and collar and returned. After such barbarities as these, it would not be surprising if Tunku dia Oodin should resort to strong measures in retaliation.

The principal event of last week was the trial before the sitting magistrate at Malacca of two Government officials, viz., the assistant colonial treasurer here, and his chief clerk, the former for embezzlement of Government moneys to the extent of $9,616 61, and the latter for aiding and abetting in the offence. The case occupied three days, no less than twelve witnesses having been examined by the Solicitor-General on behalf of the prosecution. Mr. J. G. Davidson appeared on behalf of the first defendant (the assistant treasurer), and Mr. J. D. Vaughan, on behalf of the second defendant (the head clerk in the Treasury). The case has been sent up for trial at the next criminal session, but as that will not be opened here for another six months, the Solicitor-General made an application to his Honour the Chief Justice to have the case tried at Singapore, at the next criminal session, to be held on the 10th proximo, and the Chief Justice has granted the application, so that the petty jurors there will have an opportunity afforded them of hearing both sides of the story, whilst the community of this place are entirely in the dark as to what the line of defence is to be, the counsel for both the defendants having reserved their defence until the case comes on for hearing before the Supreme Court.

H.N.M. steam frigate *Vice Admiral Koopman*, Captain Van Trojen, arrived here the other day from Batavia, on her way to Bangkok, with Mr. Hoogeven, Resident of Batavia, who, we learn, has been deputed by the Governor General of Java to invest the King of Siam and several Siamese officials with decorations. The *Vice Admiral Koopman* will return here by the middle of next month.

We understand the Government contemplate the erection of a new Post-office, the site chosen being the very best that could have been selected, namely, Fort Fullerton. This is a step in the right direction, and if the same site could be utilised for the Stamp, Import, and Export Offices, the concentration would greatly facilitate business, and would be recognised as a grateful boon by the whole mercantile community.

There exists a well-defined apprehension among the Chinese of another outbreak between the Teo Chew and Hokien tribes, though there is no telling when it may take place. Both tribes appear to be secretly preparing themselves for it, and it only needs some overt act of hostility on either side to cause a renewal of the scenes of October last. It is to be hoped that Government, having been fully warned, will take summary measures, short and stern, to check the first attempt at any disturbance.

The Messageries Maritimes Company's steamer Cambodge, with the present inward mail, arrived at Marseilles at 8 A.M. on the 30th ult., having put into La Ciotat harbour the previous day, in consequence of a strong north-westerly gale. She brings 52 passengers, 289 bales of silk, 1,624 packages of tea, and 508 packages of sundries for London. Her cargo for London will be forwarded per company's steamer Indus, which may be expected here on or about the 10th inst.

Commercial Report.

(*For dates see first page.*)

IMPORTS.

TIENTSIN. — Advices were still unsatisfactory. The water near Tientsin continued to rise, and no steps were being taken by the authorities towards repairing the banks of the river or canals. Trade, in consequence, was almost at a standstill, and there was no immediate prospect of its active resumption. A few 8-lbs. Shirtings had been placed at Tls. 1.77 per piece, and some English Drills, 15-lbs. at Tls. 3.07 per piece. Otherwise there was almost nothing to report.

HANKOW.—Advices report great dullness in Shirtings, with, however, a scarcity of the 7-lbs. weight. T-Cloths showed a decline in value, with a very limited inquiry. For Drills a good demand still existed, rates showing no change. In Fancy Cottons business had been much restricted. Tea: Arrivals had been limited, but a fair business is reported at prices rather in favour of sellers. Exchange on London was 6s. 4½d. per tael for six months' sight credits.

CHINKIANG.— The market for Shirtings and T-Cloths continued quiet, prices being about the same as those formerly current. English Drills were sought for, and Malwa Opium was in good demand. The steamers Trafalgar and Otago were loading rice for Canton. Both vessels have since passed Woosung en route for the South.

SHANGHAI.—The market had been extremely depressed since the English mail, and in spite of more favourable telegrams from Liverpool and Manchester prices of several Cotton fabrics showed a decline. The proximity of settling day, 17th and 18th Sept., was the assigned reason. The accounts from the outports have not been such as to stimulate purchases. Grey Shirtings: The business done had been scarcely sufficient to establish a market. Rates for commoner chops of 7 lbs. and 8½ lbs. were again easier; 7 lbs., Tls. 1.65 to 1.68; 8½ lbs., Tls. 1.83 to 1.86. White Shirtings: No business. T-Cloths: About 12,000 pieces 6 lbs. common, 4,000 pieces 8 lbs., and 7,500 pieces 7 lbs. Mexicans, had changed hands.; 6 lbs. at Tls. 1.18 receding to Tls. 1.15, 8 lbs., Tls. 1.67 to 1.75, 7 lbs., Tls. 1.46 to 1.50; natives were more disposed to buy, but were acting very cautiously in the face of heavy and increasing stocks. Drills: Steady demand, but quotations barely sustained, though holders firmly refuse concessions. English, 14 lbs. to 15 lbs., Tls. 3.5 to 3.14; Dutch, Tls. 3 to 3.6 per piece. Jeans: The low prices current had led to the settlement of about 7,000 pieces English. Fancy Cottons: 22-inch Black Velvets in demand for Japan, but stock exhausted; 500 pieces Dyed Spots sold at Tls. 2.66, and 500 pieces Gentian Shirtings at Tls. 2.50 per piece. Woollens: A quiet market had ruled, but Long Ells was the only article that had fallen in value. Scarlet C. P. H. cargo sold at Tls. 6.50. Assortments (half scarlet) on offer at Tls. 6.10 with no buyers. Crape Lustres sold at Tls. 4.20. Plain Lustres for Japan at Tls 4½. Medium Cloths had changed hands at Tls. 0.92½ to 0.96 per yard. Metals: Telegrams from London quoting a decline of 20s. per ton had had the effect of stopping both speculation and business. Lead: No business for cash.

HONG KONG.—Raw Cotton was saleable at a slight decline upon former rates. Cotton Yarns of all counts were receiving but little attention, and Nos. 16/24 could only be placed at lower figures. 7 lb. Grey Shirtings were again lower and 8-4 lb. had not improved in value: Drills firm and wanted, but T-Cloths neglected. No special movement had taken place in Woollens, other than a slight advance in both Assorted and Scarlet Long Ells. In metals, all kinds of iron were quieter as previous prices had been too high. Tin and tin plates were firmly held. Quicksilver steadily maintained its value, and Californian was quoted $100 to 101. Rice was not much wanted, and holders readily parted with their supplies at a fall of 5 to 6 cents per picul.

EXPORTS.

TEA.

HANKOW.—Advices report settlements of 7,000 chests Tea for the interval, chiefly third crop Oopacks, at very full rates.

SHANGHAI.—Black: A fair business had been done in Congous, the prices paid ranging from Tls. 23 per picul upwards, showing an advance of 5 mace to 1 tael per picul, while common Shantams could be bought on easier terms. Green: A lower range of prices generally had ruled; Pingsueys could be bought on what may be called reasonable terms, while two or three chops of Moyune had been bought at rates showing some weakness. Advices from America were unfavourable, and were it not for the high Exchange prices would be quoted at a decline. Concerning the qualities of the Greens on offer, it was reported that though the Moyunes were very good in cup, they were in appearance, probably, the worst ever offered, as far as make and style are concerned. Settlements for the week—Congou, 12,804 chests at Tls. 14 to 30¾. Green Tea: Moyune, Fychow, &c., 14,664 half-chests at Tls. 29½ to 51½; Pingsuey, 350 half-chests, Tls. 39; Shanghai-packed, 2,040 half-chests, Tls. 30 to 38.

FOOCHOW.—During the week a fair amount of business had been transacted, and prices for all kinds were firm and steady. Congou: Settlements, 17,144 chests at Tls. 3 to 22½, and for boxes Tls. 29; prices show little change, but latterly have been more in favour of sellers; arrivals, 20,000 chests. Souchongs: 1,026 chests taken at Tls. 15 to 25, and Tls. 34½ for boxes; arrivals, none. Oolongs: Settlements, 10,012 half-chests at Tls. 27 to 37; prices had been rather irregular but fully maintained; arrivals, 3,010 half-chests. Scented Teas: Settlements, 367 boxes at Tls. 15 to 19; arrivals, none. Pekoes: Settled, 50 chests at Tls. 26; no arrivals.

AMOY.—The Ooloong market continued very quiet, with ward tendency until the 14th Sept., when a buyer re-entered t ket, and settled a large string of chops at fully previous quo Buying had been continued at these rates, and 9,000 half-ches had been settled, leaving a stock of about 13 000 half-chests on offer. Total receipts for the season estimated at 220,000 half-chests. The Tamerlane sailed on the 16th Sept., taking 898,483 lbs. Ooloong, leaving the Anglo-Saxon on the berth for New York. The Surprise, s.s., was daily expected from Shanghai to fill up for New York.

CANTON.—A few small settlements reported at unchanged values. Musters of fourth crop Scented Capers had been placed on the market, but being much mixed in leaf and coarse in cup, had not found favour. Later on, however, some better Teas were expected. The Teamen continued firm at last quotations, though buyers, in view of the high rate of exchange, showed little disposition to purchase, except at a reduction in prices.

SILK.

SHANGHAI.—Notwithstanding unfavourable advices, there had been only a small decline—say on the average about Tls. 5 per picul. The business done had been confined to a very few buyers, but their individual purchases had been considerable, and settlements for the week were estimated at 800 bales, making total since the opening of the season 32,000 bales. In Tsatlees the following chops have been settled:—Dragon, No. 1, 2, and 3, at Tls. 620, 600, and 580; Fruit Chop, Nos. 2 and 3, at Tls. 550 and 530; Elephant, blue, at Tls. 522½; Dancing Bear, at Tls. 522½; Phœnix "Yuch-hwa," at Tls. 495; stock of Tsatlees estimated at about 5,500 bales, fully one-half being inferior and foul Silk from No. 4½ downwards. This was difficult of sale, but good and clean parcels, on the other hand, were firmly held, and seemed more likely to maintain their value. Hainangs: No settlements; stock about 200 bales; Fatmow's No. 2 scarce, and held for Tls. 510. Taysaam: Tsu-ke-yuen's "Ting-how" and "Gua-ling" Kahings bought at Tls. 525 and 495; stock of Kahing estimated at 500 bales, and of coarse Taysaams at 300 bales. Re-reeled Tsatlee of fair to good quality had been taken for America at Tls. 570 to 590; stock large, say 1,500 bales, the bulk Tsatlee. Yellow Silk: Some purchases of Mienchow reported at Tls. 385; stock, 1,000 bales.

CANTON.—Since the English mail of 11th Sept. the market had been rather quieter, and dealers were firmer at the reduced quotation, partly owing to the fourth crop just finishing and reports of the shortness and inferiority of the fifth crop, to arrive in about ten days from date. Settlements for this (French) mail were estimated at from 300 to 400 bales, but it was said that considerably more had been purchased and was being kept back for a more favourable rate of exchange. The reduced prices and bad reports of the fifth crop had induced purchasers to go into the market, and in consequence there were very few desirable parcels offering, most of the best having been picked out. Only some 200 to 300 bales Re-reels were reported as going forward to the United States by the Pacific mail leaving Hong Kong 21st Sept. Market Tsatlee was quoted at $470 to 480. Re-reeled Cumchook and Lacklow No. 1 at $540 to 560. Stock estimated at 2,000 bales Tsatlee and 100 bales Loongkong.

ARRIVALS.

At YOKOHAMA.—From Liverpool, Dovenby.

At SHANGHAI.—From London, Sept. 9, Mikado; 10, Sir Jamsetjee Family; 11, Aracan; from Liverpool, 14, Priam (str.); Oct. 31, Menzales.

At HONG KONG and CANTON.—From London, Sept. 18, Glance; Oct. 30, Canton (str.); from Liverpool, Petersburg (str.); from Sunderland, James Vinicombe; from Southampton, 20, Delta (str.); from New York, 17, Early Morn; 18, Galatea; from Calao, 18, America.

At SINGAPORE.—From London, Sept. 24, Sree Singapura; 28, Gordon Castle (str.), 25, Empress of India; Oct. 30, Pakwan; from Cardiff, 24, Blackwall; 26, Josephine; from Sunderland, 26, Mary; from Shields, Duke; from Liverpool, Oct. 30, Diomed (str.).

At BATAVIA.—From Holland, Sept. 11, India Packet; 13, Mr. Jacob van Lennep; 17, Drie Gezusters; 23, Stad Middleburg; Oct. 29, Hoek van Holland.

At PENANG.—Oct. Antenor (str.), Odessa (str.).

DEPARTURES.

From SHANGHAI.—For London, Sept. 7, Ajax (str.); 11, Yeavering Bell; 14, Glenroy (str.); Oct. 31, Hong Kong (str.).

From FOOCHOW.—For London, Sept. 6, Essex; 7, Duna (str.); 11, Zenobia.

From HONG KONG and CANTON.—For London, Oct. 30, Hector (str.); for New York, Sept. 19, Bowmah.

From SINGAPORE.—For London, Sept. 20, Ajax (str.); 21, Orchis (str.).

From BATAVIA.—For Holland, Sept. 12, Princes Amalie, 14, Nicolette; 15, Robertus Hendrikus, Hebe; 18, Otto; 21, Susanna Elizabeth, Michael Angelo, Jupiter; 24, Minister Fransen Van der Putte.

CASUALTIES.

SHANGHAI.

The Arracan, which arrived at Shanghai on Sept. 11, will have to dock, as she encountered heavy weather off the Cape of Good Hope, and since that time has been leaking considerably. The Araby Maid British ship, which arrived on Sept. 9, from Foochow, fouled a junk lying at anchor near the Woosung bar. The junk sank, and the ship will dock for examination.

VESSELS PASSED STRAITS OF SUNDA.

DEPARTURES.—Oct. 31, from Cardiff, for Trincomalee, Norge; 30, from Sunderland, for Singapore, Kishon; 31, from London, for Singapore, China, &c. (via S.C.), Cheops (str.); Nov. 1, from London, for Hong Kong, Neuva Providencia.

LAID ON.—At London, for Singapore, China, &c. (via S.C.), Craigforth (str.); for Singapore and Saigon, Charles Collett.

SPOKEN.—Angela (Spanish barque), Glasgow to Manila, Aug. 27, 3 N., 24 W.; Java Packet, Batavia to Rotterdam, Sept. 25, 7 N., 23 W.

BIRTHS, MARRIAGES, AND DEATHS.

—o—

BIRTHS.

BARNES—On the 26th Oct., at Shanghai, the wife of F. D. Barnes, of a daughter.
MILLER—On the 28th Oct., at Shanghai, China, the wife of Rowley Miller, of a son.
SPEIDEL—On the 12th Sept., at Saigon, Mrs. T. Speidel of a son.
YOUNG—On the 12th Sept., at Shanghai, the wife of Capt. Young, steamer *Acantha*, of a daughter.

MARRIAGES.

CLARKE—LEICESTER.—On the 24th Sept., at St. Andrew's Cathedral, Singapore, by the Rev. Canon Beckles, William Clarke, fourth son of the late Mr. James Clarke, to Nancy Primrose, fourth daughter of Mr. W. S. Leicester.
HOLDSWORTH—WHITLEY—On the 26th Oct., at Christ Church, High Harrowgate, by the Rev. P. W. Hulbert, Edward Holdsworth, of Shanghai, China, to Janey, youngest daughter of the late James Whitley, of Burrage House, Harrogate, formerly of Morton, near Bingley. No cards.
MCDONELL—COPE.—On the 24th Oct., at St. Giles's, Camberwell, by the Rev. George Viner, of St. John the Baptist, Enfield, William, son of the late George McDonell, of Trinity-square, E.C., to Emily Hannah, eldest daughter of Augustus Lidbrook Cope, H.M.'s Customs.
MORRIS—GEORGE.—On the 26th Oct., at Christ Church, North Brixton, by the Rev. J. McConnell Hussey, M.A., incumbent, Benjamin John Morris, of Foochow, China, to Florence Elizabeth, elder daughter of Ben. George, Esq., of Hattongarden, and Bayswater.
MOSS—LAING. On the 31st Aug., at H.B.M.'s Consulate, Kanagawa, by Russell Robertson, H.M.'s Consul, Edward J. Moss, of Cirencester, Gloucestershire, to Helen F. Laing, of Ayton, Berwick.
RUTHERFORD—BREDIN—On the 10th Oct., at St. Thomas's Church, Dublin, by the Rev. Canon Beach, M.A., Chaplain to the Forces, the Rev. W. A. Rutherford, D.D., Royal Navy, H.M.S. *Asia*, Portsmouth, to Elizabeth Frances, third daughter of Hall Bredin, Esq., M.D., No. 181, Great Brunswick-street, Dublin, No cards.

DEATHS.

BAUMGARTEN—On the 19th Sept., at Singapore, Anne Caroline, the beloved wife of Christian Baumgarten, Registrar Supreme Court, aged 57.
CROSSE—On the 27th Oct., at Shepherd's-bush, Harriette Arabella, the beloved wife of Hammond Andrew Crosse, late of the Clarendon-road, Nottinghill, aged 43.
FISHE—On the 28th Aug., at Taichowfoo, of diarrhœa and dysentery, Jessie Marion, infant daughter of Edward and Annie Fishe, of the China Inland Mission.
MILLS—On the 30th Oct., at Dudley House, Sutton, Surrey, Maud, the infant daughter of Thomas and Eleanor Mills, aged 4 weeks and 3 days.
STAEL—On the 24th Sept., at Hong Kong, Mrs. Johanna Stael, aged 50 years.

GRANT OF THE ALBERT MEDAL TO MESSRS. MARGARY AND DODD.

The *Gazette* contains a notification that the Queen has conferred the "Albert Medal of the First Class" upon Mr. Augustus Raymond Margary, of the China Consular Service, and upon Mr. John Dodd, merchant, of Ke-lung, Formosa. The services on account of which this exceptional honour has been conferred upon the gentlemen named are detailed in the *Gazette* as follows:—

"During the raging of a very violent typhoon which burst over the north coast of Formosa on the 9th August, 1871, the schooner *Anne* of Hong Kong and the French barque *Adele* were blown from their anchorage and driven on the rocky shore of Ke-lung Harbour. Messrs. Margary and Dodd had a rope fastened round their bodies and went into the surf to the aid of the crew of the *Anne*, the nearest ship, and the only one which could at that moment be discerned. They waded and swam a distance of forty yards through the surf, and the rope being too short they had to abandon it and trust themselves without its aid. Eventually they reached the ship by swimming, and then made an unsuccessful effort to return to the shore with a rope from the schooner. They were unable to accomplish this, and also failed in a subsequent effort to row ashore in a small boat. The boat was capsized and Mr. Margary but narrowly escaped drowning, both the adventurers being cast on shore bruised and exhausted. The captain of the *Anne* was of opinion that his vessel being strongly built would last out the typhoon, and advised Messrs. Margary and Dodd to desist from further efforts.

"Affairs remained for some time in this position, when it became known that the *Adele* was in need of assistance, which Messrs. Margary and Dodd proceeded at once to render. They had to make their way in the dark over the rugged rocky shore, and having done this they arrived within a short distance of the vessel, which had by this time become a total wreck. The captain threw overboard a rope attached to a buoy, which was seized by Mr. Dodd, who was joined by Mr. Margary with another rope from the shore, and a splice was effected. All the crew were saved by means of this rope with the exception of four men who were paralysed with fright, and another, the boatswain, who had broken his leg. Messrs. Margary and Dodd swam ashore with all these five men successively, and Mr. Margary was on board the vessel at the time she actually broke up, when he finally came ashore with the ship's cat clinging to his shoulder."

The Mosquito, composite gunboat, 400 tons, and 360-horse power, was commissioned at Devonport on the 30th ult. for on the China station, by Lieutenant-Commander W... Bond. The Mosquito is expected to sail this week.

The screw-steamer Scotland, 2,145 tons, 500-horse p... James, sailed on Saturday for Queenstown, where ... embark the reliefs for the 10th and 80th Regiments, and proceed to Singapore and Hong Kong, *via* the Suez Canal.

THE JAPANESE EMBASSY.

In our last issue we briefly recorded the arrival of the chief members of the Japanese Embassy at Bradford, and the presentation of addresses from the Municipality and the Chamber of Commerce. The following is the full text of the Chamber of Commerce address:—

MAY IT PLEASE YOUR EXCELLENCIES,—The Council of the Bradford Chamber of Commerce beg most respectfully to offer a most hearty welcome to the illustrious representatives of a monarch who, by the appointment of your Embassy, has evinced his strong desire to draw closer and closer the bonds of friendship and brotherhood between our two countries. This Council hail with peculiar satisfaction the visit of your Excellencies to the seat of an industry which, almost more than any other, is able to produce objects of exchange for those in which Japan is so rich. While fully acknowledging the great facilities which the Government of Japan has of late afforded to the development of international trade, this Council trust that your Excellencies will permit them to take advantage of this auspicious occasion to call the attention of your illustrious Emperor to some others which it is to be hoped his Government may soon deem it expedient to grant. Nothing would tend more to facilitate the profitable exchange of the rich produce of Japan for that of our various industries than improvements in the roads and means of communication between the sea board and the interior; while the two nations would learn to appreciate each other more thoroughly if permission were granted to British subjects to travel freely all over the country, subject to such passport regulations as may be deemed expedient by the Mikado's Government. The mines in his Majesty's dominions are reported to contain a large amount of wealth, and would no doubt yield a greatly increased production if Englishmen were permitted to apply to the working of these mines the practical science which they bring to bear upon their works at home. But if the granting of such a privilege should not be deemed advisable at the present, a great improvement would be effected if advances made to the owners by foreigners could be legally secured.

Your Excellencies will have witnessed the beneficial effects which the unrestricted freedom of trade have had upon this country, and they trust that on your return you will lay before your gracious Sovereign the results of an experience which must have the effect of confirming him in the path of enlightened reform by which he has inaugurated his reign. In conclusion, we beg your Excellencies to convey to your illustrious monarch the prayer of this Council that he may long reign over a happy and contented people, and that the relations of his Government with all the nations of the world may be ever those of friendship and peace.

The following reply was given by Iwakura in the Japanese language:—

GENTLEMEN,—The Ambassadors of his Imperial Majesty the Emperor of Japan, fully appreciate the cordial welcome you have extended to them, as well as the earnest words you have spoken in commendation of their Empire, and of them as its representatives. We have come, as is set forth in the words of our commission, "to select from the various institutions prevailing among enlightened nations such as are best suited to our present condition, and to adopt them, with gradual reforms and improvements." We have come, not only to examine your factories and mines, and shipbuilding, but also that, by personal contact with your people, we may succeed in establishing more firmly those relations of peace and friendship which shall create a feeling of lasting brotherhood between our two countries.

In regard to the suggestions you have made as to increased facilities of intercourse and travel, we can only express the conviction that whatever difficulties may exist are the results of years of education under a different policy, which will be obviated by increased foreign intercourse, and by such other influences as are now at work. We shall convey the words of this day to our Sovereign, and it will be a great gratification to him to know, as it will ever be to us to remember, that his representatives were so universally received with expressions of good-will, and were so kindly assisted in their labours.

On Friday, the 25th ult., the Ambassadors proceeded by special train to Saltaire to view the far-famed works of Sir Titus Salt and Co. They were attended by Mr. M. W. Thompson (the Mayor) and Alderman Law (President of the Chamber of Commerce). After inspecting the works and lunching with Sir Titus Salt, the party proceeded to Messrs. S. C. Lister and Co's. silk manufactory at Lillycroft, were they were conducted through the works by the manager, and minutely inspected the manufacturing processes from the base of the building to the topmost story. The Ambassadors afterwards returned to Bradford, and in the evening a banquet was given at the Victoria Hotel by the president and members of the Chamber of Commerce. The chair was occupied by Alderman Law, and Sir Harry Parkes, Gener... Alexander, Major Aston, the Mayor of Bradford, Mr ... Powell, M.P., and Mr. John Darlington, were amon... while letters of apology from Lord Frederick C... the Right Hon. W. E. Forster, M.P., and M... read.

On Monday, the 28th, the Ambass... ...sheffield, and they have since visited the ... ...orks in the district.

The Ambassad... ...General Alexander, were ... ...at the Sheffield Cutlers' ... ...ue the principal speech of

---

...ed that at the visit lately paid by some of the mem... ...the Embassy to the works of Messrs. Henry Balfour and Co., Leven, who are constructing materials for the copper mint in Osaka, orders were given for plans and estimates of cattle food, starch, and flax mills.

THE MESSAGERIES AND THE SUEZ CANAL. JUDGMENT.

THE judgment in this *cause célebre*, delivered in Paris on the 26th, appears to us to be convincing and conclusive. It is not necessary to reopen arguments which have been already discussed in these columns, and which are of too great interest to our readers to be easily forgotten. Suffice it to say that the judgment fully corroborates the view taken by the *Messageries*, and that the Canal Company is ordered for the future to confine its tariff to the limits laid down in its first constitution. It would have been a monstrous iniquity if it had been ruled otherwise. The Suez Canal is, without doubt, the most important—nay, necessary—highway in the world; and that its tolls and rates could be raised at the dictation of a few directors, when the original projectors were only too eager to form it on terms drawn up by themselves, would be simply intolerable. The judgment of the Parisian Tribunal will give universal satisfaction. Notice of appeal was, no doubt, formally given; but there is little prospect of the judgment being reversed, even if the appeal should be pushed on. The grounds of the present judgment are too clear to admit of reversal, as our readers will see from the short sketch given below. While congratulating the *Messageries* on the victory they have won, we cannot but express the hope that they will not be left to bear the whole expense of the litigation, of which every steamship owner, whose vessels pass through the Suez Canal, will partake the benefit. Nor can we close our comment without also expressing our regret that an undertaking of such world-wide importance—such incalculable influence on future history—as the Suez Canal, should for a moment have been attempted to be muddled into disgrace by such a plea as that of an *alibi*. Our readers will, however, see what very short work the Judge made of the "domicile" which the directors tried to shift from France to Egypt:—

The Suez Canal Company contends that it is strictly an Egyptian Company, and that it merely took the form of "La Societé Anonyme Francaise" for the sake of convenience; that the Viceroy of Egypt, as head of the State, when he authorised its constitutiown represented, both in his firman and his charter, only his own country and countrymen, and that he had authority to make no stipulation except in favour of those on whom he imposed the rates. The conditions of the 17th Article of the firman were imposed (say the company) solely for the profit of Egypt, and not for that of third parties, unknown, or at least unrecgnised. But that same firman declared the Canal open to the mercantile marine of all the world, and the company was restricted from the right to give special advantages to any particular nationality or company. Consequently, there can be no doubt that the Viceroy, in granting the concession, had but one object—uniformity of rate to all nationalities alike. The argument that the Canal Company is an Egyptian, and not a French Company, falls to the ground, because they had adopted the French form and domicile. They had the opportunity of choosing their own domicile as such, and it must stand by their own election—which was Paris.

Thus the low basis on which the Canal Company first sought to try conclusions with the *Messageries* is dismissed somewhat contemptuously—and not undeservedly so. This point being settled, the real question under dispute admitted of but one solution. "Ten francs a ton on the actual carrying capacity of the vessel was fixed by the firman as the "maximum rate that could ever be demanded without upsetting all the conditions on which the enterprise was "founded." The judgment proceeds:—

In adopting French currency as a standard rate, there can be no doubt that the company implied also the adoption of the French method of measurement.

What that means is, that a ton is a ton; and the Judge says, moreover, that the ten francs per ton, settled as the first and final rate by the firman itself, "*est une valeur "monétaire officielle Francaise parfaitement certaine et indis-"putable.*"

Such is the judgment against which the Directors of the Suez Canal have lodged notice of appeal. There is no chance of the judgment being reversed; and, if the shareholders are not more indifferent to dividends than shareholders generally, they will do well to impose some restraint on their Board.

THE FLOODS IN CHILI.

THE letters from our Tientsin correspondents are full of ominous forebodings. The floods which devastated the province of Chili last year have hardly subsided before a threatening rise in the height of the rivers is again observable. Already the Peiho washes its banks at a higher level than it did at any time last year; already the plain in the neighbourhood of Tientsin is covered with water, and reports from the interior speak of crops wasted and villages desolated by the rising floods. It is officially announced that the Hwanho, in repairing the banks of which, last year, LI-HUNG-CHANG asserts that Tls. 90,000 were expended, has again burst its bounds, inundating the country far and wide; and from the provincial capital, Paon-ting-Foo, we learn that the inhabitants have been obliged to close and plaster over the gates of the city, to protect themselves against the advancing element. The full significance of these facts will be apparent only to those who have watched the consequences of similar disasters in China. They mean more than the fact that thousands will be driven from their homes, destitute and starving; they mean more than that death will count its victims by hundreds daily, and that much which would have been spent in buying shirtings and Manchester goods will be expended in supplying the necessaries of life to the crowds of sufferers who will be thrown on the charity of the rich. They mean above and beyond all this that we must look forward to a winter when brigandage, if not movements of a more organised character, will be rife throughout the Province. They mean that when the wretched sufferers that have been reduced to the last extremity of famine, the able-bodied amongst them will take to pillage for a livelihood, and the weaker being unable to resist them will throw in their lot with them. They mean that another strain will be put upon the strength of the Government, already shattered by the many blows which have fallen upon it during the last fifteen years, and that we must look forward to another of those periods of disorder which each time they recur imperil the safety and jeopardise the interests of foreign subjects throughout the Empire.

The overwhelming nature of the calamity which has thus overtaken the Imperial province two years in succession will render absolutely necessary the adoption of extraordinary remedial measures. The system of patching up the banks of the rivers, and of suppressing, as far as possible, the knowledge of the real extent of the damage done and the sufferings incurred, to which recourse is commonly had in similar cases, will be too absurdly inadequate and impossible in the present instance. The real cause of the disaster is too deeply-seated and too general to allow of the application of any but the most thorough and powerful remedies. No mere effort to repair the banks of the rivers will render the Province safe from another flood next year. It is not due to any very unusual fall of rain that hundreds of square miles were inundated last autumn, and that these are now again under water, but to the gradual silting up of the beds of the rivers. It is a geological fact that the coast line of the Province is gradually rising from the sea, and that the rivers which dissect the vast plain extending southwards from Peking are becoming choked with the immense amount of alluvial soil continually deposited by them in their courses. Gigantic as are the resources at the command of the Chinese Government, experience has proved that they are quite inadequate to cope with a difficulty such as this. The embankments which make the whole course

Digitized by Google

of the Yellow River one of the wonders of the world, are a lasting monument to the folly of attempting in such a country as China to confine large and rapid rivers, raised by nature above the level of the surrounding country, by artificial barriers. Terrible as will be the distress caused by the present inundation, it will not have been endured in vain if it teaches the authorities this lesson; if it serves to break down the absurd pride which forbids the adoption of any measure but such as have been employed in similar emergencies from time immemorial, and if it compels the Government, in its hour of need, to seek the assistance of foreign scientific skill and appliances.

If there can be any gleam of consolation to be found in the terrible picture of misery which is presented to us, it is to be sought for in the facts that the scene of the catastrophe, being in the immediate neighbourhood of the capital, a consideration of the merits of the remedies proposed, both by natives and foreigners, will be forced upon the attention of the Government, and that LI-HUNG-CHANG is the Governor-General of the Province. It is commonly reported, and we believe on good ground, that this officer is the leader of the political party which is most strongly opposed to the introduction of foreign ideas into China. The magnitude of the difficulty, however, with which he now stands face to face, renders him powerless to deal with it single-handed. He must, therefore, either court disaster by attempting that which he is manifestly unable to carry out, or he will have to choose between employing foreign engineers and dredging machines, and yielding place to one who will.

WE understand that Messrs. D. and T. STEVENSON, of Edinburgh, have in hand at their works four more lighthouses for the Japanese Government Next to the appropriation of money, for such useful purposes as lighthouses on the coast of Japan, is the manner and instruments used for the accomplishment of such objects. We congratulate the Japanese Government on the success which has attended their appointment of Mr. BRUNTON, C.E., to carry out the erection of these lighthouses. While the Chinese Government, or their foreign employés, have been haggling and disagreeing as to the number and mode of erecting lighthouses on their coast, we have been recording from time to time the completion of some new lighthouse on the coast of Japan. We trust that Mr. GODFREY, the mining engineer, now in Japan, will be equally successful in his explorations for the mineral productions of the country.

THE assembly of the combined fleets of England, France, and America in the harbour of Chefoo is calculated to puzzle the Chinese Government. It is beyond their comprehension that we should attempt any display purely in honour of the marriage of their EMPEROR. We presume that any nearer approach to the capital—say, for instance, Taku —would have been a real terror to the Chinese. It is to be regretted, however, that the EMPEROR and his Ministers could not see for themselves these combined fleets, with their manned yards and big guns.

WE notice with pleasure the honors conferred upon Mr. MARGARY, of the British Consulate at Formosa, and upon Mr. DODD, a merchant of the same place. There are numerous instances on record of bravery displayed in rendering services to shipwrecked crews; but we believe there are few instances of such heroic devotion as that manifested by Messrs. MARGARY and DODD. The "Albert medal" is a decoration which is granted only to those who have shown special bravery in saving life. The notice from the *London Gazette* will be found in another column.

IN our account of the progress of the Japanese Embassy we give the address of the Bradford Chamber of Commerce. Of all the addresses yet presented we think it is the best. It contains practical suggestions for the benefit of both countries, and gives less of the adulatory feature. We may mention that YOSHIDA, Vice-Minister of Finance, has left for Paris, and is now quartered at the Grand Hotel with his Secretaries. It is believed that his visit is in connection with a loan.

THE Government of Berlin, it seems, has thought proper to give a semi-official contradiction to the rumours current in China as to the Prussian Treaty being denounced. It is further stated that alterations in the Treaty are now being negotiated at Peking. In a late number we gave an article on the subject, which was quoted in *The Times*, and this has no doubt attracted the attention of the Government at Berlin.

THE steamer *H. C. Orsted* left Gravesend on 31st ult. with fifty-five miles of telegraphic cable for connecting the coast ports with the Great Northern Hong Kong and Shanghai cable. The *H. C. Orsted* will remain on the station as a repairing steamer.

THE *Times'* correspondent at Shanghai has given us the benefit of his jottings of a visit to Pootoo and Chusan and the English graves there. The letter is most interesting, and forms an agreeable contrast to most of the news from China, which is necessarily confined to trade and disputes with the Chinese.

Monetary and Commercial.

—o—

We are glad to see that the importance of having a Chamber or Tribunal of Commerce in London is now being recognised. At the last meeting of the Common Council Sir Sydney Waterlow proposed that the question be referred to the City Committee on Local Government. This was seconded in a very able manner by Mr. M. McGeorge and Mr. Wheatley, who detailed the great advantages of such institutions in France, Italy, and Germany. It is something anomalous that London has not such an institution. The necessity for it is now being very distinctly shown in the affairs of Messrs. Gledstanes and Co., where disputes and rival interests occur as to the disposition of certain documents, which could be disposed of by a Tribunal composed of men of business at a trifling expense, and not thrown into the clutches of the lawyers, to fight over until not a vestige remains for the creditors. With reference to this particular estate of Gledstanes and Co., we know that one of the creditors has devoted the utmost energy to settle such disputes amicably, or by arbitration, but without success, and it is feared that this estate will form no exception to the general rule.

Mr. Sam Mendel has issued a Circular on the subject of mildew shirtings, which fearlessly exposes where the fault lies. He suggests that the Chamber of Commerce should have a special meeting on the subject and devise an effectual remedy for this growing evil. He says:—"It would be surely better to send out what now pass as 8¼ lbs. to weigh 7¼ lbs., leaving out the filth now used to give the additional weight. Many shirtings weighing 8¼ lbs. do not contain more than 6¼ lbs. of yarn, yet buyers, both here and in the East, accept these because they can buy such makes at 6d. less than pieces with 1 lb. more yarn in; and sales are often made in the East at a difference of not more than 3d. to 4½d. per piece between the one and the other. This is no excuse for dishonesty; the wrong-doing should be stopped by every means, however severe or onerous."

At extraordinary general meetings of the British Indian Submarine, Falmouth, Gibraltar, and Malta, Marseilles, Algiers, and Malta, and Anglo-Mediterranean Telegraph Companies, held on the 1st inst., the special resolution for effectuating and completing the amalgamation of these undertakings was passed unanimously.

The China Submarine Telegraph Company have notified that the receipts for the year ended the 30th of June enable the directors to declare a final dividend of 4s. per share, making, with those already paid, a distribution of 8 per cent. per annum.

The Foreign-office having requested the opinion of the Liverpool Chamber of Commerce on the negotiations between Great Britain and the Netherlands relative to the new Treaty of Commerce, the Council have expressed their entire approval of the principle upon which the negotiations between the two countries are being conducted, viz., that no special stipulations will be made on either side, each country being placed on the footing of the most favoured nation as to commerce or navigation.

The market for Bar Silver is very inactive, and sales have been effected at 59⅞d. per oz. standard, the lowest price touched for more than twenty years. A still further reduction is probable. Mexican Dollars show a downward tendency. About £370,000 have arrived per *Tagus* from the West Indies; these have not yet been sold, but will not realise the prices last obtained.

ARTICLES OF IMPORT.

TEA.

The market has been liberally supplied with a good selection of first crop leaf, chiefly of medium quality, and during the past week a fair business has been transacted, but at ½d. to 1d. per lb. decline on Teas selling from 1s. 3d. to 1s. 7d. per lb.; fine quality, however, shows a hardening tendency, and this movement is quite in accordance with the falling off in supplies of this class, through the loss of Parnassus and Lahloo, and the quantity sent direct from Hankow to Russia, via Odessa. The export from China by latest telegraphic advices is falling off, being now about the same as last season, and present prices for common Tea do not tend to encourage shipments from China, as thousands of chests can be bought in this market at 7d. to 9½d. per lb., or 1d. to 2d. per lb. under China quotations. The Continental trade has been on the most limited scale, but for Canada and New York rather more inquiry has set in during the past few days. The Deliveries have been on a large scale, the total for the week being 3,451,597 lbs., against 3,354,863 lbs. last year. The public sales have comprised 1,455 packages, offered on the 25th, and 10,573 packages on the 29th ult., all without reserve, and sold without material change in prices.

Black.—Red-leaf, below common Congou, more inquiry; dust 3½d. to 4½d., siftings and broken leaf 5d. to 9d., and bold leafy kinds 9½d. to 11½d. per lb.; flavoury kinds, twisted leaf at 1s. to 1s. 1d. per lb. are scarce; at 1s. 1½d. to 1s. 4d. a large quantity has been on sale, chiefly Sayune district; medium Kaisow sells at 1s. 5d. to 1s. 8d. per lb.; finest has been selling at up to 2s. 4d., and for two or three well-known chops 2s. 5d. to 2s 7d. has been bid. Pakling kinds, are difficult of sale. Tayshan leaf: In the absence of further imports, no change has taken place. Black leaf: Low and ordinary common is unsaleable except at forced rates, consumption being still on the most limited scale; good common to fair is worth 11d. to 1s.; good to medium at 1s. 1d. to 1s. 4d.; good medium kinds at 1s. 5d. to 1s. 8d. have been largely dealt in; fine and finest at 1s. 9d. to 2s. 2d. in better request; extra fine, is held for 2s. 4d. to 2s. 7d. per lb. Souchong: Medium quality sells at 1s. 6d. to 1s. 8d., fine and finest 1s. 10d. to 2s. 3d. per lb. Oolong: In limited demand, with moderate supplies. Scented Tea: Canton kinds; with no new imports there is nothing of interest to advise. Foochow Scented Orange Pekoe: Some 15,000 boxes have been on offer, and are selling at further reduced rates; strong scented can now be bought at 1s. 5d. to 1s. 7d., fine quality at 1s. 8d. to 1s. 10d. per lb. *Green*: At the moderate range of prices now current for Ping Suey the home-trade demand has improved. The bulk of the business transacted has been at public auction without reserve, in fact, this course is now almost generally adopted in quitting Green Tea. Canton Gunpowder, in no demand. Japan leaf: A few parcels of Nagasaki leaf have been on offer of good common to medium quality, but no business has transpired.

SILK.

The market is still without animation, though there has been rather more business doing, and the downward tendency of prices seems to a certain extent checked. In Chinas there is a small dail business doing, almost entirely for the home trade and prices have experienced but little alteration, Red Peacocks being still quoted at 24s. 9d., Blue Elephants at 26s., and Kukee Chin Jan chop at 26s. to 26s. 6d. In medium and common Tsatlees some sales have been made from 22s. to 23s. 6d. Japans still continue neglected, large arrivals now taking place leading buyers to think that they may do better by waiting. Deliveries 1st to 30th Oct. inclusive:—China, 2,638 bales; Canton, 657 bales; Japan, 680 bales; total, 3,975 bales.

CARDAMOMS.—Ceylon are firmly held for advanced rates, at which sales is not at present practicable.

...—The following sales have taken place:—*Borneo*: 1,100 ... to 2d.; 6,300 Tonkin, ⅝d. *Penang Lawyers*: 25 bunples, ... *Java*: 18,640 bundles, 2⅞d. to 3d.

China: Market steady; of 391 cases at auction, half sold ... cwt., and subsequently about 100 cases have been quit... ...hts. *Japan*: No ... ...ions.

CHI... ... business done; n... ...tion £50 per ton.

CHINA ...rm; 100 bales ret... ...rage quality.

CHINA P... ...VED GINGER continue... at auction were retired ... 6½d. to 6¾d. for fair to g... ...etired, candied at 8d., and fine Chyloong withdraw...

CUBEBS are very dull, and there are no transac... nominal quotations 19s. to 20s. per cwt.

COCOA-NUT OIL.—Large supplies have been placed ... e have met with a moderate demand at previously current r... the last sales, of 256 casks Ceylon offered, 57 casks good to fine ... £35 10s., and one lot yellowish £35 5s., the remainder being boug... in at £35 10s., also 56 casks Singapore at £35, and 80 casks Penang at £36. Privately there is a steady, though not active, business doing in Ceylon at £35 to £35 10s. per ton.

COIR GOODS.—At the last public sales a larger supply of Yarn was offered at the auctions than for some time past a portion consisting of second-hand parcels being mostly withdrawn, but the remainder in first hands met a good demand, and was all disposed of with spirit, good qualities at dearer rates, common and roping at fully previous rates to an occasional advance. The quantity of Fibre offered was also large, and only a small part sold on reduced terms. Of 201 bales Ceylon Yarn offered, 166 bales sold, medium £33 15s., good well made £36 5s. to £37 5s., fine even make and colour £46, 77 tons ditto in ballots and dholls nearly all sold, common to good common £27 15s. to £29 10s., good £35 15s. to £36. Of Fibre only 4 tons Ceylon sold at £16 to £17 10s.

CUTCH.—Holders having accepted a further reduction, a large business has resulted, about 7,000 packages having changed hands at 21s. 6d. for fine Pegu in boxes, and 20s. in bags.

DRAGON'S-BLOOD.—In auction, of 29 cases lump offered, a few only old, one lot good bright at £7 10s., fair at £6 5s. to £6 7s. 6d.

EBONY.—The high prices now current for Ceylon are having the natural effect of producing increased supplies, 98 tons being now afloat, against 88 tons last year. As these come to hand prices are likely gradually to recede. A few tons have been placed at £24 per ton for good quality.

ESSENTIAL OILS.—*Aniseed* is dull, and 1s. lower; 30 cases at auction mostly sold at 9s. 9d. to 9s. 11d., but subsequently and more recently some business has been done at 9s. 6d. per lb. *Cassia* is very firmly held, and 12 cases at auction retired. *Nutmeg* firm; 9 cases sold at 8¾d. to 9d. per oz. *Cinnamon*: fine scarce and wanted; 4 cases retired. *Citronelle* lower and dull; 175 cases at auction retired; sales privately at 2¼d. to 2⅜d. *Lemon Grass*: value nominal, and difficult of sale; 68 cases retired.

GALANGAL ROOT.—In good demand; fair bright quality held for 24s. per cwt.

GAMBIER.—An active inquiry has again been experienced, and as only limited supplies have been offering prices have further advanced, fair block having been sold at 27s., 600 to 700 bales having been disposed of; 2,000 bales Cubes are also reported sold at 27s. 9d. to 29s. per cwt.; and for arrival 200 tons July sailing at 24s. to 24s. 6d. ex ship, and 50 tons August sailing at 23s. 9d., ex ship.

GALLS.—*China*: The market is steady and firm, and there have been no transactions; the nominal value of fine quality is £2 18s., and a parcel of 200 cases offered in auction yesterday was bought in at £2 17s. 6d. per cwt. *Japan*: No supply.

GUMS.—*Benjamin*: Siam quiet; of 58 cases at auction, half sold at £18 15s. to £19 for fine tear in block; £15 15s. do. foul; £16 15s. to £17 siftings and small tear, mostly clean; £8 to £8 2s. 6d. dull brown. Sumatra also quiet; of 115 cases, few sold; small almondy seconds £7 (1 lot £6 15s.). *Copal*: Cheaper, and very dull; of 2,008 cases offered, only a few sold at 30s. per cwt. for good hard. *Damar* quiet, with large arrivals; 455 cases chiefly retired. *Gamboge* quiet; 105 cases offered were mostly firmly held and bought in; few only sold—clean pipe at £15, drossy and mixed at £11 to £12.

GUTTA-PERCHA.—Rather more business has been done at easy rates; of 1,913 packages, and 2 tons offered, a small proportion only sold; fine at 2s. 9d., chiefly common to middling reboiled at 9¾d. to 1s. 4d. per lb., and a large quantity White Borneo at 1s. to 1s. 3d. for good clean quality.

HEMP.—Business is still checked by heavy arrivals, and the market continues dull, with an easier tone; white Quilot rules as before at £55 to £55 10s.

HIDES.—There was a limited attendance of the home trade at the last periodical auctions, and as exporters bought sparingly only two-thirds of the quantity offered was disposed of. Prices were chiefly ¼d. to ½d. in favour of the buyer, the greatest reduction being in the middling and low qualities; Singapore and Penang sold at late prices to a slight decline. Of Buffalo Hides a smaller quantity was offered than of late, and of the total quantity about one-half sold at previously ruling prices.

HORNS.—*Siam Buffalo* firm at the last quoted rate, viz., 36s. 6d. to 39s. 6d. per cwt. for 3 lb. to 4 lb. horns. *Ceylon Deer* also firm; ten tons 1 lb. to 1¼ lb. horns sold at 75s. per cwt.

ISINGLASS.—Penang firm at previously ruling prices, viz., good and fine pale leaf, 3s. 9d. to 4s. 5d.; middling tongue, 3s. 2d. to 3s. 4d.; good cake, 2s. 3d. to 2s. 5d. per lb.

INDIA-RUBBER.—Market quiet; 50 baskets common foul East India have been quitted at 1s. 5d. per lb.

JAPAN WAX.—In fair demand, and fine saucers are firm at £4 12s. per cwt.; 42 cases dull saucers were quitted in public sale at £4 10s. 6d.

MUSK.—Market steady; at the auctions 49 caddies Tonquin were offered, and all sold; pile 1 of fair shape, but rather skinny at 38s. to 39s. 6d.; very unsightly ditto, but good grain and thin skin at 32s. 6d. to 33s. 6d.; pile 2, generally rough, but containing a few sightly pods at 19s. to 20s.; inferior skinny ditto at 18s. to 18s. 6d.; wet pickings at 21s. to 23s.; trimmings at 1s. 1d. per oz.

PEPPER.—*Black*: Slightly improved, and as high as 6½d. to 6⅝d. has been obtained for Singapore, and 6¼d. for Penang, which prices have also ruled in auction. Of 1,356 bags Siam offered, barely half sold, very dusty at 6⅜d. to 6½d. *White* is ¼d. to ½d. lower, and the market is quiet; Singapore rules at 1s. 1d. to 1s. 1½d. for middling to good; Penang at 1s. 0¾d. to 1s. 1d. for fair.

PLUMBAGO.—The demand has been limited, but former prices have been sustained. At auction 472 barrels partly sold, fine chips 22s. to 24s., fine dust 12s. per cwt.

RATTANS are firm at the last quoted rates.

RHUBARB.—China is rather quieter. At public sale, of 155 cases offered, about half found buyers; selected very bold root, of good right pinky fracture, 3s. 6d. to 4s. 6d.; small to medium ditto, 2s. to 2s. 11d.; fairly trimmed middling fracture, 1s. 11d. to 2s.; a... ...h dried dull wormy roughish at 1s. 6d. to 1s. 8d.; high... ...s. 3d. to 1s. 4d. per lb.

...ed with difficulty both on the spot and afloat,

Digitized by Google

and business is unimportant. There has been more pressure to sell floating cargoes of soft grain and several have changed hands at reduced rates; other kinds are also cheaper. The business done comprises 150 tons Dacca September-October shipment, via Cape, at 10s. 3d. The floating cargo, per Ontario, 1,271 tons Rangoon at 9s. 9d., ex ship London; also two cargoes arrived in dock, viz., the Top-Gallant, 1,750 tons Rangoon at 9s. 7½d., ex quay, and the W. G. Russell, 1,735 tons Necransie at 8s. 9d., ex quay.

SAGO.—Market steady; private sales of fair quality at 16s.; 'of 2,125 bags offered at auction, the bulk sold—good and fine medium and large, 18s. 6d. to 19s. 6d.; fair small, 16s. to 16s. 6d. *Flour* is very firmly held; of 798 bags offered, half sold at 16s. to 16s. 6d.

SHELLS.—Market quiet pending the next periodical sales, which will be held to-morrow.

SAPANWOOD.—*Manila* and *Siam* quiet; no transactions. *Ceylon* continues scarce.

STAR ANISEEDS.—Steady; of 186 cases and 10 bales offered at auction, only 75 packages sold; fine bright at £5 12s. 6d.; fair, slightly mould, at £5 2s. 6d. to £5 5s.; badly moulded being retired at £5.

STICKLAC.—Market for Siam firm; at public sale 490 boxes newly arrived, per Ravensworth Castle, sold at £4 8s. to £4 9s. for good, and £4 2s. 6d. to £4 3s. 6d. for slightly blocky; a further offer of 82 boxes fine free quality was quitted at £4 8s. 6d. to £4 9s. per cwt.

SOY.—*China*: There have been large arrivals, and the market continues very flat; the parcel bought in at 1s. 9d. a fortnight since has been sold privately at a lower figure. *Japan*: No transactions.

SPICES.—*Cinnamon*: A rather better demand prevails for good kinds, but business is not large. *Cassia Lignea*: Steady; 737 cases unworked at public sale brought 87s. to 88s. per cwt. for fair quality. *Buds*: Quiet; 45 boxes bought in. *Cloves*: Amboyna firm; Penang steady. *Mace*: Again offers more freely, but there is a fair export trade; of 35 packages at auction, part sold; good pale 4s. 4d., middling reddish 3s. 9d. *Nutmegs*: Flat; 73 cases chiefly retired, few bold sold, 68's at 3s. 9d., 78's at 3s. 5d. per lb.

TURMERIC—China scarce, Java unsaleable.

TAPIOCA.—In spite of a falling off in the quantity afloat, and in spite of high prices quoted from the other side the stock here is so heavy that prices, if they rally one day, decline the next. Singapore in auction has sold, fair at 2¼d., good and very fair at 2⅜d. to 2½d., and a few bags of extra fine at 3d. per lb. Privately, really fine has been sold at 2½d. per lb. Penang; fair Alma brand has been quitted at 2d. to 3¼d., and greyish ditto at 2d. per lb.

TIN.—Market firm, and prices slightly advanced; quotations:—Straits, on the spot, £142 to £142 10s.; afloat, £142; Banca, £156 10s.; Billiton, £147 per ton.

TOBACCO.—In the public sales 943 bales China leaf sold at 4½d. to 8½d., 11 bales ditto damaged at 2⅞d. to 4d., 193 bales Japan ditto 7½d. to 8¾d., part at 2⅞d. to 3d., 83 bales ditto damaged at 2d. to 7d. Of cigars one case Manila damaged sold at 4s. 6d., and 21 cases Cheroot and Cigars at 1s. 1d. to 4s. per lb.

VERMILION.—China has slightly advanced, 10 boxes having been sold at 3s. 10d. per lb.

Insurances.

By steamers via S.C., or sailing vessels, f.p.a.:—To Yokohama steamer 35s., ship 40s.; to Shanghai, steamer 30s., ship 40s.; to Hong Kong, steamer 25s., ship 35s.; to Singapore, steamer 20s. ship 25s. to 27s. 6d.

CASUALTIES.

Later advices from Honolulu, Sept. 24, state that the Lochnaw (British barque), from Manila to Valparaiso, with sugar, ex Kedar, which vessel was condemned at Manila, put into Honolulu, Aug. 31, leaky, and reported having experienced heavy weather from July 27 to Aug. 5, during which she sprung a leak, and jettisoned some cargo; after discharging, the leak was discovered and stopped, and the vessel would be ready for sea about Sept. 27.

The Yokohama (American barque), from New York for Hong Kong, reported in our last issue as having been abandoned, &c., was subsequently burnt.

MISCELLANEOUS.

The John Clark, from Cardiff to Singapore, put into Rio Janeiro, Oct. 5, with master (Ross) sick.

HONG KONG.

COMPLETION FUND.

JUST before embarking from Hong Kong, on Tuesday, Nov. 16, 1869, H R H. the DUKE OF EDINBURGH was graciously pleased to lay the first stone of a choir for this, the mother Church of the Diocese of Victoria. The cost of the fabric has been shared by the Executive Government and the local community; and it is proposed, by a general subscription among former residents in and visitors to China, to provide the necessary furniture and fittings. Should sufficient funds be raised, it is proposed to erect a stone pulpit.

The Committee will gladly receive and forward any special gifts with which they may be entrusted. This scheme having received the cordial approval of the Colonial Chaplain and the Trustees, is circulated by the Executive Committee.

The Rev. W. R. BEACH, M.A., Chaplain to the Forces, Canon of St. John's Cathedral, Hong Kong, and late Colonial Chaplain.

CHAS. S. GEORGE CLEVERLY, Esq.

ROBERT S. WALKER, Esq., Hon. Treasurer, the Hollies, Beckenham, S.E.

HERBERT LAURENCE, Esq., Hon. Secretary 1, Royal Exchange-buildings, E.C.

P.O. Orders to be made payable at Cornhill, E.C.

HOLLOWAY'S PILLS

The changes of temperature and weather prevalent in autumn frequently upset persons who are most cautious of their health, and most particular in their diet. These corrective, purifying, and gently aperient Pills are the best remedies for all defective action of the digestive organs; they augment the appetite, strengthen the stomach, correct biliousness, and carry off all that is noxious from the system. Holloway's Pills are composed of rare "balsamic matter," and on that account are particularly well adapted for the young, delicate, and aged. The field of beneficial work done by Holloway's well-known and widely appreciated Pills is too large to attempt to catalogue all the diseases and distempers remediable by these means.

(LIMITED).

VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th October, 1868. In the high tides of the North-East Monsoon there is a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

These advantages, and the great facilities which the proximity of the Dock to the town offers for the transport of materials, &c., enable this Company to adopt a very low scale of charges for ships' work of all classes.

LONDON AGENTS.

Messrs. MACTAGGART, TIDMAN, and CO., 34, Great St. Helens.

E. M. SMITH, Manager.

OVERLAND ROUTE VIA MARSEILLES.—MESSAGERIES MARITIMES DE FRANCE, 97, CANNON-STREET.—FRENCH MAIL STEAMERS LEAVE MARSEILLES (via S.C.) ON THE FOLLOWING SUNDAYS, at 10 A.M.:—

Ava ...	... Nov. 10	For	Aden, Galle, Singapore, Batavia, Saigon, Hong Kong, Shanghai, and Yokohama.
Donnai	... Nov. 24		
Peiho	... Dec. 8		
Meikong	... Dec. 22		
Sindh...	... Jan. 5		
Provence	... Jan. 19		

The steamers of the 24th Nov., 22nd Dec., and 19th Jan. connect at Aden with the steamers for Reunion and Mauritius.

The steamers of the 10th Nov., 8th Dec., and 5th Jan. connect at Galle with the steamers for Pondicherry, Madras, and Calcutta.

For Alexandria and Naples... Every Thursday (noon)
" Constantinople ... ... " Saturday, 5 P.M.
" Algiers ... ... " " "

The Company's weekly steamers to Alexandria connect at Alexandria with the English mail steamers from Brindisi to Bombay.

For Passage, Freight, or Information, apply to the Company's Agent, 97, Cannon-street, E.C.; G. H. FLETCHER and Co., Liverpool; at the Offices of the Messageries Maritimes of France in Paris, Lyons, Bordeaux, and Marseilles; or to SMITH and Co., Rotterdam.

*** Passengers eastward of Suez securing their Berths in London are entitled to the conveyance of their luggage free to Marseilles.

CASTLE LINE OF STEAM PACKETS for PENANG, SINGAPORE, HONG KONG, SHANGHAI, JAVA, and JAPAN.—The following high-classed and full-powered STEAMSHIPS will be despatched as under:—

Steamer.	Class.	Tons.	Dock.	To sail.
Glenroy	100 A1	2,100	SWID	Early in Nov.
Glenlyon	100 A1	2,200	SWID	To follow
Gordon Castle	100 A1	2,000	SWID	To follow

STEAM to BANGKOK (Crossing the Bar.)

Via the Suez Canal, with all possible despatch, calling at Tanjong Pagar Wharf, Singapore, the new, powerful, first-class screw steamer KROMATAH, 805 tons, 150-horse power, nominal, W. B. HAFFENDEN, Commander; South West India Docks. Splendid accommodation for passengers.

For Freight, Passage, or further particulars apply to SMITH, SON, and COLE, 12 George-yard, Lombard-street, London, E.C.

SUCCESS IN INDIA,

AND HOW TO ATTAIN IT.

EFFINGHAM WILSON, Royal Exchange.

The writer is evidently well acquainted with the East, and the information afforded by him is both useful and interesting.—*Daily News.*

The honest yet hopeful way in which practical information is communicated in these pages concerning actual life in India will awaken the dormant enterprise of young men of education and ability, whose prospects may be somewhat indifferent at home.—*Globe.*

A valuable little pamphlet.—*Morning Post.*

The author of this very sensible work appears quite at home in his subject.—*Financier.*

We leave the little book with much the same impression as would be derived from the conversation of an intelligent and observant man of the world.—*Bullionist.*

A real and practical knowledge has been brought to bear upon the subject.—*Money Market Review.*

The author of the above-named pamphlet formerly editor of the *Indian Examiner*, and since on the staff of daily and weekly Journals in London, seeks a re-engagement as editor in China, Japan, or Ceylon. The advertiser has a thorough knowledge of the practical working of a newspaper, and could undertake the business department also.

Address, J. D. B., care of the Editor of the *London and China Telegraph*, 2, Cowper's-court, Cornhill, to whom references are kindly permitted.

[illegible]nted for the Proprietors by WOODFALL and KINDER [illegible]Milford-lane, Strand, W.C., and published by JAMES [illegible]ST, at the Office of the "LONDON AND CHINA [illegible]GRAPH," 2, Cowper's-court, Cornhill, in the [illegible]of St. Michael's, in the City of London.—Nov. 4, 1872.

THE MAILS, &c.

The P. and O. mail, bringing advices as above, was delivered, *via* Brindisi, this morning, its due date. A portion of our correspondence by the Pacific mail, bringing dates from Yokohama up to the 2nd Oct., was also delivered this morning. The next inward French mail, with dates Yokohama Sept. 25th, Shanghai Sept. 29th, Hong Kong Oct. 5th, Singapore Oct. 14th, is due, *via* Marseilles on Monday next, the 18th inst.

Telegrams by the China Submarine and Red Sea Lines are being received with the usual regularity, occupying, allowing for difference of time, five to six hours in transmission. The Great Northern line is in working order, with the exception of the Hong Kong and Shanghai section.

List of Passengers.

PASSENGERS INWARD.

By this mail to Brindisi, per P. and O. steamer *Malta*, arrived Nov. 8.—From Hong Kong: Mr. J. Armstrong. From Singapore: Mr. W. Aden. To Venice, from Shanghai: Mr. Kehlken, Mr. Hopimann. From Hong Kong: Mr. Walter.

To Southampton, per P. and O. steamer *Nubia*, expected to arrive Nov. 19.—From Shanghai: Mr. J. Barker, Capt. Legoosion, Capt. Tucker. From Hong Kong: Lieut. Cumpton, Mr L. H. Moorsoom, Mr. S. Deacon, and two second-class passengers. To Suez, from Singapore: Mr. L. Haber.

PASSENGERS OUTWARD.

Per French mail steamer *Ava*, from Marseilles, Nov. 10 (booked from London).—To Yokohama: Mr. H. Riley, Mr. Hagase, Mr. Itsutruye, Mr. Takatouge, Mr. Kagawa and two second-class passengers, Mr. C. Ekeda, Mr. Kobayashi. To Shanghai: Mr. and Mrs. Johnston, Mr. Mead. To Hong Kong: Mr. and Mrs. Lammer and four children, Mr. E. Beart, Mr. Morgan, Mr. and Mrs. Peterson, Mr. and Mrs. Delavel, Mr. W. Sturrock. To Singapore: Mr. Rubin, Mr. and Mrs. Ryk, Madame Ryk and governess, Mr. Tefta, Mr. and Mrs. W. Ullemeister, and three second-class passengers. To Batavia: Mr. and Mrs. Nogel, Miss Klins, Mr. A. Matkins, Miss Clona, Mr. and Miss Mees, Mrs. Praterms, Miss Guiem. To Batavia: Mr. J. Roland, Mr. Van der Ploeg. To Galle: Mr. G. Phear. To Saigon: Admiral Dupré and suite, Mr. M. de Montesquir, Mr. de Langemden, Mr. Berthanst, Mr. Tibbout.

Per French mail steamer *Donnai*, from Marseilles, Nov. 24 (booked from London).—To Shanghai: Mr. and Mrs. Holdsworth. To Hong Kong: Mr. M. Beart. To Singapore: Mr. M. Englebach, Mr. M. Mether, Mr. and Mrs. Van der voes de Bye. To Batavia: Mr. and Mrs. Hora Siccoina, Mr. and Mrs. Kleberg, Mr. Sholten, Mr. R. W. Besier, Mr. John S. Dick.

Per P. and O. steamer *Pekin*, from Southampton, Nov. 7.—To Yokohama: Mr. S. Yugawa, Mr. S. Ohuman, and one second-class passenger. To Shanghai: Mr. Wulff, Mr. G. Lethbridge, Mr. G. R. Johnston. To Hong Kong: Mr. K. Mac Iver, Mr. T. E. Ludlam. To Ceylon: Mrs. F. Bayley and child, Mr. J. R. Loftus, Mr. Rudd, Mrs. Robertson and child, Miss Burrington. To Hong Kong (*via* Bombay): Mr. W. H. Fittock. To Batavia: Mr. Burgoyne.

Per P. and O. steamer *Malta*, from Venice, Nov. 15.—To Yokohama: Mr. and Mrs. A. Ewers. To Hong Kong: Mr. D. Petrie. To Ceylon: Mr. Quilty, Earl Grosvenor, Marquis of Stafford, Viscount Lewisham, Dr. Gould.

Per P. and O. steamer *Malta*, from Brindisi, Nov. 18.—To Shanghai: Mr. and Mrs. H. Robinson, Mr. and Mrs Ferguson.

Per P. and O. steamer *Mooltan*, from Southampton, Nov. 21.—To Ceylon: Mr Bell.

Per P. and O. steamer *Simla*, from Venice, Nov. 29.—To Singapore: Mr. and Mrs. J. R. Mac Arthur.

Per P. and O. steamer *Simla*, from Brindisi, Dec. 2.—To Hong Kong: Mr. C. V. Creagh.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates from Yokohama by this mail extend to the 18th Sept., but by San Francisco we have advices to the 2nd Oct. The following telegraphic summary is from the *New York Herald* :—

The steamer *Colorado*, from Hong Kong, September 21st, and Yokohama, October 2nd, has arrived here, and brings the following news :—

The Korean Government has sent more threatening letters to Japan. Sailing vessels, conveyed by a Japanese man-of-war, have been sent to Korea for the purpose of bringing back all Japanese in the country, preparatory to further measures on the part of the Imperial Government.

The Japanese Government has liberated the coolies brought by the Peruvian vessel *Maria Luz*, which was driven ashore in stress of weather, under the plea of ill-treatment to the coolies when on board.

A Chinese mandarin had arrived to take charge of the liberated people, and they will be returned to China.

In Yedo the mortality was excessive. The authorities had notified foreigners residing outside of foreign settlements to return at once, and the Japanese were forbidden to lease premises to them.

The new paper money made in Berlin has been already counterfeited.

The telegraph line from Yedo to Nagasaki has been opened. The railroad from Yedo to Yokohama has been completed, and was to be formally opened by the Mikado.

CHINA.

TIENTSIN.

The waters in the east and west plains are still rising, and it was expected that the same condition of things as regards flooded country would prevail this autumn and winter as were witnessed last year. Two British, one French, one Russian, and one American gunboats will be stationed off the Settlement during the winter; so the foreign residents will have ample protection in the way of a naval force, should any disturbances unfortunately arise through dearth of food amongst the Chinese population. The territorial authorities have not taken any measures for the purchase of rice or grain for the alleviation of the coming winter's dearth of food among the poorer classes. The crops of millet have been entirely destroyed by the inundations, and owing to two continuous years' floods the means of a great mass of the

Digitized by Google

population have been reduced to the lowest ebb, so that there was no doubt that Government aid will be required to meet the dearth of food, which will exist to a great extent and with much severity during the coming winter.

On the 8th Sept. General Vlangally, the Russian Minister, and Herr Annecke, the German Minister, arrived at Tientsin from Chefoo. On the 9th they called on Li Hung-Chang, and immediately after that proceeded on to Peking by the north river. Mr. Robert Hart, Inspector General of Customs here, will also proceed on to Peking; so when he reaches the capital all the chiefs of the different foreign departments will have returned to their posts at the metropolis.

The import trade at Tientsin has for some months back been in a very deplorable condition, which may be attributed principally to the heavy *Lekin* or *Letseuen* taxes which are levied on every article of foreign imports by Li Hung-chang, for the support of his southern legions. This action on his part has driven away from the Tientsin market, over one-half of the Shanse inland traders.

SHANGHAI.

We have advices from this port to the 22nd Sept.; the French mail, from London August 2, arrived out on the 16th Sept. The following summary of news is from the *North China Herald*:—

The junk sunk close to the Woosung Bar, by collision with the *Araby Maid*, has been entirely removed; Mr. Henderson, the engineer, made endeavours to remove the junk as it lay, by getting divers to discharge the cargo—consisting of about forty tons of bones and miscellaneous articles—and then having chains slung under the bows and stern, in order to tow it away. This plan, however, did not succeed, the junk having become imbedded firmly in the mud. It was therefore resolved to blow up the wreck. Three torpedoes, each containing 50 lbs. of powder, were placed under it—at the bow, midships, and stern—and these were exploded one after the other. An agitated heaving of the water followed the dull thud beneath, a little smoke and some air bubbles came up, and then followed pieces of the wreck, which were shot into mid-air, while the mud displaced by the downward force of the explosion rose and spread in a circle extending to a radius of perhaps 100 yards. The experiment was completely successful.

The monthly general parade of the Volunteer corps passed off with every success. The corps was divided into defence and attack parties. The artillery, under Captain Dallas, Rangers under Captain Dunn, and the Rifle Companies, commanded by Lieut. Pearson, Captain Cann, and Lieut. Tucker, assembled in front of the Custom-house, and having gone through the usual preliminaries, marched down the Foochow Road, headed by the bands. When they arrived at the Parsee Cemetery, the gala march was suddenly broken by the rattle of musketry in front, and Captain Brewer, in command of the line, disposed the companies in safe positions, while the artillery unlimbered smartly and swept the road (with grape). The enemy retreated, and the advancing party resumed the march. The tactics subsequently consisted of advancing companies to fire on the enemy, which met the attack in the same form or by skirmishing. The programme was altogether well calculated to interest and to improve, combining as it did the pleasurable excitement of a sham fight with a valuable practical lesson in road warfare. The muster of all arms was about 140.

Chen, the Mixed Court magistrate, is to proceed to Japan, to take part in the investigation of the case of the *Maria Luz*. Chen will, we understand, be accompanied by the Japanese Consul, and during his absence the Chehsien will carry on the business of the Mixed Court. The fact of Chen's projected visit to Japan on such an errand, taken in connection with the measures instituted by the Canton Viceroy, to prevent the kidnapping of coolies, or their being induced to go to Macao under false pretences, shows that the Chinese authorities are becoming more alive to the evils of the traffic as it is at present carried on.

The 17th September, which was the 15th day of the 8th Chinese moon, was a partial holiday and grand chin-chin day among the natives, who observe it as a sort of harvest-moon feast. It is also one of the settling days of the year.

The steamer *Great Northern* has left for Amoy, with Mr. Dreyer, manager of the Great Northern Telegraph Company, in order to carry out arrangements for the branch cable which is to connect that port with the main line.

It is believed that the cotton crop round Shanghai will not turn out quite so well as was at one time anticipated, the heavy rains which succeeded the seasonable showers that ushered in the autumn having beaten the flower off before the bud had matured. The plants look if anything too luxuriant, while the bursting cotton pod appears sparse by comparison.

A proclamation has just been issued by the Hai-fang-ting (Marine Magistrate), notifying that the bye-law forbidding Cantonese and Fukienese living in the city will be strictly enforced.

The autumn regatta is fixed for the 29th and 30th Oct., and as the races come off on the 31st Oct. and 1st and 2nd Nov., the week in which they occur will be almost a complete holiday.

Hankow has been visited with a terrible gale of wind from the north. The waves on the river may be well described by the usual and pardonable hyberbole, as "waves running mountains high." They were beating against the bund, as if bent on its destruction, and it was found, indeed, when the storm passed, that it had been a good deal damaged in several places. Its restoration will probably deplete the full purse of the Municipal Council. Three of the steamers in port were obliged to anchor on the Wuchang side. Rafts came down, and, of course, were broken up when they came in contact with the hulks and chains which lie above the bund. Damage was done to the bund of Teh Hing Heng, and also to the hulk at which U.S.N. steamers are moored. No less than four junks were wrecked in that vicinity, but the lives of the crews were all saved. A number of boats were also smashed at the mouth of the Han. No loss of life is reported.

The following is from the *Courier*:—

A Chinaman has been brought before the Mixed Court, charged with the theft of a quantity of telegraph cable, cut from the Great Northern Telegraph Company's lines. For the second time within a short space the Company found, in March last, that their connections were interrupted by the cutting away of a piece of cable, on this occasion of a length of a mile and a half. They applied to the police to discover if possible the depredators, and some fishermen were found with pieces of the cable in their possession, and about four months since they were brought before the Court, but received punishment which must, for so grave an offence, be deemed wholly inadequate—a month's cangue. In the present case the accused confessed that, while dredging in the Woosung, he grappled a piece of cable, which, with the help of his wife, he got into his boat. Acting upon the advice of some cautious friend, however, who told him its possession might involve him in trouble, he sunk it in the Soochow Creek, somewhere between the Gasworks and Stone Bridge. The locality was dragged by the police, and two coils of cable, containing about 100 yards, were found. The case was remanded for a fortnight, in order that the police may prosecute their inquiries. The weight of the cable and the quantity stolen are both evidence that a large number of men must have a share in the business.

Early on the morning of the 21st Sept., the inhabitants, native and foreign, of Shanghai and its environs were startled by the occurrence of the unusual phenomenon of an earthquake. It appeared to combine a vibratory and an oscillating motion, and caused beds, gasaliers and all similar objects to shake with a noise that startled and terrified those near them. It lasted from 6 to 10 seconds. The direction was N. W. and S. E. We have not heard of any serious damage done.

An advertisement of a special meeting of the rate-payers to be held on the 15th Oct. has appeared. The business which has led to the calling of the meeting is the recent proposal of the Bridge Company to transfer all their property and rights to the community for Tls. 60,000.

It is said that the Grand Duke Alexis of Russia will not visit Shanghai on his way north, but will go from Hong Kong direct to Japan, and thence to the Amoor; but he will probably look in upon us on his way south.

The *Avon* is to leave for Hankow, and the *Thistle* for Chefoo, on the arrival of the next English mail, due on the 22nd Sept. The *Cadmus* will remain there for some considerable time, and it is expected that the *Iron Duke* will revisit Shanghai about the end of October.

HONG KONG.

Dates by the French mail extend to 28th Sept.; the outward mail of 16th Aug. (French) arrived on the 27th.

The following summary is from the *China Mail*:—

The meeting of the Legislative Council took place on the 25th Sept. There were present:—H. E. the Governor, the Acting Chief Justice, Acting Colonial Secretary, Acting Attorney General, Acting Colonial Treasurer, Hon. P. Ryrie, Hon. H. Lowcock, Hon. J. Greig, Hon. W. H. Alexander, and Hon. J. Whittall.

Reverting to the question of water supply, H.E. said he had given the subject a very careful consideration, and had come to a determination which he should like to lay before the Council. He thought the best and cheapest plan for them to do now was to apply to England to send out a competent man, who would make a proper survey, draw up plans and give an estimate of the costs of the water supply. Anything else would be going from blunder to blunder. He thought the Colony should not begrudge the preliminary expenses, since so much money had been spent on water works. If the Council concurred with him, it was necessary to place the resolution on record.

The minutes of the previous meeting were then read and signed. Mr. Ryrie said the unofficial members fully concurred with H.E.'s views. It was much better, when they were about to incur a large expenditure, that the best scientific aid should be got and paid for, and it would not be got unless it was paid for. They should get a man and pay him a liberal sum, and he proposed that a competent man should be engaged to come out. He did not think it possible for him to do anything unless he came ott. The motion, having been seconded by Mr. Greig, was unanimously carried. H.E. observed that no new vote was necessary, as the expenses would come out of the $25,000 already voted.

It is stated on good authority that the Viceroy of Canton has failed in his object of building an arsenal or shipyard at Whampoa because the Cabinet is afraid of putting too much power into the hands of a Governor who is so far located from the Central Government.

Digitized by Google

Our Canton correspondent writes:—The Canton community has been cast into gloom and sorrow by the sudden and unexpected death of Mrs. Hance, the wife of Her Majesty's Vice-Consul at Whampoa. The deceased lady had been resident many years in China, and the news of her death will be received with much sorrow by many friends at all the Treaty ports.

The Canton Consulate was closed as a mark of respect, and the Viceroy placed one of his steamers at the service of the community to convey to and from Whampoa, where the funeral was to take place, those who might wish to follow their friend to her last resting-place. All flags were half-mast high.

The manufacturers of spurious Bass' ale were brought up before Mr. Mitchell. Inspector Grimes described how he accidentally came across this native brewery, wherein he found a large quantity of beer already bottled and ready to be sent to the auctioneers or for exportation. Searching the house the Inspector found among other things two bills, one from Messrs. Lambert, Atkinson and Co., and the other from Messrs. MacEwen, both being for draught ale bought by this shop. As the master was still at large the magistrate remanded the case, to give the police time to apprehend him. The defendants, who were only shopmen, were allowed bail in $300 each.

Sunday, Sept. 22nd, being the anniversary of the birthday of H.I.H. Konstantin Nicolajewitsch, the Emperor's brother, and Lord High Admiral of Russia, a salute was fired by the various men-of-war in harbour at one o'clock. All the men-of-war in the port dressed ship, with the Russian standard at the main.

The *Ta Anlan* being, we believe, the first Chinese Imperial gunboat built at the Foochow Arsenal, commanded and manned throughout by Chinese that has been attached to the Kowloong Station, is a vessel of about 700 tons, and is a fourth-class ship in the newly-organised Chinese navy; her engines are of 150-horse power nominal, but can be worked up to 230; her armament consists of 7 guns—4 French rifled guns throwing a 62 lb. shell; 2 other guns of a smaller calibre; and a Krupp gun at the bow. Her usual rate of speed is 11 knots, but with sails a speed of 15 knots, it is said, can be obtained. She is commanded by Captain Leboo, a native of Amoy, and has a complement of about 150 men, including forty marines.

Several of the leading Chinese waited on his Excellency the Governor, but were received by the Acting Colonial Secretary and the Acting Registrar General, the Governor being otherwise engaged at the time. The deputation proposed to the Government to make a law against adulterers and adulteresses, especially the latter. They urge as a reason for the necessity of the enactment that Hong Kong has already acquired for itself a bad name for morality, from a Chinese point of view. So far as we can learn, the proposed measure tends rather to the protection of bigamous husbands, who choose to allot to themselves half a dozen or more wives each, than to the maintenance of morality.

The Union Insurance Society have held their half-yearly meeting; Present, Messrs. T. Pyke (Chairman), S. D. Sassoon, A. Joost, Hon. H. Lowcock, Hon. P. Ryrie, Hon. J. Whittall, H. B. Lemann, N. J. Ede, Jensen, Arthur, Deacon, Heaton, Hon. J. Greig, W. H. Forbes, McDouall, Cairns, Eimbcke, Karberg, Behre, Cordes, and Huntington.

The Chairman, after having read the report, said, the directors regretted exceedingly that they were not able to present a more favourable one, but the losses had been unusually heavy this year. Still it was not so unfavourable a state of things as it might appear. The profits to 30th June were, as they would see, $426,371, and carrying $250,000 to the Reserve Fund, the balance was $176,371; add premia earned since the end of June to the 16th instant $125,600, this would give $301,971 in hand to meet the losses since the 30th June, say $228,134. The balance this day as far as could be ascertained, was therefore $73,836, and he very much doubted whether any of the other offices could show a more favourable report.

The directors regret to say that the claims paid since the 30th June, 1872, and the further losses to date, as far as can be ascertained, are estimated at the unusually large sum of $228,135, which includes the estimated amount of claims pending per *Hailoong* and the known total losses per *Parnassus*, *Astarte* and *Lahloo*, making together $172,729. Under these circumstances, the directors do not think it advisable to propose an interim dividend.

The P. and O. steamer *Delta*, arrived 20th, is a side-wheel steamer, which has lately been employed on the home side, and is now going to remain on the China coast.

The very handsome gift of seventy-four volumes has been lately presented to the City Hall Library by Mr. D. C. Tata. They include a Rees' Encyclopædia, Smollett's History of England, and twenty-seven other volumes of Biography, History, &c. We trust that this liberal example will be followed.

Among the passengers of the last French mail from Shanghai was M. le Comte de Chappedelaine, who resumes charge of the French Consulate at Canton, M. Godeau having relieved him at the Consulate-General, at Shanghai, at the beginning of the month.

IMPORTANT COOLIE PROCLAMATION.

The following anti-coolie traffic proclamation has been recently issued by the Governor-General and Lieutenant-Governor of Kwangtung:—

The Grand Secretary of Man Wah Palace, Minister of War, and Governor-General of the Two Kwang, Jui; Vice Minister of War, and Lieutenant-Governor of Kwangtung, Chang, fully and sincerely proclaim the following for information.

There are in the different departments of Kwangtung vagabonds who decoy and kidnap people for the purpose of sale to go to a foreign land, a thing commonly known as "pig-selling."

The simple-minded villagers, not knowing any better, frequently fall into the snares of their artful devices, having small regard for their person and consenting to go to a distance, little knowing, however, that when they go out to the ocean the wide expanse of the sea will be before them, and that they have to traverse a journey of many thousand *li*. They will find that they are placed in a foreign land, where they are deprived of their liberty, and the chance of seeing the dearest and nearest relations is distant and uncertain, while their parents, wives and children receive no intelligence of them. Grief and sorrow present themselves in ten thousand ways, while day and night is spent in suspense and anxiety—all the miseries of separation fill their hearts.

The "pigs" sold are mostly conveyed to Peru and other colonies of Portugal. The climate of these places is malignant, and it is extremely difficult to withstand it. The treatment from the natives, again, is very cruel, and those from China are ruthlessly made to perform all sorts of hard labour, without ceasing day and night. They are also subjected to oppression, beating and reviling, while their clothing and food are both insufficient, a situation far different from that of a labourer in China. Therefore, Chinamen arriving there die, some from illness resulting from the effects of the climate, and some from the insustainable nature of the ill-treatment. If some happen to survive, their lot is extraordinarily hard. Under those circumstances, you wish to come back but cannot, and it is then too late to retrace or repent. This state of things is indeed worthy of sympathy and compassion. You, people, born in the good land of China! why do you walk into pit-falls by going to a foreign land afar to undergo all these everlasting miseries? You, kidnappers! Every line of business is open to you for a living, how can you bear to practice this cruel device? to send fellow-men into the doom of cages? Though you may succeed in kidnapping one man, yet the gain to you is not very great, and though a stupid man from his own folly voluntarily consents to emigrate, it is still your duty to dissuade him from going. How much greater (is your crime) when you add to your enticing deceit personal violence? Is this not an act devoid entirely of conscience? Supposing your brothers, sons and nephews are decoyed away by other people, could you help feeling pain in heart and affliction in head? Consider when in this world there is the law of the sovereign, and in hell, there are the ghosts and spirits! From a grain of coveteousness, you commit this great wickedness and crime! Though you may gain money, will you be able to enjoy it with peace and quietness? When once your crime is full to the brim, do you think you can escape punishment and destruction? In the stillness of the night you ought to place your hand on your heart, and be quickened to a sense of repentance.

It is hereby proclaimed that all you people, inhabitants of the different departments and others, ought to know that emigration to Peru to become labourers is the most miserable thing. You ought to be quickly enlivened to the evils, and not mistakenly fall back again into your vicious ways so as to kidnap other men and sell them to emigration. It is an act most at variance with law and most devoid of feeling. You ought, moreover, to repent of your past misdeeds, each preserving in his own mind the dictates of conscience, never allowing himself to decoy away simple people or to sell them from hand to hand. All Macao fruit boats and passage boats of other places ought to obey the law, and not to carry "pigs" to Macao for the sake of lucre, thereby bringing upon themselves seizure of their boats and apprehension of their persons. The Governor-General and Lieut.-Governor have at heart the preservation of their subjects, so they have spoken with great firmness. If you people should still transgress, we have only to resort to instructing officials to make arrest everywhere and to stretch the law to its extreme penalty, without showing the least leniency. You ought to give consideration and not look upon our words as the water of the rivers. All ought to obey with awe and transgress not.

STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Dates extend to the 6th Oct. The outward P. and O. mail of 6th Sept. arrived on the 5th Oct.

The following summary is from the *Straits Times*:—

The Legislative Council held meetings on the 26th Sept. and 1st and 3rd Oct. At the first meeting the Ports and Harbours Bill was passed, its final reading being proposed by one of the unofficial members who had so strongly opposed one part of the measure. At the second meeting the Council concluded the consideration of the garrison report, and passed an important resolution, declaring its conviction that the defence of Singapore should fall upon the Imperial Government and not upon the colony, a decision in which they will have the support of every taxpayer in the colony. The reasons urged by the Council are cogent ones,

Digitized by Google

but are scarcely set forth at sufficient length to carry conviction to those unacquainted with the nature of our trade and the geographical position of the place; and the assistance of Straits people in England may be necessary to explain them fully to the Secretary of State for the Colonies. At the same meeting a resolution was passed that the management of the pauper hospitals be taken over entirely by the Government, assisted by a committee of gentlemen of influence in the community, who will endeavour to raise funds by subscription in aid of the support of the institutions. There was no business of importance transacted at the meeting on the 3rd.

The great topic of interest has been the autumn races, which were run on three days. The weather has been all that could be desired, and the meeting a very successful one. All the principal prizes have fallen to two horses, which were ridden by the same rider, and did not run against each other. Several of the other horses did not turn out so well as was anticipated, and should we have a spring meeting, it will probably be contested by a number of horses entirely new to the course.

After a long period of stagnation and several heavy failures, it is gratifying to be able to announce that mercantile business is again reviving, and confidence beginning to be restored. There is certainly an encouraging activity in the bazaar, and things generally wear a more healthy look than during the past two or three months.

The arrivals of steamers *via* the Suez Canal have been the *Gordon Castle* on the 28th Sept., from London, *Hector* 30th from Liverpool, the *Benmore* 2nd Oct., from Marseilles, the *Patroclus* on the same day from Liverpool, and the *Auguste Leffles* on the 4th from Bordeaux. The departures have been the *Orchiz* on the 24th, *Glenroy* on the 26th Sept., and *Priam* for London on the 4th and *Teviot* for New York on the 5th Oct.

During last week no less than 813 dogs were killed in town, the proportion of males and females being nearly equal. The necessity that existed for thinning the number of dogs in the town is shown by the fact that these 800 do not seem to be missed.

We understand that the Rhio farms were sold at auction on the 27th and 28th September. The opium farm was let for the year 1873, for Java Rupees 14,415 per month, against a monthly rent of Java Rupees 26,120 for the present year. The spirit farm for 1873 brought Java Rupees 2,660 per month, against Rupees 3,410 the present year. There is thus a decrease of Java Rupees 11,705 in the opium, and Rupees 750 in the spirit farm, making a total decrease of Java Rupees 12,455 per month.

☞A letter from Malacca says:—The two defendants who were lately committed for trial in the embezzlement case have been admitted to bail; the first defendant himself to the amount of $6,000, and four sureties in $1,500 each, and the second defendant, himself $3,000, and two sureties in $1,000 each. Jewellery and a grant of land, altogether valued at $900, have also been deposited by the second defendant as further security for his appearance. Both defendants proceed to Singapore per steamer *Japan* to-day.

Commercial Report.

—o—

(*For dates see first page.*)

IMPORTS.

TIENTSIN.—The advices continued to be most unsatisfactory. A further fall in the price of Cotton Goods had failed to induce large settlements, and the market had a strong downward bias.

HANKOW.—The improved demand for Grey Cottons recently noticed was of very short duration, and the market had again relapsed into quietude. The approach of the Chinese autumn settling day had restricted the operations of the dealers, and when it had passed over there would doubtless be more doing. With the exception of Long Ells all classes of Woollens were firm, though with but little business passing.

CHINKIANG.—There was great stagnation in the Piece Goods market—English Drills being the only article readily saleable. There was a moderate enquiry for Scarlet Long Ells and Spanish Stripes, as also for Turkey Red Cloths of full weight. Malwa Opium showed signs of weakness in price—though the quoted value was unchanged.

SHANGHAI.—Plain Cottons had been in somewhat better enquiry, but the business passing had not been large. The cash prices for all, save Drills, showed a decline, which had been the more readily submitted to by holders in order that they might secure the high sterling exchange ruling on England. Woollen Goods had received almost no notice. Grey Shirtings: 20,000 pieces 7lbs. at Tls. 1.65 to 1.68; 55,000 pieces 8¼-lbs. at Tls. 1.81 to 1.88; and a few 9 and 9¾ lbs. at Tls. 2.02 to 2.47, made up the sales, and the market closed quietly with no scarcity of goods offering. White Shirtings: best 64 reed and ordinary 66 reed placed at Tls. 2.10 and Tls. 2.00 respectively. T-Cloths: had been more freely dealt in; but the desire to sell was strong, and the market was very irregular. Tls. 1.36 paid for 7-lbs., Dewhurst's T; Tls. 1.52 to 1.53 for Mendel's hand and branch, and Collie's cnop dollar; Tls. 1.44 per piece; and Tls. 17.0 to 1.80 for good to best ordinary chops of 8lbs. Drills: Demand prevailing sufficient to enable holders to command former rates; Dutch, Tls. 3.00 to 3.08; English, Tls. 3.07 to 3.15½. Jeans: Considerable transactions; inquiry freely met, however, and prices further declined; favorite English chops, Tls. 2.13 to 2.14; ordinary import, Tls. 2.10. Sheetings: Nothing done. Fancy Cottons: Gentian Shirtings and Turkey Reds had been the only articles finding buyers, the former at Tls. 2.40 to 2.55, the latter at Tls. 2.10. Woollens: Unusual quietness had pervaded the market, and very few transactions had been entered into; the value of every article was nominally unchanged. Metals: There had been very little market for any one article.

FOOCHOW.—The following sales had been reported:—500 pieces 7 lbs. T-Cloths at $2.07½; 300 pieces 8 lbs. T-Cloths at $3.10; and 1,200 pieces 8½ lbs. Grey Shirtings at $2.77½ a $2.82½.

HONGKONG.—Business in Manufactured Goods during the fortnight had continued upon a most trivial scale. The small enquiry from the consuming districts, the dearness of money and the decline in Manchester, had all tended to reduce transactions to the smallest possible extent. When any improvement was likely to take place was very difficult to say; but as stocks generally in native hands were not excessive it was hoped that no great reaction in values will occur at present.

CANTON.—Lead:—The transactions reported had been small, and values shewed a decline of fully 20 cents per picul for W.B. As no supplies had been received stocks were much as last given, with the exception of the few settlements that had been effected. Quotations, Sales and Stocks were as follows:—Common quality, $6.45 to 6.50; W.B. quality, 6.65 to 6.70; Sales, 500 piculs; Stocks, 1,800 piculs.

MANILA.—During the fortnight there had been no great demand for goods. With the exception of light weights of Shirtings, Grey staples were in absolutely no demand, as the market was still labouring under the large parcels of damaged goods recently forced off. White goods were in quiet demand at about last rates. Coloured goods continued to improve in inquiry, but rates were still very irregular. Yarns were out of demand.

SINGAPORE.—Messrs. Boustead's Report says:—There has been a fair demand for most descriptions of Manchester goods at rather weaker prices. The advices from Manchester have been unfavourable to holders, and stocks have been increased by heavy arrivals. 39-inch Grey Shirtings, 8¼ lbs., sales to fair extent at $2.50 to 2.52½, closing at the lower quotation; 7 lbs. in some inquiry at $2.10 to 2.12½; 6 lbs. very quiet at $1.90 to 1.92½. 45-inch 8 lbs. in good request at $2.50. 32-inch Grey T-Cloths: Light weights in moderate inquiry at $1.10 to 1.12½ for 4 lbs., $1.17½ to 1.20 for 4½ lbs.; 5 lbs. little wanted; 6 lbs. in good demand at $1.60 to 1.62½; 7 lbs. quiet at $1.80 to 1.82½. 32-inch Grey Madapollams: A few sales of 2½ lbs. at $18; in other weights nothing doing. 36-inch White Shirtings: Medium descriptions in good inquiry at previous rates, and fine qualities steady and in some request; no demand for low makes. 45-inch White Cambrics: Sales to some extent of ordinary 15/16s at $32¼ to 32½; medium kinds in less demand, stocks increased; low in small stock, but demand very limited. 30-inch White Madapollams scarce and asked for at $19 to 19½. 45-inch T. R. Mulls are scarce and wanted at $32 to 34. Grey Yarn 40's very dull at $130 to 132½; 30's scarce and wanted at $113 to 114; 18-24's in very poor inquiry at $105 to 107½. T Red Yarn firm, with small sales; Dark Green held for $85 to 86. Woollens: Scarlet Long Ells are without inquiry; Lastings, Blue wanted, Assorted colours and Black neglected; Camlets, no transactions. Metals: Iron firmly held. Nailrods sold for $4.10; Common Flat Bar nominally $3.70 to 3.75; Hoop, saleable at $4¾ to 5; Swedish Flat Bar at $4.15 to 4.25; Yellow Metal, sales to fair extent at $26 to 25¾.

EXPORTS.

—o—

TEA.

HANKOW.—Messrs. Drysdale, Ringer and Co.'s Report is as follows:—We have to report a good business for the past fortnight at former prices, viz., Tls. 10½ to 21. At the corresponding time last year prices ranged from Tls. 9½ to 17 for Teas in every respect quite equal, if not superior in quality. To make up our export to last year's total we still require about nine million pounds. Natives estimate the quantity up country at the outside at 50,000 chests, or say five million pounds. This is supposed to be the total quantity of leaf available, but at current rates here and in Shanghai it is certain that the quantity will be made as large as possible. We estimate total arrivals to date, exclusive of Ningchow, at 50,632,900 lbs., against last year 53,630,800 lbs. Customs export to 12th Sept. was 49,907,859 lbs., against 51,131,827 lbs., or, including Ningchows, 55,020,566 lbs., against 54,485,351 lbs.

KIUKIANG.—No settlements had been made, but fair quantities of Congous and Greens had been shipped to Shanghai on native account.

SHANGHAI.—*Black*: A fair amount of business had been transacted. The better Teas had been taken readily at a further advance of Tls. 1 to 2 per picul; common descriptions had not been in much demand, and rates for them were rather weaker, though still much above latest telegraphed London value. Prices had been irregular, but the average business was considered a worse one than the previous fortnight's. Supplies had been fairly liberal for the time of year, and for the rest of the season they would doubtless be somewhat regulated by the demand for common Teas, the bulk of which was yet to arrive. Settlements for the fortnight, 22,500 chests; re-shipments on owners' account, 384. Stock 24,000 Hohow, 1s. 1½d. to 1s. 4d.; Oonam, 0s.10½d. to 1s. 4d.; Oanfa, 1s. 3d. to 1s. 9d.; Ningchow, 1s. 2½d. to 1s. 6¾d.; Oopack, 1s. 2½d. to 1s. 6d. *Green*: The departure of last English mail was followed by rather a lull in this market, after which considerable activity was shown, resulting in settlements for the fortnight which were fully up to the average. Prices generally showed but little change in values, but fine Teenkai had ruled easier, and a decline was noted of from Tls. 1 to 2 on the rates current a few weeks ago. The prices paid had been about as follows:—For Moyune fine to finest, Tls. 40½ to 45; good medium to fine, Tls. 38 to 40; Medium Moyune kinds, Tls. 35 to 37; Teenkai fine and finest, Tls. 40½ to 44; Fychow good to fine, Tls. 38 to 40: common to fair, Tls. 38 to 40; Pingsueys, Tls. 25 to 56¾; Local-packed, Tls. 30 to 38. Settlements, 46,455 half-chests; Stock, 43,585 half-chests.

FOOCHOW.—Business in Congous had continued fairly active at previous quotations during the week. Settlements had been 19,214 chests at Tls. 4½ to 23, and at Tls. 30 for boxes; prices showed no alteration; arrivals, 17,550 chests. Souchongs: 1,788 chests taken at Tls. 12 to

Digitized by Google

27; arrivals, 400 chests. Oolongs: Owing to the firmness of Teamen the market had been very inactive, settlements only amounting to 1,824 half-chests, at Tls. 18½ to 27½; arrivals, 4,900 half-chests. Scented Teas: 5,374 boxes settled at Tls. 18 to 24½; arrivals, 5,000 boxes. Scented Pekoes: No business transacted.

AMOY.—Further moderate transactions had taken place in Ooloongs and the settlements for the season thus far reported had been 157,854 half-chests. Prices had ruled at about former quotations, but the market closed weak as Teamen were anxious sellers. Current prices were—cargo grades $22.00; goods $24 at 25.00, and choice $54.00 per picul, and a further reduction was expected. The arrivals to date were 169,581 half-chests, and the stock was 11,727 half-chests; supplies yet to come in being estimated at 40,000 half-chests. The Tamerlane had sailed, and the Anglo Saxon was on the berth for New York at £3 10s. per ton. The steamer Teviot had arrived from Shanghai, and would take about 200 tons of Tea for New York at £4 10, and the steamer Surprise was expected for the same destination. Advices from Formosa estimate the season's supply of Ooloongs at 80,000 half-chests, against 65,000 for last year, and the export to date to all countries is placed at 1,620,000 lbs.

CANTON.—Tea:—A little more business has been transacted than during the interval last reported upon, owing to a few holders being disposed to meet the views of buyers. Scented Capers had received the most attention, and two or three large parcels of well-made Teas, of good appearance but poor quality in the cup, had been purchased at rates a little below the lowest point of last year. The fourth crop musters shewed no improvement in quality, and well Scented Teas of clean leaf were very scarce. Scented Orange Pekoes had been offering at lower prices, but the large quantity already shipped had deterred buyers. In other descriptions there was nothing of interest to note. Settlements:—Scented Orange Pekoe, 2,000 boxes at Tls. 14.50 to 25 per picul; Scented Caper, 12,000 boxes at Tls. 13.50 to 24 per picul; Gunpowder, 1,500 boxes at Tls 20. to 27 per picul.

SILK.

SHANGHAI.—Messrs. Skeggs and Co.'s Circular says: Since our issue of the 7th Sept., the London mail of the 1st August has been received, and telegrams to 19th report Silk quiet, common unsaleable, chop 3rd 29s. 6d., Red Peacocks, 25s. 6d., discount 4 per cent. For the first week under review, business was on a moderate scale, but more activity has lately prevailed, and settlements for the fortnight reach about 2,500 bales. Prices of chops and all good Silks shows a decline of Tls. 10 to 15, and on re-reels Tls. 20 to 25, but a higher Exchange makes the sterling cost only from 2d. to 9d. per lb. lower than current a month ago. Dealers towards the close are getting more anxious to sell, and would make further concessions if foreigners were willing to go on, the large quantities of Silk rejected, amongst which are some well-known chops, causing much anxiety to them; holders of these rejected Silks are shipping them on their own account or in joint account with foreigners, chiefly with a view to support the price of their particular chops. For the American market about 550 bales have been settled mostly re-reels of the best qualities, for which extreme quotations have been paid.

CANTON.—Owing to the high rates of exchange and the unfavourable reports from London, the Silk market has been very quiet, and there had been only 70 bales of new settlements since the departure of the French mail on 21st Sept., from Hongkong, by which mail 435 bales were shipped. Prices were quoted $5 to 10 lower, but more owing to the inferiority of the musters of the fourth crop left on the market than to any modification in the demands made by the country silkmen. The fourth crop was all in, and some 50 bales Kowkong of the fifth crop had arrived; they were inferior in colour and cleanliness to the first arrivals of the fourth crop but somewhat finer: the yield was estimated at 3,000 bales. Reeels were very quiet and a good deal of diversity of opinion seemed to prevail among the dealers, some being anxious to sell and others more inclined to hold their stocks, which were generally of very poor quality. Stock 1,500 bales Tsatlee, 100 Loongkong, and 300 to 400 of commoner kinds.

PEREIRA—On the 5th Nov., at his residence in Grosvenor-square, Edward Pereira formerly a partner in the firm of Messrs. Dent and Co., China.
REILLY—On the 15th Sept., at Foochow, Mrs. Elizabeth Jean Reilly (from the effects of an explosion of kerosine).

THE JAPANESE EMBASSY.

On the 1st inst. the Japanese Ambassadors brought their visit to Sheffield to a close, and proceeded, in company with Sir Harry Parkes and General Alexander, to Burton-on-Trent, for the purpose of viewing the brewing operations carried on in that busy town. As illustrating the newest and most improved establishments, the brewery of Messrs. Allsopp and Sons, which is close to the railway station, and covers nearly fifty acres of adjacent land, was selected, and the ambassadors were invited to enter a couple of open railway cars, seated in which they were conveyed by one of the firm's private locomotive engines over the outlying works of the brewery, including the malt-houses, the barley and hop stores, the cooperage, &c. They then commenced an inspection of the interior of the brewery. The inspection being concluded, the various qualities of ale were tested in the good old English fashion, with "a crust of bread and cheese;" and the opinion of the distinguished visitors was invited. Upon this knotty point the chief ambassador expressed himself in true British fashion, declaring, through his interpreter, that he liked the strong beer best, an announcement which created general amusement, and was followed by Mr. Allsopp begging his acceptance of a butt of the beer of his own selection. The work of inspection occupied more than three hours, and the ambassadors, having expressed to Messrs. Allsopp their acknowledgments for the attention they had received left Burton by special train for Birmingham.

On their arrival at Birmingham the Ambassadors were received by the mayor, town clerk, and other local officials, with whom they proceeded to the Queen's Hotel. Next day (Saturday) they paid a visit to Coventry and Warwick. After visiting several of the celebrated manufactories in the city, the party proceeded to Warwick, where they were conducted through the Castle, and shown the State apartments, with their costly art treasures and articles of virtu, the celebrated Warwick vase, and the reputed armour of the redoubtable Guy. The distinguished visitors dined with the mayor at his private residence and returned to Birmingham in the evening. On Monday the members of the Japanese Embassy visited the Exchange, where an address was presented to them by the Chamber of Commerce. There was a large attendance of members of the Chamber, and other prominent townsmen, including Mr. G. Dixon, M.P. (President of the Chamber), Mr. T. Lloyd (High Sheriff of Warwickshire), and the Mayor (Alderman Sadler). Mr. C. S. Hawkes, the Chairman of the Council, read the address, and presented it to the Chief Ambassador. The address was bound in morocco, beautifully illuminated, and the covers were lined with blue watered silk. Embossed in gold letters on the outside was the following:—"Address to their Excellencies the Japanese Ambassadors by the President, Chairman, and Council of the Birmingham Chamber of Commerce, 1872." On the fly-leaf was the following:—"To his Excellency Sionii Tomomi Iwakura, Ambassador Extraordinary of his Majesty the Emperor of Japan, and to their Excellencies and Associate Ambassadors Kido, Okubo, Ito, Yamagutsi.—G. Dixon, President; C. S. Hawkes, Chairman; Samuel Booth, Vice-Chairman; H. J. Harding, Secretary." The text of the address was as follows:—

"May it please your Excellencies,—The Council of the Birmingham Chamber of Commerce have great pleasure in availing themselves of this opportunity to offer to your Excellencies a most cordial and respectful welcome to this town, and they desire to express the great satisfaction they derive from the presence of such distinguished representatives of the flourishing Empire of Japan. This Council cannot but regard the visit of your Excellencies to this country as a gratifying proof of a desire on the part of the Sovereign and people of Japan to maintain and extend the relations of friendship and commerce which have happily been established between the two Empires, a desire which your Excellencies may be assured is cordially reciprocated in this town, and by the people of this kingdom at large. The interests and objects of both nations, notwithstanding their wide geographical separation, are identical, and this Council are fully impressed with the conviction that a free and unrestricted intercourse, commercial and social, cannot fail to be productive of great mutual benefit by promoting the interchange of industrial ideas and progress, as well as a generous rivalry in the pursuits of peace, by extending the application of science and art to the material wants of an advancing civilisation. Commerce has always been found a powerful means of attaining these ends, and of thus contributing largely to the happiness and well-being of nations; and highly appreciating, as we do, the declared purpose of your visit to this country, we would most respectfully invite the attention of your Excellencies to the many proofs surrounding us of the great benefits to be derived from a liberal commercial policy, which, by removing antiquated restraints from the operations of trade and unnecessary impediments to individual liberty, has vastly increased the prosperity of this kingdom and its colonial dependencies.

"In the progress which your Excellencies have already made through other manufacturing districts you doubtless have observed many interesting processes in which raw material is rapidly transformed by ingenious scientific and mechanical appliances; but we venture to think that in no single district will you have found more numerous or varied examples where the hidden properties of nature are fully explored, developed, and adapted to useful purposes than are to be found in this town and neighbourhood. We therefore trust that the impressions produced on your minds by your visit to Birmingham will be not only pleasing in themselves, but specially favourable to the national and enlighted objects your Excellencies have in view. In conclusion, we pray that his Majesty the Emperor of Japan may reign many years to see a constantly increasing prosperity to his people, resulting from his wise and benevolent policy in holding out the hand of friendship to ourselves and the other nations of the world."

The Chief Ambassador read a reply in the Japanese language, which was translated by the interpreter as follows:—

"To the Honourable Council of the Birmingham Chamber of Commerce. Gentlemen,—The cordial manner in which you have welcomed us, as the Ambassadors of his Majesty the Emperor of Japan, is very gratifying, and we feel grateful for this reception, as well as for the very decided interest you have manifested in the welfare of our Empire. We have come under direction of our Sovereign on a mission of peaceful inquiry, endeavouring to make ourselves more intimately acquainted with the people and institutions of the most enlightened nations, and intending to carry back what we can of the spirit which shall encourage the same progress amongst us. You represent a people with whom we are pleased to be on terms of the most friendly character, and you represent at the same time an agency in the work of civilisation which is most highly valued by us. We hope henceforth to be bound more strongly by our many mutual interests, the chief of which is commerce. Trusting that our visit may be of some interest to you, as we are certain it will be of profit to us, we again thank you very heartily for this cordial welcome."

The Ambassadors afterwards paid visits to several of the manufacturing establishments of the town, and in the evening they were entertained at dinner by the Mayor. The next day, Tuesday, they made further progress with their inspection of the manufactories, after which a grand banquet was given in their honour by the Birmingham Chamber of Commerce. Mr. S. C. Hawkes (the Chairman of the Council) occupied the chair, and there were a number of guests present. Letters of apology were read from Lord Leigh (Lord Lieutenant of the County), Mr. G. Dixon, M.P., Mr. P. H. Muntz, M.P., Mr. Bromley-Davenport, M.P., and the Recorder of Birmingham (Mr. C. S. Adams).

In proposing the first toast, that of "The Queen," the Chairman said that he was fully persuaded that the illustrious gentlemen whom they were entertaining that night had already seen sufficient of our national characteristics to require no explanation why that toast always took precedence of all others. In the course of their travels they must have discerned, being close observers, that we respected and loved our Queen. "The Prince and Princess of Wales and the other members of the Royal Family" followed.

The Chairman said it was his honour and privilege to propose the next toast, "Our distinguished guests, their Excellencies the Japanese Ambassadors." He said the gentlemen present would agree with him that no mission had ever approached the shores of this country of a more interesting character, or more thoroughly charged with a message of peace and goodwill, for that Embassy did not come armed merely with the powers of subtle diplomacy, to adjust an old-standing dispute, or re-arrange a boundary line, or even to negotiate a one-sided treaty of commerce. Their aim and object was cosmopolitan—it was to observe and inspect our institutions, our industrial life, and the mission of their Excellencies was to introduce into their own country that which they found to be good, and, at the same time, to warn their countrymen of whatever they found to be bad. And they might be quite sure that that function would be discharged with judgment and success when they were informed that the eminent personages who composed that Embassy were selected by their Sovereign by reason of their eminent abilities, experience, and accurate perception of the newly-found requirements of their country. We have had Embassies here composed of their most distinguished nobles and statesmen. We have had in our colleges and educational institutions their forms and lecture rooms occupied in considerable numbers by the youth of Japan. These young men would carry back to their own country not only a familiarity with

Digitized by Google

the language of Shakspere and Dryden, but somewhat of an acquaintance with the political wisdom of a Peel, a Cobden, and a Gladstone; and the great scientific achievements of a Watt, a Stephenson, a Davy, and a Murchison, and who should attempt to estimate the future effects on the prosperity of Japan and the other countries to the East and West? After some further remarks, in which he alluded to the desirability of co-operating with the Emperor of Japan and his Council, who had inaugurated a new era in their country, by extending the right hand of fellowship to the other nations, to render those relations beneficial to all, the chairman concluded by asking them to join with him in giving a hearty welcome to the Ambassadors of Japan. The toast was drunk with full honours. The Chief Ambassador responded in Japanese, which was translated by the interpreter. He said: Mr. Chairman and Gentlemen—In response to the toast which has just been proposed, permit me to thank you, both for myself and my associates, for the cordial manner in which we have been received by the city of Birmingham, and especially by this Chamber of Commerce. Our visit has been one of much pleasure and profit, and we shall carry home most pleasant remembrances of the various objects of interest which we have had so kindly pointed out and explained to us. In the future, we trust to become more familiar with your arts and manufactures, and to be brought into more intimate acquaintance with the interests you represent.

The Chairman proposed the next toast, "Our Diplomatic Representatives Abroad," coupled with the name of Sir Harry Parkes, K.C.B. Sir Harry Parkes, in responding, said that although the service he had the honour of belonging to was perhaps not brought before the public notice so much as the other great branches were, at the same time he hoped they would believe, though much of their labour was done quietly and apart from the public view, they did not yield to any other branch in zeal and in the desire to acquit themselves conscientiously in their trust. He referred to the new regulation, by which the relations between the diplomatic service and commerce would be more directly brought in contact—a regulation by which the secretaries of Embassies and Legations were engaged in drawing up annual commercial reports, which were submitted to the public, and which, he believed, well deserved the public scrutiny. Into one subject especially, the prices of labour and the purchasing power of money in foreign countries, the inquiry had been declared valuable, and the papers published were popularly known as the "People's Blue-book." In conclusion, he alluded to the presence of their illustrious guests, and he trusted they would continue to wish that the friendly relations now subsisting would increase, by which Birmingham and Japan would become better known to each other. As far as rested with him, he should continue to do all in his power to promote those interests, and his reward would be sufficient if he remained in the same position in their good opinion which had just been expressed. (Applause.)

The Chief Ambassador proposed the health of the Chairman of the Chamber of Commerce, and again thanked the company for the generous reception which had been accorded him and his associates. The Chairman responded, and the proceedings terminated.

On Wednesday the Embassy and their suite visited Worcester. They were received at Shrubhill Station by Mr. H. Allsopp, Master of the Worcestershire Hunt, who accompanied them to Cotheridge Court, where the meet of the hunt took place. They afterwards paid a visit to the Royal Porcelain Works, from whence they returned to Birmingham. In the evening they proceeded to Chester, and they have since visited Northwich, on the invitation of the Salt Chamber of Commerce. They were received by some of the leading members of the Chamber, and conducted to one of the salt mines, into which they descended. The mine was illuminated for the occasion, and after the party had examined its chief points of interest, the Ambassadors were presented with an address from the salt trade.

Foreign Intelligence.

GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, NOV. 2.

Since my last letter several organs of the press at Berlin have noticed the impending revision and renewal of the Treaty between Germany and China, and unite in hoping that the Plenipotentiary in his negotiations with the Court of Peking will profit by the experience of other nations and avoid the errors into which they fell. In connection with the line of policy to be pursued, are no doubt the instructions given to Commodore Werner, in command of the German squadron now on its way to South America, and whose ultimate destination is understood to be the Far East; but leaving that out of the question, and only with reference to the extension of the German trade and shipping, which now takes rank as the third in those waters, a corresponding augmentation of the naval forces appears nothing more than natural, as England, France, and America have constantly from ten to fifteen ships-of-war in that part of the world—the first and second being represented in 1870 by seventeen and twenty-one respectively—whilst for many years past the Germans have had but two small corvettes for the protection of their interests. It is expected that the squadron will be strengthened by being joined by the *Arcona*, now stationed in the West Indies, as well as the *Hertha* and *Medusa*, at present in the waters of Eastern Asia. They would thus be enabled to put in an appearance with a comparatively imposing force of six ships-of-war, including an ironclad and three frigates. The intention of establishing a permanent naval station in the Far East, the importance and even necessity for which was fully explained and insisted on in the last Memoire of the Marine Department, would thus appear to receive further confirmation.

The fourth steamer belonging to the Hamburg Shipowners' Company is advertised to start from this port on the 25th of November for Singapore and China. Her name is the *Sylvia*, and she is described as of 1,800 tons. When the Company was formed in June, 1871, it cost some trouble to get together the comparatively small capital of $500,000, because all the accounts received from the German merchants in the Far East concurred in believing that a regular line of steamers would never pay. But when, in February last, the special general meeting agreed to the proposal for augmenting the capital by an additional million the shares were rapidly taken up, and even more subscribed for than were needed, so that a reduction in the allotment had to be submitted to. In the meantime the steamers have been very lucky and earned large profits, and the company's credit has become so firmly established that offers and proposals have been made to them to open regular lines from Hamburg to Liverpool, Leith, Harwich, Antwerp, Portugal, Spain, and the Mediterranean ports. That the directors should refuse to entertain any of these tempting offers and cultivate—for the present, at least—the Eastern trade exclusively, is a proof of their firm conviction that it is capable of a much larger development and extension in the course of time. The Company are now in possession of four steamers—the *Atlanta*, *Bellona*, *Olympia*, and *Sylvia*,—and contracts have been entered into for building several more, which are in course of construction, and will be completed and placed on the line early in the spring, when it is proposed to increase the number of departures from a monthly to a fortnightly service. The shares of the Company command a premium of nine per cent.

By decree of the King of Denmark, dated Copenhagen, Oct. 18, the resignation of Herr G. J. Helland, hitherto Royal Danish Consul at Hong Kong, has been accepted.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, NOV. 6.

The East India Budget was brought under discussion in the Second Chamber last week, and in the four days' debate which ensued, the whole Colonial policy passed under review. Messrs. Nierstrasz, 's Jacob, and van Houten had dreamed the most terrible dreams about the future of Java and the finances of Holland. According to their opinion too much is already expended on behalf of our Eastern Colonies, and the "goose with the golden eggs" is being murdered. It is noticeable that Mr. van Houten, a *Liberal*, voted against the Java tariff, against the Contagious Diseases Bill, and against this Budget. It must be difficult for a Government to hold the reins while such Liberals exist to oppose progress. I regret that two of the most important proposals of the Minister were negatived, namely, that to grant a credit of one million for the construction of a harbour at Batavia, and that which proposed the opening of a credit for works to be constructed at Batavia, to protect that town against inundations. The vote proposed with the same purpose for Samarang was, however, carried. The Minister has promised to further regulate the *Heerediensten* (personal services of the natives); but a revision of the Royal decree respecting the Agrarian Law is *not* promised. The proposal of the Minister to repay to the Trading Company the loan of ten millions was approved of by 43 against 21 votes. If the First Chamber, which will assemble on the 6th of November, also carries the Budget, then the Government will be totally free from its obligations to the Trading Company, when the new contract is made in 1874. The expedition to Deli was of course a point about which information was asked. The Minister, however, was not able to say anything, as it was only yesterday that the telegraph brought the satisfactory news that the military expedition would be soon brought to an end, and the native chiefs, who have been made prisoners, will be brought to Batavia. This news is all the more satisfactory because the mail, which arrived the same day, brought anything but favourable intelligence. Chapter I. of the Budget was carried by 58 against 5 votes, a larger majority than has been obtained for several years. The Second Chamber now stands prorogued until the 18th of November, when the ordinary Budget—the section reports upon which are published—will be brought forward. The election of a member for Amsterdam has not given a definitive result, and another election must take place between Messrs. Fabius and Jolles.

Wanted a Reform Bill! has been the cry for years past of all parties, and especially of the Conservatives, who hoped to obtain a new lease of life by it, having failed in their negotiations for a union with the orthodox Protestants and the Ultramontanes. The Reform Bill was the last "shot in the locker," and they have now got it. Mr. Geertsema has laid his project before the members of the Second Chamber. He proposes that in the country a minimum sum of f.20 paid in direct taxes should confer the right to vote. In the small towns—those of the second and third rank—the amount must be f.24 and f.32, whilst the happy inhabitants of Amsterdam, Rotterdam, and the Hague are not to obtain the franchise under a taxation of f.50. Will this Bill do? and will the question be settled? Notwithstanding that much indifference prevails with regard to Parliamentary matters, it is, nevertheless, generally acknowledged that an increased franchise ought to infuse new blood into the Second Chamber, which for some time past has done nothing but oppose every measure brought forward. The fact is that the Reform question blocks the path of legislation, and Parliament cannot set to work. General discontent prevails at this system of doing nothing except making speeches. The question now is: Will the desired change be brought about by this Bill? I fear that it is highly improbable.

The weekly paper *het Amsterdamsch Effectenblad* (*Byblad*) has published an interesting article upon the Netherland India Trading Bank, the shares of which have within the last few months received more attention on the Bourse than formerly. The quotation, which was for a long time stationary at 64 per cent., has gradually gone up to 73 per cent. The reason for this is thus explained:—The Bank at first invested its capital in undertakings in Java, which were anything but lucrative; the managers were, however, wise in time and altered their *plan de campagne*, and their motto now is no immobilisation of capital on a large scale. This policy has already borne fruit. The books shew

Digitized by Google

one account—a wood-cutting undertaking in Java—which will involve a loss of f.180,000; which is not of much importance, as it is divided over three years, and will figure in the balance sheet each year till 1875 for f.60,000. The Bank, the article continues, has a good future before it; new agencies have been established at Batavia, which are promising well, and large dividends may be expected. The same article contradicts the rumour which was set in circulation by the Brussels *Moniteur des intérets matériels*, that a union would take place between this Bank and the *Œsterreichishe Seehandlungs Gesellschaft* at Trieste. It seems that the negotiations with this object were not successful, and this had some depressing influence upon the quotation of the shares.

In nearly all the departments of the Bourse a rather dull tone has prevailed, and business has been very limited; quotations, it is true, have been well maintained, but this was principally owing to the reservedness of the holders. Our Money Market is in anything but a favourable condition. The Bank has again raised its rate of discount, which is expected to be further increased next week. The weekly account of the Bank is very unsatisfactory. The official paper, *De Staats Courant*, publishes a Royal decree, by which a commission is appointed to examine the question whether it is desirable to re-introduce the gold coinage, which was abolished several years ago. The general opinion is that this commission is in favour of the restoration of the golden standard.

I sincerely regret to state that the efforts made to secure the necessary capital for the East India Dry Dock Company have been unsuccessful. Some hundreds of shares have been taken up, but not sufficient. The committee has, however, not yet given up its task, and still hopes for ultimate success.

The members of the First Chamber meet to-day for the despatch of business. Several merchants have forwarded petitions to the Chamber to maintain the protection clauses of the East India tariff.

The screw steamer *Riouw*, built for the East Indian navy, was launched some days since from the yards at Feyenoord.

The King has accepted the resignation of our Consul at Hiogo and Osaka, Mr. A. J. Bauduin.

PRODUCE MARKETS.

A firm tone has continued to prevail throughout the past week for most of our leading articles of colonial produce, and transactions have been on a fair scale, notwithstanding the unfavourable influence which continues to be exercised on business generally by the tightness of the money market. The rate of discount of the Netherlands Bank was again raised yesterday one-half per cent., and is now for bills of exchange 4½ per cent., and for promissory notes 5 per cent.

COFFEE.—A fair consumptive demand continues to prevail at steady prices. The business done since my last has, however, mainly been confined to the undermentioned sales of shipments, imported on private account, viz.:—2,883 bags Java and Babe, ex Wyberton; 1,905 bags Java, ex Prins Hendrik; 795 bags Java, ex Wyberton; 1,175 Java, ex Prins Hendrik; 1,839 bags Java, ex Wyberton; 1,550 bags Java, ex Prins Hendrik; 1,000 bags Java, ex sundry vessels; total stock, 332,600 bags.

SUGAR continues in a very firm position. Any available parcels on the spot are already secured by our home refiners; there is very little on offer, and stocks are extremely reduced. A couple of sales of Java of the new crop have been closed, together about 1,300 baskets, mainly composed of medium numbers, at the parity of the late September sale. Trading Company's stock, 11,245 baskets, and private stock here 2,500 tons.

SPICES.—The shipment ex Æolus, recently imported here from Banda, and comprising 181 casks Nutmegs, 97 casks Mace, and 22 casks Cloves, has been wholly disposed of by secret tender, prices being kept secret. Sales have also been closed in the same manner at Amsterdam. Of 4 casks and 2 cases Nutmegs; and 19 casks Mace; 30 casks Nutmegs simultaneously offered remained unsold. Stock on warrants in the Trading Company's stores: Nutmegs, 2,779 casks; Mace, 298 casks; Cloves, 2,254 casks. Unsold stock of the Trading Company's Nutmegs, 273 casks; Mace, 134 casks; Cloves, 9 casks.

JAVA TOBACCO.—Prices remain very high, and there is a lively demand. Several parcels of sundry headmarks changed hands by secret tender. Stock of Java, 3,956 bales.

TEA.—The public sales of Java held at Amsterdam on the 29th ult. have gone off actively at high prices.

JAVA INDIGO.—About 155 cases were offered for sale by secret tender on the 31st ult., out of which 87 cases were adjudged at the bids made, and 15 cases more were subsequently disposed of by private contract.

ARRACK.—Sales have been closed of 50 casks Batavia, ex Cornelius Gips, and 49 casks, ex Kosmopoliet I.

HIDES.—Several parcels, ex Lichstraal, found buyers at prices that did not transpire.

TIN.—A firm tone has prevailed for this article the last few days, consequent upon the satisfactory returns of the deliveries from the Trading Company's stores during the past month. Sales have been closed of banca for public sales prompt at f.92, for delivery, ex the coming spring sales at f.87, and in Billiton on the spot and afloat at f.87½. Trading Company's stock on warrants, banca, 10,000 slabs; Billiton, 400 slabs. Total stock in second hands, Banca, 45,112 slabs; Billiton, 2,731 slabs. New stock unsold with the Trading Company, Banca, 32,725 slabs.

COCOA NUT OIL quiet, and prices are stationary.

RATTANS.—The whole quantity of about 49,500 bundles, put up at public auction at Amsterdam for account of the Netherlands Trading Company, on the 30th ult., found ready buyers as follows, viz.: Borneo, f.19.10 to f.23.20; Banjermassing, f.22.10 to f.22.80; Koetie, f.16; mixed parcels, f.17.10 to f.20.30. A shipment of 120 piculs, ex County of Argyle, changed hands by private contract. The article looks firm.

RICE.—Without any change or transactions to report in our market. 859 bags Java, ex Falcon, were sold at Amsterdam yesterday.

TORTOISE SHELL.—Offers by secret tender are invited at Amsterdam for 3 cases imported from Java, per Prins Hendrik.

SHIPPING.

ARRIVALS.—Oct. 29, at Flushing, from Akyab, Enice; Nov. 1, at Brouwershaven, from Akyab, Maria Napoli; 2, at Brouwershaven, from Batavia, Krimpen aan de Lek; from Akyab, Unione: at Texel, from Batavia, Java Packet; 4, at Brouwershaven, from Rangoon Petronella.

DEPARTURES.—None

PASSENGERS INWARD.—From Java, per Java Packet: Messrs. J. van der Haes and family; J. Geill, A. F. C. Meyer, J. C. van Blokland and family; Mrs. Geerstsema and family; Mrs. de Vogel and family; Miss H. M. Murgadant, Messrs. Jan van den Heer Reerink, G. A. Scherer.

PASSENGERS OUTWARD.—For Java, per Nicolaas Witsen, Messrs. H. v. d. Meer, H. Schilling, E. Denninger, F. Kramer, Miss H. Buchenau, A. Hacklander, E. Heil, Mrs. Broeckman and son; per steamer Prins Hendrik, Messrs. W. Scheepmaker, C. Scheepmaker, Timmerman and family, G. van Mensch, J. J. Donner, P. C. Vrijberghe de Coningh, W. H. van Leeuwen and family, F. W. C. Ledeboer, J. Merker, H. R. J. J. Thorbecke, J. C. de Lannoy, D. C. Kool, W. van Gelder, J. R. Couperus and family, J. J. Cambier, L. A. Dittlof Tjassens, G. Arntzenius, W. A. J. Katz, B. van der Zwaan and family, J. ter Marsch and son, Merkus Doornik, P. A. Bloys van Treslong Prins, Herman Herring, J. A. Kal and family, G. de Bont, G. J. van Kooten, C. J. Brouwer, Miss R. A. Klein, C. C. C. Gude, Chalmers H. van Papendrecht, Franckle. Mrs. Kist v. Gelder and family, J. H. v. d. Leeuwen and family, MacLeod and family, besides fifty soldiers; per Vruchtzoeker, Messrs. C. de Graaf and family, Miss M. and N. Holtz.

PORTUGAL.

(FROM OUR OWN CORRESPONDENT.)

LISBON, Nov. 2.

Since my last letter until the present time nothing has occurred with reference to the discussion upon the legality of the decree for the convocation of the House of Peers for the trial of the Marquis d'Anjega. As I stated in the same letter, the Government obtained their end, the assembling of the Peers, independently of the other House, which was resolved upon by a majority of twenty-seven votes, after a debate which lasted three days. Many of the members of the House, belonging to the party of Duke de Loule, withdrew from the House at the time the resolution was carried. On the same day the resolution was transmitted to the Legislative Commission, and the day before yesterday the Commission presented its opinion, and it was announced by the President of the House that the first day for the constitution of the House as a tribunal would be Monday, the 4th inst. Some letters have been published, signed by members of the House, declaring that they will not take their seats, and, it is believed, that the number of Peers who attend will be very small. The Marquis d Anjega has addressed a communication to the Chamber, protesting against its being constituted as a judicial tribunal. He points out the anomaly of the Chamber of Peers being called upon to act as judge in an affair in which it stands in the position of accused. Viscount Carvalho has been selected to be the reporter of the trial.

The press calls the attention of the Government to the subject of Surrate in India. The last mail brings advices that there is a privilege for Portuguese goods and for goods belonging to the Portuguese, in Surrate, which ought to be maintained for both parties. This privilege was not established by the English, but accepted by them when they took possession of Surrate. It seems, that the English have by degrees raised impediments to the importation and exportation of Portuguese goods under the former conditions, and that at last the English authorities of Bombay notified to the Portuguese Governor, that the privilege was entirely suspended till further notice. Our Government is now in treaty with reference to this affair with the English Government.

Yesterday a statement of the revenue of the State during the financial year 1871-72; was published. The amount is £4,260,000. The expenditure is not yet known, but I hear on good authority that it is not more than £4,800,000. The Government papers say that the new Minister of Finance has, amongst other proposals, to present to the Cortes, next January, one to revise the Customs duties, by which the receipts are to be increased. The *Budget* for 1873-74 is already in the press, and as soon as it appears I will send you a summary of the present state of our finances.

Rabagas, a play of Victorien Sardou's, which has made great noise in France, and caused some disturbance in several theatres where it has been acted, has been produced at the Donna Maria Theatre here. The house was extremely full during the first performance. The first act passed off without any display of feeling being manifested by the spectators. But when the monarchist principles began to be proclaimed with elogium, and the Republicans censured, signs of approval and dissent were noisily expressed from all points of the saloon, and at last it was found necessary to call for the interference of the police to restore order. Subsequent performances have passed off with greater quietude, and nothing serious has occurred.

NAVAL AND MILITARY.

The screw steamer Scotland is now at Queenstown, and is expected to sail this day, for Singapore, with the reliefs for the 80th Regiment. Particulars of the officers and troops proceeding by this steamer will be given in our next issue.

The gunboat Mosquito, recently commissioned for the China Station, is at Devonport awaiting sailing orders.

LITERATURE.

—o—

Travels in Indo-China and the Chinese Empire. By LOUIS DE CARNE. London: Chapman and Hall.—This book is entitled to respectful sympathy, if for no better reason than that it is the posthumous work of a son edited by his father. The work has, however, other and more distinct claims to attention. There can be no doubt of the *bona fides* of the young explorer; and we are certainly not disposed to question in any material way the fidelity of the comments of the Count. The worst thing that can be said of the book is that it is a little too French for our practical ideas. Here was a very noble young gentleman who was cut off at the age of twenty-seven in the endeavour to trace a certain line of communication. Everyone must regret his early death; but we really cannot see our way to closing up a path of discovery in any part of the world, merely because we have it on record that some particular persons failed to trace it, or surmount its obstacles. We have no hesitation in saying that if the present volume is in existence a generation hence it will be quoted merely as one of those incentives which have ever contributed to excite the higher spirits of mankind to achieve what has been dreamed of by the ambitious, and reflected on by the thoughtful, without success in their own time. The route that M. De Carné traversed, or went in search of, will be discovered as surely as the world goes round. And no one will then deny the credit of the conception which he endeavoured to carry out. No one will then refuse Louis de Carné the talent to perceive the truth, which he has expressed in the last pages of his book, that "the remedy for the evil which oppresses France may be summed up in two plain words—emigration and colonisation." But it is not by discouraging worthy followers in the path of De Carné that such a remedy is to be brought about; and we believe that fifty books like the one before us would not have the effect of preventing the trade of Saigon from finding its own way. The volume is very readable, and pleasingly illustrated with a map and some views.

A daily contemporary, which is generally known to be "nothing if not sensational," has made short work of Cochin China in a paragraph which we reproduce below. But, while we are quite willing to admit that there is no better authority for whatever takes place between Fleet-street and the Guildhall it scarcely carries equal weight on Eastern subjects, and we must confess that we are not prepared to consider Cochin China as deprived of "half its value," on the evidence of a bookseller's version of the experiences of an explorer who is alleged (after his death) to have failed to discover what he went in search of. It is unnecessary to expose the inconsistencies in the narrative, which are calculated to make our friends in Saigon despair of their beautiful province, if they were not too well assured by the material prosperity it has attained in the last eleven years. Ever since Saigon was acquired by France in 1861 there have been continual evidences of the wonderful resources it contains and of the readiness of the surrounding tribes to assist the French in their development. Even if it should be true that the Mekon (not Mekong as our Fleet-street friend spells it) is an "impassible" river—we presume that here again there is a slight clerical error, and that he means "impassable"—the woods and tracts already made available for commerce are sufficient to build up a settlement of permanent and increasing importance. But we are by no means ready to assume that the Mekon is impassable. We mean no sort of imputation on the memory of M. de Carné, but we cannot put out of mind Dr. Johnson's remark that "for one man to be unable to do a thing is no proof that it cannot be done." At this moment we should have had neither a Livingstone nor a Stanley, if stories, far better authenticated than our contemporary's, could have discouraged resolute men. The following is the paragraph referred to:—

A geographical mystery has been cleared up, and an illusion of commerce dissipated, by the explorations of some French travellers, whose narrative has just been published. M. Louis de Carné started in the summer of 1866 from Saigon, in French Cochin China, to track the great river of Cambodia, the Mekong, to its sources. The hope of the French Colonial-office was that this large stream, unknown like the Salween, the Meinam, and the Tonquin, might offer an available waterroad through Laos and Gunan to the back of China, and give to the Cochin China delta, which is held by France, the commerce of a second Nile or Ganges. This hope has failed; the Mekong, which the Frenchmen traced at the cost of terrible hardships and great sacrifice of brave and valuable life, is an "impassible river," broken at least thrice by furious cataracts, and having a current against which nothing could be navigated. The discovery, purchased at the cost of existence by the leader of the expedition, and by M. de Carné, whose story is posthumously published—takes away half the value of Cochin China. It is our turn to find out whether the great streams which have their embouchure at Bangkok and Moulmein offer any better chance of a backway to the Yang-tse-Kiang.

We have before us the first number of the new Chinese magazine, published by the Society for the Diffusion of Useful Knowledge, which was formed in Peking last November, under the patronage of the various foreign Ministers and residents in the capital of the Chinese Empire. This first number appeared in August. It contains papers by Drs. Bushell and Martin, Revs. J. S. Burdon and J. Edkins, and some native scholars on a variety of subjects calculated to interest and enlighten the Chinese. Its title is appropriate—*The Chino-European Information Record*, which is quite in Oriental style. The aim of the society is exceedingly good, and the time for issuing such a publication opportune. The Chinese are beginning to inquire after European products connected with the arts, machinery, &c., and we therefore wish the Society success in carrying out its benevolent objects. The committee in Peking solicit the co-operation of the friends of China, and desire to enrol new members. They have appointed Professor Summers, of King's College, the honorary secretary for Great Britain. A few copies of the first number are at his disposal for members and subscribers. The magazine is published at six shillings per annum, but is sent free to members.

The China Review, or Notes and Queries on the Far East. China Mail Office, Hong Kong. London: Quaritch, 15, Piccadilly.—It is with peculiar pleasure that we welcome the first number of this very interesting and promising miscellany, which is announced for publication every two months. For the first number the editor, Mr. N. B. Dennys, has collected a variety of striking and original papers; and, if he can maintain the standard at which he has set out, we make no doubt that his magazine will be a valuable contribution to the literature of the Far East. Among the contributors are the Rev. Dr. Eitel, Mr. A. Lister, Mr. E. C. Bowra, Mr. H. E. Wodehouse, Mr. T. Watters, the Rev. J. Chalmers, and others. Perhaps, however, the most novel and amusing of the contents is the translation of "The Adventures of a Chinese Giant," by a Gentleman, who will be generally recognised under the initials, "H. S."

Ocean Highways. By Clements Markham, Esq. George Philip and Son.—The November number of this magazine—which, by the is marvellously cheap at sixpence—contains some of the most interesting papers we have ever seen. We know of no publication bringing so nicely to one's notice all that pertains to geography and travel, and science generally. Amongst the contents for this month is, of course, a paper on the "San Juan Question," with a map, which illustrates the position of the vexed little island and its bearings. There is also a capital *exposé* of the Livingstone dispute, with which we heartily sympathise.

The Coffee Planter's Manual. By ALEX. BROWN. London: Haddon and Co.—This is a *brochure* which cannot fail to be of interest to all connected with the trade of Ceylon, and of great value to any who may be about to embark in coffee planting operations, as it contains a complete description of the whole proceedings of the coffee planter, from the preliminary clearing of the jungle to the realisation of the first crop. The information supplied is thoroughly practical, and is evidently the result of much experience of the subject treated on.

The *Edinburgh Review* contains an excellent article on the Korea, giving a description of that country, including its religion, productions, and government. Korea is now the most interesting spot in the Far East, as having defeated both the Americans and French in attempts to force an opening. These engagements are of course detailed. Our own, as well as Russian, negotiations for treating with the country have also failed. The writer gives the invasion of the country by the Japanese in 1592, the introduction and expulsion of the Jesuits. The reports of our Consuls in China, bearing on the country, as also of travellers, have been carefully studied and extracted. Articles in our own paper are also quoted, and the author has succeeded in furnishing the most comprehensive and exhaustive account of the Korea, which will be highly interesting to all who take an interest in the Far East. The writer concludes the article as follows:—

It is eminently desirable that Western prestige, seriously diminished by these two abortive expeditions, should be redressed in countries where prestige is but another name for the shadow of force in the background, which alone keeps life and property safe, and secures without perpetually recurring warfare the enjoyment of commercial rights. Equally necessary is it that some security be obtained for the proper treatment of shipwrecked mariners who, with the increasing growth of commerce in these Eastern seas, must from time to time be cast upon the shores of Korea; whilst commerce itself looks to this necessary undertaking as the step which shall facilitate its introduction to supply the wants and develop the resources of the only remaining country whence it is now rigidly shut out. Accident, or the lapse of time alone, may possibly be trusted to as the means of overcoming that politic antipathy to intercourse with the outer world which is fostered by the despotic statecraft of Korea; or on some favourable opportunity the longings manifested by Russia for the possession of this territory may be indulged to gratification; but on the other hand, those who are interested in watching the legitimate development of European commerce and Navigation in Eastern Asia, as well as the numerous class who view the subject in a simply philanthropic light, will continue to cherish an earnest hope that well-considered measures may ere long be adopted, to bring the Korean people, under adequate safeguards for their protection against violence and oppression, into beneficial relations with the remainder of mankind. The undertaking is one in which all maritime nations have an identical interest, and one which should be jointly prosecuted to a successful end.

The following letter having reference to the history of Korea has been addressed to *The Times* by Mr. Beal, F.R.A.S.:—

In the current number of the *Edinburgh Review* there is an article on "Korea," in which I find it stated (p. 300) that "with the exception of some scanty notices collected by the earlier Jesuit missionaries in China, and by writers such as Kœmpfer and Siebold in Japan, no pub-

Digitized by Google

lished accounts of the geography or constitution of the Korean kingdom are in existence." I have met with similar statements elsewhere. I should be obliged, therefore, if you will permit me to call attention through your columns to a work written by a Japanese author, Rinsifee, in 1786, called *San Kokf Tsou Ran To Sets*, or "A History of the Three Kingdoms," viz., Korea, Yezo, and Loo-choo. This work has been translated into French by Klaproth, and is to be found among the publications of the Oriental Translation Fund. In 1856, after visiting Korea, I found Rinsifee's book of great use in drawing up a paper on the subject, which I read before the Hong Kong branch of the Royal Asiatic Society.

Fraser's Magazine contains an article on the "Panthays of Yunnan," to which the initials of W. F. M. are appended; these we take to be Mr. Mayers', the Chinese Secretary of Legation at Peking, at present in England. The paper is most acceptable, and dispels much of the ignorance existing in reference to these peculiar people. The writer describes the mission of Major Sladen in 1868, when he ascended the river Irawaddy to Bhamo, and thence by land to Momein, where he found the Panthay commander of the troops, who treated him with every civility. The late mission to London of the Panthay Envoy, it seems, grew out of Major Sladen's visit. The writer concludes this very interesting article as follows:—

As a Mahommedan movement, it must be looked upon as entirely distinct from those insurrectionary outbreaks which have within the last score of years deprived the Chinese Government of its outlying dependencies in Turkestan and Ili, and have carried devastation far into the heart of the North-Western Provinces of the Empire. The vast and almost trackless distances which intervene between Yunnan and the territories now ruled over by the Atalik Ghazi of Kashgar, prevent, in all probability, any mutual knowledge of each other's existence on the part of that warlike and fanatical ruler of the so-called Sultan Suleiman in Yunnan; whilst although communications are interchanged between the Mahommedans of Yunnan and their co-religionists now in rebellion against China in the mountain fastnesses of Kansuh, no effective co-operation is possible between bodies so widely separated. The utmost that either of these Mahommedan communities can do for the other is to divide the forces of their antagonists; and it is the devotion for a series of years past of the chief efforts of the Chinese Government towards the suppression of the rebellion in the north-west that has enabled the Panthays to maintain a successful contest against the ill-paid and inefficient bodies of troops who are periodically represented in the *Peking Gazette* as waging an active warfare for the recovery of the lost territory.

The September number of the *Phœnix* contains some interesting papers, notably amongst them one by Mr. Mayers, on "Bibliographical Notes on Chinese Books." "Practical Lessons on Japanese," by the editor, is continued in this number.

The November number of *Art* contains some most charming specimens of the Heliotype process, each one worth a frame, and to be had for a shilling.

MISCELLANEOUS.

THE VOYAGE OF THE GRAND DUKE ALEXIS.

A correspondent sends us an account of the voyage of the Grand Duke Alexis of Russia, and after recording the incidents of the passages from the Cape to Batavia, and noticing a visit paid to the Governor-General of the Dutch Colony goes on to say:—

The *Svetland* is to leave for Singapore, but the *Bogatir* has another destination. She is bound for New Guinea, and, as the expedition of the corvette is connected with a scientific journey undertaken by a Russian naturalist under peculiar circumstances, it may not be uninteresting to say a few words about it. Some time ago a gentleman of the name of Miklouha Maclai expressed a strong desire to explore New Guinea, and as his researches were likely to be advantageous to science every facility to enable him to carry out his views was afforded both by the Russian Geographical Society and by the Imperial Government. It is now nearly a year since the *Vitas* corvette, which belongs to the Pacific squadron, under Admiral Fedoroffsky, touched at the Bay of Astrolabe, on the north-east coast of New Guinea, with the enthusiastic young naturalist on board. At first the natives were so shy that there was great difficulty in communicating with them; but they had an evident desire to conciliate their visitors, as they deposited a heap of presents on the ground, which they made signs to the Russians to come and take, though they had not the courage to await the approach of the dreaded strangers. After a time, however, they reappeared, and willingly took possession of the gifts the Russians had left in exchange. The next morning they summoned courage to return to the corvette, bringing friends with them, and by a judicious distribution of presents the apprehensions of the natives were gradually allayed. While the officers of the *Vitas* were endeavouring to conciliate the natives the crew cleared a plot of ground, which they surrounded with a palisade; the carpenters built a house for the new settler, and the artillery officer planted some mines for his defence, which he could fire without leaving his house. When everything was ready he was very comfortably established. He had a good supply of fuel, plenty of provisions and stores, and the captain left him one of the ship's boats, with a complete set of rigging. So, bidding him farewell, the *Vitas* left him to his fate, and now the *Bogatir* is going to look after him. The account of the adventures of this bold naturalist will undoubtedly prove extremely interesting. Let us hope he has been able to hold his own. Whatever may be his fate, he has shown a great deal of courage, and will undoubtedly make himself a name, if anybody can be found to pronounce it.

CHINESE GAMBLING.

A correspondent of *The Times*, writing from Hong Kong, forwards some interesting information with reference to the prevalence of gambling amongst the Chinese. He states that in Hong Kong the gambling farmers paid a fee to Government of $216,000 per annum for their licence. Let us for a moment discard the 7 per cent. which the bank claimed from all winners, and suppose that they cleared 12 per cent. by their transaction, which would be but an ordinary return under such circumstances. It follows that they won $237,600 per annum, and because winnings are paid trebly, it will be seen that the bank always gains on the average one-half of what is played. The sum of $475,200, or £105,600, was the sum actually staked, and yet hardly a man ever played that was not dressed in rags. Now, let us suppose that on the average each man who entered a house played 25c., then we find that 1,900,800 visits were made each year. No play being permitted on Sundays, an average of 6,072 visits per day is the result, or 506 in each room 15ft. square, and of these many remained half the day.

In another part of the letter the correspondent says:—At the time of which I write—viz., the spring of 1872, when the long wished-for news of the result of the Wai-sing lottery reached Canton by the telegraph to Hong Kong—the Chinese most stoutly refused to believe it, as they possessed reliable information of the date of the examinatio, and knew how long, by their own means, the news would be in travelling. Not only would they not believe that the telegraph could transmit a message in so short a space of time, but they were at a loss to know how the tones of the different Chinese names, upon which all the distinction depends, had been carried along, and they naturally concluded that the message was the fabrication of some one largely interested in the lottery. After the receipt of the telegram, and before the confirmation of the news by their own methods of communication, the winners of the highest prizes were quite willing to dispose of their tickets at a slight profit utterly incommensurate with the value of their legitimate prize. When the telegraphic report was afterwards confirmed by the *Peking Gazette*, the wonder of the Cantonese knew no bounds; their eagerness to learn something of the telegraph was proportionately increased, and their appreciation of foreign science, although certainly advanced, was not unmixed with the dread of spiritual influence for evil haunting them for ever afterwards.

DINNER TO SIR BARTLE FRERE.

On Friday last the Council and Fellows of the Royal Geographical Society entertained their Vice-President, Sir H. Bartle Frere, and his suite, at a farewell banquet, on his departure for Zanzibar. Major-General Sir H. Rawlinson, President of the Society, occupied the chair. Among the company, which numbered some 250 in all, were Viscomte Duprat, Count Strzlecki, Captain Sherard Osborn, R.N., Sir Rutherford Alcock, Admiral Collinson, Sir Donald M'Leod, Sir F. Buxton, Mr. J. W. Crawford, M.P., Sir E. Perry, Sir F. Arthur, Sir A. Kemball, Sir F. Arrow, Sir C. Nicholson, the Hon. G. C. Brodrick, Mr. H. W. Peak, M.P., Admiral Sir W. H. Hall, Mr. Kennaway, M.P., Sir H. Verney, Sir T. Fremantle, Sir H. Holland, Lord A. Russell, Lord A. Churchill, Sir Cecil Beadon, Sir J. W. Kaye, Sir L. Mallet, Colonel Stewart, Sir Frederick Goldsmith, Sir Vincent Eyre, Sir J. Hay, M.P., General F. Cotton, Sir H. Anderson, Sir H. F. Greene, Mr. H. Rassam, Mr. R. R. Murchison, Mr. Clements R. Markham, C.B., Dr. Mouatt, and others.

THE QUEEN OF HOLLAND.—On Friday her Majesty the Queen of the Netherlands and suite arrived at Frampton Court, near Dorchester, the residence of Mr. H. B. Sheridan, as his guest for a few days, they having started the same day from the Duke of Bedford's residence, Woburn Abbey. Her Majesty's suite consisted of the Countess Stierim, Lady in Waiting, Count de Bylandt, Minister of Holland, and M. Gevaerts, Grand Marshal; while those who accompanied her Majesty consisted of the Duke of Somerset, Mr. and Mrs. Motley, and Miss Motley. On Saturday the distinguished party arrived at Weymouth by a special train on the Great Western Railway. In addition to the above-named, Her Majesty was accompanied by Mr. R. B. Sheridan, Lord and Lady Poltimore, Mrs. Thomas Poynton Ives, and Mr. and Mrs. Algernon Sheridan. A carriage, drawn by four handsome greys, and two outriders, were in readiness to meet Her Majesty, and the Royal party at once drove to Portland. On arrival at the Royal Victoria Pier, a steam launch and boats belonging to Her Majesty's training ship *Boscawen* were in waiting for the distinguished visitors, and by these they were taken to the ship, where Captain Hare was introduced to the Queen and suite. A splendid luncheon was provided for the guests in the ward-room. About half-past three the yards were manned, and Her Majesty took her departure from the ship, making the trip to Weymouth across the bay in one of the ship's boats, Captain Hare being in command. The party left Weymouth shortly after their arrival by a special train for Frampton Court.

THE EMPEROR'S MARRIAGE.—In an article on the marriage of the Emperor of China, the *Pall Mall Gazette* mentions some curious facts. For example, it is stated that the number of wives and concubines is so arranged as to form a series in geometric l progression, with 3 as its common ratio. Thus, by law—for the "Rituals" have the force of law—the Emperor is compelled to take unto himself, besides the Empress, three ladies as *petites femmes* of the first degree—three have already been selected for his Imperial Majesty—nine of the second degree, twenty-seven of the third degree, and nine times nine concubines. With equal precision the various duties of these ladies are minutely laid down, and not much more latitude as to the choice of his companions appears to be allowed to the Emperor after his marriage than in the original selection of the members of his household.

THE dinner in celebration of the opening of telegraphic communication with Australia is fixed for Friday, the 15th inst., at the Cannon-street Hotel. The Earl of Kimberley will take the chair, and will be supported by a number of noblemen and gentlemen interested in the Colonies.

LONDON: MONDAY, NOV. 11, 1872.

THE MARRIAGE OF THE EMPEROR OF CHINA.

THE announcement of the marriage of the Emperor of CHINA will be received with satisfaction by all interested our political relations with that country. It is the preliminary step to the event upon which so much depends—the assumption of power by his Imperial MAJESTY, and thus a more than usual interest attaches to it. The telegram which announces the fact briefly states that "the Emperor "of CHINA was married at Peking on the 16th October. There "was no public ceremony outside the palace beyond the pro-"cession to bring the bride thither, and the whole affair passed "off very quietly." We could have wished that REUTER'S agent at Shanghai had exercised a little more liberality on this occasion, and had given us some further particulars on the subject of so important an event. The peculiar position occupied by women in China and the lofty rank of the bridegroom would render the celebration of anything like a public marriage ceremony out of the question, and the nature of the alliance purely a *marriage de convenance* removes it from the sphere of all sympathetic interest. Little or nothing is known of the young EMPRESS. It is to be presumed that she is beautiful, but only by experience shall we find out the bent of her tastes and her political leanings. These will be carefully watched, for though theoretically women in China are but the playthings of their lords, yet practically clever women there acquire the same influence which is enjoyed by their intellectual sisters all over the world, and the History of China supplies not a few instances in which the destinies of the country, whether for good or evil, have been swayed by the ladies of the Palace. Indeed we need not go further back than the period succeeding the death of the late EMPEROR, when the support given to Prince KUNG by the widowed EMPRESS saved the country from anarchy and bloodshed, to find an example of the immense power which is sometimes acquired by Imperial consorts in the management of the affairs of State.

No one who remembers the career and early death of the late EMPEROR can look forward to the future in store for his youthful successor without feelings of misgiving and pity. At the boyish age of seventeen he is released from all restraint, and is suddenly surrounded with every temptation to indulge in a life of ignoble idleness and of sensual indulgence. Report speaks of him as being a lad of a wilful disposition and of childish tastes, and as such likely to fall a ready victim to the allurements of his harem and its concomitant excesses. The choice of political advisers, upon which so much always depends in Oriental countries, becomes therefore an affair of even more than ordinary importance in his case. On it may be said without exaggeration to depend the stability of his throne and the future of his country. A telegram published a few days since informs us that "Im-"perial edicts have been issued at Peking which imply "that the EMPEROR will assume power in February "next." Within the next three months, therefore, he will have to decide whether he will call about him those who by frankly holding out the hand of friendship to foreigners will enrich his Empire, elevate his countrymen, and establish his throne on a broad and enduring basis, or whether he will throw in his lot with those bitterest enemies to his country's weal, the anti-foreign party, of which LI HUNG-CHANG is the leader. We shall not be kept long in suspense as to the political proclivities of the young EMPEROR. The "Audience Question," which is now ripe for discussion, will prove an unerring touchstone of the course he intends to pursue. That once granted, other concessions would naturally follow, foreigners would be officially placed on a level with the natives, and the time would not be far distant when they would enjoy the privileges possessed in almost every other nation in the world by subjects of other Powers. That refused, war cannot be very long delayed, and again would the unhappy country have to pass through a short period of vain struggling, internal disorder, and financial difficulties, only to find herself at the end once more at the mercy of the Treaty Powers.

The anxiety with which the course of events in China during the next few weeks will be watched is considerably enhanced by the unfriendly tone which has in many instances been lately assumed by the Mandarins towards foreigners. It is impossible to shut one's eyes to the fact, that the warlike preparations which have for some months been in progress in the neighbourhood of Tientsin and the capital, have assumed threatening proportions, and the belief is very general among those qualified to form an opinion in China that rather than give way on the Audience Question to the full extent, the ruling Powers will risk the consequences of another war with the European Powers. This attitude renders it imperative that the Foreign Ministers in insisting on the right of audience with the EMPEROR should set their faces stedfastly against the adoption of any half-and-half measures. We have patiently submitted to be defrauded of our Treaty rights long enough. We have allowed weight to every shifty excuse which the Government has found it convenient to make to delay yielding to us those privileges to which we are reasonably entitled. And what have we gained by it? Nothing but well-merited contempt and aversion. Even in the Metropolitan province it is at the present moment with difficulty that the Consular authorities are able to maintain friendly relations with the native officials. It is time that such a state of things should cease to be, and that our position in China should once and for all, be placed upon a basis sufficiently firm to enable us to defy the machinations of warlike Viceroys and obstructive underlings.

THE REPORTS ON THE CONSULAR SERVICE.

THE Memorandum by Sir RUTHERFORD ALCOCK on the Consular Service in China, which we reprint in its turn, is in striking contrast by its businesslike, and at the same time elevated tone, with the rhetorical, rambling, and inaccurate statement presented by Major CROSSMAN. It is satisfactory to find that H.M.'s late Plenipotentiary should dwell so strongly as he has done upon the importance of maintaining the Consular Service in a position, as regards emoluments and prospective distinctions, such as shall continue to hold out inducements for efficient officers to make it the career of their lifetime; and we see no reason to dissent from any of the moderate proposals which have been made by Sir R. ALCOCK in the interest of the service generally. It is characteristic of the Government under which the country is at present suffering that, as is stated in the Memorandum, not one of the recommendations which involve any increase of cost has been sanctioned; and to the predominance of a huckstering—yet in reality thriftless—policy at headquarters may doubtless be attributed the tone of Major CROSSMAN'S singular Report. We will not venture to suppose that it expresses the writer's sober opinion; nor is it easy to understand on what grounds an officer of Royal Engineers should be called upon to report on subjects so remote from his own province. Major CROSSMAN was employed, as we believe, between the years 1866 and 1869 in preparing plans and contracts for the Consular buildings in China and Japan; and in the course of his professional undertakings he doubtless visited most of the ports and came in contact with the majority of H.M.'s Consuls; but these last-named gentlemen will probably be much astonished when they find that in entertaining Major CROSSMAN under their hospitable roofs they were harbouring a critic prepared

Digitized by Google

to advocate the reduction of all salaries but his own, and to suggest impracticable changes in a Service, his knowledge of which could not be otherwise than superficial. Taking all economy as his province, he has not hesitated to give an oracular opinion upon the proper method of garrisoning Hong Kong, and we are not inclined to dispute the probability of a saving being practicable in that direction; but the CROSSMAN method of simplifying our Chinese affairs by superadding the cares of Colonial government to the diplomatic duties of the Minister at Peking is scarcely worthy of serious comment.

It would be easy to show that the cost of such a plan as Major CROSSMAN favours, with its inevitable duplicate Minister at Peking and Lieutenant Governor at Hong Kong, must be as great, if not greater, than the existing system; and it is characteristic of the gallant economist's method of theorising that his views are advanced, as he is obliged to admit, without "knowing the cost of the present establish-" ment at Hong Kong, and not having seen the Consular " estimates for the ensuing year." One of the first results of any such amalgamation as that proposed by Major CROSSMAN would be, we have little doubt, a serious difficulty in reconciling the pittances now paid to Consular officers of many years' standing with the large salaries enjoyed by Colonial officials of corresponding rank in Hong Kong. It has always appeared to us a striking proof of the inadequacy of the pay of the Consular Service that, under the Colonial Government of Hong Kong, Civil servants corresponding in rank and functions with the Consular assistants and interpreters receive salaries greatly in excess of, and in some cases double, the amounts allotted to the latter. The junior members of the Consular service have, until within the last few years, been able to console themselves with the prospect of rising in the course of time to moderately well-paid posts and independent positions; but these hopes are now materially curtailed by reductions already decreed and by counsels such as are urged in the same direction by men of the time like Major CROSSMAN. We can only hope, in the interest of an efficient Consular service, indispensable for the protection and furtherance of our commercial interests, that the counsels of Sir RUTHERFORD ALCOCK may be followed rather than those of the ill-informed and self-constituted adviser of the Treasury. Our interest in the question is that of the main bulk of our supporters, the mercantile community connected with China; and they, we feel convinced, would be the first to protest, if consulted, against the pecuniary reductions which might enable the Foreign-office to show a saving of a few hundreds in its annual estimate, but which could not be carried into effect without lowering the tone, checking the energies, and seriously diminishing the efficiency of a most useful service.

JAPAN AND KOREA.

Now that the Japanese have learned civilisation, and entered the comity of nations, of course they must fight. This is, undoubtedly, one of the strongest features of the Anglo-Saxon. A story, of recent occurrence, is told of a young Siamese, who had been sent over to this country to be educated, and on leaving our shores to return to his native country, took with him some fine specimens of bulldogs and fighting cocks, stating that he had found these things to be some of the most cherished emblems of civilisation amongst the students at college, and, moreover, that they were utilised as good accessories in replenishing their purses, and that he had himself found it so, having won in bets on these animals a considerable sum. According to the last news from Japan, *via* San Francisco, it seems that the feud between the Koreans and the Japanese is growing, and there is little doubt but that our American cousins have fanned the flame, and promised the Japanese their support in attacking the stubborn Koreans, who so lately defeated them in an attempt to obtain satisfaction for the murder of the crew of the American schooner *General Sherman*. It really looks as if Japan will be the instrument for bringing about the opening of Korea, and as Great Britain has had her share of "opening up," we trust Japan, backed by the stars and stripes, will accomplish it. That the Koreans can much longer estrange themselves from the influences of the West is not likely. The sooner Japan moves on the better.

THE last two numbers of the *London and China Telegraph* have chronicled the case of Mr. COUSENS. The arrest of this gentleman is altogether one of the most extraordinary events on record in the Consular annals of either China or Japan. Mr. WILKINSON, acting Vice-Consul at Osaka, has certainly shown more pluck than discretion, and has made a most unwarrantable use of his position. The decision of Mr. Consul GOWER, who tried the case, was equally egregious, and showed very distinct animus, which is the most damaging feature in a judicial functionary. To order Mr. COUSENS to be imprisoned was a gross abuse of Consular power. We trust that the Foreign Office will have the whole case laid before them, and that we shall in due time have their view of the same. Mr. WILKINSON has also to account for the imprisonment in a Japanese jail in Osaka, of a British subject named NOBLE, who, it is stated, died in the jail in consequence of the unfitness of the place to confine any European in.

THE Great Northern Telegraph Company announce that the Siberian land lines, which have been interrupted for some months, having been re-established, the Company's line to China and Japan is again in perfect order, and that messages for those countries are accepted at all postal stations, at the uniform rate of £4 6s. for twenty words. A few messages from Yokohama were received by this line from the 1st to the 4th inst., indicating that the land line from that place to Nagasaki had been completed. Since the 4th, however, no messages have come in, and it is feared that the line has been interrupted. In alluding to the despatch of the *H. C. Orsted* last week we should have stated that the cable taken out by that vessel is to connect the port of Amoy only. The *H. C. Orsted* had to put into Portsmouth through stress of weather, but she sailed again on Thursday.

HIS Excellency Admiral DUPRÉ, the Governor and Commander-in-Chief of Saigon and the French possessions in Cochin China, left by the last mail. Several Japanese are returning, amongst whom is Mr. KOBUYASHI, a student of some note, who has been for some time in England studying the constitution of our Government. Mr. JOHNSTON, Secretary to the Shanghai Municipal Council, also returns by the same mail. We believe that Mr. JOHNSTON has taken much pains to inform himself of the working of the Municipal administration of most of the cities at home, and on the Continent.

IN the report of the speech of Sir RUTHERFORD ALCOCK, at the dinner given by the Geographical Society to Sir BARTLE FRERE, he is stated to have made allusion to the efforts of Portugal in putting down the slave trade. Our ex-Minister, we fear, has not kept himself posted up lately, or he would have known that the Macao coolie trade fostered by Portugal has led to atrocities quite equal to the African slave trade. The efforts of Portugal are more honoured in the breach than in the observance.

A TELEGRAM has arrived from Shanghai, stating that the Municipal Council, acting under the authority of a special meeting of ratepayers, has offered forty thousand taels for the property and so-called rights of the Soochow Creek Bridge Company. A diversity of opinion exists among the shareholders in England as to whether the offer should be accepted or not.

WE have much pleasure in announcing that Admiral the Hon. Sir HENRY KEPPEL has hoisted his flag as Commander in-Chief at Devonport. Our readers who have had the pleasure of knowing him, will join us in congratulating the gallant Admiral on this mark of distinction.

MR. YASHIMA, who has been studying Political Economy, has gone to Frankfort to assist in the despatch of the bank-notes now under manufacture there, and to adopt some effectual means to prevent their being counterfeited.

THE appointment of Mr. JAMES WHITTALL as a member of the Hong Kong Legislative Council is officially announced in the *London Gazette*. The QUEEN has signified her approval of the appointment of Mr. J. S. GOWER as Italian Consul at Hong Kong.

DIPLOMATIC AND CONSULAR COMMITTEE.

[Statement by Sir RUTHERFORD ALCOCK, K.C.B.]

We have at the present moment under treaties with China right of access to twenty ports, or including a port in the Island of Hainam—where I believe it has been recently determined, at the request of the merchants, to place a Consular authority—21. Of these, 11 rank as first-class ports, each having its Consul, and two of them, Canton and Shanghai, a Vice-Consul in addition. This 9 (or 10) to be classed as secondary or subsidiary ports. Most of them are outlying ports essential as anchorages to the business and working of the larger places, such as *Whampoa* for *Canton*, the *Pagoda Anchorage* for *Foochow*, *Taku* for *Tientsin*, &c.

In every one of these ports, principal or subsidiary, where British subjects and shipping have access, Her Majesty's Government is bound by treaty stipulations to maintain effective means of control and protection; and of adjudication in cases of difference between Chinese and British subjects. The ex-territorial privileges are subject to this condition; nor is it expedient either in our own interest or that of the Chinese, that we should repudiate the obligation. Any saving in expense would ill compensate the obstructions to trade and constant danger of complications, which would certainly follow the withdrawal of our Consular establishments from any ports frequented by merchants and ships. Other countries may, and do, in fact, avoid the burden of paid establishments, but many have no trade to risk; and the few that have anything to lose are enabled to dispense with salaried Consuls, chiefly by reason of the position maintained by Great Britain in the China Seas, and at every Treaty port.

The actual cost of the Consular establishment is not easily distinguished in the Civil Service estimates. For the current year 1872-73, apart from that which forms no legitimate part of the Consular expenditure—that is, excluding the expenses of the legation at Peking, of prisons and the Supreme Court, of allowances to chapels and chaplains, and relief to distressed British subjects—it amounts in round numbers to £51,461. Of this £31,900 is paid in salaries to the officers, and £19,561 for expenses. This gives the total cost per annum of the existing establishments, including 12 students, maintained for the Consular service, and as its feeders, at Peking. Deducting these last, it consists of 48 working members of all ranks.

Of this total of 48 and 12, equal to 60, the only permanent reduction which I conceive can be made without impairing efficiency is in the number of students. At this advanced period, I think, the whole service in China having now been nearly supplied with Chinese speaking juniors, a permanent training school of *six students* will supply the necessary demands to fill up the vacancies as they occur, and meet the waste of strength and life.

The number of interpreters may also, I think, be reduced from 10 to 6. But inasmuch as I should propose 9 instead of 6 Vice-Consuls, as now maintained, there would only be an effective reduction of 1, the other 3 passing into the ranks of Vice-Consuls. So in like manner, out of the 12 students, 3 would be required to fill up the ranks of assistants, to the number proposed of 24 instead of the existing scale of 21. This will be seen more clearly perhaps by reference to the annexed tabular Return of the proposed establishment, showing its distribution at each port. I am satisfied, from long experience and observation, that this gives the lowest working strength. That is, if all the ports are to be occupied, there must be *at least* and *always* that number on duty. This only amounts to 38. I venture to insist upon this the more strongly, because it has been suggested that a smaller nnmber might suffice. To keep this number of 38 constantly at their posts and on duty, provision must be made for the necessary reliefs required to supply the place of those absent on leave. Many are compelled to return to Europe from illness without completing their five years; and to all, some change and rest each year is necessary for the preservation of health and strength. The experience of the past twenty years has shown sufficiently conclusively that this waste of power cannot be estimated at less than from one-third to one-fourth of the whole number kept on duty. This brings the establishment up to 50, by the addition of 12 to the number always on duty.

I have not proposed to do away with the class of interpreters, though I would reduce their number, for a very sufficient reason: it is important that this Government should always be able to command the services of men thoroughly qualified to speak, and read and write the Chinese language. The ordinary routine of business at the ports may generally be got through with a lower qualification in the Consul or his officers as regards linguistic proficiency. But from time to time, both at Peking and elsewhere, it is essential that there should be no room for doubt or misapprehension, either as to facts or arguments, in the transaction of business with the Chinese authorities. Such a degree of proficiency as this implies can never be secured, as a rule, without a separate class, who for several years at least shall be able to devote nearly all their time and attention to the language. Their chief occupation must be the use of Chinese written and spoken, by which means alone a high standard will be kept up permanently. Students after two years' training at Peking, who are drafted into the Consulates for active work in the Consular offices, will rarely, if ever, attain more than a fair practical knowledge of the Chinese language either written or spoken; but especially the former, perhaps. For these reasons, and because it would be hard to retain the more promising of the students among the class of interpreters for successive years without adequate advancement, I would propose that the six retained with the title of Interpreter should be of first and second classes; three in each, the first at salaries of £700, and the second at £600, as at present.

The pecuniary result of such a recast of the existing establishment would be a saving of some £940. The Committee, however, is aware that I have strongly urged the expediency of increasing by £50 per annum the salary of all the assistants—first, second, and third class alike. If this were done, instead of a saving there would be an increased cost of some £260, with, as I conceive, a more than corresponding gain in efficiency and character.

This estimate is framed without prejudice to the further recommendations made in my Despatch of the 29th of October, 1869, to Lord Clarendon, and printed in the Blue Book, "China No. 5," of 1870 (at page 10), although none of those which involved any increase of cost were sanctioned by the Treasury; at page 75, it may be seen that his Lordship in great part endorsed my suggestions for the improvement of the service in a letter signed by Mr. Hammond, and addressed to the Secretary of the Treasury, 7th February, 1870. Much to the same effect is a previous Despatch of the 12th March, 1869, printed in the Appendix to the First Report of the Committee.

I hope I may be permitted to suggest, in conclusion, that after all is done that can be attempted compatible with a rigid economy, something more is needed to foster a certain *esprit de corps* and pride in the service, which I believe will be found the most reliable, if not the only effective safeguard against a tendency to deterioration and a lowness of standard which ends in demoralisation. In China, Consular officers are exposed to many temptations by their position, with very limited and often inadequate means, in the midst of wealthy trading communities, all eager to make rapid fortunes, and many succeeding—not always by means which would bear strict scrutiny. In such conditions the facilities are great for making money without the parties interested ostensibly appearing to be in any way engaged in trade. Whether called investments, or by any other name, money may be employed in various ways, and to those who are on the spot, the opportunities are frequent in connection with mercantile houses of obtaining large returns for small ventures in actual cash. It is unnecessary to say that this can never be done by a Consular officer without a loss of independence and serious injury to the service. Of course the interests they are specially appointed to protect must suffer in corresponding degree. Many of my suggestions and recommendations to Her Majesty's Government to make more frequent acknowledgments of faithful and honourable service had special reference to this condition of things, and the necessity of counteracting the influences resulting from it. The evil is not to be remedied even by increased salaries, were it possible for the Treasury to adopt any general measure of this kind. In certain cases such increase is required, and would remove a danger. But the occasional bestowal of a C.B.ship, or honorary title, as has been done in two or three cases within the last twenty-five years, would probably do more to encourage exertion, and to create a higher tone of feeling in regard to the service. Governments have always at their disposal this cheap reward of nations for those who serve them. And all other States fully profit by the knowledge of the efficacy and economic advantages of stimulating zeal and supplementing insufficient pay by giving that which has a high and substantial value to the recipient, though it costs nothing to the donor.

In the same general interest I have recommended greater facilities for weeding the service in China of objectionable elements, either by the removal to less responsible situations elsewhere of individuals failing in the necessary qualifications for good service there, or by inducing their retirement on some small annuity. The latter would cost money, but it would be difficult to calculate how much it would save in credit, character, and efficiency. It has been argued that such individuals would be sufficiently punished by being passed over without promotion; and possibly they might; but it was not the interests of the individuals with which I was concerned, but that of the public, and the prejudice to the service their presence occasioned. Their retention would not relieve the establishment, nor enable the Minister to put in their place more eligible and effective men. Neither would such a course prevent Her Majesty's Government going on year after year paying salaries, five times the amount of a retiring pension, to officials occupying, to the disadvantage of the public and deserving members of the establishment, places which should, in the interest of both, be filled more worthily.

After all, it cannot be forgotten that this Chinese division of the Consular service, the duties of which are performed with great efficiency by some fifty officials, at a cost of little over £50,000 per annum, including all expenses, rent, wages, and contingencies of every kind, of which the Indian Government bears a third—materially aids the development of a commerce which already exceeds £40,000,000, and is yearly increasing in value apart from £10,000,0000 of a distributing trade between the ports and another £8,000,000 of a coasting trade in Chinese produce chiefly; the largest portion of all which is British, giving employment to 7,165 vessels, with a tonnage of 3,332,092 tons. Nor is this trade less important in a fiscal point of view, as yielding to

the British and Indian Governments a revenue of over £9,000,000 while it employs profitably a large number of workmen in Great Britain in the production of £8,000,000 worth of cotton goods annually exported to China, and yields back in Consular fees some £9,000 in diminution of the expenditure chargeable to the State. Compared with these interests the tax paid by Great Britain in the cost of the Consular establishments does not amount to *one per mil* on the gross trade, and not *one-half per cent.* on the revenue it yields. I stated in my evidence, and it will be otherwise, I think, manifest to the Committee, that, although this is no reason why a single pound sterling should be unnecessarily spent, it affords the strongest possible argument for doing all that may be required to maintain the highest efficiency; I therefore cannot help hoping that the Committee, considering the special and, so to speak, isolated character of this service, even taken in conjunction with that of Japan and Siam, and the exceptionally responsible nature of the duties discharged, will not allow a question of increased expenditure within very narrow limits to deter them from making such recommendations for its improvement as may seem to be called for by the evidence received.

[Statement by Mr. W. H. MEDHURST].

There is considerable room for the practice of a wise economy in the wages and other expenses connected with the Consulate Establishment at Shanghai, and this without any prejudice to its working efficiency. The staff of writers and linguists has been reduced to its lowest standard by the reduction last ordered, and, as I have shown in my official reports, these men constitute the most useful and important part of the Consular staff. The only modification possible is that of requiring the mixed courts to sustain the entire expense of the third writers, half of whose salary is now borne on Consulate account. The court, being properly a Chinese institution, should be called on to bear its own expenses. One first-class and one second-class Chinese writer, with one copyist and the two linguists now employed, would suffice for the Consulate work alone.
